APRESENTAÇÃO

Caro aluno,

Em um curso pré-vestibular, eficiência é um quesito imprescindível, já que você será convidado a, em apenas um ano, aprimorar competências e habilidades desenvolvidas ao longo de toda a sua escolarização e consolidar o aprendizado de conteúdos abordados no Ensino Médio.

Levando em conta essa necessidade, a coleção Alfa foi estruturada em dois volumes: o Caderno do Aluno, que traz as atividades que devem ser realizadas em sala de aula, e o Caderno de Estudos, que dá continuidade a seu processo de aprendizagem fornecendo subsídios para um momento de estudo mais autônomo.

É neste Caderno que você encontrará todas as leituras que devem ser realizadas e os exercícios indicados na *Orientação de estudo* no Caderno do Aluno (Tarefa Mínima, Tarefa Complementar e Tarefa Desafio), que devem ser encarados com dedicação.

O Caderno de Estudos é disciplinar, ou seja, nele você encontra uma disciplina por volume, dividida por setores ou unidades temáticas. Durante o ano, você receberá quatro volumes bimestrais de cada disciplina. Essa configuração permite mais autonomia e organização, uma vez que traz teoria e exercícios em um mesmo volume, facilitando o acesso ao conteúdo apresentado pelo professor em sala e aos exercícios associados a cada aula. Além disso, a estrutura facilita a realização de revisão de pontos importantes durante o ano.

Aliando um material de qualidade, a resolução das tarefas propostas e muita força de vontade, você conquistará a tão sonhada vaga!

Bons estudos!

Text Comprehension: Global Warming

Neste capítulo, trataremos do tema “aquecimento global”. Leia o texto a seguir para aprofundar seus conhecimentos a respeito desse assunto.

Where is global warming going?

The recent discussion on heat content got me thinking about an alternative way to communicate where all the heat content from global warming is going. Inspired by the elegant methods of Information is Beautiful, here is a visual depiction of how much global warming is going into the various components of our climate system:

Components of global warming for the period 1993 to 2003
calculated from Intergovernmental Panel on Climate Change

[...]

Exercícios

Texto para as questões 1 a 6

Will Global Warming Benefit Civilization?

- 1 Environmental Protection Agency head Scott Pruitt suggests that global warming isn't necessarily "a bad thing" because "humans have most **flourished** during times of... warming." But recent years have been the warmest humans have seen over at least the last millennium. This record **warmth** is tied to more extreme weather events, sea level rise and other negative impacts.
- 5 Pruitt made his **claim** on Feb. 6 while speaking with Gerard Ramalho of NBC News 3 in Las Vegas (starting at 4:08).

[...]

We reached out to Pruitt's office for support for his claims, but spokeswoman Liz Bowman didn't provide us with any.

- 10 Pruitt is right that human civilization began flourishing during a warm period after the last major ice age, which ended about 12,000 years ago. This period – the Holocene Epoch – averaged about 4 to 5 degrees Celsius above the temperatures during the ice age that came before it, Andrew Glikson, an earth and paleo-climate scientist at Australian National University, told us via e-mail.

- 15 But the burning of fossil fuels has pushed this global average even higher. Some scientists, including Glikson, even say this new warming **trend deserves** to be designated as an entirely new epoch – the Anthropocene.

The planet has warmed nearly 1 degree Celsius already since 1880, according to NASA. "Multiple paleoclimatic studies indicate that recent years are all the warmest, on a global basis, of at least the last 1,000 years," says the National Oceanic and Atmospheric Administration.

- 20 How much warming we see in the future depends on how much action we take to reduce greenhouse gas emissions.

For example, if countries **fulfill** their **pledges** under the Paris Agreement, but make no further **commitments** to reducing emissions, the climate modeling **nonprofit** Climate Interactive found that the planet would see **roughly** 3.3 C of warming above pre-industrial levels by 2100, though that number could

- 25 be as high as 4.4 C or as low as 1.9 C.

[...]

SCHIPANI, Vanessa. Available at: <www.factcheck.org/2018/02/will-global-warming-benefit-civilization/>. Accessed on: May 28th, 2018.

to flourish(ed):
prosperar;
desenvolver-se
warmth: calor
claim: afirmação;
reivindicação
trend: tendência
to deserve(d):
merecer
to fulfill(ed):
cumprir
pledge: promessa
commitment:
compromisso
nonprofit: sem fins
lucrativos
roughly:
aproximadamente

Com base no texto, dê respostas em português.

- 1** De acordo com o primeiro parágrafo:
- a) O que sugere Scott Pruitt em relação ao aquecimento global?
 - b) Qual a justificativa de Scott Pruitt para tal sugestão?
 - c) Quais as consequências das temperaturas mais quentes em mil anos registradas nos anos recentes?
- 2** De acordo com o quarto parágrafo:
- a) Em que época a civilização humana começou a prosperar?
 - b) O que foi a Era do Holoceno?
- 3** De acordo com o quinto parágrafo:
- a) O que tem elevado a média global ainda mais?
 - b) Como se descreve a Era do Antropoceno?
- 4** De acordo com o oitavo parágrafo, qual foi a descoberta da organização sem fins lucrativos Climate Interactive?

Dê respostas em inglês.

- 5** Identify in line 8:
- a) an expression that means "tried to get in touch with".
 - b) a word that means "however".
- 6** Rewrite the following sentences from the last paragraph using **yet**.
- "... the planet would see roughly 3.3 C of warming above pre-industrial levels by 2100, though that number could be as high as 4.4 C or as low as 1.9 C."

Going Beyond 9

Simple Present/Present Continuous

1. Simple Present

I. Formação

Infinitive		Simple Present
to speak	}	I speak
to go		You go
to brush		We brush
to catch		You catch
to try		They try
		He speaks
		She goes
		It brushes/catches/tries

O **Simple Present** é formado pelo **infinitivo** sem **to** para todas as pessoas, exceto para as terceiras pessoas do singular (**he, she, it**), às quais se acrescenta **s** ou **es**.

Acrescenta-se **es** aos verbos terminados em **s, sh, ch, x, z, o** e aos verbos terminados em **y** precedido de consoante (neste caso, o **y** muda para **i**).

Aos verbos terminados em **y** precedido de vogal, acrescenta-se apenas **s** (**to play - plays**).

II. Usos

- I. Water **exists** in three states: liquid, gaseous and solid.
- II. Our hometown **lies** in a valley.
- III. Brazilians **speak** Portuguese.
- IV. The Antarctic **refers** to the very cold most southern part of the world.
- V. We **walk** to school every day.

O **Simple Present** é usado para indicar estados permanentes, generalizações, verdades gerais, definições e ações habituais, entre outros usos.

Os seguintes advérbios e locuções adverbiais são comuns em frases com o **Simple Present**:

- always x never
- often x seldom
- generally
- usually
- sometimes
- every
 - day
 - month
 - year
 - now and then
 - etc.
- once/twice/three times/etc.
 - a week
 - a year
- on
 - wednesdays
 - weekends
 - etc.

2. Present Continuous

Formação

am/are/is + **-ing Form**

Our nephew Richard **is working** as a salesman now.

3. -ing Form

Infinitive

a) ~~to~~ speak

~~to~~ play

~~to~~ try

b) ~~to~~ live

~~to~~ flee

~~to~~ be

~~to~~ dye (tingir)

c) to lie lying
cvc

d) to trap + p
cvc

to occur + r
cvc

mas

to open

-ing Form

speaking

playing

trying

living

fleeing

being

dyeing

trapping

occurring

opening

A **-ing Form** é obtida acrescentando-se a terminação **-ing** ao **infinitivo** sem **to**, com os seguintes casos especiais:

- para verbos terminados em um só **e**, elimina-se o **e** final — exceto com **be** (*being*) e **dye** (*dyeing*).
- para verbos terminados em **ie**, muda-se o **ie** para **y**.
- para verbos de **uma** sílaba ou verbos de duas ou mais sílabas **oxítonos** e terminados em **consoante** — **vogal** — **consoante**, **dobra-se** a consoante final.

A seguir, alguns verbos oxítonos:

to admit

to confer

to commit

to prefer

to emit

to refer

to omit

to control

to permit

to occur

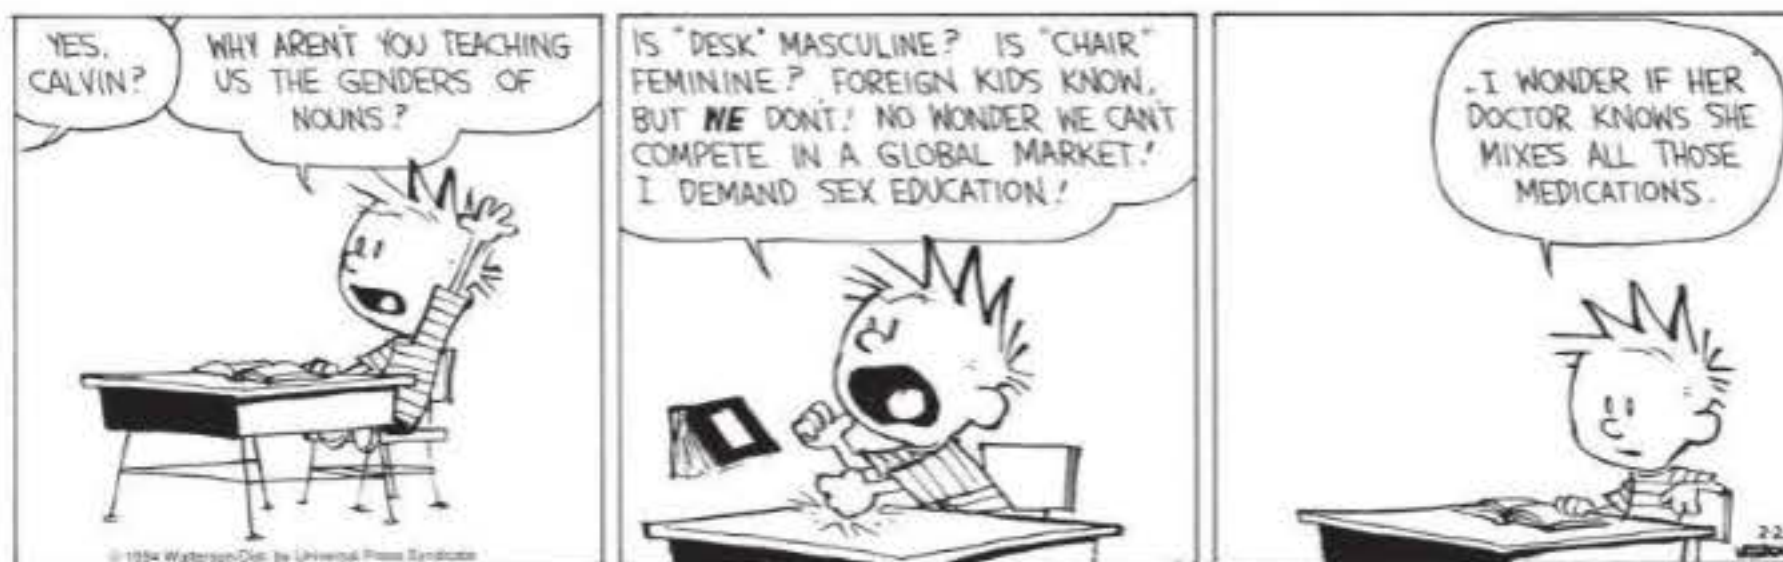

to submit

to recur

to transmit

to regret

Observe o uso do **Present Continuous** e do **Simple Present** na tira de Calvin a seguir.

Calvin & Hobbes, Bill Watterson © 1994 Watterson/
Dist. by Andrews McMeel Syndication

no wonder: não é de se admirar (não me admira)

to wonder(ed): gostaria de saber

WATTERSON, Bill. *There's Treasure Everywhere: A Calvin and Hobbes Collection*, p. 106.

Texto para as questões 1 a 5

yellow-bellied sapsucker: um tipo de pica-pau de barriga amarela

WATTERSON, Bill. *There's Treasure Everywhere: A Calvin and Hobbes Collection*. p. 14.

Baseando-se na tira de Calvin, assinale a alternativa correta.

- 1** A lacuna I (1º quadrinho) deve ser preenchida por:
 - a) I'm do.
 - b) I'm doing.
 - c) I do.
 - d) I doing.
 - e) I to do.
- 2** A lacuna II (1º quadrinho) deve ser preenchida por:
 - a) say.
 - b) saying.
 - c) is saing.
 - d) says.
 - e) to say.
- 3** No último quadrinho, a lacuna III deve ser preenchida por:
 - a) know.
 - b) am knowing.
 - c) knowing.
 - d) knows.
 - e) am know.
- 4** A forma verbal que preenche correta e adequadamente a lacuna IV (último quadrinho) é:
 - a) makes.
 - b) making.
 - c) is making.
 - d) are make.
 - e) make.
- 5** The expression **these idiots** (last frame) refers to:
 - a) Calvin.
 - b) Hobbes.
 - c) the Bird.
 - d) five boxes.
 - e) the people that set up the crossword puzzle.

Exercícios

Texto para a questão 1

Why am I compelled to write? Because the writing saves me from this complacency I fear. Because I have no choice. Because I must keep the spirit of my revolt and myself alive. Because the world I create in the writing compensates for what the real world does not give me. By writing I put order in the world, give it a handle so I can **grasp** it.

ANZALDÚA, G. E. Speaking in tongues: a letter to third world women writers. In: HERNANDEZ, J. B. (Ed.). *Women writing resistance: essays on Latin America and the Caribbean*. Boston: South End, 2003.

to grasp(ed): captar;
entender

- 1** (Enem) Gloria Evangelina Anzaldúa, falecida em 2004, foi uma escritora americana de origem mexicana que escreveu sobre questões culturais e raciais. Na citação, o intuito da autora é evidenciar as:
- razões pelas quais ela escreve.
 - compensações advindas da escrita.
 - possibilidades de mudar o mundo real.
 - maneiras de ela lidar com seus medos.
 - escolhas que ela faz para ordenar o mundo.

Texto para as questões 2 e 3

The secret of the Great Stories is that they have no secrets. The Great Stories are the ones you have heard and want to hear again. The ones you can enter anywhere and **inhabit** comfortably. They don't **deceive** you with **thrills** and **trick** endings. They don't surprise you with the **unforeseen**. They are as familiar as the house you live in. Or the smell of your lover's skin. You know how they end, yet you listen as though you don't. In the way that although you know that one day you will die, you live as though you won't. In the Great Stories you know who lives, who dies, who finds love, who doesn't. And yet you want to know again. THAT is their mystery and magic.

Disponível em: <www.goodreads.com/author/quotes/6134.ArundhatiRoy>. Acesso em: 13 set. 2011.

to inhabit(ed): habitar
to deceive(d): enganar
thrill: emoção; arrepio
trick: truque; artifício
unforeseen: imprevisto

- 2** (UFG-GO) What characterizes Great Stories is their:
- simplicity.
 - timelessness.
 - originality.
 - unpredictability.
 - mystery.
- 3** (UFG-GO) The text is metalinguistic because it:
- focuses on aesthetic effects.
 - is a reflection on the literary text.
 - appeals to the reader's feelings.
 - expresses a character's emotions.
 - gives information about reading.

Texto para as questões 4 a 6

- 1 "Hello", said a quiet, musical voice.
I looked up, **stunned** that he was speaking to me. He was sitting as far away from me as the desk allowed, but his chair was angled toward me. His hair was **dripping wet** – he looked like someone in a commercial for hair gel. His **dazzling** face was friendly, open, a slight smile on his **flawless** lips. But his eyes were careful.
- "My name is Edward Cullen," he continued. "I didn't have a chance to introduce myself last week. You must be Bella Swan."
- My mind was **spinning** with confusion. He was perfectly polite now. I had to speak; he was waiting. But I couldn't think of anything conventional to say.
- "H-how do you know my name?" I **stammered**.
- He laughed a soft laugh.
- "Oh, I think everyone knows your name. The whole town was waiting for you to arrive."

MEYER, S. *Twilight*. New York: Megan Tingley Books, 2006. p. 43.

stunned: atordada
dripping wet: escorrendo
dazzling: deslumbrante
flawless: perfeito; impecável
to spin (span; spun): girar
to stammer(ed): gaguejar

- 4 (EsPCEEx-SP) "My mind was spinning with confusion. He was perfectly polite now. I had to speak; he was waiting. But I couldn't think of anything conventional to say. 'H-how do you know my name?' I stammered." (ℓ. 11-14)
The excerpt above describes a feeling of:
- sadness.
 - deception.
 - pain.
 - nervousness.
 - anger.
- 5 (EsPCEEx-SP) According to the sentence "I looked up, stunned that he was speaking to me." (ℓ. 2), Bella:
- didn't expect Edward to approach her.
 - was feeling comfortable.
 - didn't want to be friends with Edward.
 - didn't want to talk to Edward.
 - was offended by Edward's attitude.
- 6 (EsPCEEx-SP) According to Bella's descriptions in the text, Edward was:
- intelligent.
 - boring.
 - charming.
 - inconvenient.
 - dangerous.

Texto para as questões 7 a 12

Happiness

- 1 It was almost nightfall. The whole day: rain, torrents of rain. **Drenched** to the bone, I arrived in a little Calabrian village. I had to find a **hearth** where I could dry out, a corner where I could sleep. The streets were deserted, the doors **bolted**. The dogs were the only ones to **scent** the stranger's breath; they began to **bark** from within the **courtyards**. The **peasants** in this region are wild and misanthropic, suspicious of strangers. I hesitated at every door, extended my hand, but did not
- 10 **dare** to knock.
- O for my **late** grandfather in Crete!, who took his lantern each evening and made the rounds of the village to see if any stranger had come. He would take him home, feed him, give him a bed for the night, and then in the morning see him off with a cup of wine and a slice of bread. Here in the Calabrian villages there were no such grandfathers.
- Suddenly I saw an open door **at the edge** of the village. Inclining my head, I looked in: a **murky** corridor with a lighted fire at the far end and an old lady **bent** over it. She seemed to be cooking. I crossed the **threshold** and entered. I reached the fire and sat down on a **stool** which I found in front of the hearth. The old lady was **squatting** on another stool, **stirring** the meal with a wooden spoon.
- 25 I felt that she eyed me rapidly, without turning. But she said nothing. Taking off my jacket, I began to dry it. I sensed happiness rising in me like **warmth**, from my feet to my **shins**, my thighs, my breast. Hungrily, avidly, I breathed in the delicious smell of the steam rising from the pot. Once
- 30 more I realized to what an extent earthly happiness is made to the measure of man. It is not a rare bird which we must **pursue** at one moment in heaven, at the next in our minds. Happiness is a domestic bird in our own courtyards.
- As soon as we finished, she prepared a bed for me on a
- 35 **bench** to the right of the table. I lay down, and she lay down on the other bench opposite me. Outside the rain was falling **by the bucketful**. For a considerable time I heard the water **cackle** on the roof, mixed with the old lady's calm, quiet breathing. She must have been tired, for she fell asleep the moment she inclined her head. Little by little, with the rain and the old lady's respiration, I too **slipped into sleep**. When I awoke, I saw daylight **peering through** the **cracks** in the door.
- The old lady had already risen and placed a **saucepan**
- 45 on the fire to prepare the morning milk. I looked at her now in the sparse daylight. **Shriveled** and **hump**, she could fit into the palm of your hand. Her legs were so **swollen** that she had to stop at every step and catch her breath. But her

eyes, only her large, pitch-black eyes, **gleamed** with youthful, unaging brilliance. How beautiful she must
 50 have been in her youth, I thought to myself, **cursing** man's **fate**, his inevitable deterioration. Sitting down
 opposite each other again, we drank the milk. Then I rose and **slung** my **carpetbag** over my shoulder. I
 took out my wallet, but the old lady colored deeply.

"No, no," she murmured, extending her hand.

As I looked at her in **astonishment**, the whole of her **wrinkled** face suddenly gleamed.

55 "Goodbye, and God bless you," she said. "May the Lord repay you for the good you've done me. Since
 my husband died I've never slept so well."

NIKOS KAZANTZAKIS*. <<http://grammarabout.com>>.

* Nikos Kazantzakis (1883-1957) was one of the most important Greek writers of the 20th century.

drenched: encharcado	stool: banquinho	crack: fresta; rachadura

bent: inclinada; debruçada		wrinkled: enrugada
threshold: entrada; limite		

7 (Uerj) In the third and fourth paragraphs, there are different sensory images, as in the fragment below:

"... I breathed in the delicious smell of the steam rising from the pot." (ℓ. 28-29)

In this fragment, the narrator makes use of the following type of imagery:

- a) olfactory. b) gustatory. c) acoustic. d) tactile.

8 (Uerj) The old lady is presented by means of the description of her actions and looks. The passage from the text which best describes her bodily appearance is:

- a) "... she eyed me rapidly, without turning." (ℓ. 25)
 b) "... she fell asleep the moment she inclined her head." (ℓ. 39-40)
 c) "... she could fit into the palm of your hand." (ℓ. 46-47)
 d) "... the whole of her wrinkled face suddenly gleamed." (ℓ. 54)

9 (Uerj) According to some authors, a memoir is how one remembers one's own life; an autobiography is history, requiring research, dates and facts.

In relation to the author's life, the text "Happiness" can be characterized as a memoir especially because of the presence of:

- a) factual reports. c) detailed descriptions.
 b) fictional recounts. d) personal recollections.

10 (Uerj) In the third paragraph, Kazantzakis introduces a flashback, an interruption in the telling of the major action to show an episode that happened at an earlier time.

In this narrative, the flashback has the function of:

- a) achieving a surprise effect. c) providing extra information.
 b) emphasizing the main event. d) creating a suspenseful mood.

11 (Uerj) "Happiness is a domestic bird in our own courtyards." (ℓ. 33)

This fragment contains a figure of speech which is labeled as:

- a) irony. c) metaphor.
 b) simile. d) metonymy.

- 12** (Uerj) The first paragraph describes the terrible weather, the physical state of the narrator and his unfavorable view of the village and its inhabitants.

From this beginning, one can infer that the narrator did **not** expect the peasants to:

- a) suspect him of anything.
- b) cause him any problems.
- c) give him a warm welcome.
- d) consider him a wild stranger.

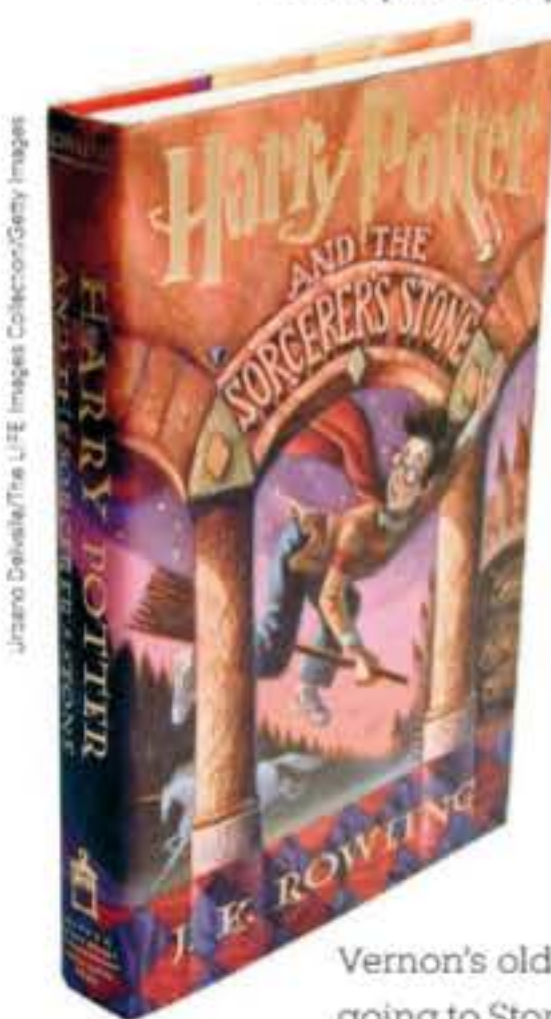

- 13** (Unicamp-SP) O excerto a seguir foi adaptado do conto "True Love" de Isaac Asimov.

My name is Joe. That is what my colleague, Milton Davidson, calls me. He is a programmer and I am a computer. I am Milton's experimental model. His Joe. Milton has never married, though he is nearly 40 years old. He has never found the right woman, he told me. One day he said, "I'll find her yet, Joe. I'm going to find the best. I'm going to have true love and you're going to help me. I'm tired of improving you in order to solve the problems of the world. Solve my problem. Find me true love."

T. Kral (org.), *Being People - An Anthology*. Washington, D.C.: USIA, n/d, p. 183.

- a) Do que Milton Davidson está cansado?
- b) Por que Milton Davidson não se casou e o que ele espera que Joe faça por ele?

Texto para as questões 14 e 15

- 1 Harry'd lived with the Dursleys almost ten years, ten miserable years, as long as he could remember, ever since he'd been a baby and his parents had died in that car crash. He couldn't remember being in the car when his parents had died.
[...]
- 5 At school, Harry had no one. Everybody knew that Dudley's gang hated that odd Harry Potter in his baggy old clothes and broken glasses, and nobody liked to disagree with Dudley's gang.
[...]
- 10 Harry was glad school was over, but there was no escaping Dudley's gang, who visited the house every single day. Piers, Dennis, Malcolm, and Gordon were all big and stupid, but as Dudley was the biggest and stupidest of the lot, he was the leader. The rest of them were all quite happy to join in Dudley's favorite sport: Harry Hunting.
- 15 This was why Harry spent as much time as possible out of the house, wandering around and thinking about the end of the holidays, where he could see a tiny ray of hope. When September came he would be going off to secondary school and, for the first time in his life, he wouldn't be with Dudley. Dudley had been accepted at Uncle Vernon's old private school, Smeltings. Piers Polkiss was going there too. Harry, on the other hand, was going to Stonewall High, the local public school. Dudley thought this was very funny.
- 20 "They stuff people's heads down the toilet the first day at Stonewall," he told Harry. "Want to come upstairs and practice?"
- "No, thanks," said Harry. "The poor toilet's never had anything as horrible as your head down it – it might be sick." Then he ran, before Dudley could work out what he'd said.
[...]
- 25 That evening, Dudley paraded around the living room for the family in his brand-new uniform.
[...]
- As he looked at Dudley in his new knickerbockers, Uncle Vernon said gruffly that it was the proudest moment of his life. Aunt Petunia burst into tears and said she couldn't believe it was her Ickle Dudleykins, he looked so handsome and grown-up. Harry didn't trust himself to speak. He thought two of his ribs might already have cracked from trying not to laugh.

- 30 There was a horrible smell in the kitchen the next morning when Harry went in for breakfast. It seemed to be coming from a large metal tub in the sink. He went to have a look. The tub was full of what looked like dirty rags swimming in gray water.
- "What's this?" he asked Aunt Petunia.
- "Your new school uniform," she said.
- 35 Harry looked in the bowl again.
- "Oh," he said, "I didn't realize it had to be so wet."
- "I'm dyeing some of Dudley's old things gray for you. It'll look just like everyone else's when I've finished."
- Harry seriously doubted this, but thought it best not to argue. He sat down at the table and tried not to think about how he was going to look on his first day at Stonewall High – like he was wearing bits of old
- 40 elephant skin, probably.

J. K. ROWLING, *Harry Potter and the Sorcerer's Stone*. New York: Arthur A. Levine Books, 1997.

- 14** (Uerj) Tomando por base os dois episódios dos uniformes, compreende-se que Harry e Dudley recebiam tratamentos diferenciados. Apresente o sentimento de Petunia em relação a Dudley. Além disso, identifique a ação que demonstra o desprezo dela por Harry.
- 15** (Uerj) Conforme se observa no primeiro parágrafo, a infância de Harry não foi feliz. Explique o porquê de Harry viver com os Dursleys. Identifique, também, os primeiros nomes de dois familiares de Harry e o grau de parentesco que cada um mantém com ele.

Going Beyond 10

Infinitive	Simple Past	Past Participle	Infinitive	Simple Past	Past Participle
to watch	watched	watched	to see	saw	seen
to work	worked	worked	to buy	bought	bought

Os verbos irregulares apresentam formas variadas no **Simple Past** e no **Past Participle**.

Para os verbos regulares, o **Simple Past** é formado acrescentando-se a terminação **ed** ao **infinitivo** sem **to**.

II. "Casos especiais" para verbos regulares

a) ~~to imagin~~ + **ed** = **imagined**

~~to believ~~ + **ed** = **believed**

Para verbos terminados em **e**, elimina-se o **e** antes de acrescentar **ed**.

↓
b) ~~to cry~~ + **i** + **ed** = **cried**

~~to obey~~ + **ed** = **obeyed**

Para verbos terminados em **y** precedido de **consoante**, muda-se o **y** para **i** antes de acrescentar **ed**. Verbos terminados em **y** precedido de **vogal** seguem a regra geral.

- c) $\text{fit} + \text{t} + \text{ed} = \text{fitted}$
cvc
- $\text{refer} + \text{r} + \text{ed} = \text{referred}$
cvc
- mas
- $\text{open} + \text{ed} = \text{opened}$
cvc

Para verbos de uma sílaba terminados em uma consoante precedida de apenas uma vogal (cvc), **dobra-se a consoante final** antes de acrescentar **ed**.

Para verbos com duas ou mais sílabas e que tenham essa terminação (cvc), dobra-se a consoante final apenas quando o verbo for **oxítono**, isto é, quando a sílaba tônica for a última.

III. Usos

Last night Bob **took** his family for a walk by the lake. His parents **used to do** that on summer nights when he **was** young.

O **Simple Past** é usado para expressar ações completas no passado. Quando se pretende indicar **hábito no passado**, usa-se **used** seguido de **infinitivo** com **to**.

2. Past Continuous

I. Formação

- I/He/She/It: **was** + **-ing Form**
- You/We/They: **were** + **-ing Form**

II. Usos

- I. What **were you doing** at this time last night?
- II. I **was sleeping** and the kids **were playing** games on their tablets.
- III. While I **was reading** the paper, the phone **rang**.

O **Past Continuous** é usado para indicar ações ou situações que **estavam ocorrendo** em determinado momento no passado. Quando essas ações são interrompidas por outra ação, esta é colocada no **Simple Past**.

As I **heard** a noise, I realized there was someone else in the house.

Lembre-se de que com verbos como **hear, see, smell, taste, understand, know, want** e **mean**, entre outros, não se usam os **continuous tenses**.

3. Past Perfect

I. Formação

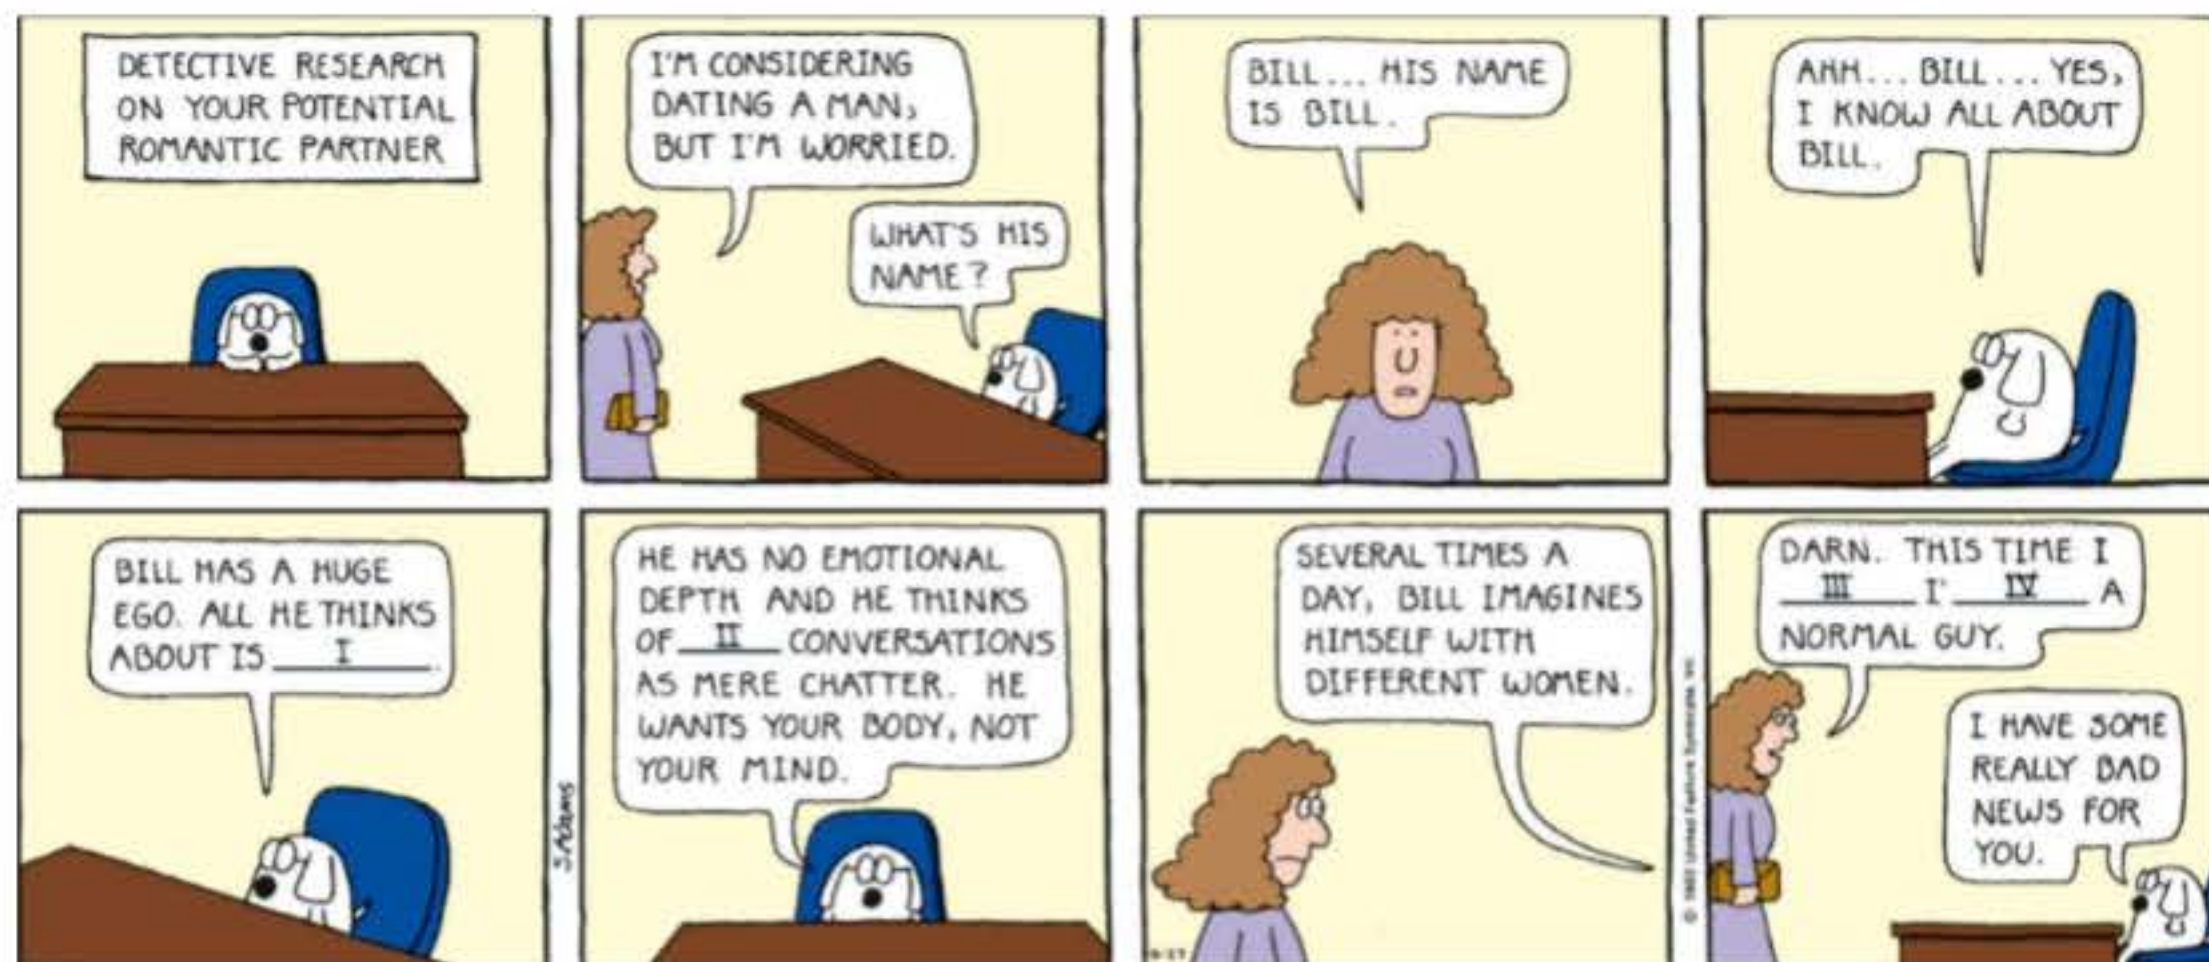

had + **Past Participle**

II. Usos

- I. When Tom **arrived** home, his wife **had** already **left**.
- II. We **wanted** to buy the car we **had seen** before.

Usa-se o **Past Perfect** para indicar uma ação passada que ocorreu **antes** de outra também no passado (que, por sua vez, é colocada no **Simple Past**).

Cartum para as questões 1 a 5

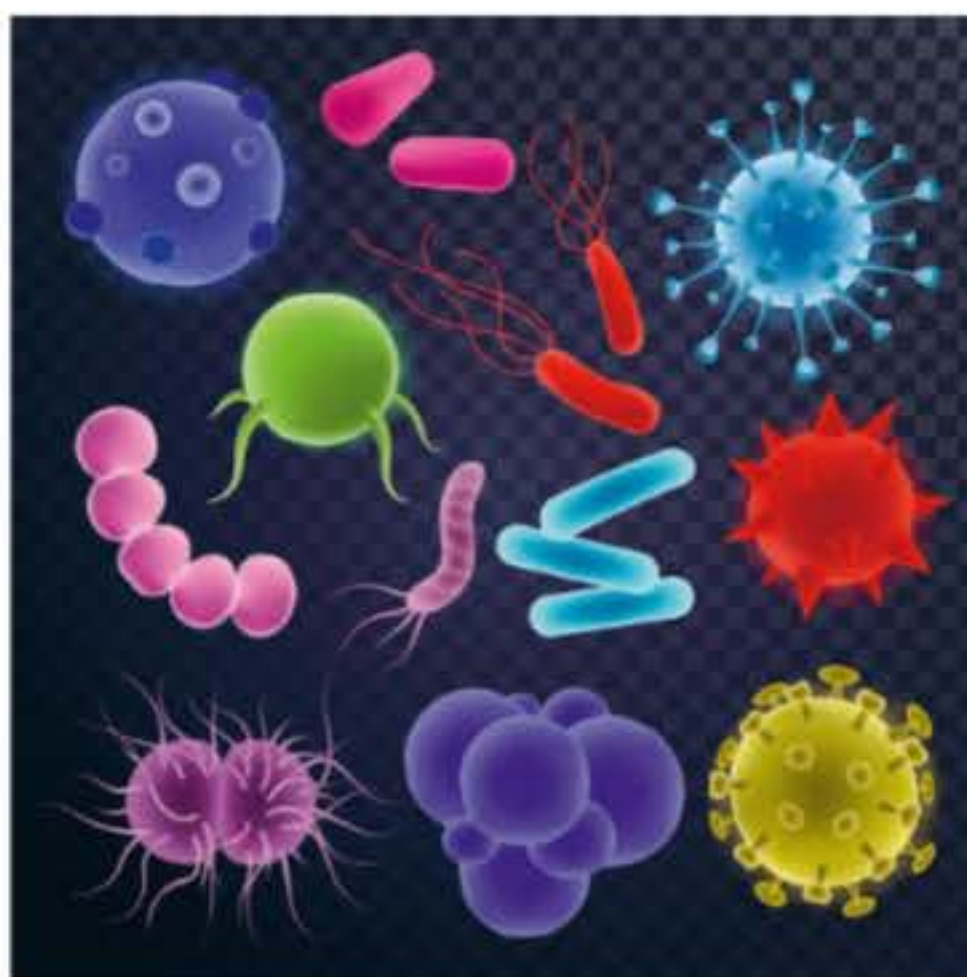

ADAMS, Scott. London: Bantam, an imprint of Macmillan Publishers LTD, 1997. p. 222.

- 1 In the 5th frame, blank I should be filled with:
 - a) your.
 - b) herself.
 - c) his.
 - d) himself.
- 2 In the 6th frame "... and he thinks of II conversations as mere chatter.", blank II should be filled with:
 - a) yours.
 - b) you.
 - c) its.
 - d) your.
- 3 The verb forms that fill blank III and blank IV are, respectively:
 - a) think - find.
 - b) thought - d found.
 - c) thank - d founded.
 - d) had thought - found.
- 4 In the 4th frame "Yes, I know all about Bill.", the word Bill could be correctly replaced by:
 - a) his.
 - b) her.
 - c) him.
 - d) yourself.
- 5 In the 5th frame "Bill has a huge ego.", the opposite of **huge** would be:
 - a) tiny.
 - b) less.
 - c) sample.
 - d) fancy.

Text Comprehension: Bacteria

Neste capítulo, trataremos do tema "bactérias". Leia o texto a seguir para aprofundar seus conhecimentos a respeito desse assunto:

What is a Bacterium?

A bacterium is the singular form of the plural word "**bacteria**". To put it another way, you use "bacterium" when there is only one of them and only use the word "bacteria" if you are referring to more than one. Many people get this wrong and you often see a phrase such as "a bacteria can cause disease" when of course it should be "a bacterium can cause disease".

A bacterium is a living cell consisting of a fluid called cytoplasm enclosed by a cell membrane and cell wall. A bacterium contains DNA in the cytoplasm in the form of a chromosome. Although a bacterium only has one chromosome it can have other, smaller DNA elements called **plasmids**. The chromosome of a bacterium is never surrounded by a nuclear membrane and this fact defines a bacterium as a prokaryote. Organisms that have their DNA in a nucleus surrounded by a nuclear membrane are called eukaryotes. A bacterium also has ribosomes in the cytoplasm. Ribosomes are involved in making proteins.

Many people confuse a bacterium and a virus. They are totally different in many ways. A bacterium is much bigger than a virus. A bacterium is much more complex. One very important difference is that a bacterium can be killed with an antibiotic while a virus cannot. So if you have a viral infection, antibiotics will not help. However, antibiotics are sometimes used to prevent people with a virus infection from catching another (bacterial) infection.

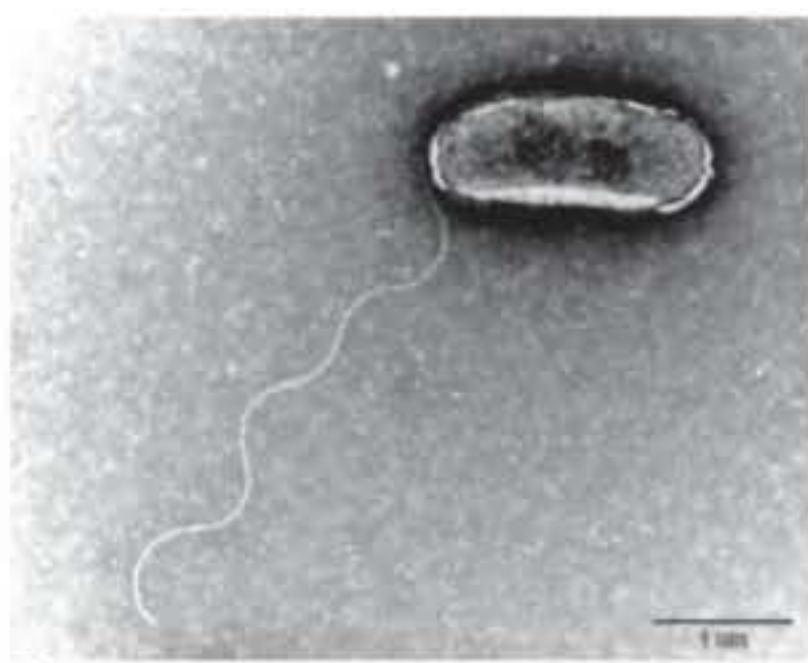

Viruses and bacteria are both microorganisms. The study of bacteria is called bacteriology and it is a branch of microbiology.

Available at: <www.highveld.com/microbiology/what-is-a-bacterium.html>. Accessed on: May 30th, 2018.

* Em muitos textos a palavra "bacteria" é usada como se fosse singular. O mesmo ocorre com as palavras "media" (originalmente plural) e "data".

Texto para as questões 1 a 5

Bacteria deep in Okinawa seas could offer clues on origins of life

Reprodução/Japan Agency for Marine Earth Science and Technology

This thermophilic, hydrogen-oxidizing and sulfur-reducing bacterium was found in the deep seas of Okinawa. (Provided by the Japan Agency for Marine Earth Science and Technology)

1 A bacterium species that uses multiple methods to survive in the deep seas of Okinawa Prefecture could provide **clues** on how life was formed on Earth, Japanese researchers said.

5 The scientists from the Japan Agency for Marine-Earth Science and Technology (JAMSTEC) and other institutions discovered the new and fairly primitive species of thermophilic, hydrogen-oxidizing and sulfur-reducing bacteria, in 2003.

10 The bacterium species was found in **seabed mud** near a hydrothermal vent about 1,370 meters deep off Yonagunijima Island, Okinawa Prefecture. The bacteria measures about 1-2 micrometers **in length**.

15 The team's study found that the bacteria use hydrogen as an energy source to produce amino acids, which are essential for life activity, and other nutrients from available **organic matter**.

20 When no organic substances are available, the bacteria can still synthesize organic matter and other products from carbon dioxide, **albeit** at a lower efficiency, the study showed.

A number of theories have been put forward on the origins of life on Earth.

25 One hypothesis says life originated where organic matter, a source of nutrition, was abundantly available. But that does not explain how **early** organisms could secure enough organic substances to survive when they had **used up** all the organic matter around them.

Another theory argues that early life forms synthesized nutrition on their own by using energy obtained from their surroundings. But this theory cannot **account for** how they could continue producing the necessary amounts of nutrition.

35 "Organisms from the early stages of life on Earth were perhaps using both mechanisms flexibly, like the bacterium species we have found is doing," said Takuro Nunoura of JAMSTEC, a member of the research team.

The research results were published online Feb. 2 in *Science*, a U.S. magazine.

SUGIMOTO, Takashi. The Asahi Shimbun, February 15th, 2018. Available at: <www.asahi.com/ajw/articles/AJ201802150001.html>. Accessed on: May 30th, 2018.

clue: pista; "dica"

seabed mud: lama do leito do mar

in length: de comprimento

organic matter: matéria orgânica

albeit: embora; apesar de

early: primitivo

to use(d) up: esgotar; usar totalmente

to account(ed) for: explicar

1 As formas verbais a partir do adjetivo **deep** (l. 2) e do substantivo **power** são, respectivamente:

- a) deepest - powerful.
- b) deeper - powered.
- c) deepen - empower.
- d) deeping - poweren.
- e) deep - empower.

2 Segundo pesquisadores japoneses,

- a) problemas de poluição no fundo do mar do Japão poderiam ser resolvidos por uma nova bactéria encontrada.
- b) uma bactéria encontrada no fundo do mar pode fornecer pistas de como foi formada a vida na Terra.
- c) a bactéria encontrada no mar do Japão é idêntica àquela encontrada em 2003.
- d) o Japão tem encontrado diversas bactérias que sugerem o início da vida na Terra.
- e) a vida na Terra foi formada, provavelmente, nos mares do Japão.

3 A bactéria encontrada no fundo do mar no Japão:

- a) tem uma alta eficiência para sintetizar matéria orgânica.
- b) não demonstrou substância orgânica disponível.
- c) é formada a partir do dióxido de carbono.
- d) produz aminoácidos e outros nutrientes.
- e) desenvolveu-se como forma de combate à poluição.

4 In the fragment "When no organic substances are available, the bacteria can still synthesize organic matter and other products from carbon dioxide, albeit at a lower efficiency..." (ℓ. 18-20), **albeit** can be replaced, with no change in meaning, by:

- a) although.
- b) in addition.
- c) therefore.
- d) moreover.
- e) hence.

5 Segundo o texto, inúmeras teorias têm sido apresentadas em relação às origens da vida na Terra. Explícite, em português, duas hipóteses mencionadas no texto e suas respectivas ressalvas.

Texto para as questões 6 e 7

Drug-Resistant "Super Bacteria" Reportedly Found in Rio's Olympic Waters

By Lucy Westcott

1 A man sits on a deck over the Rio Carioca, near Guanabara Bay in Rio de Janeiro, Brazil, Dec. 16, 2014.

Windsurfers and sailors **beware**: Drug-resistant "super bacteria" have been found by researchers in the same waters off Rio de Janeiro where many water-sports events are **scheduled** to take place during the Summer Olympic Games in July 2016.

Researchers at Brazil's Oswaldo Cruz Foundation, a scientific research center, discovered the bacteria in samples collected from three locations, including Rio's Flamengo Beach, popular among swimmers, and the Rio Carioca, a river that runs into the Guanabara Bay, where sailing and windsurfing events will take place, Reuters reports.

Rio's residents have been told to exercise caution when swimming off Flamengo Beach, another area studied by researchers that is "frequently declared **unfit** for swimming," the BBC reports, although most people ignore the **warning**.

As part of their Olympic **bid**, Rio agreed to clean Guanabara Bay by up to 80 percent, although the city's Mayor Eduardo Paes has said that target would not be met.

Ana Paula D'Alincourt Carvalho Assef, coordinator of the study, said the bacteria have potential to cause infections that could result in hospitalization. **So far**, there have been no recorded infections from the contaminated waters.

25 "Since the super bacteria are resistant to the most modern medications, doctors need to **rely on** drugs that are rarely used because they are toxic to the organism," she told the Associated Press.

Disponível no site: <www.newsweek.com/drug-resistant-super-bacteria-reportedly-lurking-rios-olympic-waters-292582>. (fragmento).

beware: fique atento; tome cuidado
scheduled: agendado
unfit: imprópria
warning: aviso; advertência
bid: oferta; lance
so far: até agora
to rely(ied) on: confiar em; contar com

6 (UFU-MG) Em relação à bactéria mencionada no texto, é correto afirmar que ela representa:

- I. uma ameaça para os Jogos Olímpicos de 2016.
- II. um avanço nas pesquisas do Instituto Oswaldo Cruz.
- III. um risco para surfistas e banhistas do Rio de Janeiro.
- IV. um motivo de pânico para os moradores do Rio de Janeiro.

Assinale a alternativa que apresenta apenas afirmativas corretas.

- a) II e IV.
- b) I e III.
- c) I e IV.
- d) III e IV.

7 In the sentence "... Rio agreed to clean Guanabara Bay by up to 80 percent, although the city's Mayor Eduardo Paes has said that target would not be met." (ℓ. 18-20), **although** could be replaced, with no change in meaning, by all the following, **EXCEPT**:

- a) even though.
- b) albeit.
- c) despite the fact that.
- d) though.
- e) instead of.

Texto para as questões 8 a 13

The Rise of Antibiotic Resistance

By The Editorial Board

1 The World Health Organization has **surveyed** the growth of antibiotic-resistant germs around the world – the first such survey it has ever conducted – and come up with disturbing findings. In a report **issued** late last month, the organization found that antimicrobial resistance in bacteria (the main focus of the report), fungi, viruses and parasites is an increasingly serious threat in every part of the world. "A problem so serious that it threatens the **achievements** of modern medicine," the organization said. "A post-antibiotic era, in which common infections and minor **injuries** can kill, far from being an apocalyptic fantasy, is instead a very real possibility for the 21st century."

The growth of antibiotic-resistant pathogens means that in ever more cases, **standard** treatments no longer work, infections are harder or impossible to control, the risk of spreading infections to others is increased, and illnesses and hospital stays are prolonged. All of these **drive up** the costs of illnesses and the risk of death. The survey **sought** to determine the **scope** of the problem by asking countries to submit their most recent **surveillance data** (114 did so). Unfortunately, the data was incomplete because few countries **track** and monitor antibiotic resistance **comprehensively**, and there is no standard methodology for doing so.

Still, it is clear that major resistance problems have already developed, both for antibiotics that are used routinely and for those **deemed** "last resort" treatments to cure people when all else has failed. Carbapenem antibiotics, a class of drugs used as a last resort to treat life-threatening infections caused by a common intestinal bacterium, have failed to work in more than half the people treated in some countries. The bacterium is a major cause of hospital-acquired infections such as pneumonia, **bloodstream** infections, and infections in newborns and intensive-care patients. Similarly, the failure of a last-resort treatment for gonorrhoea has been confirmed in 10 countries, including many with advanced health care systems, such as Australia, Canada, France, Sweden and Britain. And resistance to a class of antibiotics that is routinely used to treat urinary tract infections caused by *E. coli* is **widespread**; in some countries the drugs are now ineffective in more than half of the patients treated. This **sobering** report is intended to kick-start a global campaign to develop tools and standards to track drug resistance, measure its health and economic impact, and design solutions.

The most urgent need is to minimize the overuse of antibiotics in medicine and agriculture, which accelerates the development of resistant **strains**. In the United States, the Food and Drug Administration (FDA) has issued voluntary **guidelines** calling on drug companies, animal producers and veterinarians to stop indiscriminately using antibiotics that are important for treating humans on **livestock**; the drug companies have said they will **comply**. But the agency, **shortsightedly**, has appealed a court order requiring it to ban the use of penicillin and two forms of tetracycline by animal producers to promote growth unless they provide proof that it will not promote drug-resistant microbes.

The pharmaceutical industry needs to be encouraged to develop new antibiotics to supplement those that are losing their **effectiveness**. The Royal Pharmaceutical Society, which represents pharmacists in Britain, called this month

for stronger financial incentives. It said that no new class of antibiotics has been discovered since 1987, largely because the financial returns for finding new classes of antibiotics are too low. Unlike lucrative drugs to treat chronic diseases like cancer and cardiovascular **ailments**, antibiotics are typically taken for a short period of time, and any new drug is apt to be used **sparingly** and held in reserve to treat patients resistant to existing drugs. Antibiotics have transformed medicine and saved **countless** lives over the past seven decades. Now, **rampant** overuse and the **lack** of new drugs **in the pipeline** threaten to **undermine** their effectiveness.

www.nytimes.com. Adaptado.

to survey(ed):	pesquisar; examinar

- 8** (Unifesp) No trecho do quarto parágrafo "... has appealed a court order requiring it to ban the use of penicillin..." (l. 54-55), **it** refere-se a:
- drug companies.
 - Food and Drug Administration.
 - penicillin.
 - a court order.
 - animal producers.

- 9** (Unifesp) Segundo o último parágrafo do texto,
- a) os antibióticos estão perdendo sua eficácia devido ao seu uso abusivo.
 - b) daqui a 70 anos os atuais antibióticos estarão todos superados.
 - c) há diversas pesquisas com novas classes de drogas sendo testadas em animais.
 - d) muitas pessoas morrerão devido a infecções comuns sem tratamento.
 - e) o primeiro antibiótico de largo espectro foi criado na década de 1970.
- 10** (Unifesp) Segundo o texto, o relatório da Organização Mundial da Saúde:
- a) constatou que as infestações por parasitas ainda não têm antídotos eficientes.
 - b) concentrou-se no problema das bactérias resistentes aos antibióticos existentes.
 - c) utilizou dados detalhados de mais de 114 países para verificar os resultados.
 - d) revelou que muitas internações hospitalares são desnecessárias e dispendiosas.
 - e) comparou as classes de antibióticos descobertas após 1987 para avaliar sua eficácia.
- 11** (Unifesp) According to the fourth paragraph of the text, the Food and Drug Administration:
- a) allows the use of growth promoters in agriculture.
 - b) convinced animal producers to use only tetracycline to promote animal growth.
 - c) banned the use of penicillin and tetracycline by animal producers.
 - d) proved that antibiotic use in agriculture doesn't pose any harm.
 - e) issued a quite mild guideline to tackle excessive antibiotic use in livestock.
- 12** (Unifesp) Segundo o texto, a Royal Pharmaceutical Society do Reino Unido afirma que:
- a) o câncer e as doenças cardiovasculares também precisam de pesquisas para produzir antibióticos específicos.
 - b) há um antibiótico experimental de dose única em testes clínicos desde 1987.
 - c) o ciclo de tratamento com antibióticos deve ser revisto para que essas drogas sejam viáveis para a indústria farmacêutica.
 - d) a indústria farmacêutica conseguiu lançar poucos antibióticos alternativos eficientes desde 1987.
 - e) incentivos financeiros são necessários para o desenvolvimento de novas classes de antibióticos.
- 13** (Unifesp) Segundo o texto, um dos objetivos do relatório da Organização Mundial da Saúde é:
- a) fazer um levantamento inicial dos principais micro-organismos que causam doenças.
 - b) evitar a contaminação de pessoas saudáveis por drogas ineficientes.
 - c) identificar os países que não têm dados fidedignos sobre a resistência aos antibióticos.
 - d) iniciar uma campanha mundial para desenvolver metodologias para acompanhar a resistência às drogas.
 - e) fornecer subsídios à indústria farmacêutica para atualizar as drogas existentes.

Texto para a questão 14

Awareness campaigns may help some people get useful support and treatment, but they might also **prompt** healthy people to start taking drugs they do not need. "Drug company **sponsorship** doesn't mean the information is **bogus** – but it does raise a red flag because companies do stand to benefit from increasing diagnoses, which leads to more treatment," says Steve Woloshin, a researcher at the Dartmouth College Institute for Health Policy and Clinical Practice. It can be difficult for consumers to know if a condition they are hearing about is part of a drug company awareness campaign – TV ads and Web sites do not always **disclose** company sponsorship – but consumers can **look out for** phrases such as "the disease your doctor has never heard of," which can be red flags. Most important, before starting a new treatment, is to always talk to your doctor about risks and benefits. "The key questions to ask about treatment are 'What is likely to happen to me if I am not treated? What is likely to happen to me if I am – including side effects?'" Woloshin says.

Scientific American Mind, September/October 2015.

awareness:
conscientização
to prompt(ed):
induzir
sponsorship:
patrocínio
bogus: falsa
to disclose(d): revelar
to look(ed) out for:
prestar atenção a

14 (Fuvest-SP) Baseando-se no texto e redigindo em **português**, atenda ao que se pede.

- Aponte uma vantagem e uma desvantagem presentes em campanhas de conscientização sobre problemas de saúde, veiculadas pelos meios de comunicação.
- Quais são os dois questionamentos a serem feitos ao médico antes do início de qualquer tratamento?

Going Beyond 11

Simple Future/“Going to” Future/Imperative/Time Clauses

Atenção para o uso do **Simple Future (will)**, do **“going to” Future**, e observe a relação entre os tempos verbais nas **Time Clauses** na tira de Garfield a seguir:

DAVIS, Jim. *Garfield, Survival of the Fattest: His 41st Book*. p. 48.

No 3º quadrinho “*when she catches you, she’s going to do **this** to you*”, nota-se o uso do **Simple Present (catches)** na **Time Clause** e do **“going to” Future** na oração principal.

1. Simple Future

Formação

I	}	will/shall + infinitivo sem to
We		
You		
He, She, It	}	will + infinitivo sem to
You		
They		

Dad **will** talk to you later.

O **Simple Future** é formado pelo auxiliar **will** (para todas as pessoas) seguido do **infinitivo** sem **to** do verbo principal. Em linguagem formal, a forma **shall** pode aparecer em lugar de **will** para **I**, **We** e **You**.

Os seguintes advérbios ou locuções adverbiais são comuns em orações com ideia de futuro:

- tomorrow**
- next** (week, month, etc.)
- in** (within) + tempo

- Our parents **will be** back home *in two days*.
- We’ll **see** you again *next week*.

2. "Going to" Future

- I. Alice is **going to sing** for us tonight.
- II. We **are going to show** you how to do the work tomorrow.

○ **Present Continuous** do verbo **to go** seguido do **infinitivo** com **to** pode ser usado para expressar ação futura.

3. Imperative

- Affirmative: ~~to~~ help { **Help** Mom with the boxes, please.
Let's help Mom with the boxes.
- Negative: ~~to~~ do { **Don't** do this.
Let's not do this.

○ **Affirmative Imperative** é formado pelo **infinitivo** sem **to** ou usando-se **let's + infinitivo** sem **to**.

O Negative Imperative é constituído de **don't + infinitivo** sem **to** ou usando-se **let's not + infinitivo** sem **to**.

4. Time Clauses

- I. When she **comes** home tonight, we { **will talk** to her.
↓
S. Present } **are going to talk** to her.
- II. As soon as they **are** ready tomorrow, { they **will give** us a call.
} **give** us a call.

Nas **Time Clauses** (orações subordinadas adverbiais temporais) com ideia de **futuro**, usa-se geralmente o **Simple Present**. Na oração principal (**Main Clause**), usa-se o **Simple Future**/"going to" Future ou **Imperative** (quando não há sujeito exposto).

As principais conjunções usadas nesse tipo de oração são **when, as soon as, until, by the time, before, after, while**, entre outras.

- I. We **won't talk** to her *until* she { **finishes** her homework.
 has finished her homework.
- II. *By the time* she's **getting up** tomorrow, we'll **be** ready to leave.

Às vezes o **Simple Present Perfect** ou o **Present Continuous** é usado em lugar do **Simple Present** nas **Time Clauses** com ideia de futuro.

Nas questões 1 a 5, assinale a alternativa que contém as expressões corretas para preencher a(s) lacuna(s).

1 _____ the door until after the officer _____ you his badge.

- a) Not open – show
- b) Will not open – shows
- c) Will not open – will show
- d) Don't open – have shown
- e) Don't open – shows

2 As soon as we _____ who he is, _____ his family.

- a) find out – we will call
- b) will find out – call
- c) found out – will call
- d) will find out – let's call
- e) will find out – will call

3 (UGF-RJ) When your father _____ home, he will be very tired.

- a) comes
- b) come
- c) coming
- d) came
- e) will come

4 (PUCC-SP) I hope to finish University before I _____ twenty-one.

- a) have
- b) am
- c) will be
- d) be
- e) will have

5 (Ueba) _____ here until the mail _____.

- a) Will wait – arrives
- b) Wait – will arrive
- c) Wait – arrives
- d) Will wait – will arrive
- e) Let's wait – arrive

Text Comprehension: Viruses

Neste capítulo, trataremos do tema “vírus”. Leia o texto a seguir para aprofundar seus conhecimentos a respeito desse assunto.

What are viruses?

Almost every ecosystem on Earth contains viruses.

Before entering a cell, viruses exist in a form known as virions.

During this phase, they are roughly one-hundredth the size of a bacterium and consist of two or three distinct parts:

- genetic material, either DNA or RNA;
- a protein coat, or capsid, which protects the genetic information;
- a lipid envelope is sometimes present around the protein coat when the virus is outside of the cell.

Viruses do not contain a ribosome, so they cannot make proteins. This makes them totally dependent on their host. They are the only type of microorganism that cannot reproduce without a host cell.

[...]

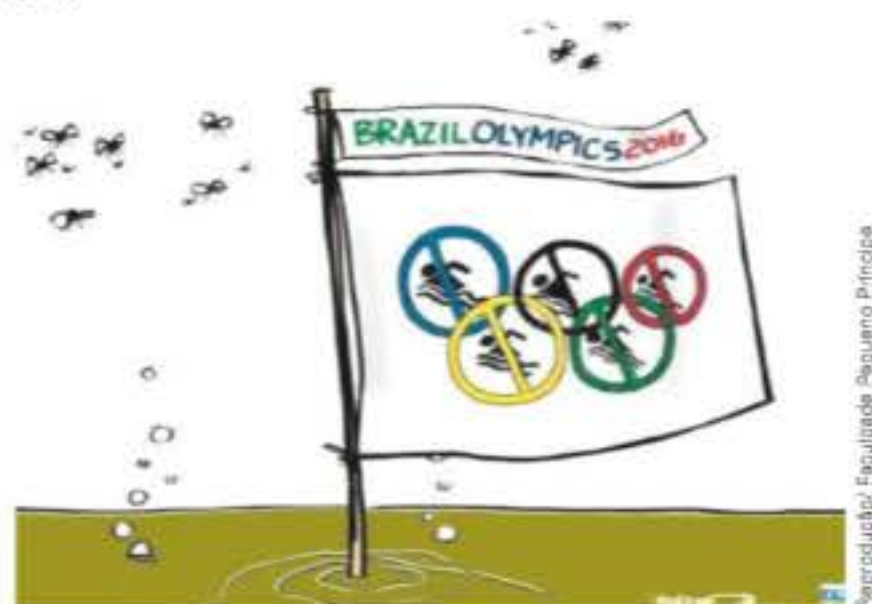

Medical News Today, May 30th, 2017. Available at: <www.medicalnewstoday.com/articles/158179.php>. Accessed on: June 13th, 2018.

Effects of viruses can range from life-threatening to virtually symptomless.

Exercícios

Imagem para a questão 1

1 (FPP-PR) Which Brazilian problems can be deduced from this image?

- a) Mosquitoes, diseases and polluted waters.
- b) Bad hygiene and inability to swim.
- c) Bad weather and bad structure.
- d) Hot weather and bad athletes.
- e) Zika virus and bad swimmers.

Texto para as questões 2 e 3

Anti-vaxxer parents should really know about herd immunity before they skip immunizations

1 Last week, a judge in Michigan sentenced a mother to seven days in jail because she wouldn't vaccinate her son, even though she was ordered by the court to do so. She's one of an increasing number of parents who may believe
5 that kids who don't receive vaccines for infectious illnesses can still be protected through something called herd immunity. They may be wrong.

Herd immunity refers to the protection a person may have from transmissible illnesses when a certain
10 percentage of the population is vaccinated for said illness. The problem, though, is many health experts don't completely agree on what that figure should be to prevent an outbreak – like the one that started in Disneyland a few years ago – from occurring. The potential for a resurgence
15 of infectious diseases could be downright catastrophic.

[...]

<http://www.newsweek.com/anti-vaxxers-herd-immunity-skip-vaccines-immunizations-683590>

2 (Unisal-SP) What is the aim of this text?

- a) To spread the information about an immunization campaign.
- b) To make parents understand that not giving their children immunization is a crime.
- c) To warn parents not to let their children miss immunizations.
- d) To show the experts' opinion on herd immunity.
- e) To make people remember Disneyland's infectious story.

3 The expression **to do so** (ℓ. 3) means:

- a) to sentence a mother to jail.
- b) to vaccinate the son.
- c) to order by the court.
- d) to know about herd immunity.
- e) to be protected.

Texto para as questões 4 a 7

Reprodução: Fuvest

1 About half of the world's population is at risk of contracting dengue, according to the World Health
5 Organization. The mosquito is found in tropical and subtropical climates around the world; however, dengue

does not naturally occur in these creatures: the mosquitoes
10 get dengue from us.

The mechanism of dengue infection is simple. Female mosquitoes bite humans because they need the protein found in our blood to produce eggs. (Male mosquitoes do not bite.) If the mosquito bites someone with dengue – and
15 then, after the virus's **roughly** eight- to 12-day replication period, bites someone else – it passes dengue into its next victim's bloodstream.

There is no vaccine against dengue, but infecting mosquitoes with a natural bacterium called *Wolbachia*
20 blocks the insects' ability to pass the disease to humans. The microbe spreads among both male and female mosquitoes: infected females lay eggs that harbor the bacterium, and when *Wolbachia*-free females **mate** with infected males, their eggs simply do not **hatch**. Researchers
25 are now releasing *Wolbachia*-infected females into the wild in Australia, Vietnam, Indonesia and Brazil.

Scientific American, June 2015. Adaptado.

roughly: aproximadamente
to mate(d): acasalar-se
to hatch(ed): eclodir

4 (Fuvest-SP) De acordo com o texto, a infecção por dengue:

- a) propaga-se quando mosquitos fêmeas picam seres humanos infectados e retransmitem a doença a outras pessoas.
- b) é provocada por mosquitos infectados depois do acasalamento.
- c) desenvolve-se por meio das fêmeas, que transmitem o vírus para os machos, num círculo vicioso que se repete periodicamente.
- d) desenvolve-se no corpo humano após doze dias da picada, período de incubação do vírus.
- e) altera a proteína presente no sangue humano que é procurada pelos mosquitos fêmeas.

5 (Fuvest-SP) Segundo o texto, a bactéria *Wolbachia*, se inoculada nos mosquitos, bloqueia a transmissão da dengue porque:

- a) torna os machos estéreis.
- b) interfere no período de acasalamento dos mosquitos.
- c) impede a multiplicação do vírus nas fêmeas.
- d) impede a eclosão dos ovos que contêm o vírus.
- e) diminui a quantidade de ovos depositados pelas fêmeas.

6 In the sentence “*The mosquito is found in tropical and subtropical climates around the world; however, dengue does not naturally occur in these creatures: the mosquitoes get dengue from us.*” (ℓ. 5-10), **however** could be replaced, with no change in meaning, by:

- a) thus.
- b) nevertheless.
- c) in addition.
- d) therefore.
- e) hence.

7 Choose the alternative that shows the same meaning for the following phrase from the text: “*There is no vaccine against dengue...*” (ℓ. 18)

- a) There isn't no vaccine against dengue.
- b) There isn't not any vaccine against dengue.
- c) There isn't not no vaccine against dengue.
- d) There is any vaccine against dengue.
- e) There isn't any vaccine against dengue.

Texto para as questões 8 a 13

SMALLPOX

1 SMALLPOX is a horrible disease. It is easily transmitted, causes **blisters** all over the body, and kills around 30% of those it infects. **Or rather**, it did, for smallpox no longer exists in nature. After a decades-long campaign of vaccination,

5 the last wild case was diagnosed in 1977. Three years later, the World Health Organisation (WHO) declared the world free of the disease. The annihilation of an illness that as recently as 1967 was **slaughtering** 2 million people a year is rightly seen as a triumph of modern medicine.

10 But the virus is not gone completely. Officially, two **reservoirs** remain, behind locked doors and strict biosafety protocols, in secure laboratories run by America's Centres for Disease Control (CDC) and the State Research Centre of Virology and Biotechnology, in Russia. On July 8th, though,

15 the CDC announced that health researchers in Maryland had discovered **vials** of smallpox sitting in a forgotten refrigerator in a corner of a **storehouse** belonging to the Food and Drug Administration, America's medical regulator.

20 As soon as the vials were discovered they were taken to the CDC's **headquarters**, in Atlanta, where they are being tested to see if they are still infectious. That done, they will be destroyed under the supervision of the WHO. The FBI, meanwhile, is trying to work out where they came from

25 – they seem to date from the 1950s – and how they were forgotten. The whole episode is embarrassing. It will also provide more fuel for a long-running argument about whether **hanging on to** smallpox samples, even in the official labs, is a good idea.

30 Many, including scientists involved in the original eradication campaign, think there is no reason to retain such a pestilential pathogen, and that the job of eliminating it should be finished properly. A report by the WHO in 2010 agreed. The revelation that America, which might

35 be expected to have good record-keeping, cannot **keep track of** all its samples does little to inspire trust.

But the discovery can be argued the other way, too. The official justification for keeping the samples is that they would help researchers to fight a renewed **outbreak** of the disease,

40 either from an undetected natural reservoir or if some unethical country had hung on to samples of its own, perhaps with a view to building a biological **weapon** out of them. And this is not the first time that forgotten samples have been discovered: a **cache turned up** in eastern Europe

45 in the 1990s, and in 2003 an envelope full of **scabs** from 19th-century vaccinations was found in a library in New Mexico.

Adapted from *The Economist*, July 12th - 18th 2014.

smallpox: varíola
blister: bolha; pústula
or rather: ou melhor
to slaughter(ed): matar em grandes quantidades
reservoir: estoque
vial: frasco
storehouse: depósito; armazém
headquarter: sede; centro de atividade
to hang(ed) on to: manter; guardar; manter-se a par
to keep (kept) track of: acompanhar
outbreak: surto; epidemia
weapon: arma
cache: esconderijo
to turn(ed) up: aparecer; ser descoberto
scab: casca de ferida

8 (FGV-RJ) The first sentence in the last paragraph, “*But the discovery can be argued the other way, too.*”, (ℓ. 37) most likely refers to which of the following?

- a) It is not necessarily the CDC's fault that the Maryland smallpox samples had been forgotten for such a long time.
- b) The discovery of the Maryland smallpox samples shows why it is so important to inspect security measures regularly.
- c) Despite the danger involved, no one was hurt by the Maryland smallpox samples.
- d) The discovery of the Maryland smallpox samples suggests that keeping some smallpox samples in secure storage may in fact be a good idea.
- e) This is probably not the last time that forgotten smallpox samples will be discovered.

9 (FGV-RJ) According to the information in the article, the WHO:

- a) believes that all samples of smallpox around the world should, without exception, be eliminated.
- b) considers the smallpox samples kept in Russia's State Research Centre of Virology and Biotechnology more secure than the samples at America's CDC.
- c) has the power to order America and Russia to destroy their smallpox samples.
- d) until very recently argued strongly in favor of maintaining live smallpox samples in secure facilities.
- e) has declared that America's method of storing smallpox samples cannot be considered safe.

10 (FGV-RJ) The article most likely mentions the smallpox samples found in eastern Europe and New Mexico in order to support the idea that:

- a) destroying all known smallpox samples is the only way to guarantee that the disease will never again afflict humanity.
- b) many scientists believe that a renewed occurrence of smallpox somewhere in the world is only a question of time.
- c) America and Russia may one day become allies in a war against smallpox.
- d) there is still no practical way to immunize large populations against the smallpox virus.
- e) it is not impossible that, one day, some country may try to use smallpox as a biological weapon.

11 (FGV-RJ) According to the information in the article, America's Centres for Disease Control (CDC):

- a) discovered that, when stored for a certain number of years, the smallpox virus loses its ability to infect.
- b) maintains the world's safest storage area for the smallpox virus.
- c) accused the Food and Drug Administration of secretly maintaining an unauthorized reservoir of the smallpox virus.
- d) declared that the Food and Drug Administration, without knowing it, had been storing a sample of the smallpox virus.
- e) revealed the existence of a previously unknown and highly lethal variety of the smallpox virus.

12 (FGV-RJ) According to the information in the article, the forgotten smallpox samples in Maryland:

- a) were fortunately being kept in a rigidly secure storage area when they were found.
- b) were discovered and then investigated by the FBI.
- c) were the first forgotten smallpox samples ever found in America.
- d) have proved to be an embarrassment especially for the WHO.
- e) will add to the controversy already surrounding a certain public policy concerning an infectious disease.

13 (FGV-RJ) Which of the following is most supported by the information in the article?

- a) Many years ago, the lack of an effective smallpox vaccine meant that the disease was almost always fatal.
- b) Nowadays, many people believe erroneously that smallpox no longer exists anywhere in the world.
- c) The number of people infected with smallpox in 1967 was probably greater than 2 million.
- d) Because of new developments in medicine, fewer than 2 million people died of smallpox in 1967.
- e) Because of the World Health Organisation's eradication efforts, smallpox is no longer considered a dangerous disease.

Public Health

Cholera tightens grip on Haiti

by Declan Butler

As cholera rampages through Haiti, some epidemiologists are warning that the country could face more than half a million cases over the coming year. "It's spreading like wildfire," says Andrew Camilli, a cholera researcher at Tufts University School of Medicine in Boston, Massachusetts. As the current Haitian population has never been exposed to cholera, they lack any immunity to the disease, which makes the toll even greater. Vaccination might have helped, but it was not an option in Haiti because of the vaccine's scarcity and the logistical difficulties in getting it to people in time.

Adaptado de *Nature*, vol. 468, p. 483-484, 2010.

14 (Unicamp-SP)

- a) Qual é a expectativa dos epidemiologistas com relação à disseminação do cólera no Haiti? O que explica a expansão dessa doença no país?
- b) Por que a vacinação não foi utilizada no combate ao cólera no Haiti?

Going Beyond 12

Present Perfect (I)

1. Simple Present Perfect (I)

I. Formação

have/has + Past Participle

○ **Simple Present Perfect** é formado com o **Present** do verbo auxiliar **to have** (**have** ou **has**) mais o **Past Participle** do verbo principal.

II. Usos

I. Peter: My parents **have sold** their house.

Bob: Really? When did they sell it?

Peter: They **sold** it last month.

II. Sharon: **Has** your mother already **talked** to the principal?

Tom: She **hasn't had** time to do it yet.

III. A: Where's Mr. Dawson?

B: He **has just left** the office.

■ Already/Yet

Atenção para os seguintes exemplos:

IV. A: Has the new furniture arrived **yet**?

B: $\left\{ \begin{array}{l} \text{Yes, it has just arrived.} \\ \text{No, not yet.} \end{array} \right.$

V. A: Have you **already** talked to Peter about the accident?

B: $\left\{ \begin{array}{l} \text{Yes, I have.} \\ \text{No, not yet.} \end{array} \right.$

VI. Have the children finished their homework **already**?

That was quick!

Usa-se o **Present Perfect** para indicar ação acabada sem tempo definido.

- a) They will go to.
- b) They have gone.
- c) They went to.
- d) They would go to.

Texto para a questão 2

The Birth of a Storyteller

1 Jackie Torrence spent her childhood in North Carolina, in the southern part of the United States. She was a shy child because she had problems with her teeth, which made it hard for her to talk. Other children teased her because of her speech problem, so she spent much of her childhood playing alone. One of Jackie's favorite games was to pretend she was on television. She told stories out loud using gestures and dramatic voices. At school, Jackie soon learned that she was good at writing stories, and with the help of her favorite teacher, she started to work on improving her speech.

5 Jackie's first storytelling performance was in a library. She was working as a librarian and was asked to entertain a group of children. Jackie told them a story and they loved it! Before long, she began telling stories within her community. Many of her stories came from old American and African-American folktales. Eventually, she started telling stories across North America.

15 As Jackie's fame increased, her health decreased. She now has to use a wheelchair, but this has not stopped her storytelling career. Jackie's stories have been published in books, magazines, and newspapers and she has appeared on radio and television. She has won awards for nine of her sound recordings and three of her television specials.

Adapted from *NorthStar 3: Listening and Speaking*, 2nd Edition (Longman, p. 57), Helen S. Solórzano and Jennifer P. L. Schmidt.

- 2 (UEMG) In the sentence "She has won awards for nine of her sound recordings and three of her television specials." (ℓ. 23-25) the underlined expression shows that:

- a) the action is not expected to happen.
- b) the action began in the past and is continuing now.
- c) the action expresses a past situation or habit.
- d) the action expresses an experience that happened at some time in one's life.

- 3 (Escola Naval-RJ) Choose the correct option to complete this novel excerpt.

"Where is Louisia?", shouted Paul.

"Paul", said Mrs. Schobert softly [...] "Louisia has not _____ nor _____. She has not _____ home – yet. I am sorry. I don't know what to think."

HOOD, P. F. F.; HOOD, C. L. *Tomorrow's soldier: Part Three: Himmler's Gas Station. An autobiographical novel in four parts.* Milton Keynes: UK: Author House, 2007, p. 40.

- a) called – wrote – come
- b) called – wrote – came
- c) call – wrote – came
- d) call – written – came
- e) called – written – come

Texto para a questão 4

EU farmers protest

- 1 The warning from farmers is that Europe is **drowning** in milk. **Plummeting** milk prices have led farmers to protest on the streets of Brussels. Police said that 4,800 farmers and close to 1,500 tractors were at the **demonstration**. And the scenes seemed to have made a difference. EU Agricultural ministers announced a 500 million euro **aid** package focused on helping milk producers.
- 5 Russia is one of the EU's main agricultural export markets worth some 5.5 billion annually. The Russian ban on imports of EU food products and the deregulation of the market hit **dairy** farmers this year. Changing dietary habits and slowing demand from China have also affected prices for dairy products. The environment secretary Liz Truss planned **to call for** the creation of a dairy future's market, similar to those for grain and sugar, which the government says will give the UK's dairy farmers more certainty over future prices. Some
- 10 farmers have called for milk production quotas to be reintroduced to avoid them having to sell **at a loss**.

Available at: www.newsinlevels.com/products/eu-farmers-protest-level-3/. Accessed on: Sept. 15th, 2015. Adapted.

to drown(ed):
afogar-se; alolar

plummeting: em queda

demonstration:
protesto; passeata

aid: ajuda

dairy: laticínio;
produtos derivados do leite

to call(ed) for: pedir;
exigir

at a loss: com prejuízo

- 4 (IFBA) Read sentences I, II, III and IV. Then, check the correct answer according to the text.

- I. "is drowning" (ℓ. 1) is a future action.
 - II. "have led" (ℓ. 1) and "have made" (ℓ. 3) are both actions happening in the present.
 - III. "demonstration" (ℓ. 3) and "annually" (ℓ. 5) are words formed with prefixes.
 - IV. "which" (ℓ. 9) refers to "sugar" (ℓ. 9) and "them" (ℓ. 10) refers to "farmers" (ℓ. 10).
- a) I and III are correct.
 - b) II and IV are correct.
 - c) III and IV are correct.
 - d) All sentences are correct.
 - e) All sentences are incorrect.

- 5** (FPP-PR) Choose the correct alternative to complete the blanks in the correct tense with the verbs in parentheses.

"My boyfriend, John, and I _____¹ (be) together for about six months. My 16th birthday was coming up and I was so excited because my previous birthdays _____² (be) bad. Of course I was _____³ (crush) when he told me his family was going away to Florida that weekend! While he was _____⁴ (go), my sister _____⁵ (take) me to the mall to get my mind off it. The whole time I kept texting him how much I missed him. I really _____⁶ (start) to get bummed out and we _____⁷ (shop) all day, so she decided to take me home. On the way, my sister said she wanted to stop at her boyfriend's house to say hi. When we _____⁸ (walk) in my friends all screamed, 'Surprise!' I was happy about the party but still upset because John wasn't there. Then my sister told me to go to the closet to get my presents. I walked over and opened the door, and there stood John with a big red ribbon on his shirt! It turns out he _____⁹ (plan) the whole party just so I could finally have an amazing birthday. I couldn't _____¹⁰ (ask) for a better day, or a better boyfriend!"

- a) have been - had been - had crushed - gone - had taken - started - had shopped - had walked - had planned - have asked.
- b) were - have been - crush - went - taked - started - shopped - had walked - have planned - ask.
- c) have be - were - have crushed - went - taken - had start - had shop - have walk - have plan - have ask.
- d) have been - had been - crushed - gone - took - started - had shopped - walked - had planned - have asked.
- e) have been - were - had crushed - went - have taken - have start - shopped - had walk - have planned - have asked.

Text Comprehension:
Discrimination Against Women

A discriminação contra as mulheres começa no nascimento. As linhas de gênero são elaboradas cedo e as exclusões para as mulheres continuam durante a vida adulta. Mensagens constantes podem levar a uma crença falsa de que as mulheres não pertencem ao mundo corporativo.

Veja abaixo o cartum que ilustra uma forma de discriminação contra as mulheres:

Available at: <www.cleveland.com/darcy/index.ssf/2012/04/masters_shanks_gender_equality.html>. Accessed on: November 16, 2018.

Texto para as questões 1 a 9

O texto **A Man's Place** foi condensado e adaptado para fins de vestibular. Encontra-se na íntegra no endereço: www.nytimes.com/library/magazine/millennium/m2/econ-panel.html.

Leia o texto e responda às questões identificando a alternativa correta, com base nas informações fornecidas. As falas foram numeradas para facilitar sua localização.

A Man's Place

Well, yes, men are doing more – but women are doing much more. A panel of three **experts convened** by The New York Times Magazine looks at women's economic progress and how that progress has **played out** over a longer **stretch of history**. They began by examining the transformation in the lives of working women.

The conversation was moderated by Michael Weinstein, an economist who writes the Economic Scene column in *The Times*.

The panelists:

Victoria de Grazia, professor of history at Columbia University and author of "The Sex of Things: Gender and Consumption in Historical Perspective".

Claudia Goldin, professor of economics at Harvard University and author of "Understanding the Gender Gap: An Economic History of American Women".

Marta Tienda, professor of sociology and public affairs at Princeton University and author of "The Hispanic Population of the United States".

A Woman's Place in the Workplace

1. Michael Weinstein: **How far** have women come over the past **century or so**? How would the economic circumstances of, **say**, a 20-year-old woman living in the United States 100 years ago be different from her **counterpart's** today?

2. Claudia Goldin: Typically, she would have spent a lot of time working **alongside** and learning from her mother. One of the profound **changes** in the 20th century was the movement of young women from being "at home" to being "at school". I'm referring to the large movement of young women first to **high school** and then to **college**. In terms of working **outside the home**, if you were a young woman in rural America and had gone to school **beyond eighth grade**, you would probably have become a teacher **for a while**. In cities, we would find the women described by the Progressives as the **pitiable** young **factory** women — those of O. Henry's New York stories — **about half** of whom worked for **piece rates**. **By the 1920's**, young women would be working in **retail sales** and in **offices**.

3. Victoria de Grazia: One of the biggest changes in women's lives is their capacity to control their fertility. Efficient contraception was **almost** unimaginable 100 years ago. The risk for **pregnancy**, not to mention the **hardship** of **childbearing**, enormously determined how women lived.

4. Marta Tienda: There is also the **issue** of how family arrangements **constrained** women. **Even** as recently as 15 or 20 years ago in the **Southwest**, the idea of women moving out of the **parental household** and **living alone** was **unacceptable**.

5. Weinstein: Victoria, did you want to say more about family structure?

6. De Grazia: A century ago, the **role** of women's **unpaid household labor** in **maintaining** the family was simply **huge**. **Take into account** the primitive equipment. Consider the difficulties of **carrying** provisions from the market. Think of the time involved in **cooking**, which **meant** getting

coal or **hauling wood**. But even with new equipment, there has still been more "work for mother", as **standards** of hygiene and nutrition and the quality of **caring for** children have been **raised**. That suggests the question: has there been real progress or only a change in how women work in the household?

7. Goldin: Many people think that the **late 1960's**, with the **revival** of feminism, was also the beginning of women's **increase** in **labor-force** participation. That is not the case. **Among** married women, labor-force participation rates **rose** 10 percentage points per decade for each 10-year period from 1940 to 1990. So today, the rates are over 70 percent for all women age 25 to 64, and **a little over** 80 percent for women who have **bachelor's degrees**, rates that are rapidly **approaching** those of men. The question is: Have women **come a long way** in the 20th century? The answer is unequivocally yes. They have enormously **narrowed** the gap in labor-force participation rates and in **earnings**. Occupational segregation has also **decreased** and so have hours of housework, **enhancing** the ability of college-graduate women, for example, to do the **ultimate** — combine career with family. **Of course**, there are **lots of** qualifications. **Few** women **actually** achieve **both** career **and** family. Women now **become** doctors at **nearly** the same rate as men, but they become family **physicians**, not **surgeons**.

8. Tienda: The progress cited by Claudia has been **uneven**. Labor-force participation of Puerto Ricans has actually declined over a 20-year period. Participation of black women has not **kept pace with** whites.

9. Goldin: **Yet despite** the qualifications, women have come a long way. They have gained independence, dignity, respect, greater **bargaining power** at home, **freedom**, ability to socialize and have a life apart from family — I think that's extraordinarily important — and of course, the ability to divorce.

As questões de inglês referem-se ao texto cujo vocabulário principal vem a seguir:

expert: especialista	say: digamos
to convene(d): reunir	counterpart: par; semelhante
to play(ed) out: acontecer; desenvolver	alongside: paralelamente
stretch of history: período de história	change: mudança
consumption: consumo	high school: Ensino Médio
gap: diferença	college: faculdade
affair: assunto	outside the home: fora de casa
workplace: local de trabalho	beyond eighth grade: além da oitava série
how far: até onde	for a while: durante um certo tempo
century: século	pitiable: dignas de dó
or so: aproximadamente	factory: fábrica

about half: cerca da metade
piece rate: ninharia
by the 1920's: por volta dos anos 1920 ou da década de 1920
retail sale: venda a varejo
office: escritório
almost: quase
pregnancy: gravidez
hardship: dificuldade
childbearing: dar à luz
issue: assunto; questão
to constrain(ed): reprimir; constranger
even: até mesmo
Southwest: Sudoeste
parental household: casa dos pais
to live(d) alone: viver sozinha
unacceptable: inaceitável
role: papel; função
unpaid: não remunerado
household labor: trabalho de casa
to maintain(ed): manter
huge: enorme
to take (took, taken) into account: levar em conta
to carry(ied): transportar
to cook(ed): cozinhar
to mean (meant, meant): significar
coal: carvão
to haul(ed): carregar
wood: madeira; lenha
standard: padrão
to care(d) for: tomar conta; cuidar
to raise(d): criar
late 1960's: final dos anos 1960

revival: retorno; volta
increase: aumento
labor-force: força de trabalho
among: entre
to rise (rose, risen): aumentar
a little over: um pouco mais
bachelor's degree: bacharelado
to approach(ed): aproximar-se de
to come (came, come) a long way: melhorar muito
to narrow(ed): estreitar; diminuir
earning: vencimento; ordenado
to decrease(d): diminuir
to enhance(d): aumentar
ultimate: essencial; principal
of course: é claro
lot of: muita
few: pouca
actually: na realidade
both ... and: tanto ... quanto
to become (became, become): tornar-se; vir a ser
nearly: aproximadamente
physician: médico
surgeon: cirurgião
uneven: desigual
to keep (kept, kept) pace with: equiparar-se com
yet: entretanto
despite: apesar de
to bargain(ed): barganhar
power: poder
freedom: liberdade

1 (PUC-SP) O painel de especialistas da *The New York Times Magazine* teve por objetivo:

- a) definir o lugar do homem na sociedade.
- b) examinar o poder econômico das feministas.
- c) avaliar o progresso de três especialistas mulheres.
- d) discutir como ocorreu o progresso econômico das mulheres ao longo dos últimos 100 anos.
- e) observar como as mulheres estão se sujeitando aos controvertidos progressos econômicos.

2 (PUC-SP) Dentre os quatro participantes, isto é, o moderador e as três especialistas,

- a) todos têm a mesma formação.
- b) todos são autores de livros.
- c) um escreve em jornal.

d) dois são professores universitários.

e) três publicaram trabalhos sobre assuntos que envolvem a mulher.

3 (PUC-SP) Segundo a fala 2, de Claudia Goldin,

- a) as mulheres costumavam, na década de 1920, abandonar seus lares para realizar o sonho de trabalhar como vendedoras em lojas e oficinas.
- b) o escritor O. Henry retrata as relações entre mães e filhas em fábricas de Nova York.
- c) ser professora era o desejo da maioria das jovens mulheres urbanas que estudavam até a oitava série.
- d) muitas mulheres, atualmente, estudam e trabalham ajudando as mães no ambiente rural.
- e) uma das mudanças mais significativas no século passado foi a escolarização das mulheres.

4 (PUC-SP) Leia as falas 3 (De Grazia) e 4 (Tienda) sobre a família e escolha a afirmação verdadeira.

- a) Até hoje, as mulheres que deixam a casa dos pais são mal vistas.
- b) Uma das principais mudanças na vida da mulher foi o surgimento de contraceptivos eficientes.
- c) O comportamento das mulheres é limitado pela família paterna e pelos parentes.
- d) Mães solteiras não eram aceitas e isso determinava um modo de vida para as mulheres.
- e) O risco de gravidez e das dificuldades do parto sempre será uma questão problemática.

5 (PUC-SP) Na fala 7, Goldin afirma que:

- a) mais de 80% das mulheres com grau universitário está no mercado de trabalho.
- b) as mulheres casadas levam 10 anos para entrar no mercado de trabalho.
- c) as mulheres começaram a participar do mercado de trabalho no fim da década de 1960, com o feminismo.
- d) 70% das mulheres começam a trabalhar com 25 anos e aposentam-se com 64.
- e) a participação das mulheres, atualmente, no mercado de trabalho, é superior à dos homens.

6 (PUC-SP) Em relação à fala 7 de Claudia Goldin, a fala 8 de Marta Tienda é:

- a) uma concordância.
- b) um exemplo.
- c) uma ressalva.
- d) uma apologia.
- e) uma persuasão.

- 7** (PUC-SP) Na última frase da fala 7 "Women now become doctors at nearly the same rate as men, but they become physicians, not surgeons.", o pronome **they** refere-se a:
- a) doctors. c) surgeons. e) women.
b) physicians. d) men.

- 8** (PUC-SP) Na frase da fala 7 de Goldin "So today, the rates are over 70 percent for all women age 25 to 64,..." a palavra **so** pode ser substituída, sem alterar o sentido, por:
- a) Therefore. d) Nevertheless.
b) If. e) Even if.
c) However.

- 9** (PUC-SP) Na fala 7 de Goldin "... for example, to do the ultimate -", a palavra **ultimate** refere-se a:
- a) formar-se na universidade.
b) trabalhar menos.
c) cumprir menos afazeres domésticos.
d) combinar profissão e família.
e) ganhar o mesmo salário que homens no mesmo cargo.

Texto para as questões 10 e 11

Gender politics in Mexico City

A **blow** for feminism – or against it?

Since electing its first left-wing **mayor** in 1997, Mexico City has been a **self-consciously** liberal oasis in a conservative country. The **current** mayor, Marcelo Ebrard, has legalised abortion **on demand**, gay marriage and gay adoption in his first four years in office. His latest move, **cheered** by environmentalists, was a **ban** on free plastic shopping bags, implemented on August 19th. **Eye-catching** reforms such as these are enhancing Mr Ebrard's profile ahead of a likely **presidential bid** in two years' time.

The latest controversy **concerns** women-only public transport. During rush hour, men have long been barred from a third of the carriages of metro trains. Some see that as offering a **blessed** sanctuary from **wandering** macho hands; for others it is a backward step on the march to equality. But **whereas** Puebla, a nearby city of more conservative bent, runs a women-only "pinktaxi" service (pictured below), Mexico City had resisted. Susana Sánchez, a Mexico City *taxista*, first requested permission to run such a service in 1998. She was told it would be discriminatory.

City officials have now **come round** to thinking that **cabs** for women would be safer for both passengers and drivers (Ms Sánchez began her crusade after being **stabbed** by a male client). From next month, a **fleet** of pink taxis driven by and for women will **roam** the streets of the capital, charging the same **fares** as ordinary cabs. The city government is training a first **batch** of approved drivers in security and women's rights.

The suburban railway and buses have followed the metro in providing women-only services. Victor Ramírez, a transport official, says he is now fielding requests to segregate the *pesero* minibuses which **rattle around** town.

(Pink cabs rev up – *The Economist*, August 28th - 3rd September 2010)

blow: golpe	wandering: errante
mayor: prefeito	whereas: enquanto; ao passo que
self-consciously: acanhadamente; envergonhadamente	to come (came, come) round: mudar de opinião; de decisão
current: atual	cab: táxi
on demand: sob demanda; a pedido	stabbed: esfaqueada
to cheer(ed): aplaudir	fleet: frota
ban: proibição	to roam(ed): percorrer
eye-catching: atraente	fare: tarifa
presidential bid: disputa presidencial	batch: lote
to concern(ed): dizer respeito a	to rattle(d) around: andar (chacoalhando) por
blessed: abençoado	

- 10** (IFSP) Segundo o texto, o atual prefeito da Cidade do México, Marcelo Ebrard,

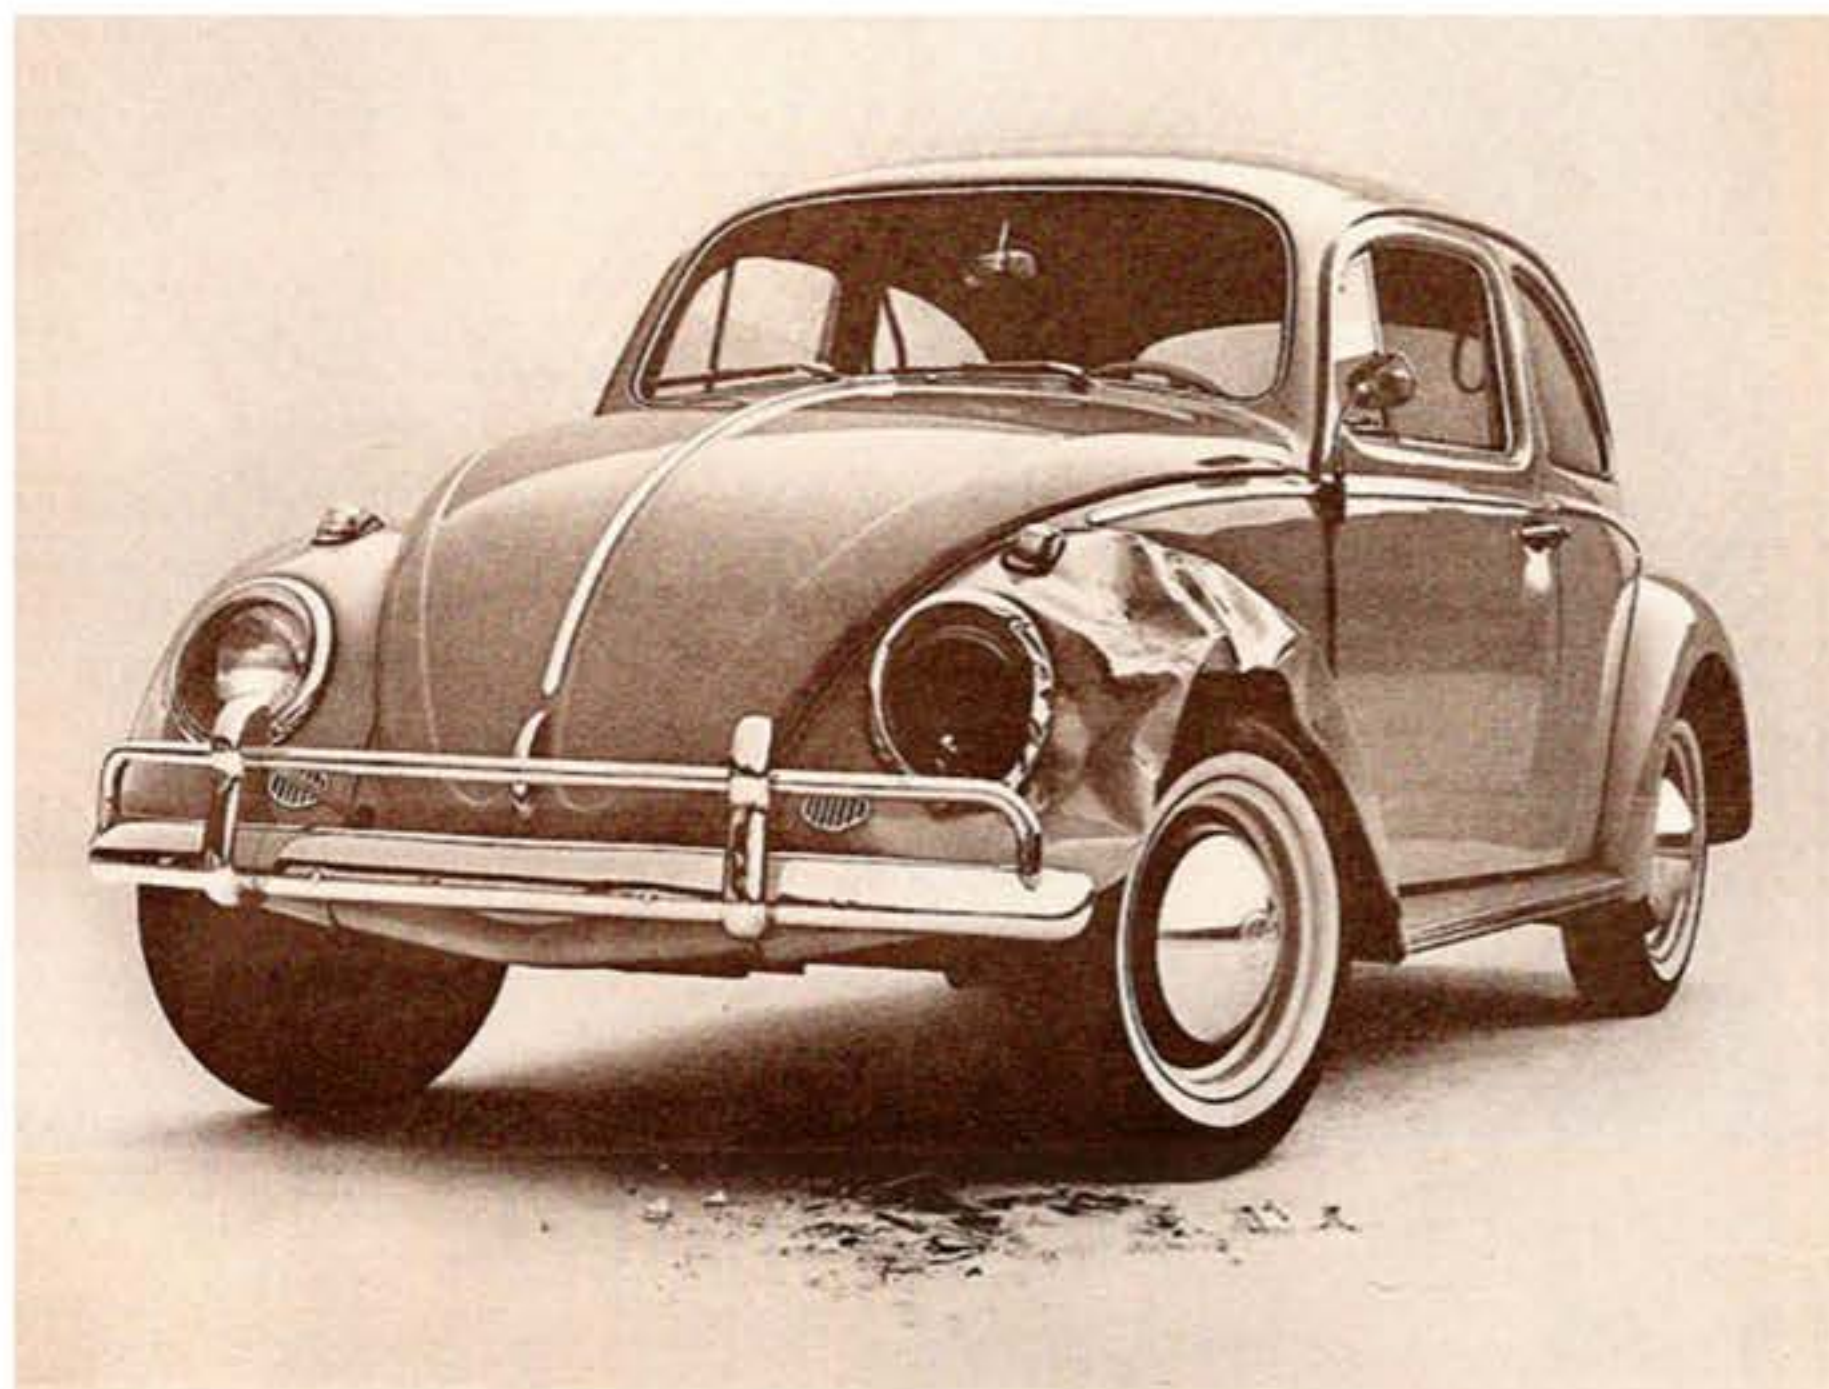

- a) faz uma gestão diferenciada, aprovando leis de cunho social e ambientalista.
b) prometeu legalizar o aborto e o casamento gay caso seja eleito presidente.
c) é um político da ala mais tradicional do partido conservador mexicano.
d) está no início do seu terceiro mandato como prefeito.
e) lançou campanha para ser o próximo presidente do México.

- 11** (IFSP) Das frases abaixo, retiradas do texto, indique a que apresenta sua construção na voz passiva.

- a) *The latest controversy concerns women-only public...*
b) *During rush hour, men have long been barred from a third...*
c) *His latest move, cheered by environmentalists, was a ban...*
d) *The city government is training a first batch of approved...*
e) *City officials have now come round to thinking that cabs...*

Texto para as questões 12 a 14

O texto a seguir é de uma campanha publicitária da década de 1960 e atualmente seria considerado politicamente incorreto, no mínimo. Leia-o e responda às questões 12 a 14.

Reprodução UEL/PR, 2014

Sooner or later, your wife will drive home one of the best reasons for owning a Volkswagen.

Women are soft and gentle, but they hit things.

If your wife hits something in a Volkswagen, it doesn't hurt you very much.

VW parts are easy to replace. And cheap. A fender comes off without dismantling half the car. A new one goes on with just ten bolts. For \$24.95, plus labor.

And a VW dealer always has the kind of fender you need. Because that's the one kind he has.

Most other VW parts are interchangeable too. Inside and out. Which means your wife isn't limited to fender smashing.

She can jab the hood. Graze the door. Or bump off the bumper.

It may make you furious, but it won't make you poor.

So when your wife goes window-shopping in a Volkswagen, don't worry.

You can conveniently replace anything she uses to stop the car.

Even the brakes.

(Disponível em: <<http://2.bp.blogspot.com/-y9-7Oh0Ppvk/TaHeDmBy6d/AAAAAAAAj3g/8aL1Ao4VV34/s1600/volkswagenwife1.jpg>>. Acesso em: 19 maio 2013.)

12 (UEL-PR) O argumento central no qual essa propaganda está baseada é que as mulheres:

- a) são motoristas inaptas, portanto, mais cedo ou mais tarde, colidirão os automóveis.
- b) são dóceis e gentis, gostam de dirigir e, por isso, merecem um carro popular zero-quilômetro.
- c) preferem um VW, já que o preço das peças é acessível.
- d) magoam os homens ao preferirem carros em que as peças são substituíveis.
- e) empobrecem os homens ao usarem o carro para fazer compras em *shopping centers*.

13 (UEL-PR) Com base no texto, considere as afirmativas a seguir:

- I. A expressão "Sooner or later" e a imagem do VW amassado reforçam a ideia de que, inevitavelmente, o carro será batido.
- II. A expressão "drive home" e a imagem do VW amassado traçam um paralelo entre o modo como as mulheres dirigem seus lares e o modo como dirigem seus carros.
- III. A palavra "even", na frase "Even the brakes", indica que as mulheres regularmente utilizam os freios para parar o carro.
- IV. A frase "Even the brakes" expressa uma ironia em relação à mulher motorista que utiliza tudo para parar o carro, menos a peça que foi destinada para esse fim.

Assinale a alternativa correta.

- a) Somente as afirmativas I e II são corretas.
- b) Somente as afirmativas I e IV são corretas.
- c) Somente as afirmativas III e IV são corretas.
- d) Somente as afirmativas I, II e III são corretas.
- e) Somente as afirmativas II, III e IV são corretas.

14 (UEL-PR) Sobre o preconceito às mulheres subentendido pelo fragmento do texto na propaganda, considere as afirmativas a seguir.

- I. Your wife isn't limited to fender smashing.
- II. You can conveniently replace anything she uses to stop the car. Even the brakes.
- III. So when your wife goes window-shopping in a Volkswagen, don't worry.
- IV. A fender comes off without dismantling half the car. A new one goes on with just ten bolts.

Assinale a alternativa correta.

- a) Somente as afirmativas I e II são corretas.
- b) Somente as afirmativas I e IV são corretas.
- c) Somente as afirmativas III e IV são corretas.
- d) Somente as afirmativas I, II e III são corretas.
- e) Somente as afirmativas II, III e IV são corretas.

Texto para as questões 15 a 17

Women all around the world are allowed to vote

Suffrage is one of the oldest issues that women's rights activist have been fighting for. The **struggle** to gain suffrage is often referred to as the first wave of feminism. In 1906 Finland became the first country in the world to **grant** women the right to vote and **stand in elections**. Now, 107 years later, Saudi women have also taken a step **towards** equality with the decision of King

Abdullah to grant the women of Saudi Arabia the right to vote and stand for election. The right for women to vote and stand in elections hasn't always been the case in the West, for example in Switzerland women got suffrage as late as 1971.

According to the decision made by King Abdullah, Saudi women can take part in municipal elections – the only public elections in Saudi Arabia. Women will also be able to be members of the Shura Council, which has the power to propose laws to the King.

The announcement has been received with mixed emotions. According to the international organization of Parliaments, IPU, the Inter-Parliamentary Union, the decision means that no country in the world now discriminates against women when it comes to electing leaders. Others remain more **sceptical**. For example professor and researcher Stéphane Lacroix said in an interview for French newspaper *Libération* that this decision does not fundamentally change Saudi society.

Secretary-General Ban Ki-moon welcomes the recent announcements. He believes that these represent an important step in the realization by women in Saudi Arabia of their fundamental civil and political rights.

It will be interesting to see how this law will be implemented and if it succeeds in advancing women's rights in Saudi Arabia.

Disponível em: <www.create4theun.eu/women-all-around-the-world-are-allowed-to-vote/>. Acessado em: 2 outubro 2011.

suffrage: voto
struggle: luta
to grant(ed): conceder
to stand (stood) in elections: concorrer em eleições
towards: em direção a
sceptical: cético

15 (Uespi) Considering King Abdullah's decision, Saudi Arabian women:

- a) still play an insignificant role when it comes to suffrage rights.
- b) haven't experienced anything new in their country concerning suffrage.
- c) are now in a much better standing as for suffrage rights than before.
- d) have refused to be part of such a limited voting process as offered them.
- e) will have the chance of a lifetime to change their country's political regime.

- 16** (Uespi) According to the text:
- Women have always been allowed to vote everywhere.
 - Feminist movements only recently focused on women's suffrage.
 - Saudi Arabia is still reluctant to allow women's suffrage.
 - Switzerland has always been a haven for women's suffrage.
 - Finland was a pioneer in granting women the right to vote.
- 17** (Uespi) On account of the king's decision, women's rights:
- in the Middle East have been criticized by the UN Secretary-General.
 - are to be implemented after the country turns into a democracy.
 - have already given strong signs of vitality in many areas.
 - are yet to be conquered and confirmed in Saudi Arabia.
 - will certainly go through significant changes in the near future.

Texto para as questões 18 e 19

The future looks bright

Balamurati Krishna Ambati

At age three, Balamurati Krishna Ambati was badly **burned** and spent several months in the hospital. He decided then that he wanted to be a doctor. A few years later, he read in the *Guinness Book of Records* that the youngest doctor in the world was 18 years old. So he decided to become a doctor by the age of 17. Many people thought this was impossible, but at 11, Ambati was in college. He graduated from college at 14 and from medical school at 17. Now that he is a doctor, Ambati plans to go for advanced training in Boston.

Reprodução/Uem, 2012.

Catherine Charlton

Catherine Charlton is studying engineering at Cornell University, but she has already **achieved** an important **goal**. She has worked for NASA (the National Aeronautics and Space Administration).

Reprodução/Uem, 2012.

Charlton's **achievements** aren't only in engineering, however. She is also a successful pianist and composer. Charlton hopes to combine her talents for engineering and music someday. For example, she would like to design concert halls or manufacture pianos.

Jasmin Sethi

Reprodução/Uem, 2012.

The Scholastic Aptitude Test is the test American students take to enter college; each year, only a few students get a perfect score. One of those students was Jasmin Sethi. Her achievement was especially **remarkable** because she is **blind**. To take the test, someone read the test questions to her, and she gave the answers. She even solved difficult math problems in her head. Sethi has been the editor of her school newspaper and has organized food collections. She wants to go to a top university next year. Sethi would like to be a lawyer.

(New Interchange. Cambridge University Press, 1997.)

to burn(ed): queimar
to achieve(d): alcançar; conquistar
goal: meta; objetivo
achievement: conquista
remarkable: notável
blind: cega

- 18** (Uern) Which fact do these texts have in common?
- Three young people mastered university graduation courses.
 - Three young people have outstanding school performances.
 - Three young people will follow very unusual careers.
 - Three young people have some kind of physical disability.
- 19** In the sentence from the middle column "Charlton's achievements aren't only in engineering, however.", **however** can be replaced, with no change in meaning, by:
- rather.
 - despite.
 - along.
 - since.
 - though.

Imagens para as questões 20 e 21

As imagens a seguir foram encontradas em ímãs para geladeiras vendidos nos Estados Unidos.

20 (Unicamp-SP) O que a mulher do primeiro ímã não consegue entender?

21 (Unicamp-SP) O texto do segundo ímã faz referência a uma tarefa doméstica. Que tarefa é essa e o que, na língua inglesa, possibilita que ela seja associada ao estresse?

Going Beyond 13

Present Perfect

1. Present Perfect (II)

Observe o uso do **Simple Present Perfect** na tira de Jeremy e nos demais exemplos a seguir.

BORGMAN, Jim; SCOTT, Jerry. *My Bad: A Zits Treasury*. p. 182.

- I. Bob and I **have known** each other *since* we were kids.
- II. How long **have** you **had** this headache, Peter?
For about 36 hours.
- III. It **hasn't snowed** much in that part of the country *lately*.
- IV. Mr. Crawford **has been** ill *over the past* six months.

O **Simple Present Perfect** pode ser usado para expressar ações ou situações que tiveram início há certo tempo e continuam (vêm ocorrendo) até o presente.

Nesse caso, é comum o uso de expressões de tempo com as palavras **since** (desde); **for** (faz); **long** (há muito tempo); **lately**, **recently**, **in recent times** (ultimamente); **so far** (até agora, por enquanto); **over** (**during**) **the past/last** (nos últimos).

Veja os exemplos a seguir:

- I. Tom **hasn't said** anything about this *since* we first met.
- II. We've **been** ready *since* noon. It's 3 o'clock in the afternoon. So we've **been** ready *for* three hours now.
mas
- III. They **stayed** in Boston from Monday through Wednesday last week. So they **stayed** there *for* three days.

Since significa "desde" e é usado com o **Present Perfect** indicando o *ponto de início* de ações ou situações que continuam até o presente.

For indica o *tempo de duração* de uma ação ou situação. Quando essa ação ainda continua no presente, usa-se o **Present Perfect**, e o significado de **for** é "faz", "há" (certo tempo). Quando a ação já terminou, usa-se o **Simple Past** e **for** significa "por" (tanto tempo).

2. Present Perfect Continuous

Observe os exemplos a seguir:

- I. The man **has been standing** on the sidewalk across the street all day.
- II. I've **been taking** driving lessons for a while now.
- III. Mary **has lived** in London all her life.

O **Present Perfect Continuous** (**have** ou **has** + **been** + **-ing form**) também pode ser usado para expressar ações que vêm ocorrendo por um período de tempo até o momento, enfatizando a continuação da atividade.

Para expressar ações ou situações temporárias, geralmente usa-se o **Present Perfect Continuous**. Com ações ou situações permanentes, é mais comum o uso do **Simple Present Perfect**.

- 1** (Unifor-CE) Complete o texto abaixo com o **Simple Past** ou o **Present Perfect** dos verbos entre parênteses.

I am very proud of my sister. In my opinion she _____ ¹(have) an interesting career. She _____ ²(attend) Oxford University from 1997 to 2000. Then she _____ ³(apply) for jobs abroad. She _____ ⁴(work) in Hong Kong for three years and then she _____ ⁵(come) to Brazil in January of 2004. She _____ ⁶(be) here for more than eight years and she loves what she does. She'll never go back to the UK.

During her career, she _____ ⁷(do) a number of different jobs, too. She _____ ⁸(sell) computer software in Hong Kong. She _____ ⁹(teach) English for her first year in Japan. Since then, she _____ ¹⁰(run) her own training company in Brazil. It is very successful.

A alternativa correta é:

- a) 1. has had; 2. attended; 3. applied; 4. has worked; 5. came; 6. was; 7. did; 8. sold; 9. taught; 10. has run.
- b) 1. had; 2. attended; 3. applied; 4. has worked; 5. has come; 6. was; 7. has done; 8. sold; 9. taught; 10. has run.
- c) 1. has had; 2. has attended; 3. applied; 4. worked; 5. came; 6. has been; 7. has done; 8. has sold; 9. has taught; 10. has run.
- d) 1. had; 2. attended; 3. has applied; 4. worked; 5. has come; 6. have been; 7. did; 8. has sold; 9. has taught; 10. have run.
- e) 1. has had; 2. attended; 3. applied; 4. worked; 5. came; 6. has been; 7. has done; 8. sold; 9. taught; 10. has run.

Text Comprehension: Women Empowerment

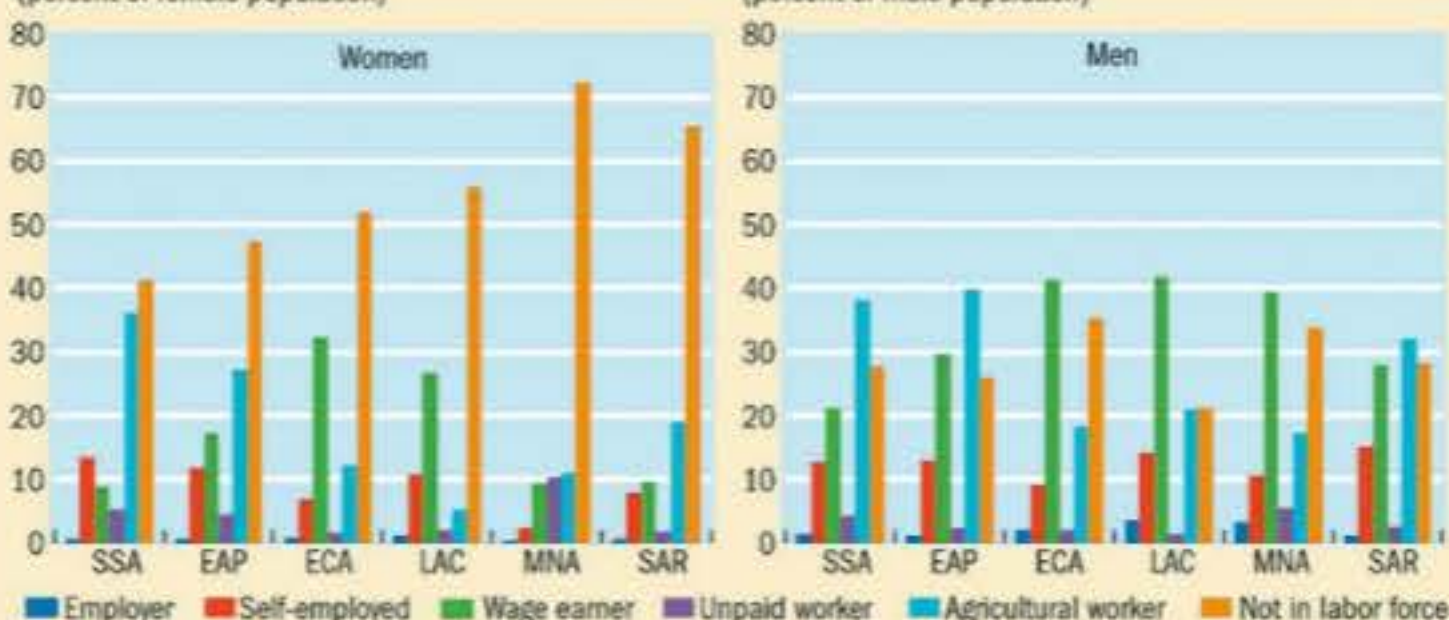

Neste capítulo, estudaremos textos relacionados às questões da mulher. A tabela a seguir mostra as diferenças entre homens e mulheres no campo do trabalho em diversas regiões do mundo.

Chart 1

Where women and men work

Women are more likely to be working and to be entrepreneurs in sub-Saharan Africa than elsewhere in the world.

(percent of female population)

Source: Household and labor force surveys from 102 low- and middle-income countries, most recent year, 2000-10.

Note: SSA - sub-Saharan Africa, EAP - East Asia and the Pacific, ECA - Europe and central Asia, LAC - Latin America and the Caribbean, MNA - Middle East and North Africa, and SAR - South Asia.

- 1 (Unicamp-SP) Os panfletos foram distribuídos na entrada de uma assembleia de estudantes universitários, reunidos para discutir um pedido de reforma nos banheiros do campus.

Assinale a opção correta.

- a) O panfleto (A) defende, de maneira irônica, a criação de mais banheiros públicos unissex.
- b) O panfleto (B) recomenda bater na porta ou avisar verbalmente antes de entrar em um banheiro unissex.
- c) O panfleto (A) critica pessoas que se preocupam excessivamente com questões de assédio sexual.
- d) O panfleto (B) argumenta a favor de banheiros unissex ao expor um dilema de pessoas transgênero.

Texto para as questões 2 a 7

Reprodução/Fuvest, 2018

- 1 It's a perilous time to be a statue. Not that it has ever been a particularly secure occupation, exposed as statues are to the elements, bird droppings and political winds.
- Just ask Queen Victoria, whose rounded **frame** **perches**
- 5 **atop** hundreds of **plinths** across the Commonwealth, with an air of **solemn**, severe **solidity**. But in 1963 in Quebec, members of a separatist paramilitary group **stuck** dynamite under the dress of her local statue. It exploded with a force so great that her head was found 100 yards away.
- 10 Today, the head is **on display** in a museum, with her body preserved in a room some miles away. The art historian Vincent Giguère said that "the fact it's damaged is what makes it so important".
- There's another reason to conserve the **beheaded**
- 15 Victoria. Statues of women, standing alone and demanding attention in a public space, are extremely rare.
- To be made a statue, a woman had to be a naked **muse**, royalty or the mother of God. Or occasionally, an icon of war, justice or virtue: Boadicea in her **chariot** in London, the
- 20 Statue of Liberty in New York.

Still, of 925 public statues in Britain, only 158 are women standing on their own. Of those, 110 are allegorical or mythical, and 29 are of Queen Victoria.

Julia Baird, *The New York Times*. September 4, 2017. Adapted.

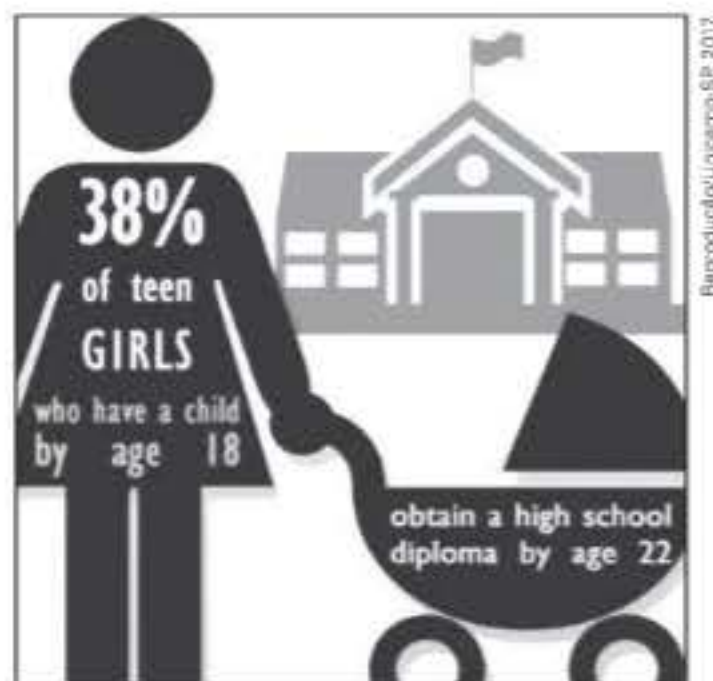

frame: moldura	to stick (stuck; stuck): enfiar
to perch(ed) atop: empoleirar	on display: à mostra
plinth: base (de estátua)	beheaded: decapitado
solemn: solene	muse: musa
solidity: solidez	chariot: carruagem

- 2 The word **perilous** in "It's a perilous time to be a statue." (ℓ. 1) means the same as:
- a) important.
 - b) safe.
 - c) novel.
 - d) risky.
 - e) annoying.
- 3 (Fuvest-SP) No texto, a figura da rainha Vitória é associada ao conceito de:
- a) firmeza.
 - b) eloquência.
 - c) longevidade.
 - d) beleza.
 - e) maternidade.
- 4 (Fuvest-SP) Conforme o texto, o grau de importância atribuído à estátua da rainha Vitória, em Quebec, reside no fato de a escultura:
- a) estar em processo de restauração.
 - b) ter sobrevivido às intempéries ao longo dos anos.
 - c) pertencer a um grupo de réplicas idênticas.
 - d) ser a primeira a retratar uma autoridade feminina.
 - e) ter sofrido danos em sua estrutura.
- 5 (Fuvest-SP) No texto, a referência ao número de estátuas expostas em espaços públicos na Grã-Bretanha indica:
- a) ênfase em personalidades alegóricas.
 - b) escassez de monumentos do gênero feminino.
 - c) despreço por esculturas de corpo inteiro.
 - d) falta de espaço em museus para peças de grande porte.
 - e) preferência por figuras de destaque em batalhas.
- 6 In the sentence "Still, of 925 public statues in Britain, only 158 are women standing on their own." (ℓ. 21-22), **still** can be replaced, with no change in meaning, by all the words given in the alternatives below, EXCEPT:
- a) Nonetheless.
 - b) Yet.
 - c) In spite of that.
 - d) Rather.
 - e) Nevertheless.

7 The fragment "... women standing on their own." (l. 22) means that women are:

- a) happy.
- b) by themselves.
- c) all together.
- d) with somebody.
- e) tired.

Texto para a questão 8

Disponível em <http://neahealthyfutures.org/the-importance-of-teen-pregnancy-prevention/>. Acesso em 04/09/2016.

8 (Unicamp-SP) Depreende-se das informações da figura que:

- a) 38% das jovens engravidam antes dos 18 anos.
- b) 38% das jovens concluem o ensino médio aos 22 anos.
- c) gravidez na adolescência interfere na vida escolar das jovens.
- d) a gravidez após os 18 anos interfere na vida escolar das jovens.

Texto para a questão 9

Disponível em: <http://bruketa-zinic.com>. Acesso em: 3 ago. 2012.

9 (Enem) A campanha desse pôster, direcionada aos croatas, tem como propósito:

- a) alertar os cidadãos sobre a lei em vigor contra a discriminação.
- b) conscientizar sobre as consequências do preconceito na sociedade.
- c) reduzir os prejuízos causados por motoristas alcoolizadas.

d) fazer uma crítica à falta de habilidade das mulheres ao volante.

e) evitar os acidentes de trânsito envolvendo mulheres.

Texto para a questão 10

Mauritius: gender roles and statuses

Division of Labor by Gender. The economic success of industry has **led** to low unemployment rates. This has changed the workplace and home life as women joined the workforce. This industrialization also led to women being promoted faster. According to the Minister of Women, Family Welfare, and Child Development, a quarter of all managers are now women.

Women are the traditional **homekeepers** of the society. Between 1985 and 1991 the number of women working outside the home increased from 22 percent to 41 percent. With that **trend** continuing, **hired housekeeping** and child care have become relatively new and important industries.

The Relative Status of Women and Men. Historically, women have had subordinate roles in Mauritian society. However, the Constitution specifically prohibits discrimination based on sex, and women now have access to education, employment, and governmental services.

In March 1998 the Domestic Violence Act was passed. This gave greater protection and legal authority to combat domestic abuse. In that same year it also became a crime to abandon one's family or pregnant spouse for more than two months, not to pay food support, or to engage in sexual **harassment**.

Women are underrepresented in the government. The National Assembly has seventy seats, of which women hold five.

Available at: <www.everyculture.com>.

to lead (led; led): conduzir
homekeeper: dona de casa
trend: tendência
to hire(d): contratar
housekeeping: serviço de limpeza
harassment: assédio

10 (Enem) Questões como o papel de homens e mulheres na sociedade contemporânea vêm sendo debatidas de diferentes pontos de vista, influenciados por valores culturais específicos de cada sociedade. No caso das Ilhas Maurício, esses valores sustentam a tomada de decisão em torno da:

a) importância do reconhecimento da presença feminina na estrutura familiar.

- b) manutenção da igualdade entre homens e mulheres no trabalho.
- c) proteção legal da mulher contra atos discriminatórios.
- d) representatividade da mulher em cargos políticos.
- e) criação de auxílio à mulher abandonada pelo cônjuge.

Texto para a questão 11

"They don't see us as a powerful economic force, which is an incredible ignorance" – Salma Hayek, actor, denouncing sexism in Hollywood at the Cannes Film Festival; until recently, she added, studio heads believed women were interested only in seeing romantic comedies.

(Time, 01.06.2015.)

- 11** (Unifesp-SP) Based on the information the text presents, one can say that:
- a) both Hollywood and Cannes are important economic forces that promote romantic comedies.
 - b) Salma Hayek believes Cannes Film Festival organizers are ignorant because they have a biased image of women.
 - c) failing to recognize women as an economic force is a sexist behaviour.
 - d) Cannes Film Festival used to portray women in romantic comedies.
 - e) most women in the United States would disagree with Salma Hayek.

Texto para as questões 12 a 15

Women taking pill more likely to be treated for depression, study finds

- 1 Millions of women worldwide use hormonal contraceptives, and there have long been reports that they can affect mood. A research project was launched in Denmark to look at the scale of the problem, involving the medical
- 5 records of more than a million women and adolescent girls.
- It found that those on the combined pill were 23% more likely to be prescribed an antidepressant by their doctor, most commonly in the first six months after starting on the pill. Women on the progestin-only pills, a synthetic form of
- 10 the hormone progesterone, were 34% more likely to take

antidepressants or get a first diagnosis of depression than those not on hormonal contraception.

- The study found that not only women taking pills but also those with implants, patches and intrauterine devices
- 15 were affected.

- Adolescent girls appeared to be at highest risk. Those taking combined pills were 80% more likely and those on progestin-only pills more than twice as likely to be prescribed an antidepressant than their peers who were not on the pill.
- 20 The researchers, Øyvind Lidegaard of the University of Copenhagen and colleagues, point out that women are twice as likely to suffer from depression in their lifetime as men, though rates are equal before puberty. The fluctuating levels of the two female sex hormones, oestrogen and
- 25 progesterone, have been implicated. Studies have suggested raised progesterone levels in particular may lower mood.

- The impact of low-dose hormonal contraception on mood and possibly depression has not been fully studied, the authors say. They used registry data in Denmark
- 30 on more than a million women and adolescent girls aged between 15 and 34. They were followed up from 2000 until 2013 with an average follow-up of 6.4 years.

The authors call for more studies to investigate this possible side-effect of the pill.

Adapted from: <www.theguardian.com/society/2016/sep/28/women-taking-contraceptive-pill-more-likely-to-be-treated-for-depression-studyfinds>

likely: provável; propenso	peers: pares
mood: humor	side-effect: efeito colateral
patch: adesivo	

- 12** (Cesmac-AL) Hormonal contraceptives:
- a) have given women the harmless choice to not get pregnant.
 - b) in the form of patches or implants do not hurt as much as pills.
 - c) have been scrutinized for their antidepressant properties.
 - d) role in women's depression is null since they are apt for it.
 - e) are claimed to be responsible for depression among women.
- 13** (Cesmac-AL) As for the dangers of contraceptives, teenagers:
- a) have experienced the least problems regarding depression.
 - b) outnumber both older women and young adults, for that matter.
 - c) are free from them as long as they're on progestin-only pills.
 - d) proved to be the ones most likely to endure its wicked effects.
 - e) have not been inflicted their devastating effects in any way.

- 14** (Cesmac-AL) The impact of low-dose hormonal contraception on mood and possibly depression:
- a) has been fully researched and tackled.
 - b) is yet to be comprehensibly grasped.
 - c) is well known and wholly understood.
 - d) has been conclusively figured out.
 - e) has always been completely ignored.
- 15** Na sentença "... *raised progesterone levels in particular may lower mood.*" (ℓ. 26), **may** indica:
- a) permissão.
 - b) probabilidade.
 - c) capacidade.
 - d) dedução.
 - e) obrigação.

Texto para as questões 16 e 17

Os quatro adesivos para carros reproduzidos a seguir (<www.bumperart.com>) contêm mensagens feministas. Leia-os e responda às questões 16 e 17.

- (1) Women who seek to be equal to men lack ambition
- (2) A Woman's Place Is In the House
The White House
- (3) A woman without a man is like a fish without a bicycle
- (4) If a woman wants to learn to drive, don't stand in her way

- 16** (Unicamp-SP) Qual dos quatro adesivos sugere que as mulheres não precisam dos homens? Justifique sua resposta.
- 17** (Unicamp-SP) Indique o número do adesivo que também pode ser lido como machista.

Texto para as questões 18 e 19

Objectification of women in the media
hinders gender equality – NCPE

June 8, 2016

The National Commission for the Promotion of Equality (NCPE) today expressed its concern with **regards** to the objectification of women's bodies in the media, including online media. Over the past months, the Commission has received a number of objections from the public with regards to videos and **statements** that **depict** women in an over-sexualised manner and reinforce negative gender stereotypes in society.

NCPE condemned these representations and stresses that those involved in the media should **refrain from issuing** material which objectifies and sexualises women and girls. The pervasive sexualisation of women and girls in media representations reinforces the stereotype that a woman's value is determined by her physical appearance and that woman's primary role is that of pleasing men. This correlates with unequal relations in society and has a direct adverse impact on women's equal participation in all spheres of life as well as sexual harassment.

NCPE said it works towards gender equality and respect and dignity for all persons.

Available at: <www.independent.com>

to hinder(ed): dificultar	to depict(ed): retratar
regard: relação	to refrain(ed) from: abster-se de
statement: declaração; afirmação	to issue(d): emitir

- 18** (Unesp-SP) De acordo com o segundo parágrafo, o que a sexualização da imagem da mulher, de forma ampla na mídia, reforça? Quais as suas consequências?
- 19** (Unesp-SP) O que preocupa a NCPE? O que motivou o seu pronunciamento?

Going Beyond 14

"To" Infinitive/Bare Infinitive/-ing Form

1. "To" Infinitive

Atenção para os seguintes exemplos:

- I. It's nice to see you, John.
adj.
- II. You're old enough to know this is wrong, kids!
adv.
- III. Does Dad have the tools to fix the car engine?
subst.
- IV. Do you have anybody to talk to about this situation?
indefinite

V. We don't know how to tell him the truth.

↓
int.

VI. Those kids *want to go* to college.

VII. My grandson *used to come* to Brazil every summer when he was a child.

O **"to" Infinitive** (infinitivo com "to") é usado na maioria das locuções verbais e também depois de adjetivos, advérbios, substantivos (indicando finalidade) e pronomes indefinidos e interrogativos.

Os verbos (locuções verbais) mais comuns normalmente seguidos de **"to" Infinitive** são:

<i>(can, can't) afford</i>	<i>learn</i>
<i>agree</i>	<i>manage</i>
<i>appear</i>	<i>mean</i> (com sentido de "pretender")
<i>ask</i>	<i>offer</i>
<i>be</i> (indicando obrigação ou ação futura)	<i>order</i>
<i>be about</i>	<i>prepare</i>
<i>beg</i>	<i>pretend</i>
<i>be supposed</i>	<i>promise</i>
<i>care</i>	<i>refuse</i>
<i>cause</i>	<i>remind</i>
<i>choose</i>	<i>request</i>
<i>claim</i>	<i>seem</i>
<i>dare</i>	<i>show</i>
<i>decide</i>	<i>teach</i>
<i>enable</i>	<i>tell</i>
<i>encourage</i>	<i>threaten</i>
<i>expect</i>	<i>try</i>
<i>fail</i>	<i>used</i>
<i>force</i>	<i>want</i>
<i>happen</i>	<i>wish</i>
<i>hope</i>	<i>warn</i>
<i>intend</i>	<i>would like</i>
<i>invite</i>	
<i>lead</i>	

Agora observe os exemplos:

I. We expect **to be** home by seven this evening.

(Esperamos estar em casa...)

II. We expect *him* **to be** home by seven this evening.

(Esperamos que ele esteja em casa...)

Certos verbos são normalmente seguidos de **object noun** ou **object pronoun** + **"to" Infinitive**.

Os mais comuns entre eles são:

<i>advise</i>	<i>compel</i>	<i>invite</i>	<i>request</i>
<i>allow</i>	<i>encourage</i>	<i>oblige</i>	<i>teach</i>
<i>ask</i>	<i>expect</i>	<i>order</i>	<i>tell</i>
<i>beg</i>	<i>forbid</i>	<i>press</i>	<i>want</i>
<i>cause</i>	<i>force</i>	<i>recommend</i>	<i>warn</i>
<i>command</i>	<i>intend</i>	<i>remind</i>	<i>wish (=want)</i>

2. Bare Infinitive (Infinitive without "to")

Leia os exemplos a seguir:

- I. If you want to drive, you *shouldn't* **drink**.
- II. Anybody *can* **answer** your questions.
- III. *Let* me **help** you with the work.
- IV. He likes her because she *makes* him **laugh**.
- V. Our daughter is sick. *We'd better* **take** her to the doctor's.
- VI. You look tired! *Would you rather* **stay** home and **have** a quiet night?

Usa-se o **Bare Infinitive** (infinitivo sem "to") depois dos seguintes verbos e expressões:

■ **Modal Verbs**

■ **let** e **make**

■ **would rather** e **had better**

seria preferível

seria melhor

preferiria

Observe o uso do Bare Infinitive e do "to" Infinitive na tira de Jeremy a seguir:

BORGMAN, Jim; SCOTT, Jerry. *My Bad: A Zits Treasury*. p. 21.

3. -ing Form

Atenção para os seguintes exemplos:

- I. **Reading** mystery novels was my mother's hobby.
- II. Are you going to practice **parking** today?
- III. I hate your **whining** all the time.

A **-ing Form** de um verbo pode funcionar como um **substantivo** e ter a função de sujeito ou objeto de uma oração. Como substantivo, a **-ing Form** pode ser usada com artigo, possessivo ou demonstrativo.

Agora, observe os exemplos:

- I. Immediately *after* **eating** his meal, he left the restaurant.
- II. Sharon wasn't interested *in* **learning** French.
- III. Do you feel *like* **going** out for dinner?
- IV. My husband *was used to* **doing** the dishes.

Quando **conjunções** ou **preposições** são seguidas de verbo, este deve ser colocado na **-ing Form**. Convém dar especial atenção à preposição **to** para não confundir-la com a partícula "to" do infinitivo.

Os seguintes exemplos de preposição **to** + **-ing Form** são comuns:

<i>look forward to</i>	}	+ -ing Form
<i>object to</i>		
<i>be (get) used to</i>		
<i>be accustomed to</i>		
<i>prefer... to</i>		
<i>take to</i>		

Observe as frases:

- I. Would you *mind* **answering** a few questions?
- II. I don't think *it's worth* **visiting** that area.
- III. Do you enjoy **cooking**?
- IV. *There's (It's) no use* **waiting** for him.

Em locuções verbais, certos verbos ou expressões verbais devem ser seguidos de **-ing Form**. Entre esses os mais comuns são:

<i>admit</i>	<i>can't stand</i>	<i>deny</i>	<i>imagine</i>	<i>mind</i>	<i>remember</i>	<i>suggest</i>	<i>appreciate</i>
<i>can't help</i>	<i>enjoy</i>	<i>it's no use</i>	<i>postpone</i>	<i>risk</i>	<i>to be worth</i>	<i>avoid</i>	<i>consider</i>
<i>finish</i>	<i>keep</i>	<i>quit</i>	<i>stop</i>				

Agora, veja os exemplos:

- I. Remember **to give** him some money. (Lembre-se de lhe dar algum dinheiro.)
- II. I remember **giving** him some money. (Eu me lembro de lhe dar (lhe ter dado) algum dinheiro.)
- III. Don't forget **to tell** her where you're living. (Não se esqueça de dizer a ela onde você está morando.)
- IV. He forgot **telling** her where he was living. (Ele se esqueceu de dizer a ela onde está morando.)
- V. He should stop **to eat** french fries. (Ele deveria parar para comer batatas fritas.)
- VI. He must stop **eating** french fries. (Ele precisa parar de comer batatas fritas.)

Depois dos verbos **remember**, **forget**, **regret** e **stop** usa-se outro verbo na **-ing Form** quando se trata de algo que **ocorreu anteriormente**. Quando se trata de algo que **vai ocorrer**, usa-se o **infinitivo com to**.

4. Bare Infinitive or -ing Form

Atenção para os exemplos a seguir:

- I. I heard him **sing/singing** beautifully.
- II. Have you seen her **leave/leaving** the house?
- III. Rather than **give/giving** an excuse he decided to tell the truth.

Depois de verbos como **hear**, **see**, **watch** e a expressão **rather than** pode-se usar **Bare Infinitive** ou **-ing Form**.

Observe o exemplo de uso do "to" Infinitive e da **-ing Form** na tira de Garfield a seguir:

DAVIS, Jim. *Garfield Hogs the Spotlight: His 36th Book*.

Texto para as questões 1 a 5

Disponível em: <<http://wordsmithonia.blogspot.com.br/2014/06/favorite-fictional-character-hagar.html>>. Acesso em: 30 out. 2017.

- 1** (Uncisal) O humor da tirinha está vinculado ao fato do personagem Hagar querer recrutar homens casados para sua nova tripulação devido às qualidades que esses homens supostamente apresentam. Assinale a alternativa que **NÃO** exprime uma das qualidades apresentadas por Hagar.
- Hagar espera recrutar homens que estejam acostumados a encarar o perigo sem pestanejar.
 - Hagar espera recrutar homens que não deixam absolutamente nada os incomodar.
 - Hagar espera recrutar homens dispostos a fazer sacrifícios.
 - Hagar espera recrutar homens que tenham irmãos e saibam dar ordens.
 - Hagar espera recrutar homens que acatem ordens, mesmo quando delas discordarem.

- 2** A frase do 1º quadrinho "*I'm happy that so many of you showed up today*" poderia ser reescrita, sem mudança de sentido, da seguinte maneira:
- a) I'm happy to seeing that so many of you come today.
 - b) I'm happy to see that so many of you came today.
 - c) I'm happy see that so many of you showed me the way today.
 - d) I'm happy seeing that so many of you are leaving today.
 - e) I'm happy to seen that so many of you are exhibiting your qualities today.
- 3** In the second frame, the phrase "*... Today I plan to assemble a new crew*" could be rewritten, with the same meaning, as:
- a) ... today I plan on assembling a new crew.
 - b) ... today I plan on assemble a new crew.
 - c) ... today I plan assemble a new crew.
 - d) ... today I plan on to assembling a new crew.
 - e) ... today I plan have assembling a new crew.
- 4** The phrase "*Before I choose...*", in the third frame, could be rewritten, without change in meaning, as:
- a) Before I choosing...
 - b) Before choosing...
 - c) Before I will choose...
 - d) Before of choosing...
 - e) Before to choose...
- 5** Identifique a frase **correta**.
- a) People are no longer used to drive without wearing seat belts.
 - b) We were used to finishing doing our homework before dinner.
 - c) They used to going to school by bus every morning.
 - d) Are you used to do the dishes?
 - e) Our parents weren't used getting up early.

What are the key trends in digital medicine?

Technology is promoting changes in the provision of healthcare and medicine on a global basis. What changes can we expect to see in the coming years? Gone are the days when healthcare was confined to a doctor's office or a hospital. Information technology has introduced the age of digital medicine, and

a growing number of traditional and non-traditional IT (information technology) companies are stepping
5 into the **fray**, offering a variety of new healthcare **tools** and services.

Advances in sensor technology, **widespread** wireless capabilities and exponential increases in electronic data and digital analytics – these are just a few of the developments already revolutionizing health care and digital medicine, from disease prevention and detection, to treatment and monitoring.

The digital revolution is changing the very nature of medical practice.

10 Technologies such as telemedicine are redefining how doctors and patients interact, while new and **plentiful** sources of personalized health information and advice are, **to some extent**, replacing **physicians**.

Google, Apple and Microsoft have invested heavily in platforms that offer consumers the ability **to track** and capture data on their own health. These platforms and others like them are enabled by sensor-equipped, wearable devices that register movement, heart and muscle activity, as well as
15 record an abundance of data points, such as body temperature, hydration, glucose and oxygen levels, respiration, ingestion and sleep cycles.

Governments are also playing a role.

In the United States, for example, the Centers for Medicare & Medicaid Services is increasing readmission penalties on hospitals to improve the quality of care and reduce the high cost of repeat
20 hospitalizations. This move has **prompted** hospitals to adopt telehealth solutions to remotely monitor patients after they **have been discharged**.

On the information-analysis front, the potential power of big data aggregation and cognitive computing is manifested in a very **compelling** way by IBM's Medical **Sieve** project.

The name is based on the goal: to create a digital sieve that filters clinical and diagnostic-imaging
25 data to help physicians diagnose and treat patients with more precision. The system **relies on** cognitive computing to analyze multimodal sources of data – such as pharmacy records, EMR, labs and ADT – combined with advanced clinical knowledge.

When proven, this technology will revolutionize the field of radiology, just as x-rays, ultrasound, PET scans and MRI have in the past. All these trends and developments **foretell** an increase in the growth and
30 the prosperity of a fast emerging digital medicine industry sector.

Ultimately, digital medicine is promoting a major **shift** from the old, one size fits all **approach** to a much more cost effective, customized approach.

Adapted from: <www.hottopics.com/17030/what-are-the-key-trends-in-digital-medicine/>.

1 (UFF-RJ) The statement: “*Gone are the days when healthcare was confined to a doctor’s office or a hospital.*” (ℓ. 2-3) means that:

- a) it is rare to find doctors in offices or at hospitals nowadays.
- b) doctors’ professional activities are confined to offices and hospitals after the advent of information technology.
- c) information technology has improved healthcare in doctors’ offices and at hospitals.
- d) doctor’s offices and hospitals have not been affected by advances in information technology.
- e) information technology has expanded the domain of healthcare beyond hospitals and doctors’ offices.

2 (UFF-RJ) Sensor technology and widespread wireless capabilities are two examples of technological developments which:

- a) are having a great impact on healthcare.
- b) prevent the detection and treatments of some diseases.
- c) have insignificant effect on electronic data and digital analytics.
- d) have had few applications in healthcare.
- e) are used only in disease prevention and detection.

fray: batalha
tool: ferramenta
widespread: altamente difundido
plentiful: abundante
to some extent: em certa medida
physician: médico
to track(ed): rastrear
to prompt(ed): levar; conduzir
to be discharged: ter alta
compelling: convincente
sieve: peneira
to rely(ied) on: confiar em
to foretell (foretold): anunciar
ultimately: em última análise; em última instância
shift: mudança
approach: abordagem

- 3** (UFF-RJ) According to the text, telemedicine:
- a) prevents the interaction between patients and doctors.
 - b) changes the way doctors and patients interact.
 - c) eliminates the need for interactions between doctors and patients.
 - d) promotes the interaction between patients and other patients.
 - e) results in poor interaction between doctors and patients.

- 4** (UFF-RJ) Body temperature, hydration, glucose and oxygen levels are examples of:
- a) health indicators that cannot be detected in the platforms developed by Google, Apple and Microsoft.
 - b) symptoms of a person's health which are affected by the regular use of technological procedures.
 - c) the targets of research carried out with the help of digital platforms.
 - d) data concerning a person's health monitored by sensor-equipped platforms.
 - e) the type of data which can be tracked and captured by consumers without the use of IT.

- 5** (FMC-RJ) The remote monitoring of patients (*Telehealth*) after they have been discharged from hospitals is aimed at:
- a) increasing re-admission penalties on hospitals.
 - b) enhancing the efficiency of Centers for Medicare and Medical Services.
 - c) improving the quality of care and reducing costs of repeat hospitalizations.
 - d) reducing the number of *Telehealth* solutions on Medical care.
 - e) introducing more efficient discharge procedures at hospitals.

- 6** (UFF-RJ) The goal of IBM's Medical Sieve project is:
- a) to increase the number of pharmacy records.
 - b) to filter a patient's medical data in order to help doctors with more efficient diagnosis and treatment.
 - c) to evaluate the efficiency of clinical and diagnostic imaging data.
 - d) to identify sources of data concerning physicians' medical history.
 - e) to restrict a patient's medical data to pharmacy records, EMR, labs and ADT.

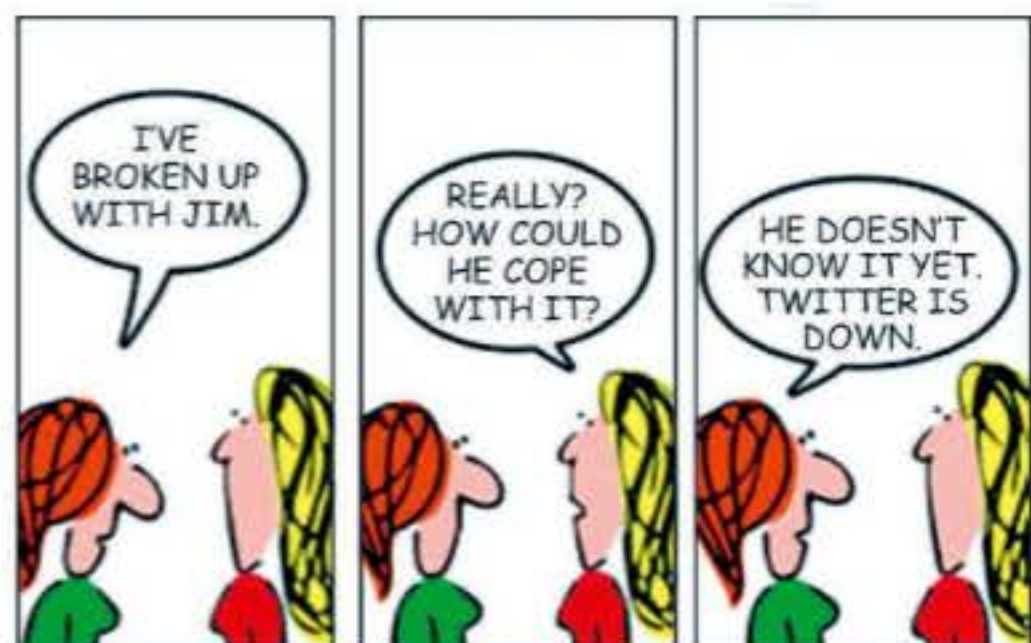

- 7** (UFF-RJ) X-rays, ultrasound, PET scans and MRI:
- a) represented a revolution in radiology in the past.
 - b) promoted a shift from the one size fits all approach to a more cost effective one.

- c) are important products of a fast emerging digital medicine industry sector.
- d) represent recent developments in IC-based radiology.
- e) are types of technology which emerged from IBM's Medical Sieve project.

- 8** (UFF-RJ) The connector **as well as** in "... *as well as record an abundance of data points, ...*" (ℓ. 14-15) expresses an idea of:
- a) condition.
 - b) contrast.
 - c) opposition.
 - d) consequence.
 - e) addition.

- 9** In the sentence "*Technologies such as telemedicine are redefining how doctors and patients interact*" (ℓ. 10), **such as**:
- a) brings the idea of **addition** and can be replaced by **besides**.
 - b) depicts **contrast** and can be replaced by **nonetheless**.
 - c) introduces an **exemplification** and can be replaced by **like**.
 - d) shows **consequence** and can be replaced by **therefore**.
 - e) brings the idea of **substitution** and can be replaced by **rather**.

Texto para a questão 10

- 10** (Unifesp) A tira evidencia que:
- a) as duas mulheres desaprovam o comportamento de Jim.
 - b) as duas mulheres preferem conversar pessoalmente a usar mídias sociais.
 - c) a mulher de roupa vermelha desaprova o fato de a mulher de roupa verde ainda não ter conversado com Jim.
 - d) a mulher de roupa vermelha ficou triste com a separação do casal.
 - e) a mulher de roupa verde tentou usar uma mídia social para resolver seu relacionamento afetivo.

Six things I learned from riding in a Google self-driving car

1 – Human beings are terrible drivers.

We drink. We **doze**. We **text**. In the US, 30.000 people die from automobile accidents every year. Traffic **crashes** are the primary cause of death worldwide for people aged 15-24, and during a crash, 40% of drivers never even hit the brakes. We're **flawed** organisms, **barreling around** at high speeds in **vessels** covered in glass, metal, distraction, and death. This is one of Google's "moonshots" – to remove human error from a job which, for the past hundred years, has been entirely human.

2 – Google self-driving cars are timid.

The car we rode in did not seem to me as dangerous. It drove slowly and deliberately, and I got the impression that it's more likely to **annoy** other drivers than to harm them.

In the early versions they tested on closed **courses**, the vehicles were programmed to be highly aggressive. Apparently during these tests, which involved obstacle courses full of traffic cones and inflatable crash-test objects, there were a lot of **screeching** brakes, **roaring** engines and terrified **interns**.

3 – They're **cute**.

Google's new **fleet** was intentionally designed to look adorable. Our brains are **hardwired** to treat inanimate (or animate) objects with greater care, caution, and reverence when they **resemble** a living thing. By turning self-driving cars into an adorable Skynet Marshmallow Bumper Bots, Google hopes to spiritually disarm other drivers. I also suspect the **cuteness** is used to **quell** some of the road **rage** that might emerge from being stuck behind one of these things. **They're** intended as moderate-distance couriers, not open-road **warriors**, so their max speed is 25 miles per hour.

4 – It's not done and it's not perfect.

Some of the scenarios autonomous vehicles have the most trouble with are the same *human beings* have the most trouble with, such as **traversing four-way stops** or **handling** a yellow light.

The cars use a mixture of 3D laser-mapping, GPS, and radar to analyze and interpret their surroundings, and the latest versions are fully electric with a **range** of about 100 miles.

Despite the advantages over a human being in certain scenarios, however, these cars still aren't ready for the real world. They can't drive in the snow or heavy rain, and there's a variety of complex situations they do not process well, such as passing through a construction zone. Google is hoping that, **eventually**, the cars will be able to handle all of this as well (or better) than a human could.

5 – I want this technology to succeed, like... yesterday.

I'm **biased**. Earlier this year my mom had a **stroke**. It damaged the visual cortex of her brain, and her vision was **impaired** to the point that she'll probably never drive again. This reduced her from a fully-functional, independent human being with a career and a **buzzing** social life into someone who is **homebound**, disabled, and powerless.

When discussing self-driving cars, people tend to ask many superficial questions. They ignore that 45% of disabled people in the US still work. They ignore that 95% of a car's lifetime is spent parked. They ignore how this technology could transform the lives of the elderly, or eradicate the need for parking lots or garages or gas stations. They **dismiss** the entire concept because they don't think a computer could ever be as good at **merging** on the freeway as they are. They ignore the great, big, beautiful picture: that this technology could make our lives so much *better*.

6 – It wasn't an **exhilarating** ride, and that's a good thing.

Riding in a self-driving car is not the cybernetic **thrill** ride one might expect. The car drives like a person, and after a few minutes you forget that you're being driven autonomously. You forget that a robot is differentiating cars from pedestrians from **mopeds** from **raccoons**. You forget that millions of

to doze(d): cochilar
to text(ed): escrever mensagens
crash: batida; acidente
flawed: imperfeito
to barrel(ed) around: mover-se rapidamente
vessel: veículos
to annoy(ed): incomodar
course: circuito; pista; campo
screeching: estridente
roaring: estrondoso
intern: estagiário
cute: fofo; gracioso
fleet: frota
hardwired: programados
to resemble(d): assemelhar-se
cuteness: fofura; graça
to quell(ed): acabar com; sufocar
rage: ódio; fúria
warrior: guerreiro
to traverse(d): atravessar
four-way stops: parada de quatro vias
to handle(d): lidar com
range: alcance
eventually: no final das contas
biased: parcial; preconceituoso
stroke: derrame; AVC
to impair(ed): prejudicar
buzzing: movimentada; atribulada
homebound: presa ao lar; sem capacidade de sair de casa

moped: motoca; motolete
raccoon: guaxinim
to fumble(d) through: tatear (sem caminho) através de
to be (was, were) birthed: ser criado; surgir
to erupt(ed) from: surgir de
outrage: indignação

photons are being fired from a laser and interpreting, processing, and reacting to the hand signals of a cyclist. You forget that instead of an organic brain, which has had millions of years to evolve the cognitive ability to **fumble** its way **through** a four-way stop, you're being piloted by an artificial one, which **was birthed** in less than a decade.

The unfortunate part of something this transformative is the inevitable, ardent stupidity which is going to **erupt from** the general public. Even if in a few years self-driving cars are proven to be ten times safer than human-operated cars, all it's going to take is one tragic accident and the public is going to lose their minds. There will be **outrage**. There will be politicizing. There will be hashtags.

I say look at the bigger picture. All the self-driving cars currently on the road *learn* from one another, and possess 40 years of driving experience. And this technology is still in its infancy.

Adapted from: <http://theoatmeal.com/blog/google_self_driving_car>.

11 (UFPR) Consider the following:

1. Drinking before driving.
2. Sending a written message while driving.
3. Sleeping for a short period of time.
4. Hitting the brakes.
5. Speeding up.

According to the text, some human mistakes that happen before or during a car accident are:

- a) 1 and 3 only.
- b) 1, 2 and 4 only.
- c) 2, 4 and 5 only.
- d) 3, 4 and 5 only.
- e) 1, 2, 3 and 5 only.

12 (UFPR) According to the author:

- a) elderly human beings tend to drive better than autonomous vehicles.
- b) during early tests, many animals and cyclists were hit and hurt by autonomous cars.
- c) radar, GPS and 3D laser-mapping are used in Google's self-driving vehicles.
- d) self-driving cars were responsible for 30,000 deaths in the US last year.
- e) the new technology proposed by Google for cars has been tested for more than 40 years.

13 (UFPR) Consider the following characteristics of the new Google self-driving car:

1. It runs on batteries and petrol.
2. It can be used in extreme weather conditions.
3. It has a design which requires further modifications.
4. It can reach the speed of 25 miles per hour.

Mark the correct alternative.

- a) Only 1 is correct.
- b) Only 1 and 4 are correct.
- c) Only 3 and 4 are correct.
- d) Only 1, 2 and 3 are correct.
- e) Only 2, 3 and 4 are correct.

14 (UFPR) Based on the text, it is correct to affirm that the author:

- a) denies the advantages of self-driving vehicles.
- b) admits the new type of car will receive severe criticism.
- c) wants to buy his mother an autonomous vehicle in the future.
- d) was an intern working in Google's new self-driving vehicle project.
- e) believes the new self-driving cars need human support on highways.

15 (UFPR) Based on the reading, mark the correct alternative.

- a) the author's mother suffered an accident while on a self-driving car.
- b) self-driving vehicles have caused more tragic traffic accidents than cars driven by men.
- c) traffic accidents are the main cause of young people's death around the world.
- d) the new Google autonomous car is still too aggressive to be used on open roads.
- e) more than 50% of the people who are still at work were impaired in car accidents and are unable to drive.

16 (UFPR) The text points out that the design of the self-driving car is deliberately attractive because:

- a) Google expects to neutralize their possible competitors.
- b) people tend to behave positively towards things that look like alive things.
- c) young people enjoy driving attractive brand new models.
- d) other drivers might not surpass these autonomous cars on the road.
- e) their appearance may help people who suffered accidents overcome their fears.

Texto para as questões 17 e 18

How technology can empower the elderly

The elderly have often been neglected by technology developers as a focus market. The stereotype is that they are technophobes, or at least slow to pick up new innovations. However, in reality not only are the elderly very capable of using a range of complex modern technologies, they are also very often in need of **devices** that can ease their lives and empower them in their range of abilities. Let's look over a few of the best examples out there.

*It seems that we are **currently** obsessed with reducing the size of new devices to make them more and more portable.* However, according to researchers, most elderly people prefer to spend their time without rushing and stressing and going from one place to the other, as many young people do. Many spend a great deal of time in their homes, which is often referred to as "ageing in place". Therefore, **gadgets** designed to support home living can be very useful, especially when they are designed appropriately for the elderly. Some simple examples include TV remote controllers, mobile phones and tablets designed as lightweight and featuring large illuminated buttons. TV audio amplifiers can also be very useful, as well as audiobooks downloaded as MP3s or played on tablets and similar devices directly from a browser or a playlist.

*The **improvements** in home alarms and mobile phone security apps for seniors have been noticeable.* There are sophisticated gadgets now available which can track activity patterns and create alerts for **carers** and family or friends when there is an unexpected interrupt in an elderly person's routine. There are also a good range of wireless alarm systems which can be placed around the home **with ease**.

*For those who **wander** due to conditions such as Alzheimer's or dementia, GPS Shoes and Smart soles are a great facility.* GPS Shoes update information periodically so caregivers can be informed about the location of the user with frequencies ranging up to every 10 minutes. GPS Smart **soles** allow online tracking of a user's location through any smartphone, tablet or browser with the login details.

A **widening** range of gadgets are now becoming more user friendly, interesting and empowering for the elderly. Also, a broad range of gadgets are now custom-made for this market group. After all, this is a segment of the population who should be respected and should never be neglected. They brought us into this world, and we will all arrive into this demographic in the end.

psychocentral.com

the elderly: os idosos
device: dispositivo
currently: atualmente
gadget: aparelho
improvement: melhoria

carer: cuidador
with ease: com facilidade; facilmente
to wander(ed): vagar
sole: sola (de sapato)
widening: ampla

- 17** (Uerj) According to the last paragraph, the elderly is a new market segment to be considered.

In this sense, the main idea behind the technology developed for the elderly is:

- a) respect.
- b) difficulty.
- c) modernity.
- d) negligence.

- 18** (Uerj) In the fourth paragraph, it is mentioned that GPS shoes are specially useful for those suffering from conditions such as Alzheimer's or dementia.

One of the reasons for its utility is:

- a) to find out their way home.
- b) to stop them from walking.
- c) to help locate these people.
- d) to say aloud where they are.

Going Beyond 15

Modal Verbs

Atenção para os exemplos a seguir:

- I. Peter **can** play several instruments.
- II. **May** I leave earlier today?
- III. Everyone **must** have their passports at hand.
- IV. You **shouldn't** be so selfish.
- V. Technology **ought to** help solve those problems.

Os **Modal Verbs** **can/could**, **may/might**, **must**, **should**, **ought** não são conjugados como os demais verbos (não têm **s** na 3ª pessoa do singular do "Simple Present", por exemplo) e, como são verbos auxiliares, **do/does/did** não são usados na formação das orações negativas ou interrogativas.

Os **Modal Verbs** devem ser seguidos de **Bare Infinitive** (infinitivo sem **to**), exceto **ought**, que deve ser seguido de "**to**" **Infinitive** (infinitivo com **to**).

1. Can

Veja alguns exemplos a seguir:

- I. A: **Can** the baby walk?
B: I think he **will be able** to walk in a few weeks.
- II. Let's change the subject. We **can** talk about this later.
- III. A: **Can** I go outside and play ball, Mom?
B: No you **can't**, you still have to finish your homework.
- IV. Accidents **can** happen.
- V. A: **Can** we help him?
B: You **can** try by asking him if he needs any help.

Can pode ser usado para:

- indicar capacidade de fazer algo, geralmente no presente. No futuro é comum o uso de **will be able to**;
- pedir ou negar permissão (informalmente);
- indicar possibilidade;
- indicar (pedido de) sugestão.

2. Could

Observe alguns exemplos:

- I. Little Joe **could/was able to** climb any tree when he was a child.
- II. A: Do you need any help?
B: You **could** do the dishes.
- III. I'm sure we **could** get a new car if we saved some money.

Could pode ser usado:

- para indicar capacidade no passado;
- para indicar sugestão;
- em sentido *condicional*.

3. May/Might

Veja alguns exemplos:

- I. A: **May/Might** I come in?
B: Of course not.
- II. These substances **may/might** cause environmental damage.
- III. **May** you all recover quickly!
- IV. Dad told us we **might** have to move.
- V. If she went on a diet, she **might** lose a few pounds.

May/Might podem ser usados para

- indicar permissão (formalmente);
- indicar possibilidade;
- **May** também pode ser usado para expressar "votos" (desejos) de que algo ocorra.

Might pode ser usado:

- como passado de **may** (no discurso indireto);
- em sentido *condicional*.

Observe o uso de *may* na tira de Garfield a seguir.

DAVIS, Jim. *Garfield Eats His Heart Out*. His Sixth Book.

4. Must

Observe alguns exemplos:

- I. Everyone in the car **must/has to** wear their seat belts.
- II. All citizens **must** obey the law.
- III. Our car has stopped running. There **must** be something wrong with the engine.
- IV. Visitors **must not** feed the animals at the zoo.
- V. You **don't have to/needn't** feed the children right now. They're not hungry.

Must pode ser usado para indicar:

- necessidade ou obrigação;
- dedução.

Must not geralmente indica proibição.

Don't/Doesn't have to (Needn't) indica não necessidade.

5. Should/Ought to

Veja alguns exemplos:

- I. If your baby has a high fever, you **should** take him to the doctor's.
- II. I don't know what to do. Maybe we **ought to** talk to a lawyer about the situation.
- III. We've bought three loaves of bread and a cake. That **should/ought to** be enough for the afternoon snack.

Should/ought to podem ser usados para indicar:

- conselho/recomendação;
- grande probabilidade.

6. Modal Verbs + have + Past Participle

Observe os seguintes exemplos:

- I. They **could/should have told** the truth. Things **might not have turned out** so badly.
- II. Tom looks very tired this morning. He **must have stayed** in the office and **worked** overnight.

Para indicar que algo **pode/poderia/deve/deveria ter ocorrido** no passado, podemos usar **Modal Verbs + have + Past Participle**.

Observe o uso de **must have + Past Participle** na tira a seguir:

to pin(ned): fixar;
prender
to get clobbered: ser
espancado

WATTERSON, Bill. *There's Treasure Everywhere: A Calvin and Hobbes Collection*, p. 18.

Nas questões 1 a 6, assinale a alternativa que completa corretamente cada frase.

- 1** (ITA-SP) You _____ to study harder if you don't want to fail.
a) must
b) ought
c) should
d) may
e) can
- 2** (FMU-SP) Stop it, children! You _____ write on the wall.
a) needn't
b) must
c) mustn't
d) will
e) should
- 3** (ITA-SP) The pilot was told that he _____ not land because of the fog.
a) could
b) can
c) will
d) may
e) ought
- 4** (FCC-SP) Elizabeth is able to understand her English teacher, therefore she _____ answer his questions.
a) cannot to
b) should
c) could never
d) must to
e) have to
- 5** (FMU-SP) Since you asked me to, you _____ go home earlier today.
a) may
b) must
c) are able
d) might
e) should
- 6** (ITA-SP) I'm awfully sorry, but I had no choice, I simply _____ what I did.
a) ought to
b) must do
c) have to do
d) have done
e) had to do

Os probióticos são bactérias vivas e leveduras, conhecidas como microrganismos “bons” porque beneficiam o sistema digestivo. Eles ajudam a manter a saúde diminuindo o número de bactérias “ruins” no intestino.

Observe no quadro a seguir os benefícios dos probióticos

BENEFITS OF PROBIOTICS

 Maintain good digestion	 Have antioxidant properties	 Improve neurotransmitter balance
 Keep strong immune system	 Improve cell growths	 Improve mental health
 Reduce inflammation	 Metabolize xenobiotics and heavy metals	 Fight the ravages of aging

Dr. Michael Lam, M.D. DrLam8 and Body Mind Nutrition@www.drLam.com

- 1** Podemos depreender a partir da leitura do cartum acima que:
- a) o restaurante possui um cardápio especial contendo apenas iogurtes.
 - b) o garçom oferece iogurtes variados de sobremesa.
 - c) os clientes do restaurante pediram iogurte como refeição principal.
 - d) o restaurante possui um cardápio saudável, que oferece iogurte como acompanhamento de todos os pratos.
 - e) o garçom anuncia aos clientes que o restaurante é especializado em diversos tipos de iogurte como sobremesa.

Texto para as questões 2 a 7

Can Probiotics Prevent Deadly Infections in **Preemies**?

- 1 [...] The practice of administering probiotics to preemies is, in some ways, a **leap** of **faith**. While more than 30 **randomized** controlled **trials** suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis),
- 5 the largest trial to date found no effect. What's more, it's not yet clear which **strains** of bacteria provide the best

protection, what dose a baby needs to receive, or exactly how these microbes protect the **gut** from NEC. As a result, the debate over whether probiotics should be a standard of care for babies can be heated; only 14% of **NICU**'s in the U.S. have adopted the practice.

"Neonatology is a field where we've really had some **mess-ups**," says Josef Neu, a neonatologist at the University of Florida. "I think we have to be extremely careful." Giving babies probiotics isn't like giving them a dose of penicillin, he adds. "These are live agents," some of which can **stick with** babies **long-term**. Many others share Neu's caution, arguing that the evidence of a benefit isn't strong enough yet and that probiotics in the U.S. are subject to little

20 regulatory **oversight**.

Yet some neonatologists see no reason to **delay**. "There's now actually more evidence for the use of probiotics in neonatology than for just about everything else that we do," says Keith Barrington, a neonatologist at Sainte Justine University Health Center, which offers probiotics in its NICU. "I'm really not sure what kind of evidence would convince someone like Dr. Neu." [...]

Public Broadcasting Service. Available at: <www.pbs.org/wgbh/nova/next/body/probiotics-for-preemies/>. Accessed on: October 30th, 2018.

preemie: bebê prematuro
leap: salto
faith: fé
randomized: randomizado; ao acaso
trial: teste
strain: cepa; linhagem
gut: intestino

NICU (Neonatal Intensive Care Unit):
 Unidade de Tratamento Intensivo Neonatal
mess-up: desordem; bagunça
to stick (stuck) with: permanecer em
long-term: a longo prazo
oversight: supervisão
to delay (ed): atrasar

- 2** The sentence "While more than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis), the largest trial to date found no effect" (l. 2-5) could be rewritten, with no change in meaning as:
- a) Since more than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis), the largest trial to date found no effect.
 - b) More than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis). In addition, the largest trial to date found no effect.
 - c) More than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis). Furthermore, the largest trial to date found no effect.

- d) More than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis). Therefore, the largest trial to date found no effect.
- e) More than 30 randomized controlled trials suggest that probiotics can protect preemies from NEC (necrotizing enterocolitis). However, the largest trial to date found no effect.

3 The text says that, as for probiotics:

- a) the microbes that protect the gut are fully known.
- b) the strains of protective bacteria are still unclear for scientists.
- c) there's a unique dose of probiotics that babies need to be protected from.
- d) all kinds of microbes protect the gut from necrotizing enterocolitis.
- e) babies and adults should receive the same daily doses of probiotics.

4 De acordo com o texto, a possibilidade de os probióticos serem ou não um padrão para o cuidado dos bebês:

- a) é aceita na maioria das Unidades de Tratamento Intensivo Neonatal.
- b) pode gerar um debate acalorado.
- c) tem sido ressaltada pela maioria dos cientistas.
- d) não leva em conta as pesquisas anteriores.
- e) já foi debatida e concluída.

5 Josef Neu, a neonatologist at the University of Florida:

- a) is completely certain that the use of probiotics in babies is harmful.
- b) sees giving probiotics to babies with caution.
- c) believes providing probiotics to babies is like giving them a dose of penicillin.
- d) mentions the live agents of penicillin.
- e) claims that penicillin can stay with the babies for a too long time.

6 In the sentence "Yet some neonatologists see no reason to delay." (ℓ. 21), **yet** can be replaced, with no change in meaning, by:

- a) So.
- b) Hence.
- c) Besides.
- d) Nonetheless.
- e) Thus.

7 Segundo o texto, Keith Barrington concorda ou discorda da opinião de Josef Neu? Justifique sua resposta.

Texto para as questões 8 a 15

First human cells grown in sheep embryos in organ donation breakthrough

By Staff Reporter Sunday 18 February 2018 23:40 GMT

1 Scientists say they have grown sheep embryos containing human cells, marking a significant step towards cultivating human organs in animals.

5 It is hoped growing the body parts in animals could not only reduce transplant waiting lists but also lower the transplant rejection rates because they could be grown with a patient's own cells.

10 Scientists have long attempted to grow organs of one species inside another and have previously successfully grown a rat pancreas inside a mouse.

Last year, scientists from the University of California created human-pig hybrid embryos in which about one in every 100,000 cells was human.

15 The same team this week announced **they** had achieved similar sheep embryos, in which around one in every 10,000 cells was human.

20 The scientists say they are already ¹ able to genetically modify pig and sheep embryos so the animals are unable to develop a pancreas. The hope is that implanting human cells in such embryos would result in the animal growing a human pancreas.

25 The embryos are currently only allowed to develop for 28 days and researchers say they would like to extend the **deadline** to get a better idea of how the cells go on to specialize.

30 ²"We have already generated a mouse pancreas in rats and then transplanted those in to a diabetic mouse and were ³ able to show almost a complete cure without any immunosuppressants," Dr Hiro Nakuuchi, who is leading the research, told the American Association for the Advancement of Science in Austin, Texas.

"When it comes to human-sheep it seems more difficult. So we would like to proceed a little longer and this time use organ-deficient embryos.

35 "It could take five years or it could take 10 years but I think eventually we will be able to do this."

Certain organs in pigs and sheep are similar in size to **those** in humans, making them **suitable** animals on which **to carry out** the tests.

Retrieved from: <www.independent.co.uk/news/science/sheep-embryos-human-cells-hybrid-organ-donation-breakthrough-a8216821.html>. (adapted)

breakthrough: avanço	suitable: adequado
towards: em direção a	to carry (carried) on: realizar
to achieve(d): conseguir; conquistar	
deadline: prazo final	

8 (Unesp-SP) Consider the statements about the text and choose the alternative in which there are only correct propositions.

- One of the research intentions is growing human organs inside animals and reduce transplant waiting lists.
- Dr. Hiro Nakuuchi, responsible for the research, created human-pig hybrid embryos with 100,000 cells and realized the procedure will take a little longer to be approved.
- According to the research, pigs and sheep will take from five to 10 years to be suitable animals on which to carry out the tests about the pancreas.
- Using the patient's own cells to be cultivated inside another species until they become organs for transplants, makes the researchers believe that the transplant rejection rates can be lower.

Mark the correct alternative.

- Only III is correct.
- I and IV are correct.
- I, II, and IV are correct.
- II and III are correct.
- I, III and IV are correct.

9 (Unesp-SP) Consider the statements extracted from the text and choose the alternative in which there are only correct propositions.

- The meaning of the underlined word in the following sentence, "... *to show almost a complete cure without any immunosuppressants*..." is a medicinal drug.
- The word 'able' in both these sentences, "... *The scientists say they are already able to genetically modify*..." (ref. 1) and "... *transplanted those in to a diabetic mouse and were able to show almost a complete cure*..." (ref. 3) expresses the idea of capability.
- The underlined pronouns **they** and **those** respectively refer to: 'embryos' and 'animals'.

IV. The sentence "*We have already generated a mouse pancreas in rats and then transplanted those in to a diabetic mouse...*" (ref. 2) is in the present perfect tense.

Mark the correct alternative.

- All of them are correct.
- I and III are correct.
- II and IV are correct.
- I, II, and IV are correct.
- III and IV are correct.

10 In the sentence "*The embryos are currently only allowed to develop for 28 days*" (ℓ. 22-23), **currently** brings the idea of:

- present time.
- future time.
- past time.
- conditional.
- passive voice.

11 In the sentence "*It is hoped growing the body parts in animals could not only reduce transplant waiting lists but also lower the transplant rejection rates...*" (ℓ. 4-6), the expression **not only... but also** gives the idea of:

- contrast.
- conclusion.
- consequence.
- opposition.
- addition.

12 In the sentence "*Scientists have long attempted to grow organs of one species inside another...*" (ℓ. 8-9), **another** refers to:

- organs.
- species.
- scientists.
- transplant.
- rejection.

13 Em "*The scientists say they are already able to genetically modify pig and sheep embryos so the animals are unable to develop a pancreas.*" (ℓ. 17-19), **so** traz a ideia de:

- consequência.
- adição.
- possibilidade.
- contraste.
- reciprocidade.

14 In the sentence "*The hope is that implanting human cells in such embryos would result in the animal growing a human pancreas.*" (ℓ. 19-21), **such** could be replaced, with no change in the meaning, by:

- some.
- this.
- these.
- that.
- like.

15 Marque a alternativa que apresenta uma oração na forma correta de voz passiva:

- Scientists say they have grown sheep embryos containing human cells, marking a significant step towards cultivating human organs in animals.
- Scientists have long attempted to grow organs of one species inside another and have previously successfully grown a rat pancreas inside a mouse.

- c) Last year, scientists from the University of California created human-pig hybrid embryos in which about one in every 100,000 cells was human.
- d) The embryos are currently only allowed to develop for 28 days...
- e) "We have already generated a mouse pancreas in rats..."

Texto para as questões 16 e 17

Awareness campaigns may help some people get useful support and treatment, but they might also prompt healthy people to start taking drugs they do not need. "Drug company sponsorship doesn't mean the information is bogus – but it does raise a red flag because companies do stand to benefit from increasing diagnoses, which leads to more treatment," says Steve Woloshin, a researcher at the Dartmouth College Institute for Health Policy and Clinical Practice. It can be difficult for consumers to know if a condition they are hearing about is part of a drug company awareness campaign – TV ads and Web sites do not always disclose company sponsorship – but consumers can look out for phrases such as "the disease your doctor has never heard of," which can be red flags. Most important, before starting a new treatment, is to always talk to your doctor about risks and benefits. "The key questions to ask about treatment are 'What is likely to happen to me if I am not treated? What is likely to happen to me if I am – including side effects?'" Woloshin says.

Scientific American Mind, September/October 2015.

Baseando-se no texto e redigindo em português, atenda ao que se pede.

- 16** (Fuvest-SP) Aponte uma vantagem e uma desvantagem presentes em campanhas de conscientização sobre problemas de saúde, veiculadas pelos meios de comunicação.
- 17** Quais são os dois questionamentos a serem feitos ao médico antes do início de qualquer tratamento?

Going Beyond 16

Passive Voice

Leia a tira a seguir:

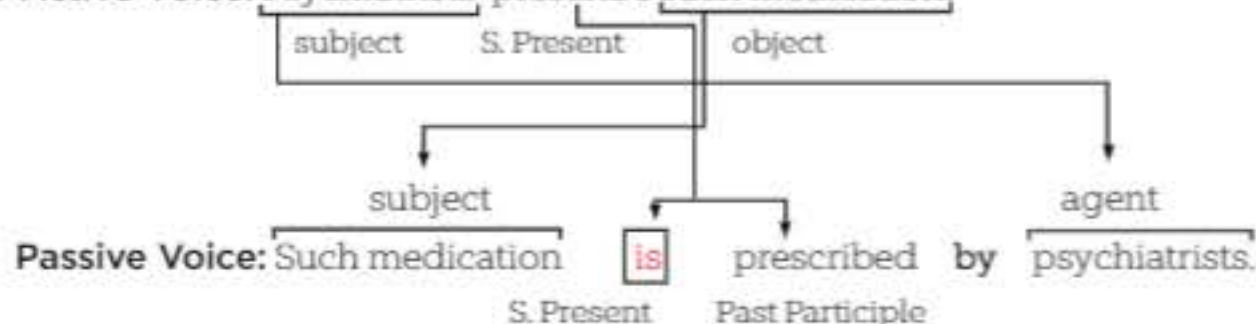

DAVIS, Jim. *Garfield Bigger Than Life: His Third Book*.

As frases "Everything is controlled by computers these days" e "That chicken [...] was even raised by a computer" constituem exemplos de **voz passiva**.

1. Formação

Atenção para os seguintes exemplos:

I. Active Voice: Psychiatrists prescribe such medication.

II. Active Voice: The earthquake destroyed the town.

subj. S. Past object

Passive Voice: The town was destroyed by the earthquake.

subject S. Past Past Part. agent

III. Active Voice: The Queen has presented the awards.

subj. Pres. Perfect obj.

Passive Voice: The awards have been presented by the Queen.

subj. Pres. Perfect Past Part. agent

IV. Active Voice: The FBI was investigating some politicians.

subj. Past Continuous obj.

Passive Voice: Some politicians were being investigated by the FBI.

subj. Past Continuous Past Part. agent

V. Active Voice: Police officers will make the arrest.

Fut.

Passive Voice: The arrest will be made by police officers.

S. Fut. Past Part.

A voz passiva é construída da seguinte maneira:

- O objeto da voz ativa torna-se sujeito da voz passiva.
- O sujeito da voz ativa torna-se o agente da voz passiva, precedido da preposição **by**.

A forma verbal da voz passiva é constituída de:

- verbo **to be** no mesmo tempo do verbo principal da voz ativa.
- +
- particípio passado do verbo principal da voz ativa.

2. Modal Verbs na passiva

I. Active Voice: Doctors only should perform biopsies.

Passive Voice: Biopsies should be performed by doctors only.

II. Active Voice: The firemen could have saved many lives.

Passive Voice: Many lives could have been saved by the firemen.

Tabela das formas verbais na voz passiva

Verb Forms	Active Voice Example	Passive Voice to be + Past Participle
S. Present	do, does	is (are)
S. Past	did	was (were)
S. Future	will do	will be
S. Conditional	would do	would be
Present Continuous	is (are) doing	is (are) being
Past Continuous	was (were) doing	was (were) being
S. Present Perfect	has (have) done	has (have) been
S. Past Perfect	had done	had been
Future Perfect	will have done	will have been
Conditional Perfect	would have done	would have been
Infinitive	(to) do	(to) be
-ing Form	doing	being
Modal Verbs	can	can
	could	could
	may	may
	might	might be/have been
	must	must
	should	should
	ought to	ought to

Quando a forma verbal da voz ativa apresenta um **Modal Verb**, na voz passiva ocorrem as seguintes mudanças:

Ativa

Modal + infinitivo sem to

Modal + have + particípio passado

Passiva

Modal + be + particípio passado

Modal + have + been + particípio passado

3. O agente da passiva

Active Voice: Everybody must tell the truth.

Passive Voice: The truth must be told ~~by everybody~~.

Active Voice: People will always publish new books.

Passive Voice: New books will always be published.

Na maioria dos casos de voz passiva, o agente **não** é mencionado.

4. Objeto direto e objeto indireto na passiva

Active Voice: Someone told <u>us</u> <u>the secret</u>. obj. ind. obj. dir. Passive Voice: We <u>were</u> <u>told</u> the secret. suj. obj. dir.	Active Voice: Someone feeds <u>the babies</u> <u>a probiotic</u> now and then. obj. ind. obj. dir. Passive Voice: <u>The babies</u> <u>are fed</u> a probiotic now and then. suj. obj.
--	--

Quando o verbo da voz ativa é seguido de dois objetos, usualmente o objeto **indireto** é que se torna o **sujeito da passiva**.

Observe a formação da passiva nos dois primeiros quadrinhos da tira de Dilbert a seguir.

ADAMS, Scott. *It's Obvious You Won't Survive by Your Wits Alone: A Dilbert Book*. p. 109.

5. Notas

Observe alguns exemplos:

- I. **Active Voice:** Nobody will solve the mystery.
Passive Voice: The mystery will not be solved.
- II. **Active Voice:** People haven't said anything.
Passive Voice: Nothing has been said.
- III. **Active Voice:** We don't expect any help.
Passive Voice: No help is expected.

Quando a oração na voz ativa é **negativa**, esse sentido de **negação deve ser mantido** na voz passiva. Para isso, algumas adaptações são necessárias.

- 1** (UFMG) Reescreva as frases a seguir na voz passiva.
 - a) The man was leading a little dog.
 - b) People showed him great devotion.
 - c) The old man could not avoid a walk to the villa.
- 2** Rewrite the sentences using the **passive** form. Make any necessary changes.
 - a) People haven't done anything to help her.
 - b) Nobody should tell kids white lies.
 - c) Nowadays they feed babies some probiotics.
 - d) Should they answer all the questions?
 - e) Did they give him the documents?

Text Comprehension: Stem Cells

Células-tronco são uma classe de células indiferenciadas com capacidade de gerar uma cópia idêntica a si mesma. Comumente, as células-tronco são obtidas a partir de duas fontes principais:

- Embriões formados durante a fase de blastocistos do desenvolvimento embriológico (células-tronco embrionárias);
- Tecido adulto (células estaminais adultas).

Ambos os tipos são geralmente caracterizados pela sua capacidade ou potencial de se diferenciar em diferentes tipos de células (como células da pele, do músculo, do osso, etc.).

Exercícios

Texto para as questões 1 a 5

Tech workers are paying \$7,000 to freeze their stem cells in hope of extending life

- 1 ■ Start-up investor Li Jiang turned to Forever Labs to extract and store young adult stem cells.
- Forever Labs hopes that it can help slow the aging process.
- Many scientists aren't certain that the technology is worth the time, money and effort.

Start-up investor Li Jiang just turned 30, and now he can't stop thinking about his own mortality.

- 5 For Jiang, who's based in San Francisco, living longer isn't just about eating healthy and exercising regularly. Last month, he cryogenically froze his stem cells, in the hopes of someday injecting them back into his body.

Jiang is one of the earliest testers of Forever Labs, which extracts and **stores** young adults' stem cells to potentially combat age-related illnesses like arthritis and heart disease. The company has the ambitious plan to **counter** "aging itself."

- 10 Forever Labs is a graduate of the start-up accelerator program Y Combinator and has raised \$2 million in funding to expand its service to more states. Jiang, a **former** investment banker who worked on health-care deals, is also an early investor in the start-up.

- 15 It's not a cheap **endeavor**. Forever Labs charges \$7,000 for a plan that includes the procedure and lifetime storage. Jiang says that's the price tag for longevity.

to store(d):

armazenar

to counter(ed):

combater

former: ex

endeavor: esforço

sample: amostra

hurdle: obstáculo

"If you are able to extend your life by even five years, I mean I think you would pay something to do that," he said.

But this is unprecedented work, and the market is so nascent that doctors and scientists are still researching how the frozen stem cells can even be used in the future.

20 Not everyone is convinced that it's worth the time and money to store these cells.

Agnieszka Czechowicz, an assistant professor of medicine at Stanford focusing on stem cell transplantation, said it's unclear if regulators will approve any potential therapies that would rely on these **samples**. There's also the risk that the samples might not be large enough to be used in any meaningful way, and uncertainty about what would happen if Forever Labs were to fail, as many start-
25 ups do.

Despite the many **hurdles** associated with private stem cell banking, Czechowicz said she's excited about the prospects and "the evolving research that may open opportunities to use such cells." [...]

FARR, Christina. CNBC, May 5th, 2018. Available at: <www.cnbc.com/2018/05/04/tech-workers-are-paying-forever-labs-7000-to-freeze-stem-cells.html>. Accessed on: August 7th, 2018.

1 According to the text, for Li Jiang,

- a) eating and exercising regularly is all about living longer.
- b) the hope to live longer exercising regularly and eating healthy has always been on his mind.
- c) start-ups should have longer lives.
- d) turning 30 in good shape is the result of eating healthy and exercising regularly.
- e) freezing his stem cells means more than living longer by eating healthy and exercising regularly.

2 De acordo com o texto, o laboratório Forever Lab:

- a) extrai e estoca as células-tronco de jovens adultos para potencialmente combater doenças relacionadas ao envelhecimento.
- b) é uma empresa ambiciosa e tem como foco principal armazenar as células-tronco das pessoas mais velhas que sofrem de artrite.
- c) é uma das empresas do jovem Li Jiang, um ex-banqueiro que agora trabalha com *start-ups*.
- d) tem feito várias experiências científicas com o intuito de curar doenças cardiovasculares.
- e) é uma empresa que se reinventou e tem trabalhado em diversos ramos de pesquisa.

3 Segundo as informações do texto, congelar células-tronco:

- a) garante a longevidade.
- b) estende a vida por cinco anos.
- c) custa caro.
- d) tem um preço razoável, uma vez que já sabemos como utilizá-las no futuro.
- e) é um procedimento simples e que pode ser feito em diversos laboratórios no mundo.

4 In the sentence "*Despite the many hurdles associated with private stem cell banking...*" (ℓ. 26), **Despite** could be replaced, with no change in meaning, by:

- a) Rather.
- b) Notwithstanding.
- c) However.
- d) Along.
- e) Hence.

5 Transcreva, em português, a opinião de Agnieszka Czechowicz.

Texto para as questões 6 a 11

Scientists identify cause of **baldness**

1 American scientists say that they've discovered why some men go **bald**. They blame faulty cells which seem to produce hair that is so thin that it is invisible to the naked eye. They expect to find a cure for baldness.

For some men, bald is beautiful. The iconic look may work for a few — especially celebrities — like the Die Hard star Bruce Willis and Star Trek's Patrick Stewart. For many, though, hair loss is no laughing matter.

5 But now researchers in America say they've uncovered a cure.

An academic medical centre has found that hair follicles actually **shrink**, but don't disappear. Dr George Cotsarelis, dermatology professor at Pennsylvania University, found the discovery exciting. "What we found surprised us. The stem cells were present but they were not doing their job."

10 The discovery of invisible hair sounds too good to be true. But what does it mean? "It really gives us hope that because the stem cells are present, it lowers the bar for developing treatments that could activate the stem cells and get them to form a new hair follicle," said Dr Cotsarelis.

Treating these faulty stem cells means that, rather than just maintaining hair, we could soon regenerate hair.

LOBEL, Mark. *BBC News*. Disponível em: <www.bbc.co.uk/worldservice/learningenglish/language/wordsinthenews/2010/12/110107_win_baldness_page.shtml>. Acesso em: 12 out. 2011.

baldness: calvície
bald: careca; calvo
to shrink (shrank; shrunk): encolher

6 (Unicentro-PR) Fill in the parentheses with T (True) or F (False).

According to scientists from the Pennsylvania University, baldness:

- | | |
|--|---|
| () could be caused by imperfect cells. | () seems to result from dead hair follicles. |
| () doesn't stand a chance of being cured. | () wouldn't be very difficult to be treated. |

According to the text, the correct sequence, from top to bottom, is:

- | | | |
|------------|------------|------------|
| a) T F F T | c) F T T F | e) T T T T |
| b) T F T F | d) F T F T | |

7 (Unicentro-PR) The text says that some men, such as Bruce Willis and Patrick Stewart,

- | | |
|------------------------------|---|
| a) hate being bald. | d) would rather have a little hair. |
| b) would like to wear a wig. | e) would like to have shoulder-length hair. |
| c) do not mind being bald. | |

8 (Unicentro-PR) "For many, though, hair loss is no laughing matter." (l. 4)

This sentence means that for many men hair loss is:

- | | | |
|-------------|---------------------|---------------------|
| a) a joke. | c) irrelevant. | e) a genetic trait. |
| b) serious. | d) easily accepted. | |

9 (Unicentro-SP) The only alternative in which **there is not** a pair of opposites is:

- | | | |
|-------------------------------|-------------------------|------------------------------|
| a) "thin" (l. 2) — thick. | c) "good" (l. 9) — bad. | e) "soon" (l. 12) — quickly. |
| b) "beautiful" (l. 3) — ugly. | d) "new" (l. 11) — old. | |

10 (Unicentro-PR) The only false cognate is in alternative:

- | | | |
|----------------------|-----------------------|----------------------|
| a) "cells" (l. 1). | c) "cure" (l. 2). | e) "present" (l. 8). |
| b) "produce" (l. 2). | d) "actually" (l. 6). | |

11 In "American scientists say that they've discovered why some men go bald", (l. 1) "they've discovered" means:

- | | |
|--------------------------------------|---|
| a) they are still discovering it. | d) there is no specific time when they discovered it. |
| b) they are about to discover it. | e) they are going to discover it. |
| c) they discovered it two years ago. | |

- 12** Explique, em português, qual o efeito de humor do cartum acima.

Texto para a questão 13

New gene therapy sparks healthy heart beats

The most common and potentially lethal complication following a heart attack is the heart's inability to do one of its most basic jobs: beat at a normal rate.

Following myocardial infarction, heart muscle cells are replaced by fibroblasts and new blood vessels, which do not conduct electricity and leave the heart susceptible to ventricular tachycardia – an excessive heart rate that can result in sudden death. These non-heart cells disrupt the normal pattern of electrical conduction that is critical for effective pumping. If there were a way to make these cells electrically active, one could bridge the conduction block to a certain degree, and greatly decrease dangerous post-infarction complications.

[...]

Cornell University. *Science Daily*. May 9th, 2018. Available at: <www.sciencedaily.com/releases/2018/05/180509121554.htm>. Accessed on: August 6th, 2018.

A complicação mais comum e potencialmente letal após um ataque cardíaco é a incapacidade do coração de realizar uma de suas funções mais essenciais: bater a um ritmo normal.

Após o infarto do miocárdio, as células do músculo cardíaco são substituídas por fibroblastos e novos vasos sanguíneos, que não conduzem eletricidade e deixam o coração suscetível à taquicardia ventricular – uma frequência cardíaca excessiva que pode resultar em morte súbita. Essas células não cardíacas interrompem o padrão normal de condução elétrica, o que é crítico para o bombeamento eficaz.

Responda, em **português**, à seguinte questão:

- 13** Qual a suposição levantada pelos cientistas para diminuir consideravelmente as complicações pós-infarto?

Going Beyond 17

Major Issues: Technology

Texto para as questões 1 e 2

Neurobionics and the brain-computer interface: current applications and future horizons.

Rosenfeld JV, Wong YT.

The brain-computer interface (BCI) is an exciting advance in neuroscience and engineering. In a motor BCI, electrical recordings from the motor cortex of paralysed humans are decoded by a computer and used to drive robotic arms or to restore movement in a paralysed hand by stimulating the muscles in the **forearm**.

Simultaneously integrating a BCI with the sensory cortex will further **enhance dexterity** and fine control. BCIs are also being developed to: provide ambulation for paraplegic patients through controlling robotic exoskeletons; restore vision in people with acquired blindness; detect and control epileptic **seizures**; and improve control of movement **disorders** and memory enhancement. High-fidelity connectivity with small groups of neurons requires microelectrode placement in the cerebral cortex.

Electrodes placed on the cortical surface are less invasive but produce inferior fidelity. Scalp surface recording using electroencephalography is much less precise. BCI technology is still in an early phase of development and awaits further technical improvements and larger multicentre clinical trials before wider clinical application and impact on the care of people with disabilities.

There are also many ethical challenges to explore as this technology **evolves**.

Ethical and practical considerations

Implantable BCI devices are in an early phase of development, with most first-in-human studies describing only a single patient. However, the performance of these devices is rapidly improving and, as they become wireless, the next step will be to implant BCIs in larger numbers of patients in multicentre trials.

The prime purpose of neurobionic devices is to help people with disabilities. However, there will be pressure in the future for bionic enhancement of normal cognitive, memory, sensory or motor function using BCIs. Memory augmentation, cognitive enhancement, infrared vision and exoskeletal enhancement of physical performance will all likely be achievable.

The introduction of this technology generates many ethical challenges, including:

- appreciation of the risk-benefit ratio;
- provision of adequate and balanced information for the recipient to give informed consent;
- **affordability** in relation to the fair and equitable use of the scarce health dollar;
- inequality of patient access to implants, particularly affecting those in poorer countries;
- **undue** influence on physicians and scientists by commercial interests; and
- the ability to achieve unfair physical or cognitive advantage with the technology, such as enhancing disabled athletes' performance using exoskeleton devices, military application with the creation of an enhanced "super" soldier, or using a BCI as the ultimate lie detector.

The introduction of these devices into clinical practice should therefore not proceed unchecked. As the technology transitions from clinical trial to the marketplace, training courses and mentoring will be needed for the surgeons who are implanting these devices.

Any new human application of the BCI should be initially tested for safety and efficacy in experimental animal models. After receiving ethics committee approval for human application, the technology should be thoroughly evaluated in well conducted clinical trials with clear protocols and strict inclusion criteria.

forearm: antebraço
to enhance(d): aumentar
dexterity: destreza
seizure: ataque (convulsão)
disorder: distúrbio
to evolve(d): evoluir
affordability: acessibilidade
undue: indevido(a)

- 1** (FMABC) O texto salienta que:
- toda nova aplicação humana da tecnologia ICC deve passar primeiramente por testes em animais e experimentos clínicos para ser aprovada pelo comitê de ética.
 - médicos e cientistas podem vir a ser afetados por interesses comerciais.
 - pacientes devem fornecer informações precisas sobre seu estado de saúde antes de se submeterem a qualquer tipo de ICC.
 - a eficácia da tecnologia ICC está comprovada e já pode ser lançada no mercado.
 - os benefícios auferidos pela ICC sempre superarão seus riscos.
- 2** (FMABC) Segundo o texto, a interface cérebro-computador (ICC):
- tem sido muito eficaz no controle de ataques epiléticos.
 - tem apresentado significativos progressos no desenvolvimento de exoesqueletos robóticos para auxiliar pacientes paraplégicos.
 - é uma tecnologia pouco invasiva, pois alcança resultados precisos com a implantação de eletrodos no couro cabeludo do paciente.
 - tem por objetivo reparar funções motoras ou cognitivas.
 - pode restaurar a visão a pacientes com cegueira congênita.

Texto para a questão 3

The downside of mobile devices

In a recent study by Jeffrey Kuznekoff at Miami University, college students who watched a videotaped lecture scored lower on a test afterward if they texted about unrelated matters during the class.

Available at: <<https://student.societyforscience.org/article/whensmartphones-go-school>>. - July 1, 2016.

- 3** (FICSAE-SP) O título e a imagem permitem inferir que:
- trocar mensagens de texto interfere negativamente nas aulas.
 - estudos parecem comprovar que trocas de mensagens relacionadas ou não à aula não prejudicam o resultado da aprendizagem.
 - um estudo feito na Universidade de Miami mostra que universitários não deveriam trocar mensagens durante as aulas.
 - a troca de mensagens de texto sobre assuntos não relacionados à aula pode prejudicar os resultados obtidos pelos alunos.

Texto para as questões 4 e 5

Baseando-se na tirinha cômica "Mama Taxi", responda, em português, ao que se pede.

Reprodução: Fuvest, 2017.

- 4** (Fuvest-SP) A que se refere a pergunta feita no segundo quadro pela motorista à passageira? Justifique sua resposta.
- 5** (Fuvest-SP) Qual foi a resposta dada pela passageira à pergunta feita pela motorista no segundo quadro? Qual foi a ação assumida pela passageira na sequência de sua resposta?

GABARITO

Capítulo 9

1. a) O chefe da Agência de Proteção Ambiental, Scott Pruitt, sugere que o aquecimento global não é necessariamente uma "coisa ruim".
b) Ele se justifica dizendo que é durante períodos de aquecimento que os seres humanos mais prosperam.
c) Esse recorde de calor está ligado a eventos climáticos mais extremos, aumento do nível do mar e outros impactos negativos.
2. a) A civilização humana começou a se desenvolver durante um período quente, após a última grande Era de Gelo, que terminou há cerca de 12 mil anos.
b) O Holoceno foi um período em que a temperatura era em média 4 a 5 graus acima das registradas no período anterior, conhecido como a Era do Gelo.
3. a) A queima de combustíveis fósseis tem deixado esta média global ainda maior.
b) É, segundo alguns cientistas, a forma de designar o período dessa nova tendência de aquecimento global.
4. A Climate Interactive descobriu que se os países cumprirem suas promessas do Acordo de Paris, mas não assumirem outros compromissos para reduzir as emissões, o planeta veria aproximadamente 3 °C de aquecimento acima dos níveis pré-industriais em 2100, embora esse número possa chegar a 4,4 °C ou tão baixo quanto 1,9 °C.
5. a) reached out
b) but
6. The planet would see roughly 3.3 °C of warming above pre-industrial levels by 2100. Yet,

that number could be as high as 4.4 °C or as low as 1.9 °C.

5. Uma hipótese diz que a vida se originou onde a matéria orgânica, uma fonte de nutrição, estava abundantemente disponível. Mas isso não explica como os primeiros organismos podiam contar com substâncias orgânicas suficientes para sobreviver quando tivessem consumido até o fim toda a matéria orgânica ao seu redor.
Outra teoria argumenta que as primeiras formas de vida sintetizavam nutrientes por conta própria, usando a energia obtida a seu

redor. Mas essa teoria não explica como elas poderiam continuar produzindo a quantidade de nutrientes necessária.

16. Adesivo número 3. O adesivo diz que uma mulher sem homem é como um peixe sem bicicleta.

Como peixes não usam bicicletas, logo mulheres não precisam de homens.

17. Adesivo número 4.

18. A sexualização reforça o estereótipo de que o valor da mulher é determinado por sua aparência física e que o papel principal da mulher é o de agradar os homens. Isso se correlaciona às relações desiguais na sociedade e tem um impacto direto e adverso sobre a participação equânime das mulheres em todas as esferas da vida, assim como o assédio sexual.

19. A NCPE está preocupada com a objetificação do corpo das mulheres na mídia, incluindo as mídias *on-line*. Ao longo dos últimos meses, a Comissão tem recebido várias críticas do público com relação aos vídeos e afirmações que retratam as mulheres de uma maneira sexualizada ao extremo e que reforçam os estereótipos de gênero negativos na sociedade.
