APRESENTAÇÃO

Caro aluno,

Em um curso pré-vestibular, eficiência é um quesito imprescindível, já que você será convidado a, em apenas um ano, aprimorar competências e habilidades desenvolvidas ao longo de toda a sua escolarização e consolidar o aprendizado de conteúdos abordados no Ensino Médio.

Levando em conta essa necessidade, a coleção Alfa foi estruturada em dois volumes: o Caderno do Aluno, que traz as atividades que devem ser realizadas em sala de aula, e o Caderno de Estudos, que dá continuidade a seu processo de aprendizagem fornecendo subsídios para um momento de estudo mais autônomo.

É neste Caderno que você encontrará todas as leituras que devem ser realizadas e os exercícios indicados na *Orientação de estudo* no Caderno do Aluno (Tarefa Mínima, Tarefa Complementar e Tarefa Desafio), que devem ser encarados com dedicação.

O Caderno de Estudos é disciplinar, ou seja, nele você encontra uma disciplina por volume, dividida por setores ou unidades temáticas. Durante o ano, você receberá quatro volumes bimestrais de cada disciplina. Essa configuração permite mais autonomia e organização, uma vez que traz teoria e exercícios em um mesmo volume, facilitando o acesso ao conteúdo apresentado pelo professor em sala e aos exercícios associados a cada aula. Além disso, a estrutura facilita a realização de revisão de pontos importantes durante o ano.

Aliando um material de qualidade, a resolução das tarefas propostas e muita força de vontade, você conquistará a tão sonhada vaga!

Bons estudos!

Putting the Brakes on Overeating

By Stephen Ornes

to release(d): liberar;
lançar
to restore(d):
restaurar

- 1 When people eat high-fat foods, the stomach sends a signal to the brain. The brain responds by **releasing** dopamine, a pleasure chemical. But eating too much fat can decrease the dopamine released after eating. As a result, people with this problem are more likely to become obese.

- 5 A team of researchers from Yale University discovered that a fatty diet reduces the body's production of a chemical called *N*-oleoylethanolamine. When the researchers injected this chemical into the guts of mice that had been fed lots of fat, the animals once again received pleasure from eating. And they stopped overeating. Although mice and people are vastly different, the new study suggests the strategy to **restore** the connection is worth investigating for people.

Adaptado de: <www.sciencenewsforstudents.org/article/puttingbrakes-overeating>. Acesso em: 12 maio 2018.

- 1** (Unicamp-SP) Segundo o texto,

- a) alimentos com alto teor de gordura, quando ingeridos em demasia, fazem com que o nível de dopamina no organismo diminua, favorecendo a obesidade.
- b) o composto químico *N*-oleoiletanolamina, quando injetado em pessoas que consomem muitos alimentos ricos em gordura, reduz o risco de obesidade.
- c) a ingestão de alimentos com elevados índices de gordura provoca uma sensação de saciedade nos indivíduos, dificultando o surgimento da obesidade.
- d) o ato de injetar, em seres humanos, *N*-oleoiletanolamina, uma substância química encontrada nas vísceras de ratos, impede o desenvolvimento da obesidade.

- 2 In the sentence "As a result, people with this problem are more likely to become obese." (ℓ. 3), **likely to** could be replaced, with no change in meaning, by:

a) fond of.
b) uncertain to.
c) on the brink of.
d) prone to.

- 3 We can replace **As a result**, in "As a result, people with this problem are more likely to become obese." (ℓ. 3) by:

a) Hence.
b) However.
c) Nonetheless.
d) In addition.

- 4 In the fragment "Although mice and people are vastly different..." (ℓ. 7), **Although** brings the idea of:

a) addition.
b) contrast.
c) conclusion.
d) consequence.

Texto para as questões 5 e 6

- 1 Before an examination of some of the most effective ways for nurses to help patients nearing the end of their lives, it is important to first take a look at what constitutes a terminal illness. According to Marie Curie, a charity based in the United Kingdom, terminal illness is understood as a condition **wherein** curative treatment no longer works and death is more than likely. However, under that umbrella term are significant variations. For example, a terminally ill patient may have advanced cancer and a life expectancy of mere weeks, while other patients may be living with a terminal illness for years before they reach the end of their lives.

Available at: <<https://onlinedegrees.bradley.edu/>>.
Accessed on: April 19th 2018.

wherein: em que

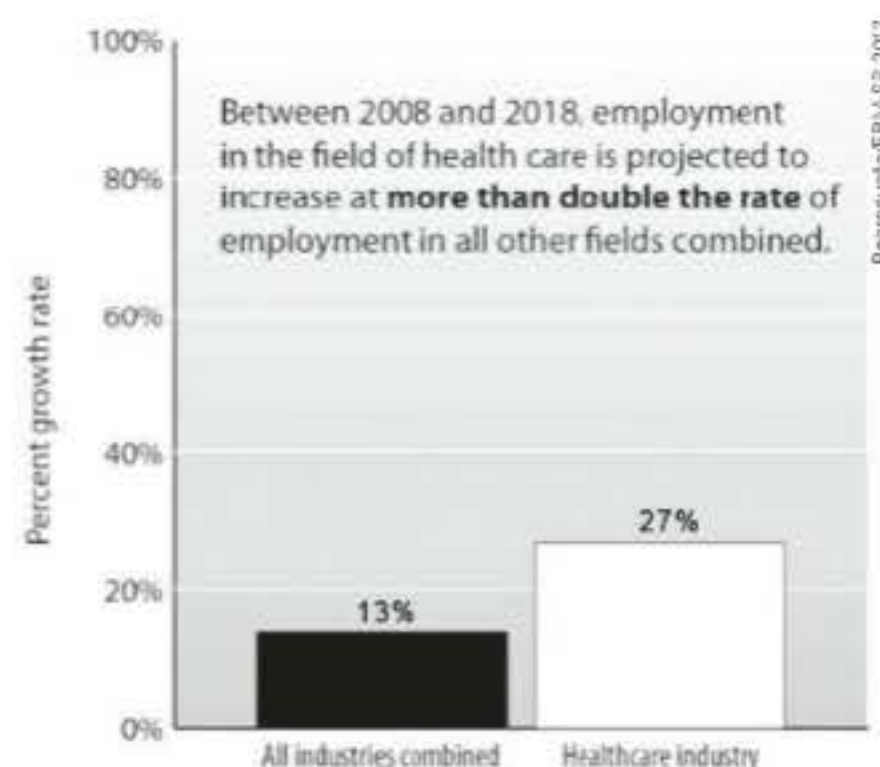

- 5 (Faseh-Medicina-MG) Having a terminal illness means:
- a) a patient's condition where no medication works anymore.
b) the expectancy of life never surpassing two or three weeks.
c) that a person with advanced cancer will not last many days.
d) the life expectancy can be measured to an exact time.

- 6 Between the two sentences in this fragment from the text, "For example, a terminally ill patient may have advanced cancer and a life expectancy of mere weeks, while other patients may be living with a terminal illness for years before they reach the end of their lives." (ℓ. 8-11), there is an idea of:

a) consequence.
b) addition.
c) contrast.
d) conclusion.

Where are the jobs? Healthcare, that's where.

(Adaptado de <http://aapci.org/blogs/?p=3923>.
Acessado em 25/07/2013.)

- 7 (Unicamp-SP) A projeção feita no infográfico é de que, entre 2008 e 2018,
- a) a oferta de empregos em indústrias de medicamentos será duas vezes maior que a oferta de empregos em todas as demais indústrias juntas.
b) a taxa de crescimento de empregos na área de assistência à saúde aumentará duas vezes mais do que as taxas de crescimento de empregos em todas as outras áreas juntas.
c) a oferta de empregos em indústrias de equipamentos médicos crescerá mais do que o dobro da oferta de empregos em todas as demais indústrias juntas.
d) a taxa de crescimento de empregos na área de assistência à saúde aumentará mais do que o dobro da taxa de crescimento de empregos em todas as demais áreas juntas.

"I can't examine you, but your health insurance does allow you access to a self-diagnosing website."

8 (EBMSP) Nesse cartum, o médico:

- a) constata que o plano de saúde do paciente está vencido.
- b) não pode examinar o paciente, pois ele não tem plano de saúde.
- c) sugere ao paciente o uso da Internet para diagnosticar sua doença.
- d) é contra o procedimento de automedicação através de consultas na rede.
- e) diz que só poderá receitar a medicação para o paciente após o exame clínico.

9 The fragment "... your health insurance does allow..." could be rewritten as all the following, **EXCEPT**:

- a) I'm sure your health insurance allows
- b) your health insurance really allows
- c) indeed, your health insurance allows
- d) your health insurance actually allows
- e) I don't know whether your health insurance allows

1 Precision medicine, sometimes called personalized medicine, is an approach for protecting health and treating disease that takes into account a person's genes, behavior, and environment. Interventions are tailored to individuals or groups, rather than using a one-size-fits-all approach in which everyone receives the same care. But what does this mean and how can precision medicine protect your health?

10 You might have heard the term "precision medicine" and wondered how it relates to you. Precision medicine is about finding your unique disease risks and treatments that will work best for you. Here are some ways that a precision medicine approach can protect your health:

- Using Family Health History
- 15 ■ Screening for Diseases Before You Get Sick
- Tailoring Prevention

Available at: <www.cdc.gov> Accessed on: August 28th, 2018 (Adapted).

10 (Fame-MG) The best title for this text is:

- a) "Is conventional approach really effective to improve your health?"
- b) "What does precision medicine mean for your health?"
- c) "Which are some effective treatments tailored for unique diseases?"
- d) "Why are today's patients choosing personalized medicine?"

11 (Fame-MG) Read the sentence from the text: "*Interventions are tailored to individuals or groups, rather than using a one-size-fits-all approach.*" The definition of the expression "*one-size-fits-all*", in this context, is:

- a) characterized by the treatment of the whole person.
- b) concerned with the actual doing rather than with theory.
- c) having sound judgment; fair and sensible.
- d) suitable for or used in all circumstances.

12 (Fame-MG) The word "*screening*" in the topic: "*Screening for Diseases Before You Get Sick*" is closest in meaning to:

- a) assessing.
- b) disguising.
- c) selecting.
- d) protecting.

13 In the sentence "*You might have heard the term 'precision medicine' and wondered how it relates to you.*" (l. 9-10), **might** brings the idea of:

- a) omission.
- b) capability.
- c) duty.
- d) possibility.

14 In the fragment "... *rather than using a one-size-fits-all approach...*" (l. 5), **rather than** could be replaced, with no change in meaning, by:

- a) despite.
- b) instead of.
- c) although.
- d) in spite of.

"More and more patients are going to the Internet for medical advice. To keep my practice going, I changed my name to Dr. Google."

- 15** (Fame-MG) What can be inferred about the humor of this cartoon?
- Getting information on the Internet could be more reliable than getting professional advice.
 - Many patients nowadays resort to Google to get information about their health issues.
 - Many doctors are struggling to make clinical diagnosis because their patients are relying on technology.
 - Researching on Google would allow doctors to determine the nature of a disease more accurately.
- 16** Choose the alternative that presents the same construction as in "*More and more patients are going to the Internet...*":
- We'd better go home now. It's getting **colder and colder**.
 - The taller** Paul is, **the better**.
 - That is **the most expensive** car I've ever seen.
 - The exercises are **more** complicated today than they were last week.

High-tech Eavesdropping on the Ganges River Dolphin

Sonar signals hold clues that could save an endangered species

- 1** The Ganges river dolphin is one of only two remaining freshwater dolphin species on Earth. But pollution, fishing, and dams threaten to wipe it out entirely.

- So acoustical engineer Harumi Sugimatsu and her team have deployed an experimental sonar monitoring system just under the surface of the murky water. The hope is to track the dolphins by the high-frequency clicks they use to navigate and hunt. By eavesdropping on their underwater lives, Sugimatsu believes she can gather data about their behavior and geographical range – data that conservationists can use in their struggle to keep the species from going extinct.

IEEE Spectrum. High-tech Eavesdropping on the Ganges River Dolphin. In: *IEEE Spectrum*, 2016. Disponível em: <<http://spectrum.ieee.org/video/green-tech/conservation/hightecheavesdropping-on-the-ganges-river-dolphin>>. Acesso em: 15/6/2016.

- 17** (IME-RJ) Why is the word **eavesdrop** used?
- Because researches will be able to keep the species living in the Ganges.
 - Because scientists and dolphins can track each other through the murky water.
 - Because dolphins can communicate and indicate the presence of scientists.
 - Because researchers need to deal with obstacles.
 - Because dolphins seem unaware of the interception of communication.
- 18** (IME-RJ) What's the meaning of the underlined word in the following sentence: "... her team have deployed an experimental sonar monitoring system just under the surface of the murky water?"
- Darkened and dusky.
 - Shining and clear.
 - Blighted and hazardous.
 - Deep and blemished.
 - Slipshod and littered.

Additions to Remarks

1. Too/As well/Also/Either

Atenção para os seguintes exemplos:

Tom is an engineer. He works as a Physics teacher

too.
as well.

ou

He **also** works as a Physics teacher.

Sharon sings beautifully. She can play the flute

too.
as well.

ou

She can **also** play the flute.

Os advérbios **too**, **as well** e **also** equivalem, em português, a **também** e são geralmente usados em orações **afirmativas** e **interrogativas**.

Too e **as well** são, em geral, colocados no final da oração. **Also** é geralmente colocado antes do verbo principal ou depois do primeiro verbo auxiliar da oração.

We haven't seen the accident and we haven't heard the explosion **either**.

Richard doesn't like classical music and isn't fond of jazz **either**.

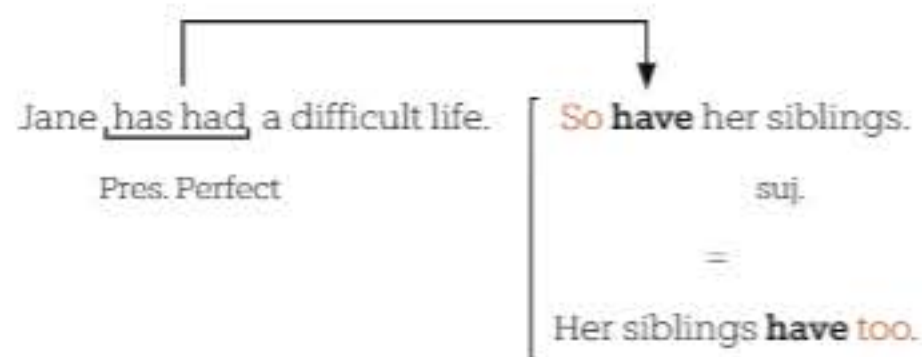

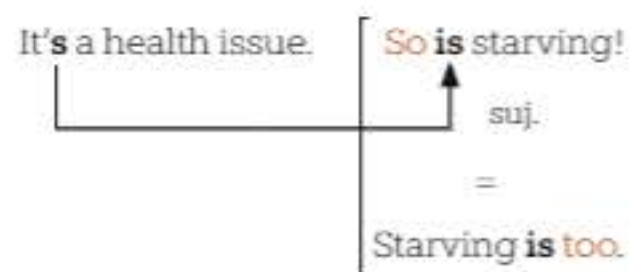

O advérbio **either** pode ser traduzido como **também** e é usado no final de orações negativas.

Atenção para o uso da **affirmative addition** na tira a seguir e nos demais exemplos:

Garfield 2011 Calendar.

2. Affirmative Additions

Additions to Remarks são orações curtas usadas para reforçar ou complementar um comentário anterior.

As **Affirmative Additions** são constituídas da seguinte maneira:

So + v. auxiliar correspondente + sujeito

ou

sujeito + v. auxiliar correspondente + **too**

Agora observe a formação da **Negative Addition** na tira a seguir e nos demais exemplos:

DAVIS, Jim. *Garfield Sits Around the House: His Seventh Book*.

2 (UEA-AM) De acordo com o primeiro parágrafo do texto,

- a) os povos indígenas ocupam uma área 2,5 vezes maior que há 50 anos.
- b) 20% da Amazônia está ocupada por habitações.
- c) nos últimos 50 anos, a floresta amazônica sofreu intensa urbanização.
- d) o desmatamento em áreas que pertencem aos indígenas é menor.
- e) a conservação das florestas deve ser responsabilidade dos povos indígenas.

3 (UEA-AM) No trecho do primeiro parágrafo "... *they are more likely to conserve the forest...*", a expressão em destaque tem sentido equivalente, em português, a:

- a) maior probabilidade.
- b) preferem mais.
- c) maior necessidade.
- d) gostam mais.
- e) maior obrigação.

4 (UEA-AM) A bancada de políticos ruralistas:

- a) é desfavorável à demarcação de territórios indígenas adicionais.
- b) pretende, junto com a FUNAI, rever o processo de demarcação de terras indígenas.
- c) acredita que o crescimento econômico depende da continuidade da reforma agrária.
- d) argumenta que a preservação da floresta deve ficar sob responsabilidade da FUNAI.
- e) defende que as terras deveriam ser aproveitadas para a agricultura em vez da pecuária.

5 (UEA-AM) No trecho do segundo parágrafo "... *the land ought to be used for farming...*", o termo em destaque pode ser substituído, sem alteração de sentido, por:

- a) have to.
- b) used to.
- c) may.
- d) will.
- e) should.

6 No trecho do texto "*He also said they were also proposing that Congress, rather than FUNAI or the Justice Ministry, make decisions on which lands are demarcated to indigenous groups.*" (l. 8-10), **rather than** poderia ser substituído, sem mudança de sentido, por:

- a) in spite of.
- b) despite.
- c) although.
- d) besides.
- e) instead of.

Texto para as questões 7 a 13

1 When you're traveling internationally, eating at local restaurants is an opportunity to learn about that country's culture and customs, says Gert Kopera, the executive vice president of global restaurants for Hakkasan Group, a collection of 41 restaurants worldwide. But, Mr. Kopera said, dining out can also make travelers uncomfortable. "Dining etiquette and traditions vary by country, and if you don't know the customs in the destination you're visiting," he said, "it's easy to feel like a fish out of water." Mr. Kopera has eaten thousands of meals in more than 70 countries, and here, he shares his advice on how to dine out successfully anywhere in the world.

Learn when locals eat, Mr. Kopera said, so that you're not going to closed or empty restaurants. In the United States, dinner is usually eaten from 6 to 7 p.m. and is the biggest meal of the day, but not so in other countries: In England, for example, high tea, served around 4 p.m., is a meal itself while **supper** is lighter and served at 8 p.m. or later. In Spain and South America, the average dinner starts at 10 p.m., and in India, anywhere from 9 to 11 p.m. is the norm. "You'll experience the authentic local culture if your dining times are in rhythm with the locals," he said.

Using utensils improperly can be a sign of disrespect in another country, Mr. Kopera said. He suggested that travelers observe locals while they eat and follow their practices. In China, Japan, Korea and Vietnam, **chopsticks** are the most common utensil, but **sticking** them upright in rice is considered offensive. In India and areas of the Middle East and Africa, eating with hands is normal, but be careful about using the left hand – it can be considered unclean.

30 In many countries – including Brazil, France and Italy – meals span several hours and are a time to connect with family and friends. Mr. Kopera suggested that travelers do the same. "**Savor** the food and conversation," he said. And, once you are ready to leave, ask for your **check** because in many international destinations, servers present it to diners only upon request.

Find out the proper **tipping** etiquette and way to pay in whatever country you are visiting. Tipping is not expected in many countries, and in some countries like Japan, it can be insulting. Also, in some countries, such as France, splitting the bill is considered to be unsophisticated. And know ahead of time if the restaurant you're going to accepts credit cards. In parts of Africa and Asia, the only way to pay at many restaurants is to use the local currency, and being cashless can make for an uncomfortable ending to your meal.

Shivani Vora. www.nytimes.com, 18.07.2017. Adaptado.

supper: jantar; ceia

chopstick: hashis (pauzinhos com que os orientais levam a comida à boca)

to stick (stuck; stuck): enfiar; colocar

to savor(ed): saborear

check: conta

tipping: dar gorjeta

- 7** (Univag-MT) The text is mainly about:
- using the correct utensils.
 - dining properly in another country.
 - researching tipping practices.
 - asking for the check in international destinations.
 - dining out at 41 restaurants.
- 8** (Univag-MT) In the excerpt from the first paragraph, the expression "*fish out of water*" refers to someone who:
- takes credit for something someone else did.
 - feels slightly ill.
 - is uncomfortable in a particular situation.
 - accomplishes two different tasks at the same time.
 - is looking in the wrong place.
- 9** (Univag-MT) De acordo com o texto, dependendo do país, considera-se falta de respeito:
- comer em restaurantes locais.
 - observar a população local durante a refeição.
 - evitar ingredientes desconhecidos.
 - espetar os *hashis* no arroz.
 - ficar muitas horas em um restaurante.
- 10** (Univag-MT) O segundo parágrafo destaca a importância de:
- conhecer a hora apropriada do jantar no país visitado.
 - aprender quais são os principais pratos locais.
 - ajustar o relógio de acordo com o horário local.
 - evitar restaurantes vazios ao visitar países diferentes.
 - saber qual refeição é considerada a mais importante do dia.
- 11** (Univag-MT) In the excerpt from the fourth paragraph "*... servers present **it** to diners only upon request.*", the word in bold refers to:
- conversation.
 - you.
 - request.
 - food.
 - check.
- 12** (Univag-MT) In the excerpt from the fifth paragraph "*... **splitting** the bill is considered to be unsophisticated.*", the word in bold can be replaced, without changing the meaning of the sentence, by:
- closing.
 - paying.
 - sharing.
 - checking.
 - signing.

- 13** The fragment "*... but not so in other countries...*" (l. 15) means that dinner in other countries:
- is at the same time, but it's lighter.
 - is usually later.
 - is not common.
 - is as heavy as in America.
 - is more delicious.

High-flying Ideas?

- 1 A camera-equipped drone flies around the outskirts of Seoul, South Korea, hovering near an industrial plant and capturing video of pollutants. Below, on the crowded, litter-covered streets, residents wear white and black masks that
- 5 cover their noses and mouths. A gray haze hangs in the sky. The unmanned aerial vehicle, or UAV, is part of a pilot program by South Korea's Ministry of Environment. Tasked with inspecting factory emissions in the capital's greater metropolitan area, it's the latest in a series of tech solutions
- 10 aimed at solving Seoul's dust dilemma. In fact, the fine dust has South Koreans so concerned they've cited it as their No. 1 stressor in life – more distressing than the country's economic stagnation, its rapidly aging population and even North Korea's erratic dictator and nuclear weapons
- 15 program. Their worries are well-founded. The World Health Organization (WHO) advises exposure to fine dust, or PM10, of no more than a daily average of 50 micrograms per cubic meter, and to ultra-fine dust, or PM2.5, of no more
- 20 than 25. At one point in 2017, Seoul's PM10 hit 179. In late March 2018, Seoul's PM2.5 soared to over 100. PM2.5 is of greatest concern. So small it can get lodged into the lungs and penetrate the lining to enter the bloodstream, PM2.5 is comprised of black carbon, nitrates, ammonia and other
- 25 harmful compounds linked to respiratory diseases and cancer. The WHO has classified fine and ultra-fine dust as carcinogenic since 2013. Developed by the government-run National Institute of Environmental Research, the drone is the first of what
- 30 the environment ministry intends to be a fleet deployed nationwide. Some South Korean tech companies, too, are stepping in with their own innovations. Although much of the new tech appears promising, Greenpeace's Seoul office stresses the importance of addressing the root of
- 35 the problem. Part of the solution is getting residents to recognize their own role in curbing carbon output. So, even though the new fixes may do a good job of measuring dust, what about actually busting it? That's where the technology hasn't quite caught up yet.

(Ann Babe. www.usnews.com, 08.08.2018. Adapted.)

14 (FICSAE-SP) The text deals with a main public interest issue in South Korea related to:

- a) the dirt and dust deriving from the overcrowded streets in the country's capital.
- b) air pollution, and the health risks brought about by fine-dust particulates.
- c) a variety of factors impacting on the South Koreans' quality of life in the present days.
- d) the great number of camera-equipped drones flying all around Seoul's skies.
- e) the many types of pollutants produced by the country's industries and residents.

15 (FICSAE-SP) The pilot program mentioned in the second paragraph uses UAVs primarily to:

- a) map the dirty and dust-affected streets in Seoul.
- b) predict critical points of pollution in Seoul's metropolitan area.
- c) create technological solutions to solve Seoul's dust dilemma.
- d) identify alternatives to some of the most distressing factors affecting South Koreans.
- e) monitor industrial plant emissions in the city and its surroundings.

16 (FICSAE-SP) According to the third paragraph, PM2.5 is currently a topic of greatest concern in Seoul because:

- a) it has recently reached levels far beyond those the WHO admits as safe for humans to live with.
- b) its particles have just been discovered to be even tinier than the average PM10 particles.
- c) it has, in the latest years, surpassed PM10 in numbers and as the origin of incurable diseases.
- d) it is composed of black carbon, nitrates and ammonia, a combination inevitably resulting in deadly side-effects.
- e) it has been announced by the WHO as the main cause for respiratory diseases and cancer in the country.

17 (FICSAE-SP) The text concludes by stating that tech innovations in South Korea:

- a) come from companies in close cooperation with Greenpeace in their common goal to protect the environment.
- b) are promising, though South Korea has been ranked as the world's deadliest country for outdoor air pollution these days.
- c) have made the measurement of dust emissions possible, but have not yet found ways to suppress them.

d) have led South Koreans to control carbon pollution production in their own homes.

e) have had greater participation from non-governmental groups than from the Korean government itself.

A Kiss for Every Taste

A guide to the greeting that's better than a handshake

1 If there's one thing that can be disconcerting when you're traveling around Latin America, it's the custom of greeting people with a kiss. Really, is there anything more uncomfortable than kissing a total stranger?

5 That's what a lot of Argentines do, finding it perfectly acceptable to plant one or even two kisses on the cheek of someone who they've just met. Going cheek to cheek is increasingly common between Argentine men, even if they've never laid eyes on each other before.

10 On the other side of the Andes, in Chile, a kiss on the cheek is also customary – but beware, only one, and only between women. Chilean men shake hands, but if they are already friends, first comes the handshake and then a hug. Nice.

15 The social mores of other cultures are a minefield of possible embarrassments. But they are also a constant source of fascination.

Ethnic Issues

As questões de etnia têm sido discutidas e debatidas há muitos anos.

A fim de ir além do paradigma racial negro-branco tradicional e de olhar para as relações raciais e étnicas através de uma lente diversa, a Universidade do Norte da Flórida lançou o Instituto para o Estudo das Relações Étnicas e Raciais, instituição de pesquisa interdisciplinar sobre o estudo da desigualdade racial centrada na região local e sudeste, mas igualmente atenta ao impacto mais amplo em comunidades nacionais e internacionais. O texto a seguir apresenta uma série de fatores interessantes acerca do tema.

Texto para as questões 1 a 7

What is Ethnic Conflict?

- 1 Discussions of ethnicity and ethnic conflict are notoriously imprecise, because people disagree about what counts as an ethnic conflict. Are race relations between blacks and whites in the USA an example of low-violence ethnic conflict, or is racial conflict a different category **altogether**? If race is different, does the distinction extend to Rwanda, where Hutus and Tutsis – both black – referred to their difference as one of race? Are relations between Muslims and Hindus in India, or between Sunni and Shi'a Arabs in Iraq, cases of ethnic conflict, or do they belong in different categories as 'religious', 'communal' or 'sectarian' conflicts?

- For an anthropologist, what these cases all have in common is that the groups involved are primarily ascriptive – that is, membership in the groups is typically **assigned** at birth and is difficult to change. In theory, Indian Muslims can convert and become Hindu, and Iraqi Sunnis can become Shi'a, but in practice few do, and the conversion of those few is not always accepted by their new co-ethnics. Identities of this kind are therefore "sticky", hard to change even if they are not marked by the kind of obvious physical differences that distinguish African-Americans from white Americans. Based on this commonality, I will use the broader definition of ethnicity that **encompasses** all of these kinds of ascriptive groups. According to Anthony Smith (1986), a group is an ethnic group if its members share the following **traits**: a common name, a believed common descent, elements of a shared culture (most often language or religion), common historical memories, and **attachment** to a particular territory.

- In the past, experts disagreed widely about where ethnicity comes from. Some, focusing on the evidence that many ethnic identities seem to go back hundreds or thousands of years, **asserted** that ethnicity was a 'primordial' identity, and implied that it was essentially unchangeable. They emphasized

altogether:
totalmente;
completamente
assigned: atribuído
to encompass(ed):
abranger
trait: traço;
característica
attachment: apego
to assert(ed): afirmar

to carve(d): esculpir;
moldar
to stick (stuck) to:
manter; aferrar-se a
hatred: ódio
nested: aninhada
overlapping:
sobrepota
assertiveness:
assertividade;
posicionamento
formerly:
anteriormente
to shift(ed): mudar
selfish: egoísta
in pursuit of: em
busca de

that groups often worked hard to make their identity unchangeable, sometimes **carving** that identity on to their bodies through tattoos or circumcision (Isaacs 1975). Even when they do not go that far, however, people tend **to stick to** the identities – especially the language and religion – they learn first from their parents. This view of ethnicity implies that ethnic conflict is based on “ancient **hatreds**” that are impossible to eradicate and nearly impossible to manage. There is another, more complicated side to ethnic identity, however. Most people have multiple identities that are either “**nested**” (as subgroups within larger groups) or **overlapping**. The average Cuban-American is at the same time also an American Hispanic or Latino, an American Catholic, an American, and a member of the worldwide Catholic Church. Which identity is more important to her is likely to depend on the situation: when listening to the Pope, she is likely to respond as a Catholic; when watching the US President, as an American; and when thinking about US policy towards Cuba, as a Cuban-American.

Furthermore, identities do sometimes change, with new ones emerging and old ones disappearing, especially in times of crisis. For example, when the Soviet Union was breaking apart in the early 1990s, Ukrainians and Russians in the Transnistria region of Moldova came together as ‘Russophones’ – people who preferred to speak Russian rather than Moldovan – to resist the **assertiveness** of the ethnic Moldovans (Kaufman 2001). On the other hand, the “Yugoslav” identity disappeared with the country of Yugoslavia in 1991, so people who **formerly** called themselves Yugoslavs had to **shift** to another identity as Serbs, Croats, or members of some other group. Noticing that people shift their identity – or at least the identity they use politically – based on the situation, a second group of scholars emerged to argue that ethnic identity is not “primordial” at all, but merely “instrumental” (Hardin 1995). From this perspective, people follow “ethnic” leaders when it is in the interests to do so, and leaders try to create ethnic solidarity when it works for them. This view of ethnic identity implies that ethnic conflict can be blamed primarily on **selfish** leaders who mislead their followers **in pursuit of** their own power.

A Molecular Reason Why Obese People Have Trouble Losing Weight

Fat **desensitizes** the brain to a hormone that diminishes appetite

By Bret Stetka

1 Obesity rates in the U.S. and abroad have **soared**. The world now has more overweight people than those who weigh too little. One reason relates to the way the body reacts to its own fat **stores** by **setting in motion** a set of molecular events that impede the metabolic process that normally puts a **damper** on hunger.

5 A new study published August 22 in *Science Translational Medicine* provides details of how this process occurs, giving new insight into why obese individuals have trouble **shedding** pounds. It also suggests a possible treatment **approach** that targets obesity in the brain, not in the belly.

Scientists have long known that a hormone called leptin is instrumental in regulating the human diet. Produced by fat cells, the molecule communicates with a brain region called the hypothalamus, _____ **reins in** hunger **cravings** when our energy stores are full.

10 Yet as we gain weight our bodies become less **sensitive** to leptin, and it becomes harder and harder to **slim down**. In other words, weight gain **begets** more weight gain. In an experiment using mice that became obese on a high-fat diet, an international team found obesity increases the activity of an enzyme called matrix metalloproteinase-2, or MMP-2. By using a technique called western **blot** analysis – separating and identifying all the proteins in a **tissue sample** – the authors found MMP-2 **cleaves off** a portion of the leptin

15 receptor in the hypothalamus, impairing the hormone's signaling and its ability to suppress appetite. The study also revealed that disabling MMP-2 with a gene-silencing technique – one in which a stretch of RNA was injected directly into the hypothalamus – had the effect of reducing weight gain in obese mice and preventing leptin receptor **cleavage**. Conversely, viral delivery of MMP-2 to the same brain region promoted subsequent weight gain and the **snipping off** of receptors. "The concept of 'leptin resistance' was

20 already known in the field," says paper co-author Dinorah Friedmann-Morvinski, a cell biologist at Tel Aviv University in Israel. "Our contribution to the field is (revealing) this mechanism by which obesity induces the activation of MMP-2 in the hypothalamus, which impairs the subsequent leptin-signaling cascade." Friedmann-Morvinski and her colleagues – including lead author Rafi Mazar, a biologist at the University of California, San Diego – also found treating hypothalamic cells in a lab dish with inflammatory

25 compounds increases the expression of the *MMP-2* gene, suggesting the initial "cause" of obesity results from inflammation. Previous research supports the idea high-fat, high-calorie diets can induce chronic low-grade inflammation of the hypothalamus, which over time may escalate MMP-2 production. Martin Myers, a diabetes researcher and professor of internal medicine at the University of Michigan (U.M.) who was not involved with the work, agrees MMP-2 is probably playing a role in energy

30 balance. He points out, however, the new study is not enough to demonstrate that it interferes with leptin signaling in living animals. "I think their finding about a role for MMP-2 in the [hypothalamus] is potentially important. But I don't think they have identified the mechanism," he says. "I think the most important problem here is that they have not shown any alteration of [leptin] signaling in vivo." – a contention disputed by the study's authors.

- 35 If the new findings do **pan out**, they could open the door to possible therapies aimed at damping down inflammation in the brain, decreasing MMP-2 activity and boosting the brain's responsiveness to leptin. "The therapeutic implications here are **far-reaching**," says
- 40 Friedmann-Morvinski. "They point to inflammation as one important player in obesity, and also suggest targeting MMP-2 could be a novel strategy to tackle the problem."

- 1** The text suggests that:
- There are more obese than malnourished people around the world.
 - People have been buying too much fat in stores.
 - Obesity rates in the U.S. and abroad have remained steady.
 - The metabolic process is benefited by fat.
 - A set of molecular fat avoids the metabolic process.
- 2** The expression "... puts a damper on hunger..." (ℓ. 3) in the first paragraph means:
- sparks hunger.
 - causes starvation.
 - gets overweight.
 - diminishes the appetite.
 - turns the taste around.
- 3** According to the text,
- scientists have long understood that a hormone called leptin is the main cause of obesity.
 - fat cells are produced by the hormone called leptin.
 - a new study published on August 22 offers new understanding about why fat people have difficulty to lose weight.
 - fat cells can communicate with a brain region called the hypothalamus.
 - a possible treatment for obesity should target the brain and the belly.
- 4** Marque a alternativa que melhor completa o espaço em branco no seguinte trecho do terceiro parágrafo:
- "Produced by fat cells, the molecule communicates with a brain region called the hypothalamus, _____ reins in hunger cravings when our energy stores are full."
- whose
 - which
 - whom
 - that
 - b e d** estão corretas.

- 5** When the author starts the fourth paragraph by saying "Yet as we gain weight our bodies become less sensitive to leptin..." (ℓ. 10), he intends to indicate _____ in relation to previous paragraph.
- consequence.
 - addition.
 - cause.
 - exemplification.
 - contrast.
- 6** Segundo as informações no quarto parágrafo do texto:
- A MMP-2 une e absorve uma porção do receptor de leptina no hipotálamo.
 - A obesidade aumenta a atividade de uma enzima chamada matriz metaloproteinase-2.
 - À medida que ganhamos peso, nosso corpo torna-se menos resistente à leptina, o que torna o ato de emagrecer cada vez mais difícil.
 - A MMP-2 aumenta a capacidade de suprimir o apetite.
 - Camundongos receberam leptina durante um experimento elaborado com uma técnica chamada *Western blot analysis*.
- 7** In the sentence "Conversely, viral delivery of MMP-2 to the same brain region promoted subsequent weight gain and the snipping off of receptors." (ℓ. 18-19), **Conversely** could be replaced, with no change in meaning, by:
- In addition.
 - Hence.
 - Thus.
 - Despite.
 - On the other hand.
- 8** De acordo com o texto, Martin Myers:
- participou do trabalho denominado *Science Translational Medicine*.
 - ressalta que o novo estudo não é suficiente para demonstrar que a MMP-2 interfere na sinalização da leptina em animais vivos.
 - acredita que a descoberta deles sobre o papel da MMP-2 no hipotálamo é potencialmente importante, a ponto de achar que eles identificaram o mecanismo.
 - tem a convicção de que o tratamento de células hipotálamicas em laboratório com compostos inflamatórios aumenta a expressão do gene da MMP-2.
 - aponta que a MMP-2 provavelmente está desempenhando um papel no desequilíbrio energético.
- 9** In the sentence "... and also suggest targeting MMP-2 could be a novel strategy to tackle the problem." (ℓ. 41-42), **could** brings the idea of:
- necessity.
 - opposition.
 - duty.
 - possibility.
 - emphasis.

- 1 One of the major effects of eating too much sugar is a high incidence of **tooth decay**. When we eat something with sugar in it, particularly refined sugar, enzymes in the saliva in the mouth begin to work immediately to
- 5 change that sugar into a type of carbohydrate. As one eats, particles of the sugary food get stuck between the teeth and around the **gums**. As the food changes its chemical composition, the resultant carbohydrate produces bacteria that begin to eat away at the **enamel**
- 10 on the outside of our teeth. This is actually the decaying of the tooth. Now, if this process happens each time we eat sugar, we can see that eating excessive amounts of sugar causes more and more tooth decay. It is true that some tooth decay can be avoided with immediate
- 15 brushing after eating, removing all the particles of food trapped in the teeth. However, sweets are often eaten as snacks between meals and during the day, times when people generally do not brush after eating. Therefore, the dangerous process of tooth decay is allowed to continue.

- 10 The words **now**, **however** and **therefore** could be replaced, respectively, by...
- a) Than - But - Thus.
b) These days - Perhaps - So.
c) Because - Although - Meanwhile.
d) Recently - Even though - Besides.
e) Well - Nevertheless - Consequently.
- 11 (Cesgranrio-RJ) In the fragment "As one eats, particles of the sugary food get stuck between the teeth and around the gums.", the expression "**As one eats**" can be replaced, with no change in meaning, by:
- a) While we eat.
b) When they eat.
c) Though we eat.
d) Because you eat.
e) As one thing is eaten.
- 12 According to the text, eating large amounts of sugar:
- a) results in accumulating weight.
b) causes growing chemical composition.
c) postpones the process of tooth decay.
d) brings about the decaying of the teeth.
e) wears away carbohydrate gain in the body.

- 13 A synonym for the word **actually**, as in "This is **actually** the decaying of the tooth.", is...
- a) now. d) normally.
b) today. e) theoretically.
c) indeed.
- 14 Mark the item that shows the correct ending to the following sentence: "Now, if this process happens each time we eat sugar, we..." (ℓ. 11-12):
- a) will have dental problems.
b) would have dental problems.
c) would have had dental problems.
d) could have dental problems.
e) may have had dental problems.
- 15 In the sentence "When we eat something with sugar in it, particularly refined sugar, enzymes in the saliva in the mouth begin to work immediately to change that sugar into a type of carbohydrate." (ℓ. 2-5), the pronoun **it** refers to:
- a) saliva. d) something.
b) sugar. e) refined sugar.
c) mouth.

- PHE says young children are eating three times more than the sugar limit. Its new Change4Life advertising
- 10 campaign, which includes the sugar app, suggests that on average children aged four to ten years old are consuming 22kg of added sugar a year. That's about 5,500 sugar cubes - more than the weight of an average five-year-old child.
- The app has been developed to raise **awareness** of
- 15 how much sugar is contained in everyday food and drink. It works on more than 75,000 products, offering a quick guide to help parents to assess potential **purchases** that may harm their children's health. PHE has previously said it supported a sugar tax to help people cut down on the
- 20 sugar they eat. It has also called for reduced marketing of sugary food and drinks towards children in stores, on TV and online as well as fewer price promotions on sugar-laden products.

Public Spaces

O debate sobre a utilização adequada do espaço público tem sido cada vez mais importante à medida que crescem as áreas urbanas.

O texto proposto visa oferecer uma ideia de como alguns países, entre eles o Brasil, têm enfrentado a questão da falta de moradia e o consequente aumento no número de moradores em situação de rua.

In Brazil, Recession and Housing Cuts Push Families onto the Street

- 1 The country's economic crisis and the high cost of living in big cities are forcing thousands onto the street, said Miriam Gomes, founder of Anjinho Feliz community center. She has never seen it this bad. "I've seen a 70 percent increase in the number of homeless over the last three years," said Gomes, as volunteers buzzed around the center distributing food. "In the past, most homeless were adult males; now there are
- 5 far more women and kids living on the streets," she told the Thomson Reuters Foundation.

About 14,000 people are living on the streets of Rio de Janeiro, a city of about 6.5 million, according to data from the municipal government. That's a sharp increase over a decade ago in a trend seen across Brazil's other big cities, according to government data and community workers. In São Paulo, the number

of people sleeping rough on the streets nearly doubled between 2000 and 2015 to 15,906 people, according to that city's municipal government. Homelessness in Brazilian cities is generally defined as people who regularly sleep outside on the streets, rather than just those who lack a permanent address.

National housing initiatives such as Brazil's multi-billion dollar "Minha Casa, Minha Vida" building program, which provided a lifeline to some homeless families, have been cut. "The waiting list for 'Minha Casa, Minha Vida' is huge," said Gomes. "And the homeless shelters are so awful that people would rather stay on the street." Other public services upon which the poor and homeless depend such as healthcare are also under strain, according to government officials and campaigners.

Number of Rough Sleepers in England Rises for Sixth Successive Year

The number of people sleeping rough in England has risen for the sixth year in a row, according to the latest official figures. An estimated 4,134 people bedded down outside in 2016, according to the snapshot survey, an increase of 16% on the previous year's figure of 3,569, and more than double the 2010 figure.

John Healey, Labour's housing spokesman, said: "This is a direct result of decisions made by Conservative Ministers: a steep drop in investment for affordable homes, crude cuts to housing benefit and reduced funding for homelessness services."

UK nationals made up the biggest share of the total rough-sleeping figure, with 17% from European Union (EU) states and 5% from non-EU countries. Women made up 12% of rough sleepers.

Rough sleepers are defined for the purposes of official counts as people sleeping on the street and other places not designed for habitation. It does not include people in hostels or shelters or formal temporary accommodation.

To **grasp** water scarcity, researchers **probe** links between human and natural systems

1 Understanding the fine-level interactions between nature and people is essential in determining whether a region will suffer water scarcity in the future. That's a key finding of a study titled "Finding Water Scarcity **amid** Abundance Using Human-Natural System Models," to be published next week in *Proceedings of the National Academy of Sciences*.

5 Up to 2 billion people around the world face water shortages now and in the future, said the study's lead author, William Jaeger, an economist in Oregon State University's College of Agricultural Sciences. Emerging scarcities are tied to factors such as growing populations, rising standards of living and climate change.

10 "Recent **droughts** across the West have **underscored** the vulnerability of even highly developed economies to water scarcity," Jaeger said. "And climate change will only heighten the need to anticipate water shortages worldwide." It's a **daunting** task, he said, because the interactions between natural water supply and human water demands are complex, and involve "linkages and feedbacks" that are difficult to anticipate.

- 7** (Udesc) We can get some information through this list, they are:
- a) The person is willing to make some changes, possess new things, purchase U.S. goods and be more active.
- b) The person aims to buy animals, live on a farm, move to France and be an activist.
- c) The person focuses on a natural life with a healthy way of living but cozy, and start an exchange course.
- d) The person loves animals and witchcraft, is a sports person, a writer and a traveler.
- e) The person is addicted to online blogs, loves being isolated, and is not happy with her house but everything else.
- 8** (Udesc) Mark the correct alternative which can be answered by the text.
- a) Where can the person find herself being aware of others, in a long term of life?
- b) Is the person longing for new ways of life and interaction?
- c) What can be purchased in U.S.?
- d) Can the person breed animals without raising her own carbon footprint?
- e) What goods does she plan to find on the roads?
- 9** (Udesc) Mark the correct alternative which contains synonyms linked to the meaning in the text.
- a) craft shows – witchcrafts; comfortable – cozy
- b) schedule – time table; keep to it – purchase
- c) bathing suit – tuxedo; community – group
- d) finds – goods; Come up with – invent
- e) healthy – natural; Attend – help

10 (Udesc) Check if the sentence is true or false, according to the text.

- () the person wishes a huge amount of things but being surrounded by animals.
- () all the things she wants are things which she can manage soon.

Treating the UK's loneliness epidemic

Over a million people in the UK aged over 65 now experience chronic loneliness. This **figure** will only rise as our population ages. And research shows that severe loneliness affects people across their life course, including children and young people.

Chronic loneliness is as bad for our health as smoking 15 cigarettes a day and as damaging as obesity and physical inactivity. It is linked with depression, dementia and high blood pressure alongside a number of other conditions. Loneliness impacts on our struggling health and social care system, with evidence showing that those living with loneliness are far more likely to visit their local doctor or A&E. New research shows the health cost alone of loneliness is equivalent to some £ 12,000 per person over 15 years.

National and local **policymakers** are now waking up. Health and wellbeing **boards** across England are making loneliness a priority and the Welsh and Scottish governments have recently announced **commitments** to develop national cross-governmental strategies to address loneliness and social isolation.

We are calling on the UK government to follow suit and commit to the development of a UK-wide strategy for **tackling** loneliness and social isolation to help end this growing crisis.

- a) becomes even worse as a person gets more sedentary.
 - b) affects people from all ages and genders in all the UK.
 - c) is as damaging for health as smoking 15 cigarettes a day.
 - d) is even worse than obesity and physical inactivity.
 - e) is fortunately far from any relation with other illnesses.

- 16** (Cesmac-AL) The UK authorities:
- a) have finally started to pay attention to the problem and done something.
 - b) have overlooked the problem despite the obvious need for action.
 - c) have long ignored the problem and seem to want to keep it that way.
 - d) regard loneliness and social isolation as an unsolvable problem.
 - e) intend to take action as long as the health system isn't struggling.

Loneliness can be deadly for elders

The circle **shrinks**. As the years pass, older people attend too many funerals. Friendships that sustained them for decades **lapse** when companions and confidants retire or move away or grow ill.

The way we prioritize friendships may evolve. Laura Carstensen, a Stanford University psychologist, developed an influential theory called "socioemotional selectivity": As people sense their remaining time growing **brief**, they **shed** superficial relationships to concentrate on those they find most meaningful.

"They invest more in their remaining connections," said Gary Kennedy, director of geriatric psychiatry at Montefiore Medical Center. "They optimize friendships, rather than try to maximize them."

A **tide** of recent research **underscores** the importance of such **bonds**. Social isolation and loneliness can **take a serious toll** on elders, psychologically and physically. They also suffer higher mortality rates and increased risk of depression, cognitive decline and illnesses like coronary artery disease.

Researchers at the University of California, San Francisco, followed 1,600 participants (average age: 71) and found that those who reported loneliness were more likely to develop difficulties with activities of daily living. Even when the study controlled for socioeconomic status and health, the lonely had higher mortality: Nearly 23 percent died within six years, compared with 14 percent of those who weren't lonely.

With strong evidence that friendship does, **indeed**, help save lives and promote health, social workers and researchers wish we could pay more attention to its central role. Activity directors, senior center staff members and family **caregivers**. Are there better ways to help elders stay in touch with the friends they care about, or meet new ones? We're all willing to drive relatives to doctors' **appointments**; driving them to spend time with friends may matter as much.

to underscore(d): ressaltar	

- 17** (Unifimes-GO) According to the text, older adults without friends should look for:
- a) social workers.
 - b) family caregivers.
 - c) socioeconomic status.
 - d) meaningful relationships.
 - e) doctors' appointments.

- 18** (Unifimes-GO) No trecho do primeiro parágrafo "*Friendships that sustained them for decades **lapse** ...*", o termo em destaque **lapse** pode ser substituído, sem alteração de sentido, por:

- a) cease.
- b) strengthen.
- c) increase.
- d) enhance.
- e) improve.

- 19** (Unifimes-GO) The excerpt from the third paragraph "*They optimize friendships ...*" refers to:

- a) "remaining time".
- b) "socioemotional selectivity".
- c) "recent research".
- d) "social isolation".

Council of Europe language education policy

The Council of Europe promotes policies which strengthen linguistic diversity and language rights, deepen mutual understanding, consolidate democratic citizenship and sustain social cohesion.

Council of Europe language education policies aim to promote:

- **PLURILINGUALISM:** all are entitled to develop a degree of communicative ability in a number of languages over their lifetime in accordance with their needs;
- **LINGUISTIC DIVERSITY:** Europe is multilingual and all its languages are equally valuable modes of communication and expressions of identity; the right to use and to learn one's language(s) is protected in Council of Europe Conventions;
- **MUTUAL UNDERSTANDING:** the opportunity to learn other languages is an essential condition for intercultural communication and acceptance of cultural differences;
- **DEMOCRATIC CITIZENSHIP:** participation in democratic and social processes in multilingual societies is facilitated by the plurilingual competence of individuals;
- **SOCIAL COHESION:** equality of opportunity for personal development, education, employment, mobility, access to information and cultural enrichment depends on access to language learning throughout life.

A plurilingual person has:

- a repertoire of languages and language varieties;
- competences of different kinds and levels within the repertoire.

Plurilingual education promotes:

- an awareness of why and how one learns the languages one has chosen;
- an awareness of and the ability to use transferable skills in language learning;
- a respect for the plurilingualism of others and the value of languages and varieties irrespective of their perceived status in society;
- a respect for the cultures embodied in languages and the cultural identities of others;
- an ability to perceive and mediate the relationships which exist among languages and cultures;
- a global integrated approach to language education in the curriculum.

If You're Out There

If you hear this message
Wherever you stand
I'm calling every woman
Calling every man

We're the generation
We can't afford to wait
The future started yesterday
And we're already late

We've been looking for a song to sing
Searched for a melody
Searched for someone to lead
We've been looking for the world to change
If you feel the same, we'll go on and say

If you're out there
Sing along with me if you're out there
I'm dying to believe that you're out there
Stand up and say it loud if you're out there
Tomorrow's starting now... now... now [...]

We can destroy Hunger
We can conquer **Hate**
Put down the arms and raise your voice
We're joining hands today [...]

hate: ódio

I Should Have Known Better

By The Beatles

I should have known better
With a girl like you
That I would love everything
That you do
And I do,
Hey, hey, hey,
And I do

Whoa, oh, I never realized
What a kiss could be
This could only happen to me.
Can't you see?
Can't you see?

That when I tell you that I love you, oh,
You're gonna say you love me too, oh,
And when I ask you to be mine,
You're gonna say you love me too

So, oh, I should have realized
A lot of things before.
If this is love
You've got to give me more
Give me more,
Hey, hey, hey,
Give me more

- 5 (Mack-SP) According to the lyrics to the song "I Should Have Known Better" by The Beatles, the structure **should have**:
- a) was used to talk about past events that did happen.

Love is not all

By Edna St. Vincent Millay

Love is not all: It is not meat nor drink
Nor slumber nor a roof against the rain;
Nor yet a floating spar to men that sink
And rise and sink and rise and sink again;
Love cannot fill the thickened lung with breath,
Nor clean the blood, nor set the fractured bone;
Yet many a man is making friends with death
Even as I speak, for lack of love alone.
It well may be that in a difficult hour,
Pinned down by need and moaning for release,
Or nagged by want past resolution's power,
I might be driven to sell your love for peace,
Or trade the memory of this night for food.
It may well be. I do not think I would.

The Road Not Taken

Two roads diverged in a yellow wood,
And sorry I could not travel both
And be one traveler, long I stood
And looked down one as far as I could
To where it bent in the undergrowth;

Then took the other, as just as fair,
And having perhaps the better claim,
Because it was grassy and wanted wear;
Though as for that the passing there
Had worn them really about the same,

And both that morning equally lay
In leaves no step had trodden black.
Oh, I kept the first for another day!
Yet knowing how way leads on to way,
I doubted if I should ever come back.

I shall be telling this with a sigh
Somewhere ages and ages hence:
Two roads diverged in a wood, and I –
I took the one less traveled by,
And that has made all the difference.

Language carries culture, and culture carries, particularly through oratory and literature, the entire body of values by which we come to perceive ourselves and our place in the world. How people perceive themselves affects how they look at their culture, at their politics and at the social production of **wealth**, at their entire relationship to nature and to other beings. Language is thus inseparable from ourselves as a community of human beings with a specific form and character, a specific history, a specific relationship to the world.

Facebook Song Lyrics

I wouldn't call myself a social butterfly
And there's not much that separates me from the other guy
But when I log in

There's an online world where I am king
Of a little website dedicated to me
With pictures of me and a list of my friends
And an unofficial record of the groups that I'm in

Before the internet, friendship was so **tough**
You actually had to be in people's presence and stuff
Who would have thought that with a point and a click
I could know that *Hope Floats* is your favorite flick

I'm hooked on Facebook
I used to meet girls hanging out at the mall
Now I just wait for them to write on my wall

Oh! Link's status changed, it says he's playing the recorder...

How do you know this person?
Did you hook up with this person?
Do you need to request confirmation?
Or did you just think they looked cute...
From their picture on Facebook?

If the internet crashed all across the land
Or my Facebook account was deleted by the man
I'd carry around a picture of my face
And a summary of me typed out on a page

We Can Change the World

Michael Jackson

All for one and one for all is what we all should be.
But instead we go and fight each other.
Now, that wasn't meant to be.
You know, the sun is there to light the day.
The night is lit by the moon.
If we don't come together, my brother, it all can end very soon.
It's your world now.
The future is plain to see.
Give love right now.
We need the harmony.
Some of us have a heart of stone and feel as cold as ice.
Love can make a change in you, take a wrong and make things right.
If you only knew how it was planned for life to really be,
You would join in, you won't hesitate, you would help
bring the harmony.

The Valentine's Day Song

By Bryant Oden

I made a special valentine's card for a girl I like
I gave it to her in class with all the rest
I watched her open it out of the corner of my eye
She read it then went right on to the next
I felt so broken hearted we were over before we started
I guess she didn't like what I wrote, I spent forever on that stupid

love note.
 It said:
 I'm glad you and I are friends and I hope that never ends
 But I've been thinking we could be more
 That's what Valentine's Day is for

Then I noticed my best friend Christy was smiling at me
 She was holding the card she wasn't supposed to be
 She walked right over and got really close to me
 I never noticed it before but her eyes were pretty

She said: I'm glad you and I are friends and I hope that never ends
 But I've been thinking we could be more
 That's what Valentine's Day is for

Then my heart started pounding and my knees went weak
 My best friend Christy kissed me on my cheek (with her lips!)
 I felt so happy hearted, look at what my mess up started
 I took her hand and said:

I'm glad you and I are friends and I hope that never ends
 But suddenly I'm thinking we could be more
 That's what Valentine's Day is
 That's what Valentine's Day is for

Offer

Alanis Morissette

Who
 Who am I **to be blue**
 Look at my family and fortune
 Look at my friends and my house

Who
 Who am I to feel dead and
 Who am I to feel spent
 Look at my health and my money

And where
 Where do I go to feel good
 Why do I still look outside me
 When clearly I've seen it won't work

Is it my calling to keep on when I'm unable
 And is it my job **to be selfless extraordinaire**
 And my generosity has me disabled
 by this my sense of duty to offer

to be blue: estar triste, deprimido
to be selfless extraordinaire: ser altruísta notável

oyster: ostra
rest on my laurels:
acomodar-me
an outstretched hand:
uma mão estendida

Why
Why do I feel so ungrateful
Me who is far beyond survival
Me who's seen life as an **oyster**

And how
How dare I **rest on my laurels**
How dare I ignore **an outstretched hand**
How dare I ignore a third world country
Who
Who am I to be blue

MORISSETTE, Alanis. *Feast on Scraps*. Canada: Maverick Recording Company, 2002. 1 CD. Faixa 5.

- 20** (UFG-GO) Qual dos seguintes versos questiona a ideia expressa na comparação "*Me who's seen life as an oyster*"?
- Who am I to be blue?
 - Who am I to feel dead and?
 - Who am I to feel spent?
 - Where do I go to feel good?
 - How dare I ignore a third world country?
- 21** (UFG-GO) Os vários questionamentos presentes na letra da música:
- evidenciam a busca pela aceitação social.
 - ênfaticam a dificuldade de ascensão econômica.
 - criticam a generosidade da sociedade burguesa.
 - comprovam a complexidade de relacionar-se com o sexo oposto.
 - demonstram o conflito entre o ser e o fazer.

Reported (Indirect) Speech

Leia a tira de Garfield a seguir.

O texto do 3º quadrinho pode ser considerado como **discurso indireto**. A forma direta seria: Say to (tell) life: "Leave a message".

1. Introdução

Direct Speech: Jon said: "Life is calling."

Reported (Indirect) Speech: Jon said (that) **life was calling**.

No discurso direto (Direct Speech) são usadas as palavras textuais do emissor. No discurso indireto (Reported/Indirect Speech) relata-se o que foi dito, adaptando-se as palavras (frases) do emissor.

Quando o verbo da oração introdutória está no passado (**said, told, asked**), na transformação do discurso direto para o discurso indireto (Reported Speech), ocorrem várias mudanças (no tempo verbal, pronomes, advérbios).

2. Tempos verbais e pronomes

D. S. Peter said, "I live with my parents."

S. Pres.

R. S. Peter said (that) **he lived** with **his** parents.

S. Past

D. S. Susan said, "My friends didn't invite me."

S. Past

R. S. Susan said (that) **her friends hadn't invited her**.

Past Perfect

D. S. Our neighbors said, "We'll take our kids to the zoo."

S. Fut.

R. S. Our neighbors said (that) **they would take their kids** to the zoo.

S. Condit.

D. S. Mom said, "These may be Dad's car keys."

R. S. Mom said (that) **those might** be Dad's car keys.

D. S. The children said, "We can swim."

R. S. The children said (that) **they could** swim.

No **Reported / Indirect Speech** os pronomes pessoais, reflexivos, possessivos e os demonstrativos sofrem alterações conforme o significado. Os tempos dos verbos geralmente tornam-se “mais passados”, isto é, voltam para um tempo passado “anterior”.

Observe a tabela a seguir com as modificações apresentadas na passagem do discurso direto para o discurso indireto **Reported / Indirect Speech**:

D. S. (Direct Speech)	R. S. (Reported Speech)
This	That
These	Those
Simple Present	Simple Past
Present Continuous	Past Continuous
Past Continuous	Past Continuous (ou Past Perfect Continuous)
Present Perfect	Past Perfect
Simple Future	Simple Conditional
Simple Conditional	Simple Conditional (ou Conditional Perfect: would have + Past Participle)
can	could
may	might
must	must (ou had to / must have been)
should	should (should have been)
ought to	ought to (ought to have been)

3. Outras palavras (“Here and now” words)

D. S. Bob said, “I’ll stay *here* until *tomorrow*”.

R. S. Bob said that he would stay **there** until **the next day**.

D. S. The children said, “We’re doing our homework *now*”.

R. S. The children said (that) they were doing their homework **then** (at that moment/time).

D. S. Bob said, “I met the new Math teacher *yesterday*”.

R. S. Bob said (that) he had met the new Math teacher **the day before**.

Além das mudanças nos pronomes e tempos verbais, geralmente também ocorrem mudanças nos advérbios de lugar e de tempo.

Observe a tabela a seguir:

Direct Speech	Reported Speech
here	there
now	then (at that moment / at that time)
today	that day
tomorrow	the next day
next...	the following...
yesterday	the day before
last...	the previous...
...ago	...before

4. Ordens (Orders) e Pedidos (Requests)

D. S. The policeman said to Richard, "Get out of the car."

R. S. The policeman **told** Richard **to get out of the car**.

D. S. The photographer said to us, "Don't move, please."

R. S. The photographer **asked us not to move**.

D. S. Alan said, "Let's do something about this."

R. S. Alan **suggested (that) we should do something about that**.

Quando se trata de ordens, deve-se usar, no **Reported Speech**:

- **tell + objeto + infinitivo com to**, para orações afirmativas.
- **tell + objeto + not + infinitivo com to**, para orações negativas.

Quando se trata de **pedidos**, deve-se usar o verbo **ask** em vez de **tell**. A palavra **please** é eliminada da oração.

Quando se trata de **sugestão** ou **convite (let's...)**, deve-se usar o verbo **suggest** na oração introdutória e substituir a expressão **let's** por **we should**.

5. Perguntas (Questions)

D. S. Mom said to me (asked me), "Where did you buy your new dress?"

R. S. Mom **asked me where I had bought my new dress**.

D. S. Harriet said, "What time is it?"

R. S. Harriet **asked what time it was**.

D. S. Mary's friends asked her, "Can you help us?"

R. S. Mary's friends **asked her if (whether) she could help them**.

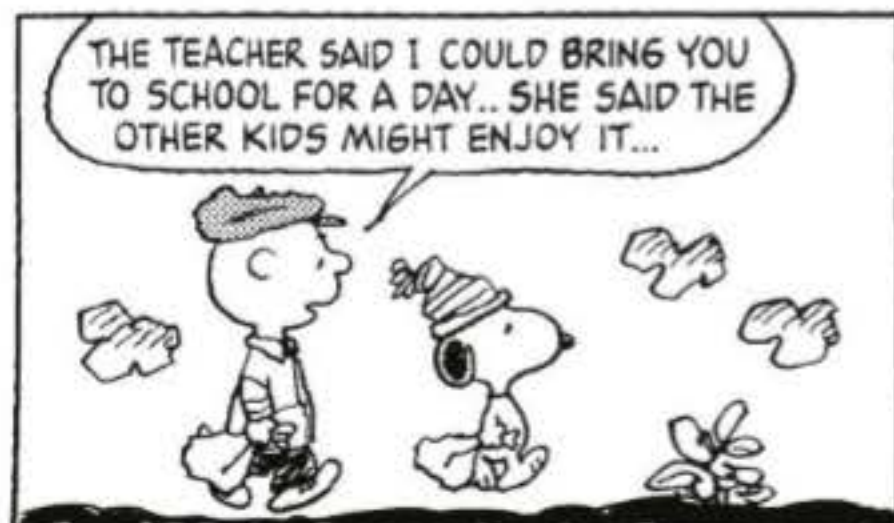

Quando se trata de **perguntas**, no **Reported Speech** o verbo da oração introdutória passa a ser **ask (wonder, want to know)**. As perguntas transformam-se em **orações interrogativas indiretas**, cuja estrutura é a seguinte:

oração interrogativa indireta

... asked (+ objeto) + interrogative (Wh-word) + sujeito + verbo + complementos

... asked (+ objeto) + if (whether) + sujeito + verbo + complementos

Observe o uso do **Reported Speech** na tira de Peanuts a seguir:

Prescriptions for Fighting Epidemics

Epidemics have **plagued** humanity since the **dawn** of **settled life**. Yet success in conquering them remains **patchy**. Experts predict that a global one that could kill more than 300 m would come round in the next 20 to 40 years. What pathogen would cause it is anybody's guess. Chances are that it will be a virus that **lurks** in birds or mammals, or one that has not yet **hatched**. The scariest are both highly lethal and spread easily between humans. Thankfully, bugs that **excel** at one tend to be weak at the other. But mutations – ordinary business for germs – can change that in a **blink**. And when humans get too close to beasts, wild or packed in farms, an animal disease can become a human one. Moreover, when humans get too close to beasts, wild or packed in farms, an animal disease can become a human one.

A **front-runner** for global pandemics is the seasonal influenza virus, which mutates so much that a vaccine must be **custom-made** every year. The Spanish flu pandemic of 1918, which killed 50 m to 100 m people, was a potent version of the "swine flu" that emerged in 2009. The H5N1 "avian flu" strain, deadly in 60% of cases, came about in the 1990s when a virus that sickened birds made the jump to a human. Ebola, HIV and Zika took a similar route.

Texto para as questões 8 a 10

For most, The Gateway International Bridge functions as it should, allowing people to get between the U.S. and Mexico. But on a hot Sunday afternoon, a dozen migrants at the mouth of the bridge weren't getting anywhere at all. They had been told, once again, to wait. At a press conference the next day, president Trump once again **touted** the border wall he has promised supporters.

"The wall is getting longer and taller and stronger each and every day", he said, even though construction has not begun. The president's characterization of the physical wall was false, but his Administration has effectively erected an invisible one.

It is built, in part, from situations like the one at the bridge, which illustrates the problem with this kind of barrier. The practices that Trump **praises** for keeping out criminals also punish those who are trying to follow the rules.

Those migrants who spoke to *Time* at the bridge had varied stories but shared a determination to cross. Some understood a bit of what could happen to them next. How long could it take to get processed? And if they did ultimately apply for asylum, it remained to be seen whether their stories would qualify. The regulations governing such matters are complicated, and the vast majority who apply are rejected. But in theory, their **fates** would be decided at **immigration courts**, not at the **border**.

- 8** (Fuvest-SP) Segundo o texto, após ingresso nos Estados Unidos, os migrantes que requerem asilo
- a) têm seu processo julgado com mais rapidez.
 - b) precisam comprovar sua idoneidade.
 - c) aguardam na fronteira, onde sua petição é avaliada.
 - d) são mais determinados a permanecer no país.
 - e) têm seu pedido negado com frequência.
- 9** (Fuvest-SP) De acordo com o texto, para ingresso nos Estados Unidos, o cruzamento da fronteira entre este país e o México, no local denominado The Gateway International Bridge, é:
- a) dificultado para alguns migrantes.
 - b) negado para casos de reincidentes.
 - c) adiado para os migrantes que seguem as regras.
 - d) condicionado à nacionalidade do solicitante.
 - e) liberado para os migrantes com documentação válida.
- 10** (Fuvest-SP) Com base no texto e nos fatos que envolveram a política migratória dos EUA em junho de 2018, é correto afirmar:
- a) O presidente Donald Trump, por pressão do Conselho de Direitos Humanos da Organização das Nações Unidas (ONU), flexibilizou a punição aos imigrantes ilegais, passando a tratar os casos em cortes de imigração e não mais por meio de indiciamento criminal.

- b) O presidente Donald Trump finalizou a construção do muro na fronteira México-EUA, desde a costa leste até a oeste, com o objetivo de conter a nova onda migratória de venezuelanos e hondurenhos.
- c) Imigrantes mexicanos que seguiram as regras oficiais para imigração nos EUA obtiveram concessão de asilo político em curto prazo, especialmente nas cortes da Califórnia, tradicional reduto conservador e base eleitoral do presidente Donald Trump.
- d) A construção de uma barreira física entre México e EUA visa, segundo o presidente Donald Trump, consolidar um estado fronteiriço, no qual os imigrantes deverão permanecer algum tempo antes de ingressarem em outras partes do país.
- e) As barreiras construídas entre México e EUA são, além de físicas, também psicológicas, como pôde ser visto no caso em que milhares de crianças imigrantes foram separadas de suas famílias.

Underground river "Rio Hamza" discovered 4 km beneath the Amazon

Scientists estimate the subterranean river may be 6,000 km long and hundreds of times wider than the Amazon

Alok Jha, science correspondent, guardian.co.uk

Covering more than 7 million square kilometres in South America, the Amazon **basin** is one of the biggest and most impressive river systems in the world. But it turns out we have only known half the story until now.

Brazilian scientists have found a new river in the Amazon basin – around 4 km **underneath** the Amazon river. The Hamza river, named after the head of the team of researchers who found the groundwater flow, appears to be as long as the Amazon river but up to hundreds of times wider. Both the Amazon and Hamza flow from west to east and are around the same **length**, at 6,000 km. But whereas the Amazon ranges from 1 km to 100 km in width, the Hamza ranges from 200 km to 400 km. The underground river starts in the Acre region under the Andes and flows through the Solimões, Amazonas and Marajó basins before opening out directly into the depths of the Atlantic Ocean.

The Amazon flows much faster than the Hamza, however, draining a greater volume of water. Around 133,000 m³ of water flow through the Amazon per second at speeds of up to 5 metres per second. The underground river's flow rate has been estimated at around 3,900 m³ per second and it **barely inches** along at less than a millimetre per hour.

The Hamza was located using data collected inside a series of 241 abandoned deep wells that were drilled in the Amazon region by the petrochemical company Petrobras in the 1970s and 1980s. Elizabeth Tavares Pimentel and Valiya Hamza of the Department of Geophysics at Brazil's National Observatory led the work and presented their results last week at the International Congress of the Brazilian Geophysics Society in Rio de Janeiro.

According to the researchers, the presence of the Hamza river might account for the relatively low salinity of the waters around the mouth of the Amazon. Professor Hamza said Pimentel's measurements represented preliminary work on the discovery of the new river, but Hamza said he expected to confirm the existence of the flow with additional measurements within the next few years.

11 (PUC-SP) No trecho do segundo parágrafo "*But whereas the Amazon ranges from 1 km to 100 km in width, the Hamza ranges from 200 km to 400 km*", a palavra **whereas** pode ser substituída, sem alteração de sentido, por:

- a) whenever.
- b) wherever.
- c) while.
- d) however.
- e) which.

12 (PUC-SP) Segundo o texto,

- a) o rio Hamza é um afluente do rio Solimões, que se torna subterrâneo no trecho entre o Rio Amazonas e a ilha de Marajó.
- b) o Rio Hamza tem comprimento similar ao do rio Amazonas, porém é muito mais largo.
- c) o rio Hamza corre em paralelo com o rio Amazonas a uma profundidade de 400 metros abaixo de seu leito.
- d) o fluxo do rio Amazonas é bastante lento comparado ao do rio Hamza.
- e) as águas pluviais são filtradas pelo solo e alimentam tanto o rio Hamza como o rio Amazonas.

13 (PUC-SP) The flow of the Hamza river:

- a) has already been demonstrated by the researchers.
- b) can be questioned because the water is salty and too close to the ocean.
- c) has been shown in pictures during the international congress.
- d) has been already identified in the 70's and 80's.
- e) is yet to be confirmed by additional measurements.

14 (PUC-SP) O rio Hamza:

- a) foi descoberto por pesquisadores da Sociedade Brasileira de Geofísica.
- b) foi considerado o maior rio do mundo pelo Observatório Nacional do Brasil.
- c) tem esse nome em homenagem a um cientista que morreu durante as pesquisas.
- d) foi localizado a partir de poços abandonados da Petrobras.
- e) nasce nas geleiras da cordilheira dos Andes.

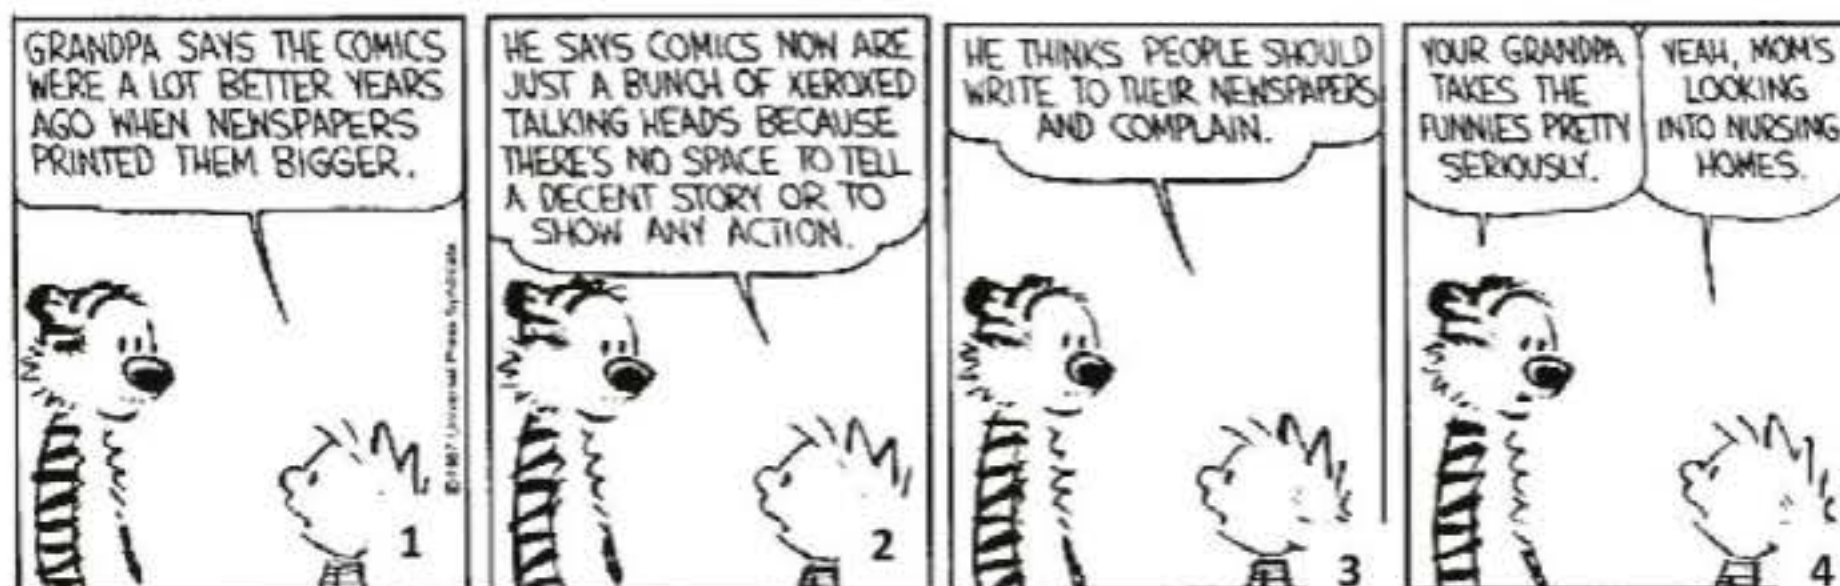

15 No trecho do terceiro parágrafo "*The Amazon flows much faster than the Hamza, however, draining a greater volume of water*", **however** pode ser substituído, sem mudança no sentido, por:

- a) so.
- b) therefore.
- c) besides.
- d) though.
- e) in addition.

16 In the sentence from the last paragraph "*...the presence of the Hamza river might account for the relatively low salinity of the waters around the mouth of the Amazon...*" **might** gives the idea of:

- a) permission.
- b) competence.
- c) capacity.
- d) obligation.
- e) possibility.

Medi-evil: the monstrous middle ages

Reprodução/UNESP 2019

Monsters are still everywhere. Godzilla keeps stomping through silver-screen cities, zombies lurch through eight seasons of the TV series *The Walking Dead* and the vampires of *Twilight* nibble necks across thousands of pages of the book series by Stephanie Meyer.

But those looking for some historical context should head to the Morgan Library and Museum in New York to see around 70 works (such as illuminated manuscripts) from the 9th to the 16th century that show how ogres of the imagination have always inspired terror and wonder. In a time when the distant was unknowable, they filled the gaps. Almost always from afar, the monster was a substitute for those perceived to stray from the norm.

Pale man in *Pan's Labyrinth* (www.cinematropical.com)

Keep your eyes peeled for a perennial medieval favourite, the Blemmyae: disgusting headless humanoids with their faces transplanted onto their chests. These were quite possibly the inspiration for Guillermo Del Toro's Pale Man in the film *Pan's Labyrinth* (2006) – a horrifying fellow whose eyeballs peer out abjectly from his clawed hands.

All for one and one for all is what we all should be

A TRIBUTE TO MARTIN LUTHER KING, JR.

Mary Miché

Chorus:

Martin Luther King, you make my spirit sing.
You mean so much to me, 'cause you taught
[us how to be free.

You loved everybody black or white,
And you taught us it's no good to fight,
But just to stand up for what's right,
And let your love shine like a light.

You bravely walked the streets of this land.
You marched with others, hand in hand.
You taught us that we all should stand,
Together, for equality in this land.

You spoke of justice loud and long,
With patience and love you fought against
[wrong,
As brothers and sisters we'll be strong,
And so to you we give this song.

Linguistic imperialism: African perspectives

Abstract

Ninety per cent of the population in Africa today speak only African languages (Ngugĩ wa Thiong'o, 1992, p. 27).

Seventy per cent of South Africa's population understand Zulu (Neville Alexander in Bhanot, 1994). There's no such thing as Nigerian English (Achebe, 1992, p. 73).

This is a response to a recent article in *ELT Journal* on aspects of African language policy (Bisong, 1995). Among the points taken up are: research evidence from African, **scholars**, multilingualism and monolingualism, proposed changes in language policy from the Organization for African Unity and in current initiatives in, South Africa, the language that literature is written in, bilingual education, and whose interests ELT is serving.

1. O autor questiona se as relações entre negros e brancos nos Estados Unidos são um exemplo de conflito de baixa violência ou o conflito racial é uma categoria completamente diferente. Se a etnia é diferente, como entender a causa de conflitos entre as mesmas etnias?
2. Para um antropólogo, a participação nos grupos é tipicamente atribuída no nascimento e é difícil mudá-la, ainda que os membros não sejam marcados pelo mesmo tipo de diferenças físicas óbvias que os distinguem.
3. De acordo com Anthony Smith, um grupo étnico é aquele em que seus membros compartilham as seguintes características: um nome comum, uma crença comum, elementos de uma cultura compartilhada (na maioria das vezes idioma ou religião), memórias históricas comuns e apego a determinado território.
4. A visão de que, mesmo quando as pessoas não vão tão além, elas tendem a se ater às identidades – especialmente o idioma e a religião – que aprendem primeiro com seus pais.

17. A nova campanha sugere que, em média, crianças de quatro a dez anos estão consumindo 22 kg de açúcar por ano. São cerca de 5500 cubos de açúcar – mais do que a média do peso de uma criança de cinco anos de idade.

Going Beyond 26

1. No Brasil: a crise econômica do país e o alto custo de vida nas grandes cidades estão forçando milhares de pessoas a viver nas ruas.
Na Inglaterra: é um resultado direto de decisões tomadas por ministros conservadores: uma queda abrupta no investimento em moradias acessíveis, cortes profundos em benefícios destinados a moradias e menos recursos para serviços ligados aos desabrigados.
2. 1º) Iniciativas habitacionais nacionais, como o programa brasileiro de construção “Minha Casa, Minha Vida”, foi cortado; 2º) A enorme lista de espera para o “Minha Casa, Minha Vida”; 3º) a precariedade dos locais destinados aos desabrigados; e 4º) a contenção de gastos com os serviços de saúde pública.
3. No Brasil, os moradores em situação de rua são aqueles que dormem na rua regularmente e não aqueles que não têm endereço fixo.
Na Inglaterra, os moradores em situação de rua são definidos, para fins de contagem oficial, como pessoas que dormem nas ruas e outros lugares não apropriados para a habitação. Isso não inclui pessoas em albergues, abrigos ou acomodações temporárias formais.

4. No Brasil: no passado, a maior parte dos moradores de rua era masculina; hoje há muito mais mulheres e crianças nas ruas.

No Reino Unido: os britânicos são a maior parte do total dos moradores de rua, com 17% oriundos de países da União Europeia e 5% de nações que não fazem parte da União Europeia. As mulheres representam 12% dos moradores de rua.

14. A relação que o eu lírico estabelece com a Língua Inglesa é de alguém que não pertence àquela cultura ("Me not no Oxford don / [...] I immigrate") (Eu não sou de Oxford, senhor / [...] sou imigrante), mas que ao mesmo tempo não se submete a ela ("I'm a man on de run / And a man on de run / Is a dangerous one") (Eu sou um fugitivo / E um fugitivo / é perigoso). Ele escolhe "roubar a língua", apropriando-se do inglês e usando-o à sua maneira ("but mugging de Queen's English / In the story of my life") (mas roubando o inglês da rainha / na história da minha vida).
