# APRESENTAÇÃO

Caro aluno,

Em um curso pré-vestibular, eficiência é um quesito imprescindível, já que você será convidado a, em apenas um ano, aprimorar competências e habilidades desenvolvidas ao longo de toda a sua escolarização e consolidar o aprendizado de conteúdos abordados no Ensino Médio.

Levando em conta essa necessidade, a coleção Alfa foi estruturada em dois volumes: o Caderno do Aluno, que traz as atividades que devem ser realizadas em sala de aula, e o Caderno de Estudos, que dá continuidade a seu processo de aprendizagem fornecendo subsídios para um momento de estudo mais autônomo.

É neste Caderno que você encontrará todas as leituras que devem ser realizadas e os exercícios indicados na *Orientação de estudo* no Caderno do Aluno (Tarefa Mínima, Tarefa Complementar e Tarefa Desafio), que devem ser encarados com dedicação.

O Caderno de Estudos é disciplinar, ou seja, nele você encontra uma disciplina por volume, dividida por setores ou unidades temáticas. Durante o ano, você receberá quatro volumes bimestrais de cada disciplina. Essa configuração permite mais autonomia e organização, uma vez que traz teoria e exercícios em um mesmo volume, facilitando o acesso ao conteúdo apresentado pelo professor em sala e aos exercícios associados a cada aula. Além disso, a estrutura facilita a realização de revisão de pontos importantes durante o ano.

Aliando um material de qualidade, a resolução das tarefas propostas e muita força de vontade, você conquistará a tão sonhada vaga!

Bons estudos!

## Text Comprehension: Fake News

Estudos científicos comprovaram que o cérebro humano é programado para aceitar com maior facilidade notícias falsas de cunho apelativo, as chamadas *fake news* – que se espalham mais rapidamente –, e tende a ignorar aquelas informações verdadeiras que desafiam suas opiniões.

Texto para a questão 1

Joe Heller/Cagle Cartoons, Inc.

Available at: <[www.cagle.com/joe-heller/2016/11/fake-news-5#WzAfONJKjIU](http://www.cagle.com/joe-heller/2016/11/fake-news-5#WzAfONJKjIU)>. Accessed on: August 16<sup>th</sup> 2018.

- 1** The character in the cartoon:
- believes fake news has always happened since old times.
  - intends to correct all fake news from the newspaper.
  - misses good old times when news was reliable.
  - does not care whether newspapers are fake or true.
  - remembers that fake news was in vogue in the old times.

**Texto para as questões 2 a 6**

**Facebook updates its fact-checking program to fight fake news**

- Facebook has introduced several updates which include removing fake accounts, **partnering** with fact-checkers, and promoting news **literacy** with the **aim** to fight false news.
- Among other updates, Facebook has also expanded its test to fact-check photos and videos, taken action against new kinds of repeat offenders and has also expanded its fact-checking program to new countries.
- Facebook further **highlighted** how it is using machine learning to identify fake news. For example, a fact-checker in France **debunked** the **claim** that one can save a person having a **stroke** by using a needle **to prick** their finger and **draw** blood. As a result, Facebook was able to identify over 20 domains and over 1,400 links spreading that same claim.
- Tessa Lyons, Facebook's product manager in a blog wrote: "In April, we announced a new initiative to help provide independent research about the **role** of social media in elections, as well as democracy more generally. The elections research commission is in the process of **hiring** staff and establishing the legal and organizational procedures necessary to becoming fully independent. In the coming weeks, the commission will release a website and then its first request for proposals, to measure the volume and effects of misinformation on Facebook.
- "We're currently working with the commission to develop privacy-protected data **sets**, which will include a **sample** of links that people engage with on Facebook.

- The academics selected by the commission will be able to study these links to better understand the kinds of content being shared on Facebook. Over time, this externally-validated research will help keep us **accountable** and **track** our progress."

SRIVASTAV, Taruka. *The Drum*. June 23<sup>rd</sup> 2018. Available at: <www.thedrum.com/news/2018/06/23/facebook-updates-its-fact-checking-program-fight-fake-news>. Accessed on: August 16<sup>th</sup> 2018.

|-------------------------------------------------|----------------------------------------------------|
| <b>partnering:</b> fazer parcerias              | <b>to prick(ed):</b> picar; alfinetar; fazer furos |
| <b>literacy:</b> alfabetização                  | <b>to draw (drew; drawn):</b> retirar; sacar       |
| <b>aim:</b> objetivo; meta                      | <b>role:</b> papel; função                         |
| <b>to highlight(ed):</b> destacar               | <b>to hire(d):</b> contratar; empregar             |
| <b>to debunk(ed):</b> desacreditar; desmascarar | <b>set:</b> conjunto                               |
| <b>claim:</b> alegação                          | <b>sample:</b> amostra                             |
| <b>stroke:</b> derrame                          | <b>accountable:</b> responsável                    |
|                                                 | <b>to track(ed):</b> acompanhar; rastrear          |

- 2** According to the text, with the aim to fight false news, Facebook has introduced several updates, EXCEPT:
- excluding Facebook accounts.
  - promoting partnership with fact-checkers.
  - promoting news literacy.
  - warning the police.
  - taking action against new kinds of repeat offenders.
- 3** The text says that:
- a person was saved from stroke by having his/her finger pricked by a needle.
  - the pricking of a finger with a needle caused someone a stroke.
  - there was false news in France which was spread by more than 1400 links.
  - Facebook advises its users to prick the finger and draw blood if a person has a stroke.
  - Fake news from France has been spread throughout the world.
- 4** According to Tessa Lyons,
- democracy is to blame for fake news.
  - a new machine to block fake news will be announced.
  - Facebook is fully independent.
  - a new group will hire staff and establish new connections with Facebook.
  - a research commission will measure the volume and effects of misinformation on Facebook.
- 5** Choose the title that best suits the text you've just read:
- Facebook engaged in fighting fake news
  - Fake news no longer appears on Facebook
  - Offenders on Facebook are prosecuted

- d) Facebook's new staff  
e) A person having a stroke was saved by Facebook users

**6** In the sentence "... in France debunked the claim that one can save a person having a stroke..." (l. 11-12), the modal verb **can** gives the idea of:

- a) necessity. d) obligation.  
b) probability. e) deduction.  
c) capacity.

### Texto para as questões 7 a 11

#### Nearly half of social media users deleted at least one account in the past year

Privacy **concerns** have **prompted** 40% of people **to scrape** at least one social media account, a new study found.

1 Social media users are becoming more private.  
A **lack** of **trust** in websites like Twitter and Facebook has prompted 40% of people with social media accounts to delete at least one of them in the past year, new research  
5 by public relations agency Edelman found.

The firm **polled** 9,000 people in Canada, China, France, Germany, Brazil, India, the United Arab Emirates, the U.K. and the U.S., and found collective **outrage** over repeated online privacy violations **stemming** from the Cambridge Analytica data **leak** and uncertainty about the truth in articles online as  
10 a result of the Russian-produced fake news that influenced the 2016 presidential election. What's more, 48% surveyed said that it's a brand's fault if its advertising appears next to violent or hateful content, and 62% wanted more regulation  
15 on platforms like Facebook and Twitter. A **whopping** 2.6 billion people use social media across the globe.

The social networks are **scrambling** to do damage control. Facebook agreed to take down 270 pages and accounts in April posted by the Internet Research Agency,  
20 the Russian group that tried to influence the election. And last month, both Twitter and Facebook **debuted** stricter **guidelines** for political ads ahead of the midterm elections.

Facebook founder Mark Zuckerberg also **endured** a two-day congressional testimony before House and  
25 Senate lawmakers in April, **fielding questions** regarding data collection, **censorship**, user privacy and whether the platform should be regulated after the social media platform allowed more than 50 million users' data to be **harvested** by British consulting firm Cambridge Analytica.  
30 Facebook revealed that it knew about the **breach** since 2015, but only just suspended the firm from its platform this year. The controversy led to a #DeleteFacebook movement, with users **vowing** to permanently leave the world's largest social network. As a result, 7% of

35 Americans deleted the Facebook app from their phone over privacy concerns, and 9% said they deleted their account altogether.

Another survey last year revealed our society's collective distrust regarding privacy online – just 9% of  
40 social media users were "very **confident**" that companies would protect their data, and about half of users were not at all or not too confident that their data was in safe hands.

Apart from privacy concerns, deleting more social media accounts could also help **boost** happiness. Research  
45 has shown that social media can negatively affect users' mental health and wellbeing, with one study indicating that an increase in someone's Facebook, Instagram and Snapchat use could significantly lead to a decline in mental health and an increased risk of depression and anxiety.

SETTEMBRE, Jeanette. Moneyish. June 24<sup>th</sup> 2018. Available at: <<https://moneyish.com/ish/nearly-half-of-social-media-users-deleted-at-least-one-account-in-the-past-year/>>. Accessed on: August 16<sup>th</sup> 2018.

|                                            |                                                           |
|--------------------------------------------|-----------------------------------------------------------|
| <b>concern:</b> preocupação                | <b>to debut(ed):</b> lançar; introduzir pela primeira vez |
| <b>to prompt(ed):</b> levar a              | <b>guideline:</b> orientação                              |
| <b>to scrape(d):</b> remover               | <b>to endure(d):</b> enfrentar                            |
| <b>lack:</b> falta                         | <b>to field(ed) questions:</b> responder às perguntas     |
| <b>trust:</b> confiança                    | <b>censorship:</b> censura                                |
| <b>to poll(ed):</b> entrevistar; pesquisar | <b>to harvest(ed):</b> colher                             |
| <b>outrage:</b> indignação                 | <b>breach:</b> violação                                   |
| <b>to stem(ed):</b> originar-se (de)       | <b>to vow(ed):</b> prometer                               |
| <b>leak:</b> vazamento                     | <b>confident:</b> confiante                               |
| <b>whopping:</b> impressionante            | <b>to boost(ed):</b> aumentar                             |
| <b>to scramble(d):</b> esforçar-se         |                                                           |

**7** According to the text, what has led 40% of people to remove at least one social media account?

- a) Lack of time to use them.  
b) Worries about confidentiality.  
c) Scarcity of information.  
d) A great deal of censorship.  
e) Stricter guidelines for political ads.

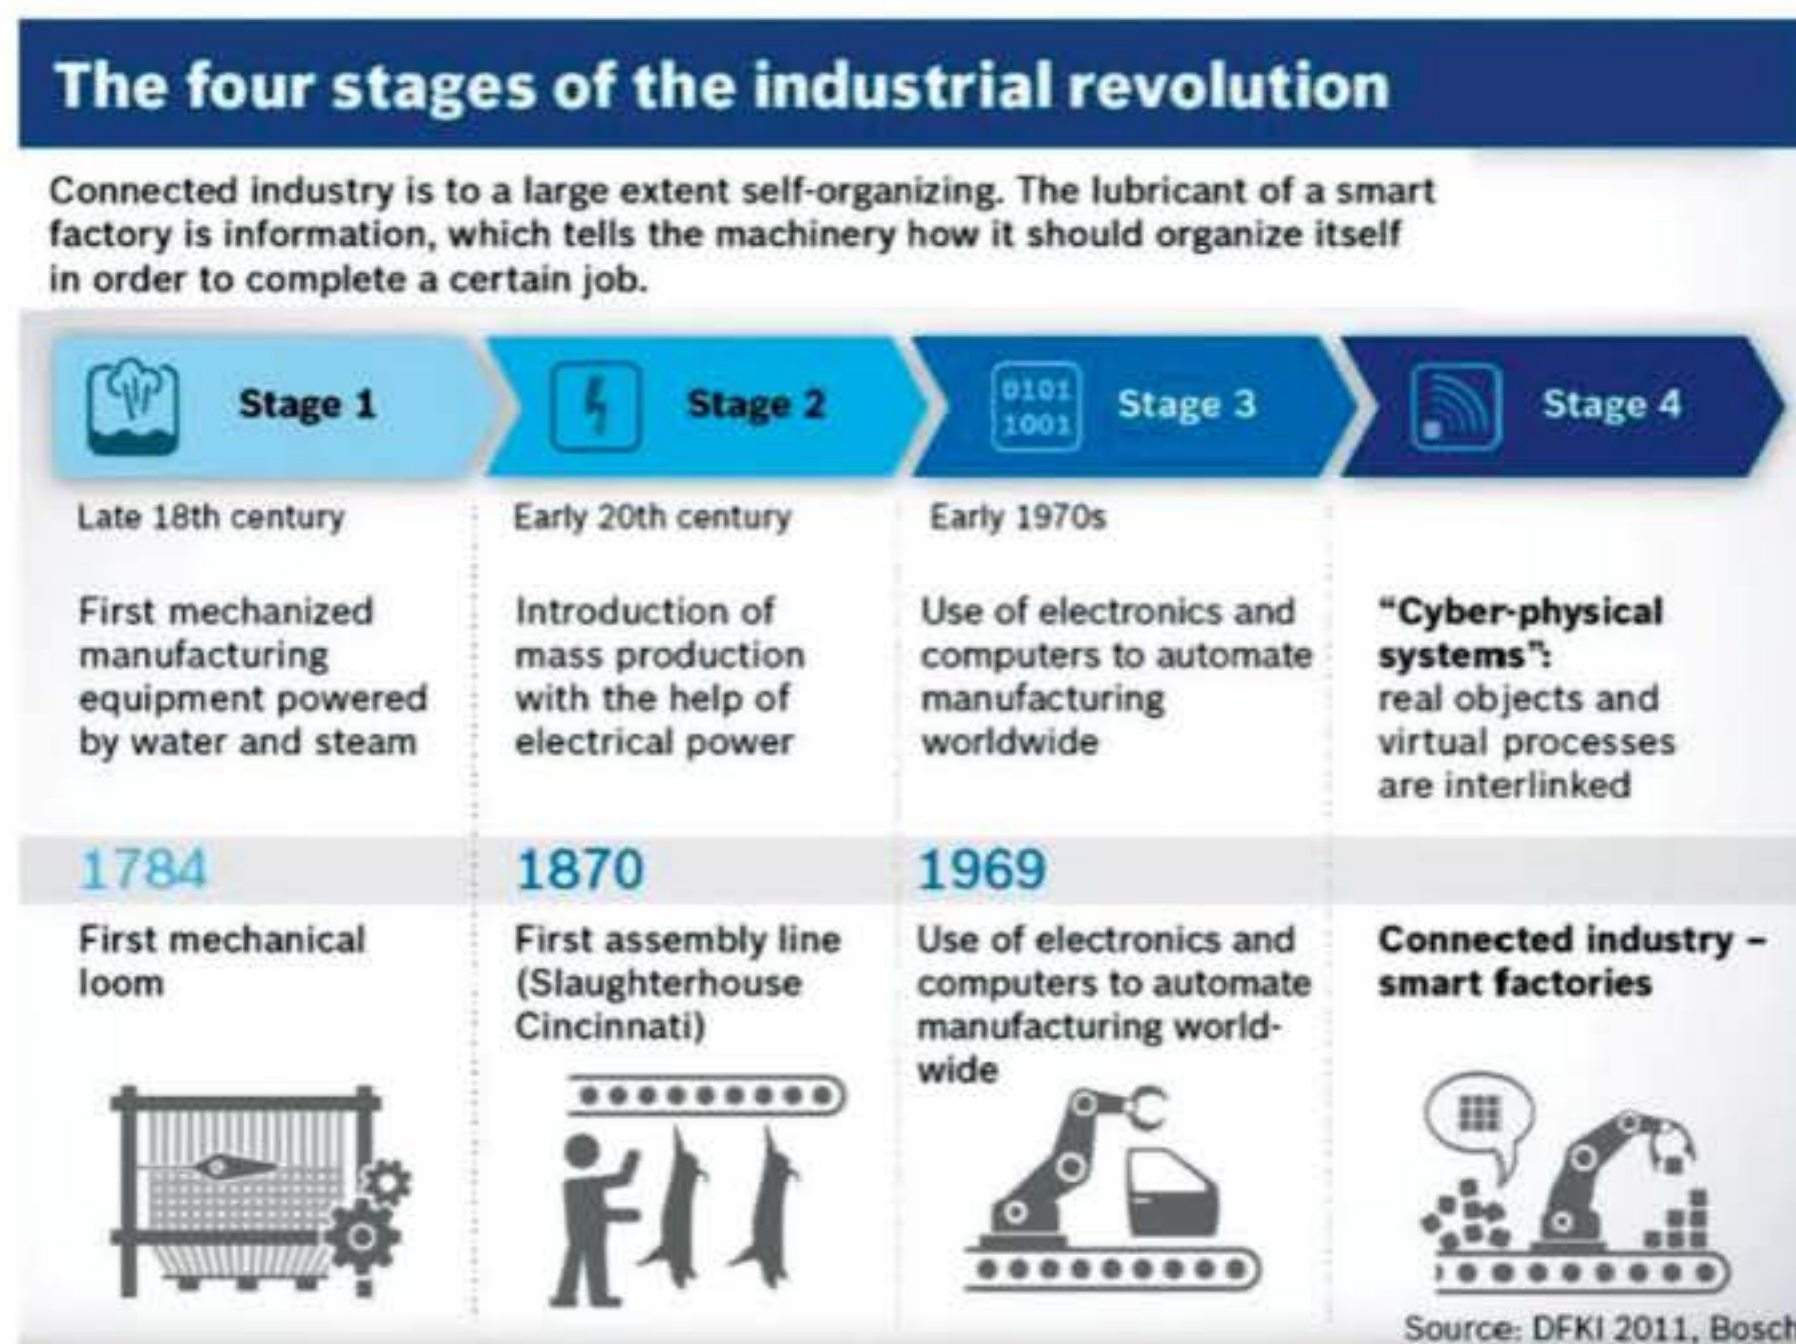

**8** The text says that:

- a) nine thousand people were polled and showed common indignation over privacy violations.  
b) fake news has influenced Russian elections.  
c) Canada, China, France, Germany, Brazil, India, the United Arab Emirates, the U.K. and the U.S. are the countries which provide the most users on Facebook.  
d) Cambridge Analytica was responsible for the leaks of about nine thousand people on the Internet.  
e) Twitter and Facebook account for 40% of privacy violations throughout the world.

- 9 De acordo com o texto,
- 2,6 bilhões de pessoas excluíram suas contas nas mídias sociais.
  - Mais de 48% dos usuários foram entrevistados.
  - 62% dos usuários veem as plataformas das mídias sociais como um local seguro.
  - 48% associam uma marca exibida a seu conteúdo de violência e de ódio.
  - 62% confessam ter postado conteúdos violentos e odiosos nas mídias sociais.
- 10 In the excerpt "*The controversy led to a #DeleteFacebook movement...*" (ℓ. 32-33), **The controversy** refers to:
- the number of people who scraped their Facebook accounts.
  - Russian firms trying to influence U.S. elections.
  - collective distrust regarding privacy online.
  - deleting more social media accounts, which could also help boost happiness.
  - the revelation that Facebook had been aware of the violations for some time.
- 11 In the sentence "*Apart from privacy concerns, deleting more social media accounts could also help boost happiness.*" (ℓ. 43-44), **boost** can be replaced by all alternatives below, EXCEPT:
- raise.
  - increase.
  - promote.
  - enhance.
  - dwindle.

Texto para a questão 12

Disponível em: <<http://www.bosch-press.de/pressportal/de/en/see-boschs-contribution-to-industry-4-0-42895.html>>.  
Acesso em: 23 fev. 2018. (Adaptado)

- 12** (UEG-GO) According to the information expressed in the image and data, the industrial revolution:
- a) is changing our way of life. Since 1969 assembly lines have been uniquely compounded by computers which automate the whole process and has raised unemployment around the world.
  - b) in the 18<sup>th</sup> century used animal traction in their first mechanized manufacturing process in order to power the textile manufacturing companies and their equipment in England.
  - c) has achieved an important stage in which the received information by the machinery is the main component to the line production because computers need it in order to manufacture.
  - d) in the 20<sup>th</sup> century, in the slaughtering industry, used electrical power which was responsible to achieve the high efficiency of the emerging meat industry.
  - e) has influenced the development of workstations which were customized by the new technologies according to the needs and abilities of their operators.

## Going Beyond 18

### Linking Words

A função das **linking words** é unir, conectar orações, termos ou expressões, estabelecendo algum tipo de relação entre elas e dando coesão ao texto.

Elas podem ser *coordenativas*, quando conectam orações independentes e de mesmo nível sintático, ou *subordinativas*, quando conectam uma oração que assumirá um nível sintático inferior e será dependente da oração principal.

### Classificação

#### 1. Adversativas

Dão a ideia de **oposição, contraste**.

- **But** – mas

I wish we all were in a comfortable situation now, **but** no one has gotten to the point.

- **However** – entretanto

New avenues, freeways and large streets were supposed to be built aimed at alleviating the traffic in the city. **However**, the project never came to completion.

- **Nevertheless/Nonetheless** – não obstante; mesmo assim

There are many articles on the benefits of laughter, laughing therapy and how it can make us feel better. **Nevertheless/Nonetheless**, no one seems to talk about the benefit of tears or the benefits of crying.

- **Yet** – mesmo assim; contudo

We are experiencing growing resistance and solidarity as more and more women come together to demand change. **Yet** we know that many women's voices go unheard.

- **While** – enquanto; ao passo que

Sally ordered pizza **while** Tom was ready for a sandwich.

- **Still** – todavia; contudo

Youngsters were bored at the trip. **Still**, we could notice that they were improving their knowledge.

- **On the other hand** – por outro lado

The correction of defects and injuries of the human body by means of tissues and cells is a great development in medicine. **On the other hand**, it remains a sensitive issue.

#### 2. Concessivas

Estabelecem uma ideia de **oposição, contraste**.

- **In spite of** – apesar de

**In spite of** the cold weather, there are places with spectacular views that just brighten up your day.

- **Despite** – apesar de

The barbecue was a success, **despite** the rain.

- **Whereas** – ao passo que

The majority of students were satisfied with the activity-based together with project-based learning, **whereas** some students were still shy and did not share ideas or discuss with others.

- **Notwithstanding** – contudo; todavia

The burning could become a threat to the environment. **Notwithstanding**, we managed to maintain a delicate balance.

- **Albeit** – embora; apesar de

He wanted to change his deposition, **albeit** not entirely.

- **Although/Though/Even though** – embora; ainda que

Soil conservation and management had not been effective, **although** there were many regional agreements.

### 3. Aditivas

Dão a ideia de **adição, acréscimo, inclusão**.

- **And** – e

Sally was the first student in class **and** was considered the best friend as well.

- **Also** – também

He was speechless, probably shocked. **Also**, he was taken by deep fear.

- **Along with** – juntamente com

His decisive crisis management gave Schroeder a boost in the polls which, **along with** his resistance to the Iraq war, helped him win the elections.

- **Moreover** – além do mais; além disso

He was against the new politics in his country and cried out against the government. **Moreover**, he decided to seek asylum in the United States.

- **Furthermore** – além do mais; além disso

The Taipei City Government has cooperated with private institutions for provision of free Internet training courses, which encourage citizens to receive training to popularize Internet education. **Furthermore**, citizens can enjoy services of a global Internet.

- **Besides** – além disso

Mary Ann is smart and nice to everyone, **besides** being a beautiful girl.

- **On top of** – além de

Some Social Media can monetize by selling ads spaces. **On top of it**, they can obtain and sell people's data.

- **In addition (to)** – além disso; além de

He feels confident and happy in his new job. **In addition**, his salary is great.

- **Both ... and** – tanto ... quanto

The Healthcare plan can be **both** individual **and** collaborative.

- **Not only ... but also** – não somente ... mas também

The evidence seems to suggest a considerable return to those countries avoiding **not only** high **but also** intermediate inflation.

### 4. Conclusivas

Introduzem/estabelecem uma **conclusão** ou **consequência**.

- **So** – então; por isso

The director of the company in Croatia decided to lend money to his workers **so** they could pay off their debts.

- **Therefore** – portanto; logo

Employment growth was strong and **therefore** workers were able to secure significant wage advances.

- **Thereby** – desse modo; (sendo) assim

The hotel is located on top of the other resorts, **thereby** the views are much better.

- **Hence** – daí; logo

Everybody wants value, and **hence**, everybody needs a solid branding.

- **Thus** – logo

New tests on cancer cells have been approved and **thus** they should provide a more accurate control of the disease.

- **Then** – daí, então

He is a great musician. **Then**, everyone wants to see his show.

## 5. Causais

Estabelecem relação de **causa**.

- **Because** – porque

We'd better wait here **because** it's too early to get in there.

- **Due to/Owing to** – devido a

We are closed tonight **due to** the rain!

- **Thanks to** – graças a

**Thanks to** Ms. Miller, we can have this presentation in the city.

- **Since/While** – porque, já que

I. **Since** no one wants the dessert, I'll take it back to the fridge.

II. Susan is taking an umbrella **while** it's raining outside.

- **For** – pois

I don't want to quarrel with you, **for** everybody needs a friend.

## 6. Temporais

Associam os elementos em relação ao **tempo**.

- **When** – quando

Jane was a good athlete **when** she was a kid.

- **While** – enquanto

**While** I was heading to school this morning, I saw Joe.

- **By the time** – quando, na hora em que

Don't worry! We'll be home **by the time** you get there.

- **As soon as** – assim que

I'll buy that car **as soon as** I have the money for it.

- **Until/Till** – até que

They will wait here **until** the class ends.

- **After** – depois

**After** Paul had gone to Kabul, he visited Budapest.

- **Before** – antes

Look **before** you leap!

## 7. Substitutivas

Estabelecem uma relação de **substituição**.

- **Instead (of)** – em vez de, em vez (disso)

**Instead of** being upset, she seemed quite pleased that he had arrived earlier.

- **Rather (than)** – em vez de, em vez (disso)

**Rather than** going to the movies, Paul decided to go to the club.

## 8. Condicionais

Estabelecem uma **condição**.

- **If** – se

We would have been paid **if** we had done the job.

- **Unless** – a menos que

**Unless** you want to get hurt, don't play with sharp objects.

- **As long as** – contanto que  
She will let him stay **as long as** he pretends to be working for her family.
- **Provided that** – contanto que  
He can come along, **provided (that)** he pays for his meal.

## 9. Alternativas

Dão a ideia de **alternância**.

- **Or** – ou  
You can stay here **or** you can take the first flight to New York. It's up to you.
- **Either ... or** – ou ... ou  
**Either** ask her out **or** never talk to her again!
- **Neither ... nor** – nem ... nem  
She went **neither** to the beach **nor** to the club. She decided to stay home, instead.
- **Whether** – se  
No one knows **whether** (or not) he committed the crime.
- **Or else** – ou, senão  
Please, come up with examples **or else** don't mention it at all.
- **Otherwise** – de outro modo; caso contrário  
Bring your kids to school before 7:30 am. **Otherwise**, they will miss the first class.

**1** Na frase: *"I won't be able to make it to work today due to my Aunt flying in from Australia and she needs me to pick her up."* **due to** traz a ideia de:

- finalidade.
- causa.
- condição.
- reiteração.
- estimativa.

- 3** (ITA-SP) Marque a opção que pode substituir "**due to**" sem alterar o sentido do período.
- a) by means of.
  - b) in case of.
  - c) in spite of.
  - d) instead of.
  - e) because of.

Texto para a questão 4

- 1 So long as the country's in a crisis over fake news, here's a fact check the national media desperately need: It's a fact that President-elect Trump, during the campaign, mocked a reporter who happens to have a physical impairment. It's
- 5 fake news, however, that he mocked the reporter because of his affliction.

[...]

SCARRY, Eddie. The Media's "Disabled Reporter" Lie. *Washington Examiner*, January 14<sup>th</sup> 2017. Available at: <[www.washingtonexaminer.com/the-medias-disabled-reporter-lie](http://www.washingtonexaminer.com/the-medias-disabled-reporter-lie)>. Accessed on: September 10<sup>th</sup> 2018.

- 4** In "It's fake news, **however**, that he mocked the reporter because of his affliction." (ℓ. 4-6), the option that replaces the highlighted expression is:
- a) so.
  - b) though.
  - c) thus.
  - d) most likely.
- 5** In the sentence "Besides doing things for their community, the boys in the team work as a group.", **Besides** could be replaced, with no change in meaning, by:
- a) In addition to.
  - b) Although.
  - c) In spite of.
  - d) Next to.
  - e) Better than.
- 6** Na frase, "By mentioning the Egyptian's pride, Herodotus was acknowledging that the Egyptians were proud to be 'peculiar' and thus, he couldn't have been ethnocentric.", assinale a alternativa que poderia substituir a palavra **thus** sem prejuízo do sentido literal e da correção gramatical.
- a) however
  - b) though
  - c) in addition
  - d) therefore
  - e) eventually

- 7** In the sentence "*Although he was polite, he was not able to avoid quarrelling with Ms Bloom.*", the word **Although** introduces:
- a) an additional idea.
  - b) an opposing idea.
  - c) a conclusion.
  - d) an example.
  - e) a chronological order.
- 8** The sentence "*There may be some strategies to find out the reason for violence, but violence is encrusted in all segments of society.*" could be rewritten, without changing its meaning, as:
- a) There may be some strategies to find out the reason for violence, therefore violence is encrusted in all segments of society.
  - b) There may be some strategies to find out the reason for violence, also violence is encrusted in all segments of society.
  - c) There may be some strategies to find out the reason for violence, even though violence is encrusted in all segments of society.
  - d) There may be some strategies to find out the reason for violence, instead violence is encrusted in all segments of society.
  - e) There may be some strategies to find out the reason for violence, thus violence is encrusted in all segments of society.
- 9** Considerando o trecho "*Drivers of the future will have to be more and more acquainted to use of computers. Cars are becoming fully computerized*", a relação semântica entre as duas sentenças pode ser explicitada pela adição do seguinte conectivo:
- a) unless.
  - b) since.
  - c) however.
  - d) as though.

## Exercícios

Texto para as questões 1 a 7

Dawn of the pre-tiree:

What to call the time of life between work and old age?

*To get the most out of longer lives, another age category is needed*

**elderly:** idoso

**to lack(ed):** faltar

**to err(ed):** errar

**to brand(ed):** rotular

**to trigger(ed):** causar;  
provocar

**beyond:** além de

**to stretch(ed):** esticar

**lifespan:** vida útil

**accomplishment:**  
conquista

**revenue:** receita

**doom:** apocalipse;  
ruínas

**mongers:** catastrofistas;  
agourentos

**approach:** abordagem

**awkward:** estranho

**bobby sock:** meia-  
soquete

**to coin(ed):** criar;  
nomear

**retirement:**  
aposentadoria

**withdrawal:** retirada

**misleading:** enganoso

**to clap(ped) out:**  
acabado

- 1 What do you call someone who is over 65 but not yet **elderly**? This stage of life, between work and decrepitude, **lacks** a name. "Geriactives" **errs** too much on the side of senescence. "Nightcappers" risks being patronising. Perhaps "Nyppies" (Not Yet Past It) or "Owls" (Older, Working Less, Still earning) ring truer. **Branding** an age category might sound like a frivolous exercise. But life stages are primarily social constructs, and history shows that their emergence can **trigger** deep changes in attitudes.

5 Before 1800 no country in the world had an average life expectancy at birth **beyond** 40. Today there is not a country that does not. Since 1900, more years have been added to human life than in the rest of history combined, initially by reducing child mortality and lately by **stretching** **lifespans**.

Longevity is one of humanity's great **accomplishments**. Yet it is seen as one of society's great headaches. The problem lies in the increasing dependency of the old on the young. As the world greys, growth, tax **revenues** and workforces will decline while spending on pensions and health care will increase. So, at least, goes the orthodoxy.

**Doom-mongers** tend to miss a bigger point, however. Those extra years of life are predominantly healthy ones. Too many governments and firms fail to recognize this fact. A more radical **approach** would start by acknowledging that, in the rich world at least, many of the old are still young and active. They want to work, but more flexibly. They want to spend money, too.

Declaring a new stage of life could help change perceptions. It has done so before. Today's conception of childhood emerged in the 19th century, paving the way for child-protection laws and a golden age of children's literature.

20 Spotty, **awkward** 15-year-olds predated the 1940s, but only then did mystified adults **coin** the label "teenagers", fuelling all sorts of products and services, from **bobby socks** to the music industry. In 1944 *Life* wrote that "American businessmen, many of whom have teen-age daughters, have only recently begun to realise that teen-agers make up a big and special market." So, as life becomes longer, the word "**retirement**", which literally means **withdrawal** to a place of seclusion, has become **misleading**. At 65 you

25 are not **clapped out**, but pre-tired.

- 1** (FCMSCSP) The article puts forward the idea that:
- a) stretched lifespans have generated increasingly extra undesirable public spendings worldwide.
  - b) a new age group should be created if we are to maximize the potential benefits of people's greater longevity today.
  - c) the broader the number of people reaching more advanced ages, the greater the need for public health care programs.
  - d) new governmental decisions on pensions are imperative if we are to adequately care for the elder.
  - e) the creation of new words to refer to people over 65 may contribute to the acceptance of older people by society.

- 2** (FCMSCSP) Assinale a alternativa cuja afirmação corresponde, de forma mais próxima, ao conteúdo da ilustração que introduz o texto:

- a) "Retirement" literally means "withdrawal to a place of seclusion".
- b) Extra years of life are predominantly healthy ones.
- c) The word "retirement" has become misleading.
- d) In the rich world, many of the old are still young and active.
- e) Years have been added to human life by stretching lifespans.

- 3** (FCMSCSP) No trecho do terceiro parágrafo *"Longevity is one of humanity's great accomplishments. Yet it is seen as one of society's great headaches."* (ℓ. 9-10), a palavra em destaque estabelece entre as duas frases uma relação de:

- a) complementação.
- b) conclusão.
- c) contraste.
- d) alternativa.
- e) tempo.

- 4** (FCMSCSP) According to the sixth paragraph,
- a) only after the 1940s was adolescence demystified by American businessmen and recognized as a potential market.
  - b) the label "teenager" was invented to help sell products such as bobby socks and music.
  - c) unprecedented perceptions of childhood in the 19th century resulted in the birth of children's literature.
  - d) child-protection laws first appeared in the 1900's, together with today's conception of childhood.
  - e) the emergence of new life stages throughout history has resulted in changes in attitude towards people of different age groups.

- 5** (FCMSCSP) In the excerpt from the sixth paragraph "... but only then did mystified adults **coin** the label 'teenagers'..." (ℓ. 20-21), the word in bold can be replaced, without changing the meaning of the sentence, by:

- a) make up.
- b) understand.
- c) pick out.
- d) accept.
- e) promote.

- 6** In the sentence *"Doom-mongers tend to miss a bigger point, however."* (ℓ. 13), **however** can be replaced, with no change in meaning, by:

- a) hence.
- b) so.
- c) though.
- d) already.
- e) then.

- 7** The expression *"It has done so before."* (ℓ. 17) means that:

- a) the declaration of a new stage of life had already helped to change perceptions.
- b) the declaration of a new stage of life always helps to change perceptions.
- c) the declaration of a new stage of life will help to change perceptions for the first time.
- d) the declaration of a new stage of life never helps to change perceptions.
- e) the declaration of a new stage of life avoids helping to change perceptions.

#### Texto para a questão 8

#### Elderly flight passenger throws coins into engine for 'luck', **delays** take-off for hours

- 1 China Southern Airlines Flight 380 was held up at the Shanghai Pudong International Airport after an elderly woman passenger caused a **disruption**, according to the airline's official WeChat account. An investigation into the
- 5 incident is under way.

- Passengers boarding the flight reportedly saw an elderly woman throwing coins at the engine for **"blessings"** from the middle of the boarding staircase and alerted the **crew**. Ground staff said the woman, who appeared to be
- 10 about 80 and had limited mobility, was accompanied by her husband, daughter and son-in-law.

The captain was quoted as saying the metal, if **sucked up** by the engine, could have caused serious damage, including **failure**.

The flight was later given a green light and took off at 5.52pm, more than five hours late. It is scheduled to arrive in Guangzhou at 8.14pm.

Adaptado de Sarah Zheng, Elderly flight passenger throws coins into engine for 'luck', delays take-off for hours. South China Morning Post, 27/06/2017.  
Disponível em: [www.scmp.com/news/china/society/article/2100242/elderly-flight-passenger-throws-coins-engine-luck-delays-take](http://www.scmp.com/news/china/society/article/2100242/elderly-flight-passenger-throws-coins-engine-luck-delays-take).

**to delay(ed):** atrasar; retardar

**disruption:** interrupção; problema; perturbação

**blissing:** bênção

**crew:** tripulação

**to suck(ed) up:** sugar

**failure:** falha

**8** (Unicamp-SP) O que é correto afirmar sobre o incidente relatado na notícia?

- a) Por causa do incidente, o avião chegou a seu destino com cinco horas de atraso, às 17h52.
- b) Segundo o piloto, moedas atiradas na turbina do avião causaram sérios danos à aeronave.
- c) Uma idosa chinesa, seu marido, sua filha e seu genro quase provocaram um acidente aéreo.
- d) A ação de alguns passageiros evitou o risco de um grave acidente aéreo.

**Texto para as questões 9 a 12**

To live the longest and healthiest life possible, get smarter. Institute for Health Metrics and Evaluation (IHME) data show that past a certain threshold, health and wealth are just weakly correlated. However, overall health is closely tied to how many years people spend in school. Mexico, for instance, has a fifth the per capita gross domestic product (GDP) of the United States, but, for women, more than 50 percent of the latter's schooling.

In line with the trend, Mexico's female adult mortality rate is only narrowly higher. Vietnam and Yemen have roughly equivalent per capita GDP. Yet Vietnamese women average 6.3 more years in school and are half as likely to die between the ages of 15 and 60. "Economic growth is also significantly associated with child mortality reductions, but the magnitude of the association is much smaller than that of increased education," comments Emmanuela Gakidou, IHME's director of education and training. "One year of schooling gives you about 10 percent lower mortality rates, whereas with a 10 percent increase in GDP, your mortality rate would go down only by 1 to 2 percent."

**9** (Fuvest-SP) O argumento central do texto é o de que níveis mais altos de escolaridade estão diretamente relacionados a

- a) índices mais baixos de mortalidade.
- b) crescimento econômico acentuado.
- c) mais empregos para as mulheres.
- d) menores taxas de natalidade.
- e) melhorias nos serviços de saúde.

**10** (Fuvest-SP) No texto, ao se comparar o México aos Estados Unidos, afirma-se que, no México,

- a) o produto interno bruto é equivalente a 50% do produto interno bruto dos Estados Unidos.
- b) os índices de mortalidade adulta vêm crescendo, nos últimos anos.
- c) as mulheres representam 50% da população escolarizada.
- d) as políticas educacionais são insuficientes e estão defasadas.
- e) as taxas de mortalidade feminina adulta são pouco superiores às norte-americanas.

**11** (Fuvest-SP) De acordo com o texto, "about 10 percent lower mortality rates" é resultado de

- a) "10 percent increase in GDP".
- b) "child mortality reductions".
- c) "equivalent per capita GDP".
- d) "economic growth".
- e) "one year of schooling".

**12** In the sentence "One year of schooling gives you about 10 percent lower mortality rates, whereas with a 10 percent increase in GDP, your mortality rate would go down only by 1 to 2 percent." (l. 10-12), **whereas** could be replaced, with no change in meaning, by:

- a) since.
- b) when.
- c) up till now.
- d) while.
- e) over.

Texto para a questão 13

[www.colintfisher.com](http://www.colintfisher.com). Acesso em: 30 maio 2016.

**13** (Enem) Anúncios publicitários buscam chamar a atenção do consumidor por meio de recursos diversos. Nesse pôster, os números indicados correspondem ao(à):

- a) comprimento do cigarro.
- b) tempo de queima do cigarro.
- c) idade de quem começa a fumar.
- d) expectativa de vida de um fumante.
- e) quantidade de cigarros consumidos.

Texto para as questões 14 e 15

**14** (UPE) According to the context and grammar, the expression to complete the woman's question (3<sup>rd</sup> panel) is:

- a) When did you do.
- b) Can you listen to.
- c) When will you do.
- d) What do you do.
- e) What is going to.

**15** In the sentence from the second frame "Maybe you should charge it for once", **should** can be replaced, with no change in meaning, by:

- a) may.
- b) can.
- c) ought to.
- d) might.
- e) must.

Texto para a questão 16

### Death Rates Rising for Middle-Aged White Americans, Study Finds

1 Something startling is happening to middle-aged white Americans. Unlike every other age group, unlike every other racial and ethnic group, unlike their counterparts in other rich countries, death rates in this group have been rising, not falling.

5 That finding was reported Monday by two Princeton economists, Angus Deaton, who last month won the 2015 Nobel Prize for Economic Sciences, and Anne Case. Analyzing health and mortality data from the Centers for Disease Control and Prevention and from other sources, they concluded that rising annual death rates among this group are being driven not by the big killers like heart disease and diabetes but by an epidemic of suicides and afflictions stemming from substance abuse: alcoholic liver disease and overdoses of heroin and prescription opioids.

Available in: <www.nytimes.com/>. Access: November 2015.

**16** (FPP-PR) According to the text, we can state that:

- I. "Startling" means "something good".
  - II. "Unlike" means "differently from".
  - III. "Rising", in this text, means the opposite of "falling".
  - IV. Heart disease and diabetes are the main reasons of the high death rates presented in the text.
  - V. The word "stemming" can be replaced by "originated", without changing the meaning.
- a) Only I and IV are correct.
  - b) Only II, III and V are correct.
  - c) Only V is correct.
  - d) Only II and III are correct.
  - e) I, II, III, IV and V are correct.

## The Growing Generational Divide

- 1 BERA, Ky. – I WAS always with older folks when I was very young. They called me "Little Man" and told me I was "an old soul." I worked in the garden with my grandparents, learned how to count money with Old Man Hoskins at the local store, and overheard the tales of my ancient neighbors. But it was the stories of my fierce aunt, Sis, that were my favorite.
- 5 Unfortunately, it seems there are fewer opportunities for different generations to interact now. The 2010 United States census shows that Appalachia, where I live, has some of the lowest levels of age segregation in the nation. Yet even here I notice a shift away from the intergenerational activity I enjoyed as a child in the 1980s.

Disponível em: [www.nytimes.com/2015/05/08/opinion/the-growing-generational-divide.html?ref=opinion](http://www.nytimes.com/2015/05/08/opinion/the-growing-generational-divide.html?ref=opinion)  
Acessado em 10/09/2015. Adaptado para fins educacionais. By Silas House

- 17** (FICSAE-SP) Read the text "The growing generational divide" and write a paragraph in Portuguese comparing what the author's and your childhood were like. Use standard written language.

## Going Beyond 19

## Conditional Sentences

Leia a tira de Jeremy a seguir e observe o uso dos tempos verbais nas **Conditional Sentences**.

**ZITS**

**JERRY SCOTT & JIM BORGMAN**

BORGMAN, Jim; SCOTT, Jerry. *My Bad: A Zits Treasury*. p. 259.

No trecho "... *if my parents **get** any more intrusive, my head **is going to explode***". [Se meus pais forem ainda mais intrometidos, minha cabeça explodirá/vai explodir].

Neste caso, trata-se de uma **Conditional Sentence I**, em que o verbo da **If-Clause** está no **Present** e o verbo da **Main Clause** (oração principal) está no **Future**.

As **Conditional Sentences** são constituídas de **If-Clause** (oração subordinada adverbial condicional) + **Main Clause** (oração principal).

Os principais tipos dessas orações são:

## 1. Conditional Sentence I

If Nora comes home, we will talk (are going to talk) to her.

The students won't pass if they don't study hard.

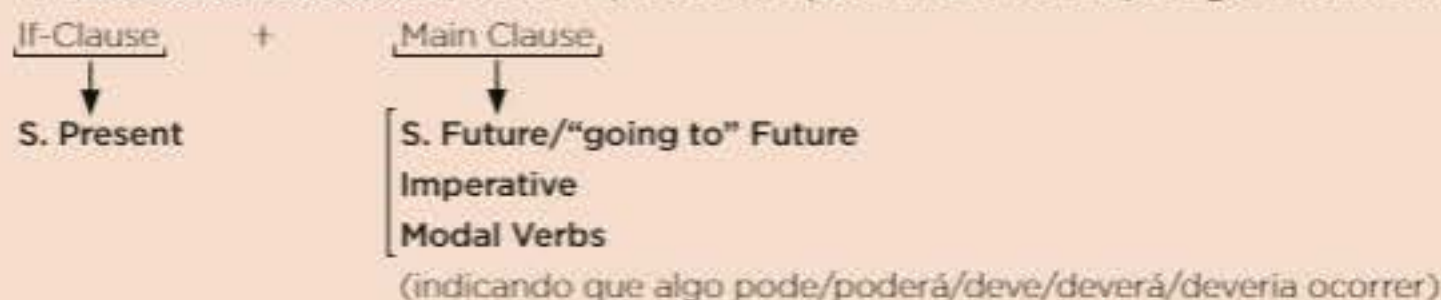

If you see your neighbors, invite them to the party.

If Sharon gets sick, her mother should take her to the doctor's.

Na **Conditional Sentence I**, a correlação dos tempos verbais nas orações geralmente é a seguinte:

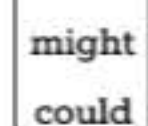

## 2. Conditional Sentence II

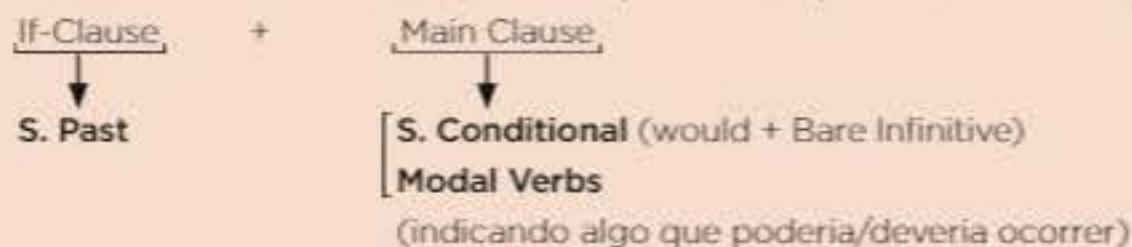

If Nora **came** home, we **would talk** to her.

The students **wouldn't pass** if they **didn't study** hard.

If Sharon **got** sick, her mother **should** take her to the doctor's.

Na **Conditional Sentence II**, a correlação dos tempos verbais nas orações geralmente é a seguinte:

### 3. Conditional Sentence III

If Nora **had come** home, we **would have talked** to her.

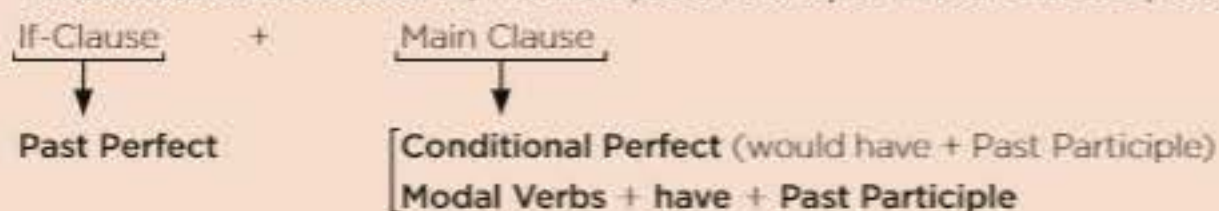

The students **wouldn't have passed** if they **hadn't studied** hard.

If Sharon **had got (gotten) sick**, her mother 

|               |
|---------------|
| <b>should</b> |
| <b>might</b>  |
| <b>could</b>  |

**have taken** her to the doctor's.

Na **Conditional Sentence III**, a correlação dos tempos verbais nas orações geralmente é a seguinte:

#### 4. Unless

You won't have success unless you try harder.

S. Future                  S. Present

Equivalente a

You won't have success if you don't try harder.

A conjunção **unless** (a menos que/a não ser que) equivale a **if not**. Ela é mais comumente usada quando a oração principal está na forma negativa.

A correlação dos tempos verbais é igual àquela das demais *Conditional Sentences*.

## 5. Special Cases

If I **were** the school principal, I **would handle** the situation differently.

Na **Conditional Sentence II**, na linguagem formal ou escrita, o passado do verbo **to be** é **were** para todas as pessoas. Na conversação normal, pode-se usar também **was**. A expressão **If I were you** é fixa.

If the kids **have finished** their homework, Mrs Sweeny **will take** them to the zoo.

If I **get up** too early, I **feel** terrible the whole day.

Às vezes, na **Conditional Sentence I** pode-se usar também **Present Continuous** ou **Present Perfect**, em lugar do **Simple Present**. Em orações do tipo "causa e efeito", pode-se usar **Simple Present** tanto na **If/Unless-Clause** como na **Main Clause**.

~~X~~the police **had warned** the drivers, they **would have avoided** the downtown area.

**Had** the police **warned** the drivers, they **would have avoided** the downtown area.

If you had brought your passport, we would catch the next flight.

Past Perfect                      S. Conditional

Quando a conjunção **if** é omitida (geralmente na **Conditional Sentence III**), a forma verbal **had** passa a **anteceder** o sujeito da oração.

Na **Conditional Sentence III**, quando a ação da **Main Clause** se refere a *presente* ou *futuro*, usa-se **Simple Conditional** em lugar de **Conditional Perfect**.

We'll stick to the story { if he believes it.  
if he doesn't believe it.

Equivale a

We'll stick to the story { **whether** he believes it or **not**.  
**whether or not** he believes it.

A expressão **whether or not** (se ... ou não; quer ... quer não) indica que a ação/situação da **Main Clause** ocorrerá independentemente da condição.

**1** (Fuvest-SP) Complete com os tempos verbais corretos dos verbos entre parênteses.

She \_\_\_\_\_ (can keep) the ring if the owner \_\_\_\_\_ (not to come) and asked for it.

**2** (Fuvest-SP) Complete usando *if* ou *unless*:

a) She will hurt herself \_\_\_\_\_ she is careful.

b) John is going to drown \_\_\_\_\_ nobody jumps into the river to save him.

**3** (USJT-SP) Complete as *sentenças condicionais* a seguir, colocando os verbos entre parênteses nos tempos corretos.

a) If it \_\_\_\_\_ (rain), we won't go to the park.

b) I \_\_\_\_\_ (write) to you if I had your address.

**4** (UFMG) Rewrite these sentences using the correct form of the verb in italics.

a) If I come here next year, I *go up* that hill.

b) If people knew how devoted the old man is, they *be* nicer to him.

**5** Rewrite the following sentence leaving out "if". Make any necessary changes.

If he had told me the truth, I could have helped him.

## Exercícios

Texto para as questões 1 a 10

### The challenge of doctor-patient relations in the internet age

Reprodução / Fac. São Camilo, 2018

1 "Let me do some research and I'll get back to you," my patient said. My patient, a 19-year-old student, had already taken time off from school because of her anxiety. I was her psychiatrist, with over two decades of experience treating university students, and had just explained my diagnostic impressions based on a **lengthy** evaluation. I'd recommended that she try a medicine I expected would help. I'd also **laid out** the  
5 risks and benefits of other treatment options.

"Do you have additional questions I can answer?" I asked. I wanted to let her know that's why I was there, **to cull** the research, to help make sense of it. "No, I like to go online and look for myself," she said.

More and more, I see students turning away from the "expertise" that a live person can offer and instead turning to the vast and somehow more objective-seeming "expertise" of the digital world.

10 In an age when journalism we don't like can be **dismissed** as "fake news," suggesting that the information we do like is most credible, **regardless of** its **source**, it's not hard to understand why young people do this. The medical profession itself, under managed care, has **played a role** as well, providing less time for doctor-patient interactions and **undermining** the chances that a personal relationship and trust can develop. Under the **guise** of efficiency, medical test results are now often released directly to  
15 patients, sometimes before or even without the benefit of any interpretation.

But there's danger in trusting data over people, as there is in thinking the expertise of all people is equivalent. When it comes to health, digital natives may not be learning how to navigate effectively. And the consequences could be harmful.

20 The availability of health data on the internet has its benefits. Online, for example, we can find explanations and solutions for symptoms we might be too embarrassed, or afraid, to discuss with another person, in person. Or, for **life-threatening** diseases, we can locate clinical **trials** our doctors may **not be aware of**.

However, there's also a lot of misleading information, and information that's simply untrue. The internet is full of people selling things – supplements, treatment regimens that have not been rigorously tested, even prescription medications – and making false promises that have not been **scrutinized** by  
25 regulatory agencies. Sometimes, as in the case of some websites that promote "an anorexic diet" for "aggressive" weight loss, the information can encourage life-threatening behavior.

**lengthy:** longo(a)

**to lay (laid) out:** expor  
**to cull(ed):** selecionar;  
examinar rigorosamente

**to dismiss(ed):**  
descartar

**regardless of:**  
independente  
(independentemente)  
de

**source:** fonte

**to play(ed) a role:**  
desempenhar um papel,  
uma função

**to undermine(d):** minar  
**guise:** disfarce

**life-threatening:** que  
ameaçam a vida

**trial:** teste (científico,  
clínico)

**to be (was/were; been)**  
**aware of:** estar ciente de

**scrutinized:** examinado

Years ago, when we discussed paternalism versus patient autonomy in my medical school ethics class, I came down strongly in favor of autonomy. Who but the patient could best decide what was right for him or her? But years of clinical – and personal – experience have taught me that information in and of itself is insufficient. Judgment is also indispensable, especially in complex situations, and the capacity for good judgment rests within people, not data sets.

(Doris Jarovici is a psychiatrist at Harvard University's Counseling and Mental Health Services and the author of *Mental Health Issues and the University Student*. [www.nytimes.com](http://www.nytimes.com). Adaptado.)

**1** (Med. São Camilo-SP) Em seu texto, a autora:

- a) apoia os jovens que preferem obter diagnósticos *on-line* em vez de consultar médicos.
- b) condena a venda *on-line* de medicamentos “milagrosos”, exceto os relacionados à perda de peso.
- c) defende a ideia de que as pessoas conseguem identificar informações falsas sobre saúde na internet.
- d) alerta que mesmo os médicos podem ser influenciados por dados enganosos sobre saúde na internet.
- e) expressa preocupação com o fato de os pacientes substituírem a avaliação médica por informações da internet.

**2** (Med. São Camilo-SP) No trecho do primeiro parágrafo “*Let me do some research and I'll get back to you...*” (ℓ. 1), o termo sublinhado refere-se:

- a) à paciente da psiquiatra.
- b) à professora de medicina da universidade.
- c) à psiquiatra autora do texto.
- d) ao estudante de 19 anos.
- e) aos alunos da professora.

**3** (Med. São Camilo-SP) No trecho do primeiro parágrafo “*I'd recommended that she try a medicine...*” (ℓ. 4), o termo sublinhado pode ser corretamente substituído por:

- a) used to.
- b) had.
- c) should.
- d) could.
- e) would.

**4** (Med. São Camilo-SP) No terceiro parágrafo, o termo “*expertise*” está entre aspas para:

- a) mostrar que o mundo digital não é tão confiável como parece.
- b) denunciar os falsos profissionais que se apresentam na internet.
- c) enfatizar que é difícil encontrar um especialista na internet.
- d) expor que só é possível avaliar especialistas com dados objetivos.
- e) destacar a especialização cada vez maior no mundo digital.

- 5** (Med. São Camilo-SP) No trecho do quarto parágrafo "... the information we do like is most credible, regardless of its source... ", a expressão sublinhada equivale, em português, a:
- a) exatamente pela. c) por causa de. e) devido a.  
b) além de. d) independentemente de.
- 6** (Med. São Camilo-SP) De acordo com o quarto parágrafo, a profissão médica contribui para que as pessoas recorram à internet em vez de recorrer a médicos. A justificativa apresentada é que:
- a) as interpretações infundadas de sintomas são recorrentes na internet.  
b) as pessoas tendem a aceitar recomendações que vão de encontro às suas crenças.  
c) a automedicação é estimulada pelos laboratórios quando disponibilizam resultados diretamente ao paciente.  
d) as pessoas desconfiam dos diagnósticos clínicos de fontes da internet.  
e) o tempo para se estabelecer um relacionamento entre médico e paciente é escasso.
- 7** (Med. São Camilo-SP) No trecho do quinto parágrafo "... as there is in thinking the expertise of all people is equivalent" (ℓ. 16-17), o termo sublinhado equivale, em português, a:
- a) contanto que. c) via de regra. e) com relação a.  
b) do mesmo modo que. d) enquanto.
- 8** (Med. São Camilo-SP) De acordo com o quinto e o sexto parágrafos, um dos benefícios dos dados médicos disponíveis na internet é:
- a) a possibilidade de comparar informações.  
b) o refreamento do pânico em caso de problemas sérios de saúde.  
c) a facilidade de acesso.  
d) a navegação natural para os nativos digitais.  
e) o acesso a informações sobre sintomas constrangedores.
- 9** (Med. São Camilo-SP) No trecho do sétimo parágrafo "However, there's also a lot of misleading information, and information that's simply untrue." (ℓ. 22), o termo sublinhado pode ser substituído sem alteração de sentido, por:
- a) Yet. c) Therefore. e) So.  
b) Furthermore. d) Whenever.
- 10** (Med. São Camilo-SP) Assinale a alternativa cujo trecho evidencia a posição atual da autora sobre o desafio apresentado no título.
- a) "... when we discussed paternalism versus patient autonomy in my medical school ethics class, I came down strongly in favor of autonomy." (8º parágrafo)  
b) "The internet is full of people selling things [...] and making false promises that have not been scrutinized by regulatory agencies." (7º parágrafo)  
c) "... the information can encourage life-threatening behavior." (7º parágrafo)  
d) "Judgment is also indispensable, especially in complex situations, and the capacity for good judgment rests within people, not data sets" (8º parágrafo)  
e) "Who but the patient could best decide what was right for him or her?" (8º parágrafo)

## Texto para as questões 11 a 19

### Twitter's testing a 280-character limit for tweets

1 Twitter chief executive Jack Dorsey last year made a definitive announcement about the company's famous 140-character count **amid** rumors that the firm would substantially relax the limit. "It's staying, it's a good  
5 **constraint** for us."

On Tuesday, the company took it back – for some people, at least.

Twitter is testing a feature to let some users double the amount of characters allowed in a tweet. The 280-character  
10 limit will be available to a small group of people on the site. When asked for more information, Twitter said it would be a "single-digit percentage" of its 328 million users – so, millions – who will be **randomly** chosen."

The company declined to comment directly on how it's  
15 choosing those people or why it changed its mind about its 140-character limit. But in a company blog post, product manager Aliza Rosen and senior software engineer Ikuhiro Ihara said the team started looking into the restrictions of the 140-character limit after noticing differences among  
20 languages. Some languages – specifically Chinese, Japanese and Korean – allow for greater expression in fewer characters.

"We see that a small percent of tweets sent in Japanese have 140 characters (only 0.4%). But in English, a much higher percentage of tweets have 140 characters (9%).  
25 Most Japanese tweets are 15 characters while most English tweets are 34," the post said.

The 280-character test will **roll out** in all languages except for Chinese, Japanese and Korean. It's true that some languages allow each character to count for more.  
30 My own last name, Tsukayama, is nine letters in English; phonetically in Japanese, it's four letters. If you use Japanese kanji characters, it's three.

But Twitter users in other languages have found **workarounds** to **bypass** the 140-character limit.  
35 It's common to see someone send out a **thread**, or "Twitterstorm," by signaling that their thoughts are going to come in several bite-sized **chunks**. Twitter itself did this when addressing why it hasn't suspended President Trump from its platform. Dorsey himself has used a common workaround – posting an image of longer text –  
40 to get around the character limit, even while **extolling** the virtues of brevity early last year.

"Although we feel confident about our data and the positive impact this change will have, we want to  
45 try it out with a small group of people before we make a decision to launch to everyone," the blog post said.

"We understand since many of you have been tweeting for years, there may be an emotional attachment to 140 characters – we felt it, too. But we tried this, saw the  
50 power of what it will do, and fell in love with this new, still brief, constraint."

Hayley Tsukayama. www.washingtonpost.com, 26.09.2017. Adaptado.

**amid:** em meio a  
**constraint:** restrição  
**randomly:** aleatoriamente  
**to roll(ed) out:** desenrolar(-se); acontecer  
**workaround:** solução alternativa  
**to bypass(ed):** contornar  
**thread:** tópico; linha; fio  
**chunk:** pedaço  
**to extol(led):** exaltar

**11** (UEFS-BA) The text is mainly about:

- a) an old feature to be reintroduced in Twitter posts.
- b) measures to control access to Twitter in different countries.
- c) new restrictions in Twitter services.
- d) changes in Twitter rejected by its customary users.
- e) an update added to the Twitter platform.

**12** (UEFS-BA) According to the text, what first motivated the company to make the announced changes in Twitter was the fact that:

- a) 140 characters did not seem enough for people to express many of their most relevant ideas.
- b) some languages, especially Asian ones, require too few characters to express even long thoughts.
- c) research into the platform demonstrated that there are languages in which each character counts for more than one word.
- d) differences were noticed as to the number of characters regularly used by speakers of various language backgrounds.
- e) users from different countries were systematically ignoring the rules that govern the platform.

**13** (UEFS-BA) The new Twitter configuration will be offered to:

- a) arbitrarily selected users.
- b) those with difficulties in restricting messages to 140 characters.
- c) English-speaking people, mainly.
- d) all of the platform's 328 million regular users.
- e) non-native English speakers.

- 14** (UEFS-BA) In the fragment from the fourth paragraph "The company declined to comment directly on how it's choosing those people..." (ℓ. 14-15), the term underlined can be replaced, without any change in meaning, by:

a) decided. d) admitted.  
b) refused. e) agreed.  
c) deliberated.

- 15** (UEFS-BA) In the fragment from the fifth paragraph "Most Japanese tweets are 15 characters while most English tweets are 34..." (ℓ. 25-26), the word underlined twice means the same as:

a) many. d) the best.  
b) the longest. e) some.  
c) the majority of.

- 16** (UEFS-BA) According to the last two paragraphs, the company have contradicted themselves the moment:

a) they decided to offer their new format to a limited number of users rather than to Twitter customers as a whole.  
b) they permitted speakers from different languages to have different Twitter formats available to them.  
c) their own chief executive used a strategy to avoid the restrictions of the platform's word limit.  
d) they did not suspend Trump from the platform, although they had previously confirmed they would do so.  
e) their involvement with new decisions became too emotional, and "falling in love" with changes was seen as a positive thing.

- 17** (UEFS-BA) In the fragment from the last paragraph "We understand since many of you have been tweeting for years, there may be an emotional attachment to 140 characters..." (ℓ. 47-49), the term underlined could be replaced, with no change in meaning, by:

a) when. d) while.  
b) because. e) however.  
c) although.

- 18** Rewrite the following excerpt from the text using **however**. Make the necessary changes.

"Although we feel confident about our data and the positive impact this change will have, we want to try it out with a small group of people before we make a decision to launch to everyone..."

- 19** Join the two sentences from the text using **such as**. Make the necessary changes.

"It's true that some languages allow each character to count for more. My own last name, Tsukayama, is nine letters in English."

## Going Beyond 20

### Social Media & Technology

Cartum para a questão 1

NO E-HARMONY? NO FACEBOOK? HOW DID YOU AND GRANDMA EVER MANAGE TO MEET EACH OTHER?

(Disponível em: [http://issuu.com/carimactimes2010/docs/backstage\\_carimac\\_times\\_2010](http://issuu.com/carimactimes2010/docs/backstage_carimac_times_2010))

- 1** (Unicamp-SP) Para o menino do cartum é surpreendente que seus avós:

a) já possuem contas nas redes virtuais de relacionamento.  
b) tenham se conhecido nas redes virtuais de relacionamento.  
c) ainda não consigam gerenciar suas relações sociais nas redes virtuais de relacionamento.  
d) tenham conseguido se conhecer fora das redes virtuais de relacionamento.

Texto para as questões 2 a 5

**1** A study **carried out** by Lauren Sherman of the University of California and her colleagues investigated how use of the "like" button in social media affects the brains of teenagers lying in body scanners.

**5** Thirty-two teens who had Instagram accounts were asked **to lie down** in a functional magnetic resonance imaging (fMRI) scanner. This let Dr. Sherman monitor their brain activity while they were **perusing** both their own Instagram photos and photos that they were told had been added by other teenagers in the experiment. In reality, Dr. Sherman had collected all the other photos, which included neutral images of food and friends as well as many **depicting** risky behaviours like drinking, smoking and drug use, from other peoples' Instagram accounts.  
**10** The researchers told participants they were viewing photographs that 50 other teenagers had already seen and **endorsed** with a "like" in the laboratory.

The participants were more likely themselves to "like" photos already depicted as having been "liked" a lot than  
**20** they were photos depicted with fewer previous "likes".

When she looked at the fMRI results, Dr. Sherman found that activity in the nucleus accumbens, a **hub** of reward circuitry in the brain, increased with the number of "likes" that a photo had.

*The Economist*, June 13, 2016. Adaptado.

to carry(ied) out: realizar  
to lie (lay; lain/lie) down: deitar-se  
to peruse(d): examinar cuidadosamente  
to depict(ed): retratar; descrever  
to endorse(d): endossar; apoiar  
hub: núcleo; centro

**2** (Fuvest-SP) Segundo o texto, como resultado parcial da pesquisa, observou-se que:

- a) fotos com imagens neutras provocaram menor impacto do que as que retratavam comportamento perigoso.
- b) os participantes mostraram tendência a "curtir" uma imagem que já havia recebido número considerável de "curtidas".
- c) os adolescentes demonstraram certo desconforto, quando solicitados a avaliar fotos produzidas por eles próprios.
- d) as tarefas propostas aos participantes apresentaram limitações, por terem foco exclusivo na rede Instagram.
- e) a metodologia adotada no experimento confirmou conclusões de estudos anteriores sobre redes sociais.

**3** (Fuvest-SP) Conforme o texto, a região do cérebro que se mostrou mais ativa, quando da análise dos resultados da ressonância, corresponde a um sistema de:

- a) memória recente.
- b) defesa.
- c) recompensa.
- d) repetição.
- e) inibição.

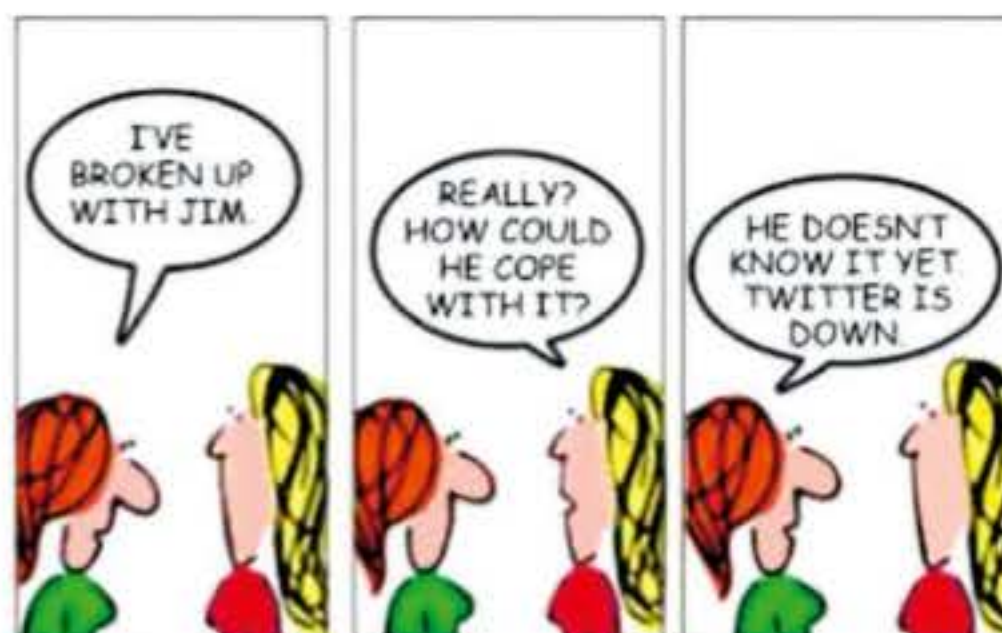

**4** In the fragment "*This let Dr. Sherman monitor their brain activity...*" (ℓ. 7-8), **this** refers to:

- a) the University of California.
- b) Instagram accounts.
- c) lying down in an fMRI scanner.
- d) teens.
- e) Lauren Sherman.

**5** Na sentença "... they were perusing both their own Instagram photos and photos that they were told had been added by other teenagers in the experiment." (ℓ. 8-10), **both... and** traz a ideia de:

- a) contraste.
- b) inclusão.
- c) exemplificação.
- d) consequência.
- e) causa.

## Texto para a questão 6

(http://royal.pingdom.com)

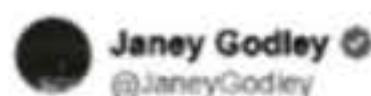

**6** (Unifesp) A tira evidencia que:

- a) as duas mulheres desaprovam o comportamento de Jim.
- b) as duas mulheres preferem conversar pessoalmente a usar mídias sociais.
- c) a mulher de roupa vermelha desaprova o fato de a mulher de roupa verde ainda não ter conversado com Jim.
- d) a mulher de roupa vermelha ficou triste com a separação do casal.
- e) a mulher de roupa verde tentou usar uma mídia social para resolver seu relacionamento afetivo.

## Texto para as questões 7 e 8

### Should Twitter entertain millions with public arguments?

Comedian Janey Godley's tweets of a couple's train-bound row raise questions of how to protect our privacy in public places.

Couple on train before its even moved have fallen out over "her inability to accept the truth" this will be fun #traintales @VirginTrains  
11.30 AM - Jun 22, 2012

She just told him "I can accept the truth you are incapable of speaking it NOW WHO the HELL is TIA and why did she email you?" #traintales  
11.33 AM - Jun 22, 2012

- 1 If the troubles of the two travellers had made it on to a newspaper first rather than a comedian's Twitter feed, would we be so relaxed about loss of privacy? I think perhaps not.

Social media has done so much for freedom of expression, it would be cruel if it actually leads to less social freedom for fear of having our every **misstep**, angry word or misbehaviour **broadcast** there for all to see.

Adaptado de David Banks, Should Twitter entertain millions with public rows? *The Guardian*, 13/07/2012. Disponível em [www.theguardian.com/commentisfree/2012/jul/13/twitermillions-public-rows](http://www.theguardian.com/commentisfree/2012/jul/13/twitermillions-public-rows). Acessado em 10/07/2017.

**misstep:** erro  
**to broadcast:** transmitir

- 7 (Unicamp-SP) No artigo de opinião, o autor:

- a) critica a perda da liberdade de expressão provocada pelo abuso nas mídias sociais por certos usuários.
- b) aponta um dilema ético suscitado pelo uso das mídias sociais, envolvendo dois tipos de liberdade.
- c) diz que a invasão de privacidade por parte de jornais é mais aceita do que aquela praticada pelo Twitter.
- d) argumenta que a liberdade dos cidadãos é um valor mais importante do que o direito à privacidade.

- 8 In the sentence "If the troubles of the two travellers had made it on to a newspaper first rather than a comedian's Twitter feed..." (ℓ. 1-2), **rather than** can be replaced, with no change in meaning, by:

- a) instead of.
- b) in spite of.
- c) despite.
- d) besides.
- e) while.

#### COMMENTS (4) (please sign in to comment)

orinoco womble **said**, 22 days ago

Good things: Living in the dorms, far from parental supervision, you can get up to all sorts and they won't know if you don't tell em.

Pizza parlours and takeaways occupy a whole street near campus. You could eat pizza every night and your parents couldn't say a word (I realise I'm showing my age, I'm before the junkfood generation).

You get to make your own mistakes. No helicopter parents around. Some of those mistakes are a lot of fun at the time! Everyone around you likes your music or something even crazier. You can experiment with life.

Reprodução / PUC, 2017

## Texto para as questões 1 a 8

## Drinking Coffee Could Help You Live Longer

1 Coffee not only helps you feel full of beans, it might add years to your life as well, two major studies have shown. Scientists in Europe and the US have uncovered the clearest evidence yet that drinking coffee reduces the risk of death.

5 One study of more than half a million people from 10 European countries found that men who **downed** at least three cups of coffee a day were 18% less likely to die from any cause than non-coffee drinkers. Women drinking the same amount benefited less, but still experienced an 8% reduction in mortality over the period measured.

10 Similar results were reported by American scientists \_\_\_\_\_ conducted a separate investigation, recruiting 185 855 participants from different ethnic backgrounds. **Irrespective of** ethnicity, people who drank two to three cups of coffee daily had an 18% reduced risk of death.

15 Each of the studies, both published in the journal *Annals of Internal Medicine*, showed no advantage from drinking either caffeinated or decaffeinated coffee. Experts believe the antioxidant plant compounds in coffee rather than caffeine are responsible for the life-extending effect. Previous research has suggested that drinking coffee can reduce the risk of heart disease, diabetes, **liver** disease, and some cancers.

20 Dr. Marc Gunter, from the International Agency for Research on Cancer, who led the European study with colleagues from Imperial College London, said: "We found that higher coffee consumption was associated with a lower risk of death from any cause and specifically for circulatory diseases and digestive diseases. Importantly, these results were similar across all of the 10 European countries, with variable coffee drinking habits and customs. Our study also offers important insights into the possible mechanisms for the beneficial health effects of coffee."

(www.huffingtonpost.co.uk, 11.7.2017. Adaptado.)

to down(ed): engolir  
irrespective of:  
independentemente de  
liver: fígado

1 The sentence "Similar results were reported by American scientists \_\_\_\_\_ conducted a separate investigation, recruiting 185 855 participants from different ethnic backgrounds." (ℓ. 8-9) could be correctly filled with:

- |           |          |         |
|-----------|----------|---------|
| a) whom.  | c) what. | e) who. |
| b) whose. | d) when. |         |

2 (Famema-SP) De acordo com o texto,

- a cafeína possui um efeito maior sobre a longevidade do que os compostos antioxidantes do café.
- o consumo de café pode reduzir o risco de doenças hepáticas.
- o café descafeinado não faz mal para quem não pode ingerir cafeína.
- o risco de morte diminui cerca de 18% entre as pessoas que bebem de uma a duas xícaras de café por dia, dependendo da etnia.
- um estudo realizado anteriormente mostrou que o café é inadequado para consumo humano.

- 3** (Famema-SP) The excerpt from the first paragraph "... *helps you feel full of beans...*" (ℓ. 1) means that coffee helps to:
- a) burn fat. d) improve memory.  
b) fortify the DNA. e) increase energy.  
c) relieve chronic pain.
- 4** (Famema-SP) In the excerpt from the second paragraph "... *18% less **likely** to die...*" (ℓ. 5), the word in bold can be replaced, without changing the meaning of the sentence, by:
- a) favourably. d) agreeable.  
b) impossible. e) probable.  
c) pleasantly.
- 5** (Famema-SP) No trecho do segundo parágrafo "*Women drinking the same amount benefited less, **but** still experienced an 8% reduction in mortality...*" (ℓ. 6), a palavra em destaque indica uma ideia de:
- a) contraste. d) comparação.  
b) inclusão. e) alternativa.  
c) negação.
- 6** (Famema-SP) De acordo com o quinto parágrafo,
- a) o alto consumo de café entre os europeus aumentou o risco de morte nesse grupo.  
b) a pesquisa do Dr. Marc Gunter mostrou que o café pode reduzir o risco de câncer.  
c) o café pode tanto prolongar o tempo de vida das pessoas quanto fazer bem à saúde.  
d) o consumo indiscriminado de café pode aumentar o risco de doenças dos sistemas circulatório e digestório.  
e) os hábitos e costumes relacionados ao consumo de café eram semelhantes nos dez países europeus envolvidos no estudo.
- 7** In the sentence "*Experts believe the antioxidant plant compounds in coffee rather than caffeine are responsible for the life-extending effect.*" (ℓ. 12-13), **rather than** gives an idea of:
- a) contrast. d) time.  
b) addition. e) substitution.  
c) consequence.
- 8** In the sentence "*Previous research has suggested that drinking coffee can reduce the risk of heart disease, diabetes, liver disease, and some cancers.*" (ℓ. 13-15), **can** brings the idea of:
- a) capacity. d) obligation.  
b) permission. e) advice.  
c) necessity.

## Texto para as questões 9 a 12

### The Invitation

1 It doesn't interest me what you do for a living, I want to know what you ache for, and if you **dare** to dream of meeting your heart's **longing**.

It doesn't interest me how old you are. I want to know if  
5 you will risk looking like a fool for love, for your dreams, for the adventure of being alive.

It doesn't interest me what planets are squaring with your moon. I want to know if you have touched the center of your own sorrow, if you have been opened by life's **betrayals** or  
10 have become **shriveled** and closed from fear of further pain. I want to know if you can sit with pain, mine or your own, without moving to hide it, or **fade** it or fix it. I want to know if you can be with joy, mine or even your own; if you can dance with the wilderness and let the ecstasy fill you to the **tips** of  
15 your fingers and toes without cautioning us to be careful, be realistic, or to remember the limitations of being a human.

It doesn't interest me if the story you're telling me is true. I want to know if you can risk disappointing another to be true to yourself; if you can **bear** the accusation of betrayal  
20 and not betray your own soul. I want to know if you can be **faithless** and therefore be **trustworthy**. I want to know if you can see beauty even when it's not pretty every day, and if you can source your life from its presence. I want to know if you can live with failure, yours and mine, and still stand on  
25 the **edge** of a lake and shout to the silver of the moon, "YES".

It doesn't interest me to know where you live or how much money you have. I want to know if you can get up after a night of **grief** and **despair**, **weary** and **bruised** to the bone, and do what needs to be done for the children.  
30 It doesn't matter to me who you are, how you came to be here. I want to know if you will stand in the center of the fire with me and not shrink back.

It doesn't interest me where or what or with \_\_\_\_\_ you have studied. I want to know what sustains you from  
35 the inside when all else falls away. I want to know if you can be alone with yourself; and if you truly like the company you keep in the empty moments.

|                                                 |                               |
|-------------------------------------------------|-------------------------------|
| <b>to dare(d):</b> ousar                        | <b>faithless:</b> infiel      |
| <b>longing:</b> desejo                          | <b>trustworthy:</b> confiável |
| <b>betrayal:</b> traição                        | <b>edge:</b> beira            |
| <b>shriveled:</b> atrofiado                     | <b>grief:</b> dor             |
| <b>to fade(d):</b> enfraquecer                  | <b>despair:</b> desespero     |
| <b>tip:</b> ponta                               | <b>weary:</b> cansado         |
| <b>bear (bore; born(e)):</b> suportar; aguentar | <b>bruised:</b> machucado     |

- 9** Choose the alternative to complete the sentence from the text:  
*"It doesn't interest me where or what or with \_\_\_\_\_ you have studied."* (ℓ. 33-34)  
 a) who                      b) that                      c) whom                      d) which                      e) whose
- 10** (Udesc) This invitation is about:  
 a) Falling into the deepest feelings and everyday acts knowing every corner of your soul and mind despite the fears and consequences that this will lead you to.  
 b) Going on a deep roller coaster of acts, searching for knowledge and company to fearlessly race a circuit of despair and anguish.  
 c) Leaving everything behind despite the fear of being alone for a while.  
 d) Searching for an unknown friend who calls out for you in a stormy day.  
 e) Traveling to other planets with a bunch of moody people who want you to leave your studies behind and hand them out your life.
- 11** (Udesc) The word "YES" (ℓ. 25) in the fourth paragraph is related to:  
 a) being at a lake feeling the desire to dive in.  
 b) taking the edge of your mistakes with pride and prejudice.  
 c) accepting your disappointments and missteps and be all right with that.  
 d) leaving your whole world behind and going after a new role of sorrow and despair.  
 e) looking for something prettier and worthy for ages and getting nothing but an image of the moon.
- 12** (Udesc) Mark the correct alternative which best substitutes the sentence in bold. "... I want to know **what you ache for, and if you dare to dream of meeting your heart's longing**." (ℓ. 1-3)  
 a) ... what you get ill for and if you dare to face your fears.  
 b) ... what you live for and if you care about your love life dream apart from you.  
 c) ... what you are afraid of and if you are willing to fight your nightmares.  
 d) ... what you suffer for and if you are willing to face your heart desires.  
 e) ... what you live for and if you care for yours but everything else.

Texto para a questão 13

The colour of the dots represents the relative intensity of therapeutic area research within a specific country across each row. The size of the dots represents the relative proportions of research across different countries within a specific therapeutic area in each column.

(Adaptado de Ajay Gautam, Lily Li e Kumar Srinivasan, Market watch: Therapeutic area 'heat map' for emerging markets. *Nature Reviews Drug Discovery* 14, p. 518, jul. 2015.)

- 13** (Unicamp-SP) De acordo com o gráfico apresentado,
- doença autoimune é um tema pesquisado intensamente em todos os países.
  - a China é o país com o menor mercado potencial para tratamentos médicos, apesar de ser populosa.
  - Índia e África do Sul dão importância semelhante às pesquisas sobre doenças infecciosas.
  - no Brasil, na Rússia e na Índia, a quantidade de doentes de câncer é aproximadamente a mesma.

Texto para as questões 14 a 21

### Human Embryos Edited to Stop Disease

By James Gallagher, health and science reporter, BBC News website

Scientists have, for the first time, successfully freed embryos of a piece of **faulty** DNA that causes deadly heart disease to run in families.

- It potentially opens the door to preventing 10,000 disorders that are passed down the generations. The US and South Korean team allowed the embryos to develop for five days before stopping the experiment.
- The study **hints** at the future of medicine, but also provokes deep questions about what is morally right. Science is going through a golden age in editing DNA thanks to a new technology called Crispr, named **breakthrough** of the year in 2015. Its applications in medicine are vast and include the idea of **wiping out** genetic faults that cause diseases from cystic fibrosis to breast cancer. US teams at Oregon Health and Science University and the Salk Institute along with the Institute for Basic Science in South Korea focused on hypertrophic cardiomyopathy.
- The **disorder** is common, affecting one in every 500 people, and can lead to the heart suddenly stopping beating. It is caused by an error in a single gene (an instruction in the DNA), and anyone carrying it has a 50-50 chance of passing it on to their children. In the study, described in the journal *Nature*, the genetic **repair** happened during conception. Sperm from a man with hypertrophic cardiomyopathy was injected into healthy donated **eggs** alongside Crispr technology to correct the defect. It did not work all the time, but 72% of embryos were free from disease-causing mutations.

- Dr Shoukhrat Mitalipov, a key figure in the research team, said: "Every generation on would carry this repair because we've removed the disease-causing gene variant from that family's lineage. By using this technique, it's possible to reduce the burden of this heritable disease on the family and **eventually** the human population."

- There have been multiple attempts before, including, in 2015, teams in China using Crispr-technology to correct defects that lead to blood disorders. But they could not correct every cell, so the embryo was a "mosaic" of healthy and diseased cells.

- Their **approach** also led to other parts of the genetic code becoming mutated. Those technical obstacles have been **overcome** in the latest research. However, this is not about to become routine practice. The biggest question is one of safety, and that can be answered only by far more extensive research. There are also questions about when it would **be worth** doing – embryos can already be screened for disease through pre-implantation genetic diagnosis. However, there are about 10,000 genetic disorders that are caused by a single mutation and could, in theory, be repaired with the same technology.

- Prof Robin Lovell-Badge, from the Francis Crick Institute, told the BBC: "A method of being able to avoid having affected children passing on the affected gene could be really very important for those families. In terms of when, definitely not yet. It's going to be quite a while before we know that it's going to be safe."

- Nicole Mowbray lives with hypertrophic cardiomyopathy and has a defibrillator implanted in her chest in case her heart stops. But she is unsure whether she would ever consider gene editing: "I wouldn't want to pass on something that caused my child to have a limited or **painful** life. That does come to the front of my mind when I think about having children. But I wouldn't want to create the 'perfect' child, I feel like my condition makes me, me."

- Darren Griffin, a professor of genetics at the University of Kent, said: "Perhaps the biggest question, and probably the one that will be debated the most, is whether we should be physically altering the genes of an IVF embryo at all."

- "This is not a **straightforward** question... equally, the debate on how morally acceptable it is not to act when we have the technology to prevent these **life-threatening** diseases must also come into play."

- The study has already been condemned by Dr David King, from the campaign group Human Genetics Alert, which described the research as "irresponsible" and a "race for first genetically modified baby".

12 Dr Yalda Jamshidi, a reader in genomic medicine at St George's University of London, said: "The study is the first to show successful and efficient correction of a disease-causing mutation in early stage human embryos with gene editing. **Whilst** we are just beginning to understand the complexity of genetic disease, gene-editing will likely become acceptable when its potential benefits, both to individuals and to the broader society, exceeds its risks."

13 The method does not currently fuel concerns about the extreme end of "designer babies" engineered to have new advantageous **traits**.

14 The way Crispr is designed should lead to a new piece of engineered DNA being inserted into the genetic code. However, in a complete surprise to the researchers, this did not happen. Instead, Crispr damaged the mutated gene in the father's sperm, leading to a healthy version being copied over from the mother's egg. This means the technology, for now, works only when there is a healthy version from one of the parents. Prof Lovell-Badge added: "The possibility of producing designer babies, which is unjustified in any case, is now even **further away**."

14 (FCMMG) We can **NOT** say, after reading the text, that:

- a) this study has already been condemned.
- b) the technology, so far, works only when there is a healthy version from one of the parents.
- c) scientists have not successfully freed embryos of a piece of faulty DNA that causes deadly heart disease to run in families.
- d) the study is the first to show successful and efficient correction of a disease-causing mutation in early stage human embryos with gene editing.

15 (FCMMG) The word **its** in the following sentence "*Its applications in medicine are vast and include the idea of wiping out genetic faults that cause diseases from cystic fibrosis to breast cancer.*" (paragraph 2) refers to:

- a) Science.
- b) Crispr.
- c) DNA.
- d) 2015.

16 (FCMMG) The word **however** in the following sentence "*However, there are about 10,000 genetic disorders that are caused by a single mutation and could, in theory, be repaired with the same technology.*" (paragraph 6) expresses the idea of:

- a) consequence.
- b) explanation.
- c) addition.
- d) contrast.

17 (FCMMG) According to the text, all the sentences below are correct, **EXCEPT**:

- a) the study involves the destruction of embryos.
- b) this study generates deep questions about what is morally right.
- c) we are just beginning to understand the complexity of genetic disease.
- d) the use of Crispr-technology to correct defects that lead to blood disorders happened before 2015.

18 In the sentence from the first paragraph "*It potentially opens the door to preventing 10,000 disorders that are passed down the generations.*", **that** could be replaced, with no change in meaning of the sentence, by:

- a) who.
- b) which.
- c) what.
- d) whose.

19 In the sentence from the last paragraph "*Instead, Crispr damaged the mutated gene in the father's sperm...*", **Instead** could be replaced, with no change in meaning, by:

- a) Thus.
- b) While.
- c) Since.
- d) Rather.

Responda às questões 20 e 21 em português

**20** De acordo com o segundo parágrafo, quais são as aplicações da descoberta do Crispr?

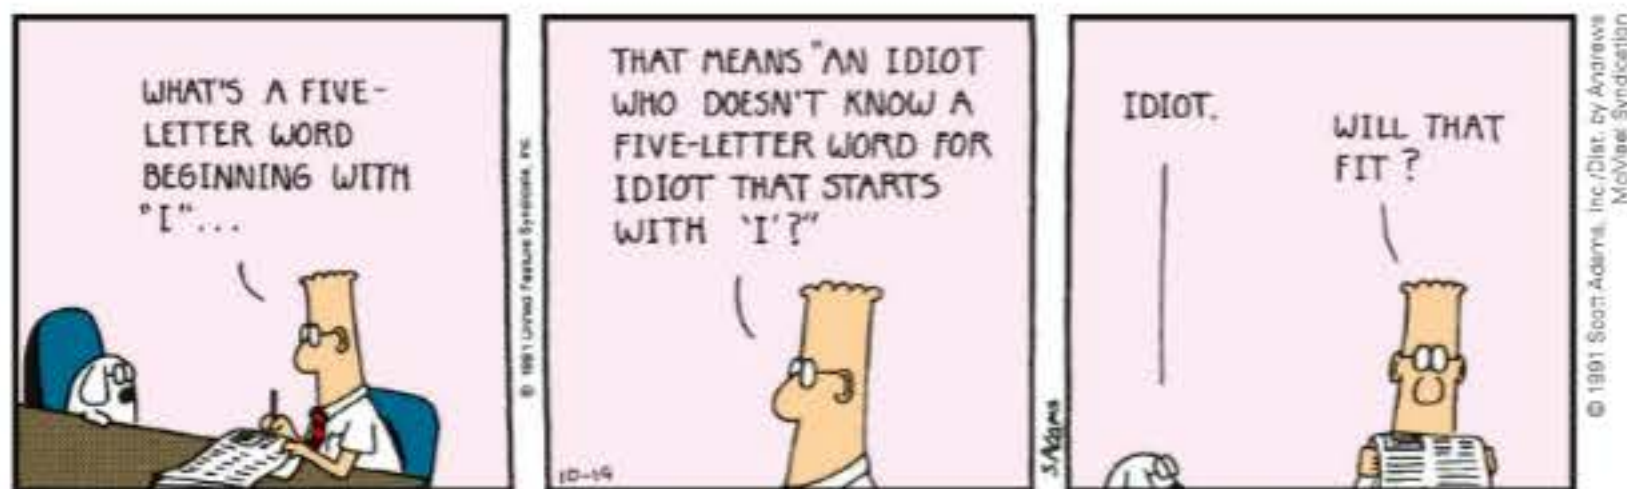

**21** Explique o contraste que existe no seguinte trecho do sexto parágrafo do texto:

*"Those technical obstacles have been overcome in the latest research. However, this is not about to become routine practice."*

## Going Beyond 21

### Relative Pronouns

Leia a tira de Dilbert a seguir:

ADAMS, Scott. *It's Obvious You Won't Survive by Your Wits Alone: A Dilbert Book*. p. 74.

No 2º quadrinho, **that** e **who** são pronomes relativos, referindo-se, respectivamente, a **word** (palavra) e **idiot** (pessoa idiota).

#### 1. Restrictive (Defining) Clauses

a) **who/that/whom/whose** (referentes a pessoas)

The boy **who** opened the door is Mrs. Tate's son.  
The boy **that** opened the door is Mrs. Tate's son.  
sujeito

The boy **who** you saw in the house is Mrs. Tate's son.  
The boy **that** you saw in the house is Mrs. Tate's son.  
The boy **whom** you saw in the house is Mrs. Tate's son.  
(omissão)  
objeto

The boy you're talking to is Mrs. Tate's son.

mas

The boy to **whom** you're talking is Mrs. Tate's son.

The boy **whose** name is Edward is Mrs. Tate's son.

subst.

Nas **Restrictive (Defining) Clauses**, os pronomes relativos referentes a pessoas podem ser **who/that/whom** (que; o/a qual; os/as quais) ou **whose** (cujo/a/s).

Quando o pronome relativo tem a função de sujeito da oração, pode-se usar **who** ou **that**.

Quando se trata de objeto direto ou indireto sem preposição antes, pode-se usar **who/that/whom**, embora na maioria desses casos o pronome seja omitido.

Quando uma preposição precede o pronome relativo referente a pessoas, então usa-se **whom**.

O pronome **whose** é sempre seguido de **substantivo**.

b) **which/that/whose** (referentes a coisas)

This is the *device* **which** will be on the market pretty soon.  
**that**  
sujeito

The *device* **which** you've seen in the lab will be on the market pretty soon.  
**that**  
(omissão) objeto

The *device* you're interested in will be on the market pretty soon.

mas

The *device* in **which** you're interested will be on the market pretty soon.

prep.

The *device* **whose** inventor is our Chemistry professor will be on the market pretty soon.

subst.

Nas **Restrictive (Defining) Clauses**, os pronomes relativos referentes a coisas podem ser **which**, **that** e **whose**.  
Quando o pronome relativo é o sujeito da oração, pode-se usar **which** ou **that**.  
Quando se trata de objeto direto ou indireto sem preposição antes, geralmente omite-se o pronome relativo.  
Quando uma preposição precede o pronome relativo referente a coisas, usa-se **which**.  
A forma **whose** deve vir seguida de substantivo.

c) Let's pack everything **that** will be needed.

Have you heard about the witnesses and details **that** led to Mr. Swenson's arrest?

Depois de certas expressões, como **all**, **everything**, **much**, **many**, **some**, **any**, **no** e formas compostas, geralmente usa-se **that**.

Quando o pronome relativo se refere a pessoas e coisas ao mesmo tempo, usa-se **that**.

## 2. Non-Restrictive (Non-Defining) Clauses

a) **who/whom/whose** (referentes a pessoas)

Mr. Bloom, **who** is the school principal, is my neighbor.

Mr. Bloom, **whom** you always see playing with my kids, is my neighbor.  
**who**

Mr. Bloom, about **whom** you're talking, is my neighbor.  
prep.

Mr. Bloom, **whose** wife is the school nurse, is my neighbor.

Nas **Non-Restrictive (Non-Defining) Clauses**, os pronomes relativos referentes a pessoas podem ser **who**, **whom** e **whose**.

Quando o pronome é sujeito da oração, usa-se **who**.

Quando se trata de objeto direto ou indireto sem preposição antes, usa-se **whom** (mais frequentemente) ou **who**.

Quando o pronome relativo referente a pessoas está precedido de preposição, usa-se **whom**.

O pronome relativo **whose** (cujo/a/s) é seguido de substantivo.

b) **which/whose** (referentes a coisas)

Her parents' marriage, **which** lasted for 30 years, took place in another country.

The new cathedral, **which** we all visited last year, has been destroyed in a fire.

The town hospital, **to which** the wounded were being taken, had no emergency room.

prep.

The Bloom family, **whose** life story was all over the news, moved to another country.

subst.

Nas **Non-Restrictive (Non-Defining) Clauses**, os pronomes relativos referentes a coisas podem ser **which** ou **whose**.

**Whose** (cujo/a/s) deve ser seguido de substantivo. Nos demais casos, usa-se **which**.

Nas **Non-Restrictive (Non-Defining) Clauses**, não se usa **that** e os pronomes relativos não podem ser omitidos.

Essas orações normalmente estão entre vírgulas.

### 3. *What ≠ which*

Show us the thing(s) that you intend to buy.

what

The students went on talking, **which** annoyed their teacher.

**What** significa "o que" (as coisas que; aquilo que) e não tem antecedente.

**Which** significa "o que" e se refere à oração anterior inteira. Neste caso, **which** é normalmente precedido de vírgula.

Confira o uso de **which** na tira de Garfield a seguir.

Nas questões 1 a 3, assinale a alternativa que completa corretamente cada frase.

**1** Mrs. Feldman, \_\_\_\_\_ health has improved a lot, will leave hospital today.

- a) whom                      b) who                      c) whose                      d) which                      e) what

**2** (Fesp) Drinking, \_\_\_\_\_ is a bad habit, is very popular nowadays.

- a) which                      b) who                      c) what                      d) whose                      e) whom

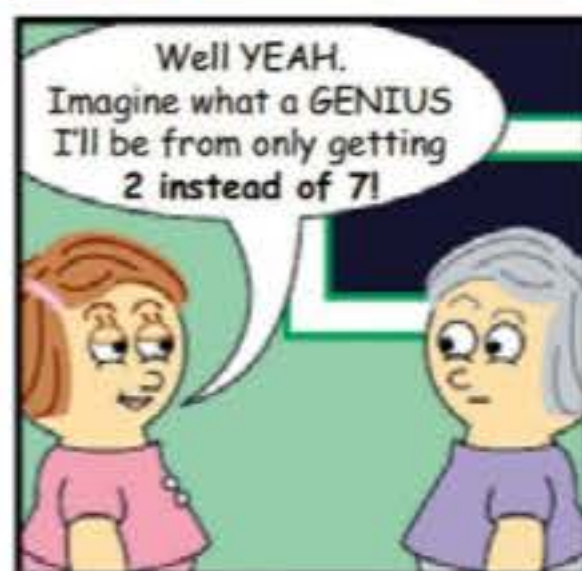

**3** (ITA-SP) Assinale a alternativa que contém o pronome que pode preencher corretamente as lacunas I e II de:

The man \_\_\_\_\_ I spoke to you is Brazilian.

The book \_\_\_\_\_ II \_\_\_\_\_ is on the table is very old.

- a) what                      b) who                      c) which                      d) that                      e) whom

Texto para as questões 4 a 6

"A study from Brigham Young University reported that teenagers \_\_\_\_\_ sleep seven hours, compared to nine hours of sleep, perform better academically. This study contradicts federal guidelines, stating teenagers should sleep as much as they need to." – THESTATECOLUMN.COM

(<http://lolalollipop.com>. Adaptado.)

- 4** (Unesp-SP) A lacuna no trecho "... teenagers \_\_\_\_\_ sleep seven hours..." deve ser preenchida por:
- a) who
  - b) whom
  - c) what
  - d) which
  - e) whose
- 5** (Unesp-SP) According to the cartoon, Lola:
- a) has already slept for seven hours.
  - b) will sleep until 7 am.
  - c) is planning to go to bed at midnight.
  - d) used to sleep for nine hours.
  - e) went to sleep at 10 pm.
- 6** (Unesp-SP) Lola thinks that:
- a) she is a genius.
  - b) it is wise to go to bed no later than midnight.
  - c) the less she sleeps, the more intelligent she'll become.
  - d) she'll please her mother if she gets better grades.
  - e) her mom wants her to sleep for at least nine hours.

## Exercícios

## England's Mental Health Experiment: No-Cost Talk Therapy

**in the midst of:** em  
meio a  
**throughout:** por todo

- 1 England is **in the midst of** a unique national experiment, the world's most ambitious effort to treat depression, anxiety and other common mental illnesses. The rapidly growing initiative, which has gotten little publicity outside the country, offers virtually open-ended talk therapy free of charge at clinics **throughout** the country: in remote farming villages, industrial suburbs and isolated
- 5 immigrant communities. The goal is to eventually create a system of primary care for mental health for all of Britain.

- At a time when many nations are debating large-scale reforms to mental health care, researchers and policy makers are looking hard at England's experience, observing both its popularity and its limitations. Mental health care systems vary widely across the Western world, but none have gone
- 10 nearly so far to provide unlimited access to talk therapies backed by hard evidence. Experts say the English program is the first broad real-world test of treatments that have been studied mostly in carefully controlled lab conditions.

Benedict Carey. [www.nytimes.com](http://www.nytimes.com), 24.7.2017.  
Adaptado.

- 1** (FCMSCSP) The singularity of the mental health program described in the text lies in the fact that it:
- a) is being tested to help future decisions about treatments.
  - b) has been totally developed under controlled conditions.
  - c) has expanded very rapidly around the Western world.
  - d) has been designed to deal with all kinds of mental illnesses.
  - e) offers limitless access to talk therapy provided for free.
- 2** (FCMSCSP) Espera-se que o programa discutido no texto:
- a) seja reproduzido em outros sistemas de saúde ao redor do mundo.
  - b) resulte na criação de um sistema de cuidados básicos em saúde mental em toda a Grã-Bretanha.
  - c) seja ampliado para poder acolher desde fazendeiros em regiões remotas até imigrantes.
  - d) encoraje o debate internacional sobre reformas em sistemas de saúde mental.
  - e) determine políticas públicas de maior acesso a terapias mentais.
- 3** (FCMSCSP) No trecho do segundo parágrafo "... but **none** have gone nearly so far to provide unlimited access to talk therapies..." (ℓ. 9-10), a palavra em destaque é utilizada para referir-se a:
- a) mental health care systems.
  - b) popularity and limitations.
  - c) the Western world.
  - d) researchers and policy makers.
  - e) reforms to mental health care.

- 4** In the fragment "... *virtually open-ended talk therapy free of charge at clinics...*" (ℓ. 3-4), **free of charge** means that the therapy:
- has no cost.
  - needs to be paid.
  - is not going to develop anything.
  - is only for researchers.
  - has a very small price.
- 5** In the sentence "*The goal is to eventually create a system of primary care for mental health for all of Britain.*" (ℓ. 5-6), **goal** can be replaced by all the following, **EXCEPT**:
- target.
  - purpose.
  - scope.
  - fraud.
  - intention.
- 6** Na sentença "*At a time when many nations are debating large-scale reforms to mental health care, researchers and policy makers are looking hard at England's experience...*" (ℓ. 7-8), a expressão **looking hard at** significa que os legisladores estão:
- pegando pesado com a experiência britânica.
  - tendo dificuldades de entender a experiência da Inglaterra.
  - olhando a experiência inglesa de forma errônea.
  - olhando com afinco para a experiência da Inglaterra.
  - pedindo mais explicações sobre a experiência inglesa.
- 7** In the fragment "... *observing both its popularity and its limitations.*" (ℓ. 8-9), **both... and** brings the idea of:
- addition.
  - comparison.
  - exemplification.
  - consequence.
  - time.

Texto para as questões 8 a 10

Available at: <https://garfield.com/comic/2017/03/28>. Accessed on: October, 12<sup>th</sup>, 2017

- 8** (Faseh-MG) They have cereal for meals:
- because they are still bachelors.
  - because they love having the same kind of meal.
  - due to Jon's laziness.
  - because Jon does not know how to cook.
  - due to the lack of a dedicated girlfriend.

- 9** In the sentence from the last frame "*In fact, let's have cereal for dinner tonight, too.*", **In fact** could be replaced, with no change in meaning, by:
- a) Indeed. d) Hardly.  
b) Never. e) Ever.  
c) Sometimes.
- 10** In the sentence "*Jon may have a girlfriend now*" (last frame), **may** gives the idea of:
- a) duty. d) permission.  
b) deduction. e) possibility.  
c) obligation.

## How to Beat the Robots

Claire Cain Miller

@clairecm MARCH 7, 2017

1 Maybe the automation of jobs will eventually create new, better jobs. Maybe it will put us all out of work. But as we argue about this, work is changing.

Today's jobs – **white collar**, **blue collar** or no collar – require more education and interpersonal skills than those in the past. And many of the people \_\_\_\_\_ jobs have already been automated can't find new ones. Technology leads to economic growth, but the benefits aren't being **parceled out** equally. **Policy makers** have the challenge of helping workers share the gains.

That will take at least some government effort, just as it did when the United States moved from an agricultural economy to an industrial one, with policies like high school for all or workers' rights.

Whether there's political **will** for big changes remains to be seen, but here are some policies that economists and policy experts think could help now.

Disponível em: <https://www.nytimes.com/2017/03/07/upshot/how-to-beat-the-robots.html?ref=economy>.

Acesso em: 7 de março de 2017.

**white collar:** de colarinho branco (trabalhadores em escritórios)

**blue collar:** de colarinho azul (trabalhadores de fábricas)

**to parcel(ed) out:** dividir

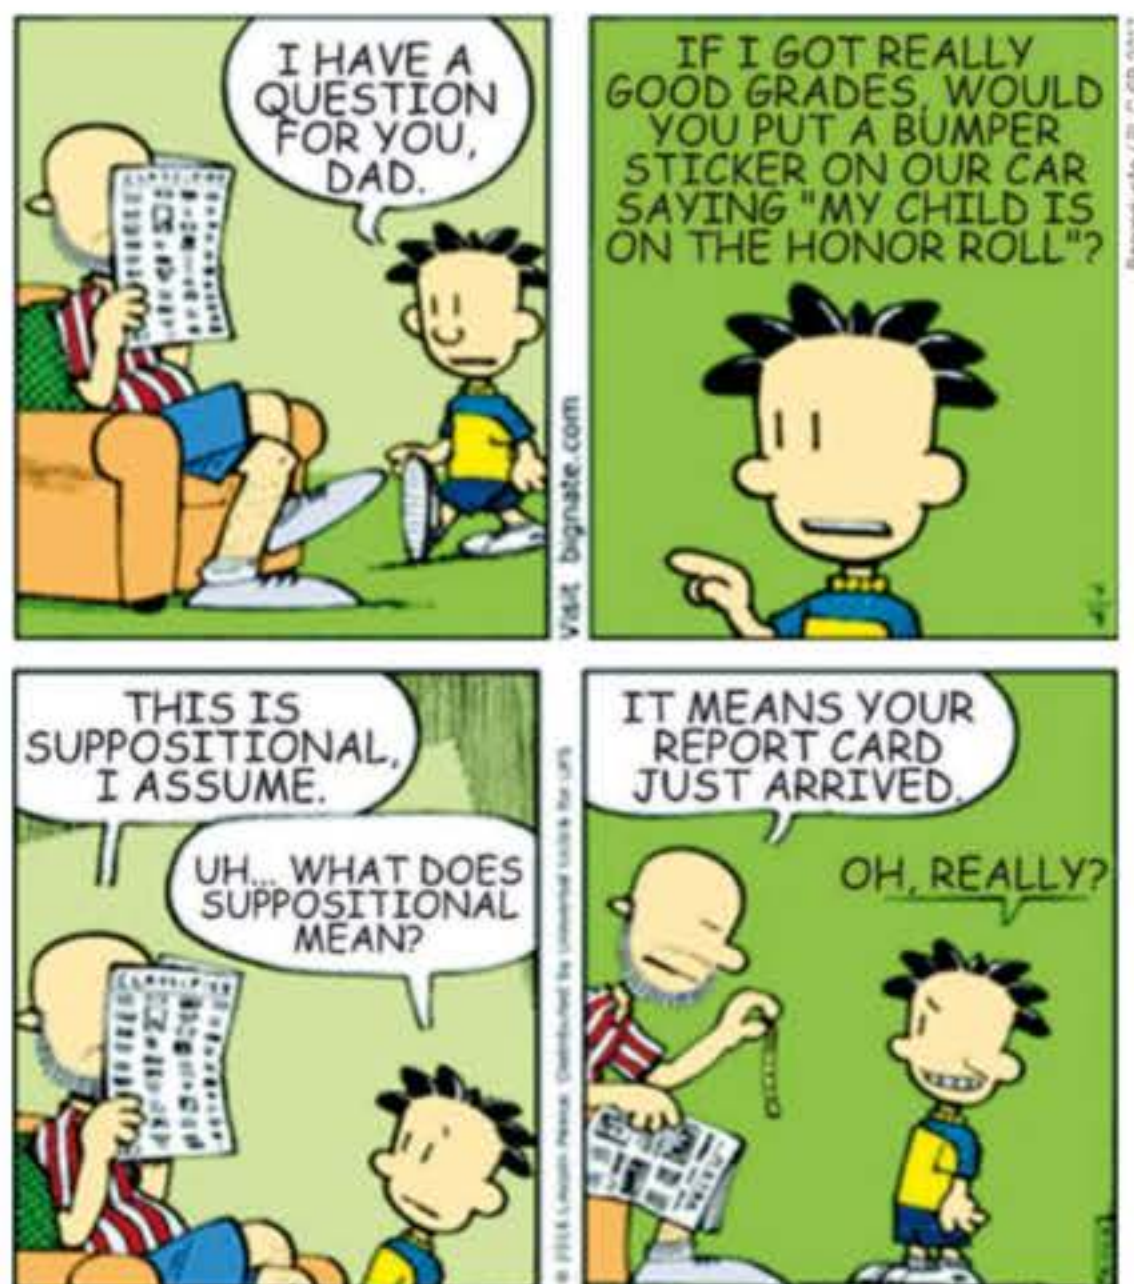

**policy maker:** formulador de políticas públicas (legislador)

**will:** vontade

- 11** The best alternative to complete the sentence: "And many of the people \_\_\_\_\_ jobs have already been automated can't find new ones." (ℓ. 4-5) is:
- a) that                                      c) whose                                      e) of whom  
b) who                                        d) whom
- 12** De acordo com o texto, por que podemos ficar sem emprego no futuro?
- a) Porque as empresas não terão capital suficiente para pagar todos os seus colaboradores.  
b) Porque o mundo todo está se transformando em uma economia industrial e o orçamento não permitirá tal mudança.  
c) Porque o trabalho das pessoas é melhor do que o dos robôs.  
d) Porque o mundo está mudando, mas a indústria continua a contratar pessoas em vez de robôs.  
e) Porque as máquinas podem substituir os seres humanos no mercado de trabalho.
- 13** (UniAtenas-MG) The text expresses one thing that can influence the development of the economy. What is it?
- a) Government.                                      c) Job.                                          e) Social equality.  
b) Technology.                                        d) Agriculture.

Texto para a questão 14

Acessado em 19/09/2016.

- 14** (PUC-SP) Observando-se a tirinha acima, depreende-se que:
- a) a pergunta no segundo quadro da tirinha mostra que o garoto é um bom aluno.
  - b) a fala do pai no último quadro mostra que a proposta do garoto não poderá ser atendida.
  - c) embora o pai não esperasse, as notas do garoto o surpreenderam positivamente.
  - d) se as notas do garoto tivessem sido boas, o pai teria certamente atendido seu pedido.

**malleable:** maleável  
**innate:** inata; natural  
**gentle pace:** ritmo suave  
**accurately:** com precisão

1 Many scientists suspect that exercise alters the biology of the brain in ways that make it more **malleable** and receptive to new information. But many questions have remained unanswered about movement and learning, including whether exercise is most beneficial before, during or after instruction and what types of exercise might be best.

5 Language learning is interesting. As young children, almost all of us picked up our first language easily. But by early adulthood, the brain generally begins to lose some of its **innate** language capability. As a result, for most of us, it becomes harder to learn a second language after childhood.

To see what effects exercise might have on this process, researchers in China and Italy recruited 40 college-age men and women who were trying to learn English. The researchers then divided the  
10 students into two groups. Those in one group would continue to learn English as they had before, basically while seated in vocabulary-memorization sessions. The others would supplement these sessions with exercise. Specifically, the students would ride exercise bikes at a **gentle pace** (about 60 percent of their maximum aerobic capacity) beginning 20 minutes before the start of the lessons and continuing throughout the 15 minutes of instruction.

15 All the students completed eight vocabulary sessions over the course of two months. At the end of each lesson, the students who had ridden bikes performed better on the subsequent vocabulary tests than did the students who remained seated. They also became more proficient at recognizing proper sentences than the sedentary students. And perhaps even most interesting, the gains in vocabulary and comprehension lasted longest for the cyclists. When students returned to the lab for a final round of  
20 testing a month after the lessons, the cyclists remembered words and understood them in sentences more **accurately** than did the students who had not moved.

This study involved college students performing relatively light exercise, and cannot tell us whether other people completing other types of exercise would achieve the same results.

<https://www.nytimes.com/2017/08/16/well/move/how-exercise-could-help-you-learn-a-new-language.html>

**15** (Unesp-SP) A pesquisa descrita no texto teve como objetivo:

- a) investigar as dificuldades compartilhadas por pessoas que tentam aprender inglês quando chegam à idade adulta.
- b) provar que o aprendizado de uma língua estrangeira é mais eficaz através da repetição de exercícios linguísticos.
- c) compreender a relação entre a prática de exercícios físicos e a aprendizagem de uma língua estrangeira.
- d) mostrar que o aprendizado de uma língua estrangeira deve ser visto como um desafio a ser vencido, e não como um teste.
- e) identificar possíveis diferenças entre aprender a língua materna na infância e uma segunda língua na idade adulta.

- 16** (Unesp-SP) No trecho do segundo parágrafo "**But** by early adulthood, the brain generally begins to lose some of its innate capability." (ℓ. 6), o termo em destaque introduz a ideia de:
- a) contraste.
  - b) consequência.
  - c) decorrência.
  - d) causa.
  - e) tempo.
- 17** (Unesp-SP) Ao descrever a pesquisa realizada, o terceiro parágrafo destaca que:
- a) os participantes eram estudantes universitários chineses e italianos.
  - b) cada sessão para a aprendizagem de inglês teve a duração de 20 minutos.
  - c) o exercício com bicicleta se estendia por 20 minutos após o término de cada aula.
  - d) os dois grupos de participantes receberam tarefas de memorização de vocabulário.
  - e) 60% dos participantes do experimento realizaram exercícios aeróbicos.
- 18** (Unesp-SP) O estudo conclui que:
- a) qualquer tipo de atividade esportiva pode potencialmente contribuir para uma melhor aprendizagem.
  - b) a aprendizagem de novas línguas na idade adulta pode ser facilitada quando acompanhada da prática de exercícios físicos.
  - c) a aprendizagem é um processo individual que depende do empenho de cada pessoa em buscar informação.
  - d) para algumas pessoas, se torna praticamente impossível aprender uma nova língua estrangeira na idade adulta.
  - e) não há relação comprovada entre capacidades linguísticas inatas e aprendizagem de línguas estrangeiras.
- 19** (Unesp-SP) No trecho do quarto parágrafo "**They** also became more proficient at recognizing proper sentences than the sedentary students." (ℓ. 17-18), o termo em destaque refere-se a:
- a) the students who remained seated during the lessons.
  - b) the more proficient students.
  - c) all the students who completed the vocabulary sessions.
  - d) the sedentary students.
  - e) the students who had ridden bikes while learning.
- 20** In the sentence from the third paragraph of the text, "*To see what effects exercise might have on this process...*" (ℓ. 8), **might** conveys the idea of:
- a) capacity.
  - b) possession.
  - c) ability.
  - d) duty.
  - e) possibility.
- 21** No fragmento do texto "*Those in one group would continue to learn English as they had before...*" (ℓ. 10), **Those** refere-se a:
- a) children.
  - b) effects.
  - c) researchers.
  - d) college-age men and women.
  - e) groups.

## Texto para as questões 22 e 23

Can you see a duck or a rabbit? Apparently this optical illusion says a lot about your creativity

Michael Morrow

Reprodução / Unesp, 2016

**This classic optical illusion says a lot about your brain, psychologists claim.**

More than 100 years after it was first created, this image is once again sparking a huge reaction after being shared on social media. Some see a rabbit and some see a duck, but some people can see both alternatively. The drawing first appeared in a German magazine in 1892 and was first used by American psychologist Joseph Jastrow soon after.

UK's Independent reports that Jastrow used the image to make the point that perception is not only what one sees but also a mental activity. Jastrow's research was based on how quickly one can see the second animal and how fast participants could change their perception of the drawing to switch between the two animals. His research suggests the quicker you can do this, the more creative you are.

This optical illusion is just one of many that have gone viral on social media over the past year.

(www.news.com.au. Adaptado.)

**22** (Unesp-SP) O que o psicólogo Joseph Jastrow pretendia comprovar com sua pesquisa?

**23** (Unesp-SP) No que sua pesquisa se baseou?

## Going Beyond 22 Cognitive Science

O texto a seguir mostra as tendências nas ciências cognitivas. Leia-o com atenção antes de iniciar os exercícios propostos.

### Trends in Cognitive Sciences

Intelligence has evolved many times independently among vertebrates. Primates, elephants and cetaceans are assumed to be more intelligent than "lower" mammals, the great apes and humans more than monkeys, and humans more than the great apes. Brain properties assumed to be relevant for intelligence are the (absolute or relative) size of the brain, cortex, prefrontal cortex and degree of encephalization. However, factors that correlate better with intelligence are the number of cortical neurons and conduction velocity, as the basis for information-processing capacity. Humans have more cortical neurons than other mammals, although only marginally more than whales and elephants. The outstanding intelligence of humans appears to result from a combination and enhancement of properties found in non-human primates, such as theory of mind, imitation and language, rather than from 'unique' properties.

ROTH, Gerhard; DÜCKE, Ursula. Trends in Cognitive Sciences. Science Direct. Available at: <www.sciencedirect.com/science/article/pii/S1364661305000823>. Accessed on: September 26<sup>th</sup>, 2018.

- 1 You know the exit is somewhere along this **stretch** of highway, but you have never taken it before and do not want to miss it. As you carefully scan the side of the road for the exit sign, numerous distractions intrude on your visual field: **billboards**, a **snazzy** convertible, a cell phone buzzing on the **dashboard**. How does your brain focus on the task at hand?
- 5 To answer this question, neuroscientists generally study the way the brain **strengthens** its response to what you are looking for – **jolting** itself with an especially large electrical pulse when you see it. Another mental trick may be just as important, according to a study published in April in the *Journal of Neuroscience*: the brain deliberately **weakens** its reaction to everything else so that the target seems more important in comparison.
- 10 Such research may eventually help scientists understand what is happening in the brains of people with attention problems, such as attention-deficit/hyperactivity **disorder**. And in a world increasingly permeated by distractions – a major contributor to traffic accidents – any insights into how the brain pays attention should get ours.

**stretch:** faixa; trecho  
**billboard:** outdoor  
**snazzy:** elegante  
**dashboard:** painel  
**to strengthen(ed):** fortalecer  
**to jolt(ed):** sacudir  
**to weaken(ed):** enfraquecer  
**disorder:** transtorno

Scientific American, July 2014. Adaptado

- 1** (Fuvest-SP) O foco principal do texto são as:
- várias distrações que se apresentam quando estamos dirigindo.
  - estratégias que nosso cérebro utiliza para se concentrar em uma tarefa.
  - informações que nosso campo visual precisa processar.
  - decisões que tomamos quando queremos usar um caminho novo.
  - várias tarefas que conseguimos realizar ao mesmo tempo.
- 2** (Fuvest-SP) De acordo com o texto, a pesquisa mencionada pode:
- colaborar para a compreensão de nossas atitudes frente a novas tarefas.
  - ajudar pessoas que possuem diversos distúrbios mentais, ainda pouco conhecidos.
  - ajudar pessoas que, normalmente, são muito distraídas e desorganizadas.
  - colaborar para a compreensão do modo como enxergamos o mundo.
  - colaborar para a compreensão do que ocorre no cérebro de pessoas com problemas de atenção.
- 3** (Fuvest-SP) Segundo estudo publicado no *Journal of Neuroscience*, mencionado no texto,
- nossa busca pela realização de tarefas diversas aumenta o número de pulsações elétricas produzidas pelo cérebro.
  - os neurocientistas estão estudando como, sem grande esforço, conseguimos focalizar uma coisa de cada vez.
  - as pulsações elétricas produzidas pelo cérebro são intensas e constantes.
  - nosso cérebro reduz sua reação a estímulos que são menos relevantes para a tarefa a ser realizada, mantendo o foco.
  - o tipo de resposta que nosso cérebro fornece frente a novas tarefas ainda é uma questão a ser respondida pelos pesquisadores.

- 4 No trecho "... *such as attention-deficit/hyperactivity disorder*." (l. 11), **such as** pode ser substituído, sem mudança de sentido, por:

a) like.                      b) how.                      c) unlike.                      d) for.                      e) since.

### Texto para as questões 5 a 7

**mindfulness:**  
consciência;  
plenitude mental  
**to rewire(d):**  
reconectar  
**to support(ed):**  
apoiar; sustentar  
**to rely(ied) on:**  
basear-se em  
**to randomize(d):**  
randomizar; selecionar  
de forma aleatória  
**thoroughness:**  
profundidade  
**awareness:**  
conscientização  
**to draw (drew;  
drawn):** retirar  
**residential retreat  
center:** centro de  
retiro residencial  
**sham:** falsa  
**stretching:**  
alongamento  
**to withstand  
(withstood):** suportar  
**to undergo  
(underwent;  
undergone):**  
submeter-se a  
**to reap(ed):** colher;  
obter

1 The benefits of **mindfulness** meditation, increasingly popular in recent years, are supposed to be many: reduced stress and risk for various diseases, improved well-being, a **rewired** brain. But the experimental bases to **support** these claims have been few. Supporters of the practice have **relied on** very small samples of unrepresentative subjects, like isolated Buddhist monks who spend hours meditating every day, or on studies that generally were not **randomized** and did not include placebo control groups.

5 This month, however, a study published in Biological Psychiatry brings scientific **thoroughness** to mindfulness meditation and for the first time shows that, unlike a placebo, it can change the brains of ordinary people and potentially improve their health.

To meditate mindfully demands "an open and receptive, nonjudgmental **awareness** of your present-moment experience," says J. David Creswell, who led the study and is an associate professor of psychology and the director of the Health and Human Performance Laboratory at Carnegie Mellon University. One difficulty of investigating meditation has been the placebo problem. In rigorous studies, some participants receive treatment while others get a placebo: They believe they are getting the same treatment when they are not. But people can usually tell if they are meditating. Dr. Creswell, working with scientists from a number of other universities, managed to fake mindfulness.

10 First they recruited 35 unemployed men and women who were seeking work and experiencing considerable stress. Blood was **drawn** and brain scans were given. Half the subjects were then taught formal mindfulness meditation at a **residential retreat center**; the rest completed a kind of **sham** mindfulness meditation that was focused on relaxation and distracting oneself from worries and stress.

20 "We had everyone do **stretching** exercises, for instance," Dr. Creswell says. The mindfulness group paid close attention to bodily sensations, including unpleasant ones. The relaxation group was encouraged to chatter and ignore their bodies, while their leader cracked jokes.

At the end of three days, the participants all told the researchers that they felt refreshed and better able to **withstand** the stress of unemployment. Yet follow-up brain scans showed differences in only those who **underwent** mindfulness meditation. There was more activity, or communication, among the portions of their brains that process stress-related reactions and other areas related to focus and calm. Four months later, those who had practiced mindfulness showed much lower levels in their blood of a marker of unhealthy inflammation than the relaxation group, even though few were still meditating.

25 Dr. Creswell and his colleagues believe that the changes in the brain contributed to the subsequent reduction in inflammation, although precisely how remains unknown. Also unclear is whether you need to spend three uninterrupted days of contemplation **to reap** the benefits. When it comes to how much mindfulness is needed to improve health, Dr. Creswell says, "we still have no idea about the ideal dose."

(Adapted from: <http://well.blogs.nytimes.com/2016/02/18/contemplationtherapy/>).

**5** (FCM-PB) According to the text, the most **suitable title** may be:

- a) Mindfulness meditation: the ultimate cure for human diseases.
- b) Meditation may harm the human brain.
- c) How meditation changes the brain and the body.
- d) Warning: meditation might impair the human brain.
- e) Meditation therapy will save you from the stress of unemployment.

**6** (FCM-PB) The conjunction **however** (2<sup>nd</sup> paragraph) may be replaced, without causing grammatical loss, by:

- a) Thus.
- b) Thereby.
- c) Subsequently.
- d) Hence.
- e) Nevertheless.

**7** (FCM-PB) Choose the appropriate *question-tag* for the following sentence adapted from the text:

*"Dr. Creswell and his colleagues believe that the changes in the brain contributed to the subsequent reduction in inflammation. \_\_\_\_\_?" (l. 29-30).*

- a) isn't he
- b) aren't they
- c) don't they
- d) do they
- e) is he

#### Texto para a questão 8

##### Zombie Neuroscience

- 1 I don't know if cockroaches dream, but I imagine if they do, jewel wasps feature prominently in their nightmares. These small, solitary tropical wasps are of little concern to us humans; after all, they don't manipulate our minds so
- 5 that they can serve us up as willing, living meals to their newborns, as they do to unsuspecting cockroaches. The story is simple, if grotesque: the female wasp controls the minds of the cockroaches she feeds to her offspring, taking away their sense of fear or will to escape their fate.
- 10 What turns a once healthy cockroach into a mindless zombie is venom. Not just any venom, either: a specific venom that acts like a drug, targeting the cockroach's brain.

(Adaptado de Christie Wilcox, *Zombie Neuroscience*, *Scientific American*, New York, v. 315, n. 2, p. 70-73.)

**8** (Unicamp-SP) De acordo com o autor,

- a) certas baratas conseguem escapar de ataques de vespas comportando-se como zumbis.
- b) baratas são capazes de ações predatórias que mal podemos imaginar.
- c) vespas fêmeas de uma certa espécie podem controlar a mente das baratas.
- d) uma barata pode inocular um veneno que transforma uma outra barata em um zumbi.

#### Texto para as questões 9 e 10

##### Are Twitter and Facebook Affecting How We Think?

*Is constant use of electronic gadgets reshaping our brains and making our thinking shallower?*

By Neil Tweedie

- 1 How many times do you click on your email icon in a day? Or look at Facebook, or Twitter? And how many times when reading on the internet do you click on a link navigating away from the text that was the original object
- 5 of your enquiry? The web, it seems, is like an electronic sweet shop, forever tempting us in different directions. But does this mental promiscuity, this tendency to flit around online, make us, well, thicker? Nicholas Carr, the American science writer, has mined this theme for his new
- 10 book, *The Shallows*, in which he argues that new media are not just changing our habits but our brains. It turns out that the mature human brain is not an immutable seat of personality and intellect but a changeable thing, subject to "neuroplasticity". When our activities alter, so does the
- 15 architecture of our brain. "I'm not thinking the way I used to think," writes Carr. "I feel it most strongly when I'm reading."

Disponível em: [www.telegraph.co.uk](http://www.telegraph.co.uk). Acesso em: 27 fev. 2012.

**9** (Enem) Neil Tweedie levanta vários questionamentos sobre a utilização de diferentes recursos tecnológicos disponíveis hoje em dia. A partir desses questionamentos e dos argumentos do escritor norte-americano Nicholas Carr, o texto sugere que:

- a) o ato de clicar em ícones e manusear aparelhos prejudica o comportamento.
- b) o mundo virtual pode ser nocivo aos jovens, por ser muito promíscuo.
- c) a internet contribui para o amadurecimento intelectual dos usuários.
- d) o uso intenso de recursos tecnológicos pode afetar nosso cérebro.
- e) as redes sociais virtuais ajudam a melhorar nossa forma de pensar.

**10** A sentença do último parágrafo do texto "*When our activities alter, so does the architecture of our brain.*" (l. 14-15) poderia ser reescrita da seguinte forma:

- a) When our activities alter, neither does the architecture of our brain.
- b) When our activities alter, the architecture of our brain does either.
- c) When our activities alter, the architecture of our brain doesn't either.
- d) When our activities alter, the architecture of our brain does too.
- e) When our activities alter, so doesn't the architecture of our brain.

## Exercícios

Texto para as questões 1 a 3

### Refugees in Germany

**cheering:** animadoras

**to greet(ed):**  
cumprimentar

**to file(d) off:**  
esvaziar; descer  
(do trem)

**stranded:** preso;  
parado

**to divert(ed):** desviar

**to ease(d):** aliviar

1 **Cheering** crowds **greeted** the new arrivals and handed out toys and chocolate as they **filed off** trains and into tents for basic medical checks.

They are then taken by bus to conference centres, school halls and other large spaces that have been pressed into service as temporary housing centres, part of a complex system for managing the influx set up almost overnight. Dieter Reiter said he was surprised at how effectively his city had responded to the crisis. The mayor said: "Of course there are some limits in response to the space we have in Munich but that is not the question I am asking myself".

5 "Every day I am asking myself how can we accommodate these people, these refugees, how can we give them a feeling that they are safe here in Munich, here in Germany. I am not really thinking about how many people can we afford and can we take here in Munich. That is not the question," he told journalists at a news conference.

On Saturday 6,780 people arrived in Munich on trains, many of them from the large group that had set off to walk from Budapest after days **stranded** at a train station in the Hungarian capital. After a long day's march, most were picked up by buses and taken to the border, but many arrived exhausted and ill. The city is expecting another 4,000 people to arrive on Sunday. The first 1,200 came in the early hours of the morning, but their trains were **diverted** straight away to other German cities, including Frankfurt, to **ease** the pressure on Munich.

There were so many well-wishers at Munich's station that police had to push back barricades to give those arriving more space, and volunteers were turning away people with clothes to donate away. Many of those at Munich station think maybe Germany should act as a role model for other nations and Robert Bogner, a Munich's citizen, says: "These people have left enough behind."

Disponível em: <<http://www.theguardian.com/world/2015/sep/06/munich-mayor-i-dont-think-about-numbers-only-refugees-safety>>. Acesso em: 04/10/2015, às 17h (adaptado).

- 1** (USF-SP) According to Munich's Mayor,
- a) he was surprised at how his city overreacted to the world crisis.
  - b) there isn't a space limit to host the refugees in Munich.
  - c) he is concerned about the refugees' welfare.
  - d) fewer than 10,000 refugees arrived over the weekend.
  - e) these people left a lot behind.

- 2** (USF-SP) According to the text, you can infer that:
- a) Germans can't handle the refugees at the moment.
  - b) only few Germans are willing to help the refugees.
  - c) Munich isn't prepared to receive as many refugees as they arrived.
  - d) many of those at Munich station are proud that their country is taking in people ignored by other countries.
  - e) Munich will be the only city in Germany hosting the refugees.

- 3** In the fragment "... but many arrived exhausted and ill." (ℓ. 14), **many** refers to:
- a) mayor.
  - b) trains.
  - c) schools.
  - d) refugees.
  - e) buses.

#### Texto para as questões 4 a 7

#### Mauritius: Gender Roles and Statuses

- 1** **Division of Labor by Gender.** The economic success of industry has led to low **unemployment rates**. This has changed the workplace and home life as women joined the workforce. This industrialization also led to women being promoted faster. According to the Minister of Women, Family **Welfare**, and Child Development, a quarter of all managers are now women.

- Women are the traditional homekeepers of the society. Between 1985 and 1991 the number of women working outside the home increased from 22 percent to 41 percent. With that **trend** continuing, hired housekeeping and child care have become relatively new and important industries.

- The Relative Status of Women and Men.** Historically, women have had subordinate roles in Mauritian society. However, the Constitution specifically prohibits discrimination based on sex, and women now have access to education, employment, and governmental services.

- In March 1998 the Domestic Violence Act was passed. This gave greater protection and legal authority to combat domestic abuse. In that same year it also became a crime

to abandon one's family or pregnant spouse for more than two months, not to pay food support, or to engage in **sexual harassment**.

- 25** Women are underrepresented in the government. The National Assembly has seventy seats, of which women hold five.

Disponível em: [www.everyculture.com](http://www.everyculture.com). Acesso em: 4 fev. 2013.

**unemployment rates:** taxas de desemprego  
**welfare:** bem-estar  
**trend:** tendência  
**sexual harassment:** assédio sexual

- 4** (Enem) Questões como o papel de homens e mulheres na sociedade contemporânea vêm sendo debatidas de diferentes pontos de vista, influenciados por valores culturais específicos de cada sociedade. No caso das Ilhas Maurício, esses valores sustentam a tomada de decisão em torno da:

- a) importância do reconhecimento da presença feminina na estrutura familiar.
- b) manutenção da igualdade entre homens e mulheres no trabalho.
- c) proteção legal da mulher contra atos discriminatórios.
- d) representatividade da mulher em cargos políticos.
- e) criação de auxílio à mulher abandonada pelo cônjuge.

- 5** According to the text, the economic success of industry has led to:

- a) high rates of employment.
- b) disparity between genres.
- c) family disruption.
- d) children in workforce.
- e) starvation.

- 6** In the sentence "However, the Constitution specifically prohibits discrimination based on sex, and women now have access to education, employment, and governmental services." (ℓ. 16-18), **however** could be replaced, with no change in meaning, by all the following, EXCEPT:

- a) Yet.
- b) But.
- c) In addition.
- d) Nevertheless.
- e) Nonetheless.

- 7** The last paragraph suggests that:

- a) the government should take care of women.
- b) there are very few women in the National Assembly.
- c) sexual harassment is taken seriously by the government.
- d) The National Assembly is represented by men only.
- e) Only one-fifth of the National Assembly is represented by women.

A man is truly ethical only when  
he obeys the compulsion to help  
all life which he is able to assist,  
and shrinks from injuring  
anything that lives

Albert Schweitzer

Disponível em: <www.azquotes.com/quote>. Acesso em: ago. 2017.

Reprodução / EBM-SP, 2016

**8** (EBMSP-BA) According to Albert Schweitzer, a truly ethical man:

- a) avoids assisting injured people.
- b) limits his help to humans only.
- c) tries to preserve any kind of life.
- d) recognizes his inability to save lives.
- e) thinks that causing injuries is unavoidable.

Texto para as questões 9 a 12

### Migrant or Refugee? There Is a Difference, With Legal Implications

1 In the first half of this year alone, at least 137,000 men, women and children crossed the Mediterranean Sea to reach the **shores** of Europe, according to the United Nations. Thousands are traveling across the Balkans now. However, are they refugees or migrants? Does it make any difference? In search for these answers, let's read the interview.

5 Q. Does it matter what you call them?

A. Yes. The terms "migrant" and "refugee" are sometimes used interchangeably, but there is a crucial legal difference between the two.

Q. Who is a refugee?

10 A. Briefly, a refugee is a person who has **fled** his or her country to escape war or persecution, and can prove it.

Q. What does the distinction mean for European countries?

15 A. Refugees are entitled to basic protections under the 1951 convention and other international **agreements**. Once in Europe, refugees can apply for political asylum or another protected status, sometimes temporary. By law, refugees cannot be sent back to countries where their lives would be in danger. "One of the most fundamental principles **laid down** in international law is that refugees should not be expelled or returned to situations where their life and freedom would be under **threat**," the refugee agency said in a statement on Thursday.

Q. Who is a migrant?

20 A. Anyone moving from one country to another is considered a migrant unless he or she is specifically fleeing war or persecution. Migrants may be fleeing **dire** poverty, or may be well-off and merely seeking better opportunities, or may be migrating to join relatives who have gone before them. There is an emerging debate about whether migrants fleeing their homes because of the effects of climate change – the desertification of the Sahel region, for example, or the **sinking** of coastal islands in Bangladesh – ought to be reclassified as refugees.

**shore:** litoral; praia  
**to flee (fled; fled):**  
fugir  
**agreement:** acordo  
**to lay (laid; laid)**  
**down:** colocar;  
estabelecer  
**threat:** ameaça  
**dire:** terrível, extremo  
**sinking:** afundamento

25 Q. Are migrants treated differently from refugees?

A. Countries are free to deport migrants who arrive without legal papers, which they cannot do with refugees under the 1951 convention. So it is not surprising that many politicians in Europe prefer to refer to everyone fleeing to the continent as migrants.

Disponível em: <[http://www.nytimes.com/2015/08/28/world/migrants-refugees-europe-syria.html?\\_r=0](http://www.nytimes.com/2015/08/28/world/migrants-refugees-europe-syria.html?_r=0)>. Acesso em: 15 set. 2015.

9 (UEG-GO) According to the text, the terms refugee and migrant:

- a) are used to refer to any people who leave their country in search for better opportunities.
- b) cannot be taken as synonyms since refugee does not have social and political aspects.
- c) are opposed to each other in economic contexts, but interchangeable in legal contexts.
- d) cannot be applied in the same sense without social and political implications.

10 (UEG-GO) The 1951 convention seeks to legally protect:

- a) migrants and refugees no matter if they have documents to prove their condition.
- b) migrants who are trying to escape situations of extreme poverty in their countries.
- c) refugees who call for political asylum in a new country due to threatening situations.
- d) refugees who have been expelled from countries where their lives were under threat.

11 In the sentence "... ought to be reclassified as refugees." (l. 24), **ought to** could be replaced, with no change in meaning, by:

- a) should.
- b) may.
- c) need.
- d) allows.
- e) can.

12 De acordo com as informações do texto, escreva em português a diferença entre migrante e refugiado.

Texto para as questões 13 e 14

(<http://keepthemiddleclassalive.com>. Adaptado.)

- 13** (Unesp-SP) Segundo a charge, o homem rico:
- considera que a divisão do bolo é desigual.
  - está feliz por poder compartilhar o bolo com os pobres.
  - deixou a maior parte do bolo para os pobres.
  - representa os 10% mais ricos, que detêm 50% da renda.
  - acredita que 90% da população pobre está satisfeita com sua parte do bolo.
- 14** (Unesp-SP) O trecho "*What are you, greedy?*" indica que o homem rico:
- desqualifica as reivindicações de 50% da população pobre.
  - não está disposto a abrir mão de sua parte.
  - convenceu os pobres de que 90% da renda é o suficiente.
  - percebeu as necessidades dos pobres.
  - está aberto a negociações.

#### Texto para as questões 15 a 17

### Gender Inequality Index (GII)

Gender inequality remains a major barrier to human development. Girls and women have made major **strides** since 1990, but they have not yet gained gender equity. The disadvantages facing women and girls are a major source of inequality. All too often, women and girls are discriminated against in health, education, political representation, and labour market – with negative repercussions for development of their capabilities and their freedom of choice.

The GII is an inequality index. It measures gender inequalities in three important aspects of human development – reproductive health, measured by maternal mortality **ratio** and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same **framework** as the IHDI (Inequality-adjusted Human Development Index) – to better expose differences in the distribution of **achievements** between women and men. It measures the human development costs of gender inequality, thus the higher the GII value the more disparities between females and males and the more loss to human development.

The GII **sheds** new **light** on the position of women in 155 countries; it **yields** insights in gender gaps in major areas of human development. The component indicators highlight areas in need of critical policy intervention and it stimulates proactive thinking and public policy to **overcome** systematic disadvantages of women.

(<http://hdrundp.org>. Adaptado.)

- 15** (Unesp-SP) Em termos de situação econômica, como a desigualdade de gênero se expressa e como é medida?
- 16** (Unesp-SP) Em que áreas há, geralmente, discriminação de mulheres e de meninas e quais são as suas consequências?
- 17** (Unesp-SP) Segundo o último parágrafo, para que serve o Índice de Desigualdade de Gênero (GII)?

**stride:** progresso; avanço.  
**ratio:** proporção  
**framework:** estrutura; quadro  
**achievement:** conquista  
**to shed (shed; shed)**  
**light:** lançar luz; destacar  
**to yield(ed):** fornecer  
**to overcome (overcame; overcome):** superar

## Going Beyond 23

### Big Issues: Bigotry; Prejudice

Os textos a seguir tratam da intolerância, tema ainda muito comum nos dias de hoje.

## Human Diversity in Education

**"It is often hard to learn from people who are just like you. Too much is taken for granted. Homogeneity is fine in a bottle of milk, but in the classroom it diminishes the curiosity that ignites discovery." – Vivian Gyssin Paley**

Reprodução / UEG, 2016

**to take (took; taken)**  
**for granted:** tomar como certo; não dar o devido valor a  
**to diminish(ed):** diminuir

<https://www.slideshare.net/oxblondieox98/human-diversity-in-education-11433320>. Acesso: 15 set. 2015.

- 1** (UEG-GO) According to the ideas expressed in the text,
  - a) there are many more learning possibilities in a heterogeneous school environment.
  - b) homogeneity in education is responsible for a more creative learning environment.
  - c) the amount of questions asked in a class measures the ignorance of the students.
  - d) educating people is similar to industrializing milk, so homogeneity is necessary.
- 2** O que o autor do texto quer dizer quando menciona "*Homogeneity is fine in a bottle of milk*"?
- 3** In the sentence "... people who are just like you.", **who** could be replaced, with no change in meaning, by:
  - a) whom.
  - b) which.
  - c) what.
  - d) that.
  - e) whose.

Texto para as questões 4 a 6

Nobel Peace Prize laureate Malala Yousafzai gestures inside a classroom at a school for Syrian refugee girls, July 12, 2015. (Reuters/Jamal Saidi)

Malala Yousafzai, the youngest winner of the Nobel Peace Prize, celebrated her 18<sup>th</sup> birthday in Lebanon on Sunday by opening a school for Syrian refugee girls and called on world leaders to invest in "books not bullets". Malala became a symbol of **defiance** after she was shot on a school bus in Pakistan in 2012 by the Taliban for **advocating** girls' rights to education. She continued campaigning and won the Nobel in 2014.

"I decided to be in Lebanon because I believe that the voices of the Syrian refugees need to be heard and they have been ignored for so long," Malala told Reuters in a schoolroom decorated with drawings of butterflies. The Malala Fund, a **non-profit organization** that supports local education projects, provided most of the funding for the school, **set up** by Lebanon's Kayany Foundation in the Bekaa Valley, close to the Syrian border. The Kayany Foundation, established by Syrian Nora Joumblatt in response to Syria's refugee crisis, has already completed three other new schools to give free education to Syrian children in Lebanon. The Malala school can welcome up to 200 girls aged 14 to 18.

"Today on my first day as an adult, **on behalf of** the world's children, I demand of leaders we must invest in books instead of bullets," Malala said in a speech. Lebanon is home to at least 1.2 million of the 4 million refugees that have fled Syria's war to neighboring countries. There are about 500,000 Syrian school-age children in Lebanon, but only a fifth are in formal education. "We are in danger of losing generations of young Syrian girls due to the lack of education," Joumblatt said in a speech at the opening of the school. "Desperate and displaced Syrians are increasingly seeing early marriage as a way to secure the social and financial future of their daughters. We need to provide an alternative: Keep young girls in school instead of being pressured into **wedlock**."

Lebanon, which allows informal settlements on land rented by refugees, says it can no longer **cope with** the influx from Syria's four-year conflict. More than one in four people living in Lebanon is a refugee. The United Nations says the number of Syrian refugees in neighboring countries is expected to reach 4.27 million by the end of the year. "In Lebanon as well as in Jordan, an increasing number of refugees are being turned back at the border," Malala said. "This is inhuman and this is **shameful**."

Her father Ziauddin said he was proud she was carrying on her activism into adulthood. "This is the mission we have taken for the last 8-9 years. A small moment for the education of girls in Swat Valley: it is **spreading** now all over the world," he said.

(www.reuters.com. Adaptado.)

- 4** (Unifesp) According to the text, Malala Yousafzai was shot because she:
- defends girls' rights to education.
  - was campaigning in a school bus.
  - is a Nobel Peace Prize laureate.
  - rejected Taliban books.
  - left Pakistan and went to Lebanon.
- 5** (Unifesp) Segundo o texto,
- há mais refugiados sírios no Líbano do que os quatro milhões na Jordânia.
  - mais de 25% dos moradores do Líbano são refugiados.
  - as fronteiras libanesas estão abertas aos sírios.
  - há 4,27 milhões de refugiados sírios no Líbano.
  - os refugiados podem se estabelecer no Líbano somente por quatro anos.
- 6** (Unifesp) On her 18<sup>th</sup> birthday, Malala:
- decided to live in Lebanon to help refugees establish schools.
  - talked to 200 welcoming girls aged 14 to 18.
  - celebrated in a school drawing butterflies with other girls.
  - visited three schools for refugees in Syria.
  - urged world leaders to invest in education and not in weapons.

### Rape Is a Tool of War Used by Migrants across Europe. So Why Is It Downplayed?

The New Year's Eve of 2016 will be remembered as a national tragedy for Germany, where sexual assaults were committed en masse. Despite the attempts at cover ups, it eventually came to light that 12 German towns and various other European cities were **set upon** in both pre-planned and spontaneous sex attacks.

Sadly, the attacks from New Year's Eve have only served as a warning of what was to come. Across Europe there are countless reports of women being sexually assaulted, molested in public pools, girls' bodies slashed for "not covering up", and more cases of "Taharrush" – a kind of **mob** sex attack that originated in Egypt. These events are no longer **outliers**, but are now daily occurrences according to both media reports and police records.

Rape is a very real tool of war and **yet** too often the perpetrators – of all backgrounds – are given a free pass. In fact, of the estimated 2,000 sex attackers in Cologne, there have been just 4 **convictions** reported in July this year. Less concerned about women's safety, authorities instead feared mostly for Islamophobia.

The Left seeks to welcome migrants **regardless** of how extreme their religio-political views, and yet refuses to hold frank dialogue on how exactly Western society will sustain egalitarianism in the face of **swelling** Islamic-fuelled misogyny. **Something has to give.**

Adapted from: McNALLY, Laura. <www.dailytelegraph.com.au>. Published: Aug. 15, 2016.

**to downplay(ed):** minimizar

**set (set; set) upon:** atacar

**mob:** multidão; turba

**outlier:** caso isolado

**yet:** no entanto

**conviction:** condenação

**regardless:** independentemente

**swelling:** crescente

**something has to give:** algo tem que ser sacrificado

**7** (Fepar-PR) Consider the sentences according to the text.

- ( ) Some of the sex attacks that took place in Germany and several other European cities had been previously planned.
- ( ) Taharrush is a gang-rape phenomenon that originated in Egypt.
- ( ) According to both media reports and police records, the attacks are exceptions; they have not been happening on a daily basis.
- ( ) Concerned about women's safety, authorities arrested 2000 sex attackers in Cologne.
- ( ) According to paragraph 4, Western society will certainly be able to sustain egalitarianism in the face of growing Islamic-fuelled misogyny.

17. A questão pede ao aluno que escreva um parágrafo em português, comparando a infância do candidato com a do autor do texto. Os pontos destacados da infância do autor do texto são os seguintes:

- Companhia constante de pessoas mais velhas;
- “Alma velha”, apesar de seu corpo pequenino;
- Trabalho de jardinagem com os avós;
- Aprendizagem de como contar dinheiro com um comerciante local;
- Histórias contadas por vizinhos idosos;
- Histórias contadas por sua tia.
